American Railroad Journal.

Saturday, June 15, 1867.

Stock Exchange and Money Market.

Money has been much more freely offered, since our last, and rates have worked in favor of borrowers. The governing figures up to Wednesday of the current week were the same as those given in our preceding weekly review. On Wednesday, call loans were quoted down from 6@7, to 5@6 per cent. on Government and other prime stock collaterals, and discount rates on choice to prime short date commercial paper, from 7@8½, to 6½@7½ per cent. per annum. At the reduced figures, the offerings of capital were quite liberal, and the demand for accommodation was less urgent, despite the increased activity at the Stock and Gold Boards, which should naturally call for the employment of increased amounts. The Government has been deriving a larger revenue from excises and customs. It has ceased being a seller of bond, and measurably, of coin; yet the cash balances in its vaults keep up to an unusually high figure. It has been semi officially stated that on Saturday last the United States Treasury held the largest amount of money ever held at any one time since the organization of the Government, to wit: $180,000,000, of which $102,000,000 were gold and $78,000,000 currency. This amount was reduced $10,000,000 on the 10th inst., by the maturing of the June compounds and interest, and on the 15th inst. it will be reduced $9,000,000 more by the payment of interest on the June Seven-thirties. The Treasury is now buying in as freely as they are offering, the maturing compound interest and Seven-thirty notes. Its purchases of these have exceeded a million and a half a day, for several days past. These purchases tend to unlock a large additional amount of currency, thus adding to the available supply of money in the open market. It is not making any further considerable drafts on the public depositories, and the banks thus designated, are not losing in their deposit or legal tender line, to any alarming extent. Confidence seems to have vastly increased in the immediate future of the market, and consequently, business appears to be improving again. Even in the dry good and produce lines, the reports of current operations are more encouraging. The city banks, last week, lost $5,655,808 of their deposits, and $2,536,720 of their legal tender reserve, while reducing their loans, $2,314,216, and their circulation, $27,951. Their specie reserve was increased $1,081,978. While the greenbacks in bank have fallen off $2,536,000, the *pro rata* of greenbacks and gold to deposits and circulation remains about the same as last Monday, to wit, 32½ per cent. The impression is general that the return of Monday is probably the last of the decidedly liquidating returns, and that the succeeding statement will show a gradual improvement in deposits and legal tender. The specie reserve of the banks is now $15,699,038, against $15,821,663 same time last year. The city bank deposits are now $184,730,335, against $202,503,949 week ending June 9, 1866. The legal tender reserve amounts to $55,923,107, against $74,828,674 same time last year. The circulation now stands at $33,719,088, against $25,967,253 same time last year. The loans are now $250,477,298, against $249,538,959 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $76,955,703 a day, against a daily average of $73,779,264 the preceding week, and $71,955,437 the week ending with May 25th. The current week's exchanges average $82,038,316 a day.

National Bank notes to the amount of $35,700 were issued last week, making the total issue to 1,671 banks thus far, as given in our last, $302,936,806, against $282,555,440 at the close of the last fiscal year, June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $4,834,627, leaving, with the existing 1,647 banks, (having an aggregate capital of $422,913,861,) an actual circulation at this date, of $298,102,179. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $340 596 500; and for the public deposits, $39,102,950—making a total of $379,699,450. The Treasury Department last week re-

deemed and destroyed $378,500 of worn and mutilated fractional currency, and issued $691,822 worth of new.

The U. S. Sub-Treasury receipts, week ending with June 8, were $18,876,740, including $1,789,-141 from customs duties; payments, $8,347,554; balance at the close of the week, $134,112,920, against $123,583,733, at the close of the preceding week, showing an increase of $10,529,187. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $1,465,816 and payments, $1,563,316; on Tuesday, receipts, $5,004,731; payments, $4,614,-518. The balance at the close of business on Tuesday stood at $134,405,663, against $126,-804,118 a week previous.

Government revenues have been much more liberal, especially in the line of excises, since our last. And the promise is of a steady increase in this particular, now that the annual taxes are payable. The excises, last week, yielded $5,450,-239, against $3,741,682 the preceding week; customs at the port of New York $1,789,141, and at the outports, about $600,000 (in coin) more, making the grand total income for the week equal about $8,736,489 in currency. The total receipts of the National Treasury, from excises, since July 1, 1866, have been about $255,000,000.

It is now confidently anticipated that the excises will yield twenty-five millions to the National Treasury, in June. Thus far in the month, they have added nearly ten millions to the public income, or an average of nearly a million for each business day.

Government received $2,775,768 from customs, through the port of San Francisco, from Jan. 1, to May 17, 1867.

From the recent improvement in the revenues, and modification of the estimates of the expenditures of the Government, it is now believed that by the end of the current fiscal year, fully $150,000,-000 will have been available, out of the income of the year, after paying off current claims, for the purpose of reducing the public indebtedness. This revised calculation would place the finances of the whole year as follows:

Revenues from all sources	$500,000,000
Expenses, including interest	350,000,000
To reduction of public debt	$150,000,000

Gold has been unusually steady, during the week, the range having been from 136½@137⅜, and the closing price 137⅛, on a tame but pretty firm market. The speculative demand has been quite moderate. The export inquiry has been less than was anticipated, especially for Wednesday's steamers. On Wednesday, the total shipments to Europe were $1,117,419 from this port. The total imports of specie from Europe, and other foreign ports since Jan. 1, 1867, have been $1,314,-626. The customs demand for Gold last week, averaged $298,190 a day; thus far, this week, it has been equal to $279,710 a day, or equal to a weekly aggregate of $1,678,260. The arrivals of specie from Europe, Havana and other foreign ports, during the past week were $258,053, and from California, $659,006. The total customs revenue of the Government, in coin, at this port since July 1, 1866, has been $116,782,903, against $126,-385,900 same time in the preceding fiscal year. The total receipts of California gold at this port since July 1, 1866, have been $37,300,596, against $28,230,736 same time last year, showing an increase this year, of $9,069,860. The exports of specie from this port, last week, were $2,216,-821. The total outflow of specie from the port, thus far in the current fiscal year has been $36,-859,481, against $49,565,459 same time in the preceding year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $555,-000, making the total coin interest disbursements through the Government office, since July 1, 1866, $53,570,310, against $45,673,696 for the same time in the preceding fiscal year. The specie exports from San Francisco, from Jan. 1, to May 17, reached $13,680,512, against $13,646,731 same time last year, showing an increase, in 1867, of $33,781.

A limited supply of choice foreign exchange has been available to buyers, this week, and as the demand has been somewhat brisker, rates have stiffened a fraction. Bankers' 60 day bills on London closed on Wednesday at 110@110⅛, and on Paris to 5.18¾@5.12½; sight bills on London to 110⅛@110⅝; and on Paris to 5.12½@5.10. The offerings of produce bills have been moderate, this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $3,829,587, making the total value of exports since July 1, 1866, $168,827,723, against $206,976,013 same time in the preceding fiscal year.

Government securities have been much more freely dealt in, since our last. The demand from investment buyers has been quite brisk, chiefly for the later issues of the Five-Twenty six per cent. coin-bearing bonds, which are improved in in price, closing quite buoyantly. A heavy conversion business has been recently transacted in Seven-Thirties, through the private banking houses, who exchange the new consolidated Five-Twenties of 1865 for the Seven-Thirties, on terms much more favorable to the holders of the notes, than those available at the Sub-Treasury, since the latter ceased to issue the bonds in exchange for the notes, with the July coupon attached to the bonds. The Treasury office, instead of giving the new bonds with the July coupon on, and charging the interest to date of conversion in currency, as heretofore, now announces that conversions at the Treasury Department will only be made by allowing interest on the Seven-Thirties to July 1st, and giving in exchange the new Five-Twenty, *with the July coupon off*. Puchase and sale at the market rates, is nearly 1 per cent. more advantageously to holders of the notes than direct conversions by the new method. The consequence of this is that the private banking houses have almost a monopoly of the business of conversion, through the exchanging process, as already mentioned. At the close the tendency of the market for the public funds is decidedly upward, on a brisk trade. U. S. sixes of 1867 closed buoyantly here on Wednesday at 134; U. S. sixes of 1868, at 136; U. S. sixes of 1881, 112⅛@112¾; U. S. Five-twenties of 1862, 110@110⅛; U. S. Five-twenties of 1865 at 106⅞@107⅛; U. S. Five-twenties of 1865, consolidated, 109¼@109⅜; U. S. Ten-forties at 99⅞@99⅛, and U. S. Seven-thirties at 105¾@106¼. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

June, 1864.....	119⅜	May, 1865	116¼
July, 1864.....	118⅞	August, 1865....	115¼
August, 1864....	118½	September, 1865..	114¾
October, 1864....	117½	October, 1865....	114¼
December, 1864..	116¾		

Through the Government Loan Agency nearly fifty-five millions of Seven-Thirties were retired, during the four months, ending with June 1. The total redemption of these notes by the Department, during the same period, amounted to $151,-746,000.

Intimations are given out that the August Seven-Thirty Treasury notes not presented for payment on or before August 15, will be treated as past due demands on the Treasury, and payment made for them in money. Up to the 1st instant the government showed an anxiety to have them funded. Now, the Secretary of the Treasury is so indifferent as to stop buying them and to fall back upon the simple funding operation; and the Assistant Treasurer in this city openly says that the amount is so small as to give no concern.

Railway and miscellaneous stocks have been in much better request, chiefly on speculative account, at firmer and buoyant prices. The renewed animation and buoyancy are due mainly to the growing ease in money, and the consequent increase of confidence is the stability of values, in the immediate future.

In general business, there has been more activity, but prices have been irregular. Breadstuffs and provisions have been generally depressed though there has been a slight rally in flour. Cotton has been in less demand at reduced rates, in consequence of the less favorable foreign advances; middling grades left off here on Wednesday very heavily at 26@28 cents per lb. as extremes. The stock of cotton now here is estimated at about 100,000 bales. The receipts at the port this week, have averaged about 450 bales a day. The receipts since the commencement of the current cotton year, Sept. 1, have been 581,000 bales, against exports of 404,024 bales. The receipts at all the shipping ports from September 1, to latest mail dates have been 1,771,000 bales against 1,906,600 bales same time last year; exports, 1,365,000 bales, against 1,486,300 bales same time last year; estimated stock at latest dates, 270,000 bales, against 323,000 bales same time last year. Foreign merchandise has attracted more attention. Dry goods of desirable styles bave been held with more firmness. The total imports of foreign dry goods, last week, were $1,-010,414, and the total amount marketed $956,268. The value of foreign merchandise imported last week, was $3,215,271—making the grand total specie value of last week's imports of dry goods and merchandise, $4,255,685, and since July 1, 1866, $244,764,619, against $278,722,919 same time in the preceding fiscal year. The ocean freight market has been moderately active and rates have advanced, since our last, with 525 vessels of all classes in port. For Liverpool we quote flour at 1s.@1s. 3d. per bbl.; grain at 2½d.@3½d. per bushel; cotton at $\frac{5}{32}$@$\frac{7}{32}$d. per lb.; and heavy goods at 10s.@20s. per ton, all by sailing vessel.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	May 29.	June 5.	June 12.
Consols	94	94½	95
U. S. 5-20's of 1862	72½	72¾	73
U. S. 5-20's of 1865	71	71	71½
Erie	40	40½	40
Ill. Central	76½	79¼	79

The New York exports, exclusive of specie, for the week ending June 11, and since the beginning of the year, compare as follows:

	1866.	1867.
For the week	$1,943,494	$3,829,587
Prev. reported	98,154,413	83,391,741
Since January 1	$100,097,907	$87,221,328

The New York imports for the week compare as follows:

	1866.	1867.
Dry goods	$611,374	$1 010,414
Gen. merchandise	2,119,385	3,215,271
Total for the week	$2,730,759	$4,225,685
Previously reported	133,907,962	109,605,902
Since January 1	$136,638,721	$113,831,587

The commerce of New York from July 1st to date compares as follows:

	1865–'66.	1866–'67.
Imports merchandise	$278,722,919	$244,764,619
Exports produce	206,976,043	168,827,728
Exports specie	49,565,459	36,859,481

The balance in the Sub-Treasury on Wednesday was $134,518,375 46.

Western Union Telegraph.

The following is an official statement of the business of the Western Union Telegraph Company from Jan 1, to April 30, 1867:

	Receipts.	Current Expenses.	Net Profit.
January	$580,560 53	$341,104 71	$239,455 82
February	483,441 77	314,617 26	168,824 51
March	530,642 66	297,076 59	233,566 07
April	545,586 30	320,869 41	224,716 89
Total	$2,140,231 26	$1,273,667 97	$866,563 20

Western (Mass.) Railroad.

At a meeting of the directors of this corporation, held at Boston on the 4th inst., it was decided to issue 20,000 new shares of the capital stock, to be distributed on and after the 10th of July to stockholders of record on the 8th inst., in the proportion of three new to ten old shares. No fractional shares will be issued, but rights to factions of a share may be assigned, convertible into stock on or before August 1st, after which time $30 will be paid for each right on the original shares not converted.

☞ The route for the projected railroad between Decatur, Ills., and East St. Louis is now being surveyed. At last accounts the engineers had reached Edwardsville, en route for Litchfield. Edwardsville is distant 16 miles from East St. Louis. The whole road will be about 100 miles in length. The President of the road, Hon. W. C. Shirley, says that it will be built immediately.

Railroad Earnings.—Weekly.

The earnings of the Grand Trunk Railway of Canada for the week ending May 18th, 1867, were $109,009 00
Corresponding week of previous year. 116,189 00

Decrease $7,180 00

The earnings of the Detroit and Milwaukee Railroad for the week ending June 6th, 1867, were $34,832 00
Corresponding week of 1866 ..... 30,277 00

Increase $4,555 00

The earnings of the Chicago and Rock Island Railroad for the 1st week in June, 1867, were $70,270 00
Corresponding week of previous year .. 96,019 00

Decrease $25,749 00

The earnings of the Michigan Southern and Northern Indiana Road for the 1st week in June, 1867, were $71,065 38
Corresponding week of 1866 ..... 81,518 32

Decrease $10,452 94

The earnings of the Western Union Railroad for the week ending June 7, 1867. ... $15,577 99
Corresponding week previous year 23,637 55

Decrease $8,059 56

The earnings of the Cleveland and Toledo Railroad for 1st week in June, 1867, were. $39,189 00
Corresponding week previous year 45,825 00

Decrease $6,636 00

The earnings of the Virginia and Tennessee Railroad for the fourth week of May, were $15,244, an increase of $2,317 on the same week last year. Total for the fiscal year commencing 1st of July, $665 763, an increase of $136,319 on same time of 1866.

Richmond and Petersburg Railroad.

The receipts of this road for the year ending September 30, 1866 were as follows:

From passengers	$79,293 60
" freight	55,186 36
" extra baggage and express.....	7,043 44
" mails	2,137 09
" miscellaneous sources	24,220 39
	$167,880 88

And the expenses were:

Repairs of road	$19,600 52	
" locomotives ...	10,849 49	
" cars	11,517 77	
" bridges	539 56	
" buildings, etc..	1,636 52	
" tools, etc	20 00	
Oil and waste	2,817 44	
Wood	13,525 82	
Train expenses	11,927 71	
Depot "	11,061 51	
Officers salaries	7 375 00	
Stationery etc	2,401 03	
		93,272 37
Leaving a net balance of		$74,608 51
Insurance on buildings.....	$1,435 38	
Tax account	4,577 36	
Loss and damage.....	503 19	
Through travel expenses ..	36 18	
Clover Hill transp. exp.	5,769 76	
Manchester and Petersburg turnpike	375 00	
Miscellaneous expenses	1,127 85	
		13,824 72
Balance of net income.....		$60,783 79

The cost of working the road being about 63 per cent. of the whole receipts, or $1.58 cents per mile.

The extraordinary expenses amount to $250,-421 25, divided as follows:

New engines	$41,691 70
" freight cars	1,876 00
Reconstruction of rolling stock and machinery injured by fire.....	84,608 48
Rebuilding James River bridge	118,245 07
Repairs of Falling Creek and Swift Creek bridges	4,000 00
Total	$250,421 25

Including the extraordinary expenditures, there is a deficiency of $189,637 46. The President in his report says:

During a portion of the year, the road-way and rolling stock were in an imperfect condition, and, until the 26th of May, we were deprived of the use of the bridge over the James River. The connecting roads south were in a similar, and in some cases, even in a worse situation for providing speedy and comfortable transportation. Other causes contributed to diminish the revenue which the road would otherwise have received; chiefly, the extraordinary failure of the crops in Virginia, the diminished quantity of coal sent to market by the Clover Hill Railroad Co., and the prevalence of the cholera as an epidemic for several months in this city. The mail pay, also, allowed the company, is only about one-third of what it was before the war, and about one-third of what is allowed the railroad companies north of Washington, for like service. Under so many unfavorable circumstances, it is a gratifying evidence of the substantial character of the business of this road, that the income is greater than it was in any year preceding the late war. Nearly every one of these drawbacks have ceased to exist; we caanot, therefore, but anticipate, with much confidence, an improvement in the earnings of the road for the future.

The Clover Hill Railroad Co. has within a few months past completed an extension of its road to Osborne's, on the James River. That company is also about to improve its machinery at the mines, so as to enlarge its operations. As those mines furnish the best gas producing coal found on the Atlantic coast, independent of its other valuable properties, and as the markets of the North are again opened to it, with increased facilities for shipment, it will doubtless soon regain the high reputation it enjoyed before the war, and find a ready sale for any quantity that can be raised.

A comparison of the operating expenses of the past fiscal year with those of several years preceding the war, if proper allowance be made for the depreciation of the existing currency, shows a degree of efficiency and economy on the part of our experienced Superintendent highly creditable to his management. As the bridges are all either entirely new, or have been thoroughly overhauled, and sound timber substituted for unsound, where necessary; the roadway in good condition, and the locomotives and other rolling stock in such order as, without accident, to require but few repairs, we have just grounds for believing that our ordinary expenses will for some time to come be very moderate.

The company chartered at the last session of the Legislature to construct a road connecting this road with that of the Richmond, Fredericksburg and Potomac Railroad Co., in this city, has progressed so far with its work that it is expected that trains will pass over it early in the ensuing year. As authorized by the charter of the Connection Co., the Richmond, Fredericksburg and Potomac Railroad Co. and this company have united in a lease of the property and franchises of the Connection Co. The Richmond, Fredericksburg and Potomac Railroad Co. to maintain and operate the Connecting Road, on terms set forth in the lease. That company and this to guarantee to the stockholders of the Connection Co. an annual rent until the two roads, or either of them, shall purchase, at valution the right, title, estate and franchises of the Connection Co., as provided for in its charter. By resolutions of the two Boards of Directors it was further understood, as between them, that during the existence of the lease the two companies are to prescribe rhe rates of fare and freight over the Connecting Road, and the permission for any other railroad to unite with it to require the assent of each of the two companies.

Application was made, in August last, to the Common Council of the city of Petersburg, to aid in getting up a similar connection, through that city, of the track of this road with that of the Petersburg Railroad Co., by opening books of subscription to the capital stock of the company, chartered also by the last Legislature for that purpose; but no answer was ever received to our application. Finding, however, that authority had been given to the Petersburg Railroad Co. to extend its road to the Appomattox River, application was made to the Council for permission to extend the track of our road so as to connect with that of the Petersburg Road on the south side of the river; and this permission was granted. Considering the importance of rendering the route through both Richmond and Petersburg as expeditious and comfortable as practicable, in order to secure the largest amount of the through travel and traffic, the Board of Directors ordered that portion of the connection which this company will have to make to be at once entered upon. The right of way has been purchased and the bridge commenced; the work is in charge of Mr. Gill, the Engineer and Superintendent of this road, and it is expected that it will be ready for use by the time the connection in Richmond is completed. A joint depot, the site of which has been secured, at the expense of the two companies, is to be erected at a suitable point on the south bank of the river, which will also admit of the other two roads which enter Petersburg uniting at the same point, so as to furnish a convenient and ready transfer of passengers and freight for all four roads.

The enterprising President of the Wilmington and Welden Railroad Co. is using every effort to construct a bridge across the Cape Fear River, at Wilmington; and the projected road between Washington City and Brooke's Station, on the Richmond, Fredericksburg and Potomac Railroad, is in course of construction. When these breaks in the line of continuous railway communication between Washington and Kingsville, South Carolina, are completed, this route will possess such advantages as will ensure to it the through travel and the mail and express transportation along the Atlantic coast. It will be still further assured against competition when (and it is boped at no distant day) the roads so long projected, and partially under way, between Raleigh and Cheraw, South Carolina, shall have been completed, and have shortened, as they will do, the distance between this city and Kingsville, South Carolina, not less than forty miles. When these links shall have been filled up, the passenger can start from New York and pass, without change of cars, to Charlotte, North Carolina, on the upper route, or to Wilmington, North Carolina, on the lower route.

In obedience to the resolutions adopted by the Stockholders at their last annual meeting, application was made to the General Assembly for authority to borrow one hundred and seventy-five thousand dollars, and to execute a deed of trust to secure the repayment of the loan. An act was accordingly passed, on the 12th of December, 1865, and which, having been accepted by the Board, as authorized by the Stockholders, the bonds of the company for the full amount were issued and readily disposed of. The proceeds have been applied to the rebuilding the superstructure of the James River Bridge and renewing the other permanent property of the company damaged or destroyed during the late war. This bridge is now considered by experts one of the most superior, as it is one of the most extensive of its kind in the Southern States.

From the report of the Superintendent we learn that the road was in good condition, the ditches had been cleaned out, and in many instances deepened, and the road-bed covered with gravel in the wet cuts. All defective or unsuitable iron in the track had been taken up, and about 250 tons of good iron laid in its place, 17,500 new cross-ties had been laid during the year, and the track leading into the coal yard at Richmond, which was destroyed by fire on the 3d of April, 1865, rebuilt.

The superstructure of the James River Bridge was completed, and the work accepted on the 26th day of May, 1866. It is a substantial and well built structure. It is built on the Howe plan, and is divided into nineteen spans. The bridge across Falling Creek and Swift Creek had been thoroughly overhauled and repaired, and all the unsound timber taken out and replaced by good materials. These had also been newly roofed, and strengthened by additional chords, braces and floor beams. The bridge at Roslin, which was in a decayed condition, had been taken down and a new one erected.

The workshops, storehouse and office and car sheds at Manchester, had all been completed, and supplied with full and ample machinery of the best description for the repair of engines and cars.

The old passenger car shed at Richmond had been altered and fitted up as a temporary freight depot. New water tanks had been constructed at Manchester, Chester and Port Walthall Junction, and the depot at Pocahontas repaired and put in good order.

The number of passengers carried southwardly was 24,696, of which 4,183 were through and 20,513 were local; total number carried northwardly, 24,529, of which 4,593 were through, and 19,936 local; number between Richmond, Petersburg and Clover Hill, 568—total number carried 49,793, equal to 989,027 carried one mile. Miles run by passenger trains 27,564; receipts per mile run by passenger trains 1.84 cents.

The total number tons of freight transported was 26,822; total tons transported one mile 726,780.

The number of miles run by locomotives with passenger trains, was, 27,564; with freight trains, 9,837; with extra trains, 96; with coal trains, 18,518; with material trains, 8,866; switching trains, 2,123—total miles run 67,004.

The company had 8 locomotives; 4 first-class passenger cars, in good order, and 1 in shops being built; 4 second-class passenger cars, 3 baggage and mail, and 2 express cars in good running order; and there were two passenger cars requiring extensive repairs; 19 freight cars in good order, and 6 requiring repairs; 13 platform cars in good condition and 4 laid up for repairs, 74 coal cars, of which 55 were in good condition.

The company had on hand 1,219 cords of wood; 2,164 cross-ties; 490 bars railroad iron, valued at $8,520, also iron castings and stores of various kinds, valued at $3,500.

On the 3d of September, 1865, the extension of the Clover Hill Railroad to Osborn's on James River, was completed, and the first train of coal went there on the 5th of that month. It was anticipated that this extension, terminating as it does at deep water on James River, and at an accessible point for large vessels, would greatly augment the coal business, and thereby keep the train steadily employed.

GENERAL STATEMENT.

Cost of road and property, including interest		$922,822 39
Less loss by fire, April 3d, 1865		254,318 30

Superintendent.—E. H. GILL.

Rights of Preferred Stockholders.

The question of the rights of preferred and debenture stockholders in railway corporations, though of great interest and affecting large investments of capital, is one to which even the shareholders themselves seem indifferent, probably from ignorance of these rights.

Year after year companies earn twice the amount of profits requisite to pay the stipulated percentage upon preferred stock, and yet so far from making such payment, either pass their dividends altogether or make them in stock worth perhaps from 50 to 60 cents on a dollar, thus withholding from 40 to 50 per cent. of the dividend due these shareholders. Indeed one corporation, the Chicago and Northwestern Railroad Company, which has earned and is earning profits enough to pay their preferred dividends with all arrears, has diverted these profits to new schemes, which, if in the interest of preferred shareholders, are not if we may judge from the present market value of the stock, as compared with its price when the profits were legitimately divided, at all appreciated by this class of stockholders. They, on the contrary, tamely submit to this arbitrary conduct of directors, without apparently so much as even inquiring as to their legal rights in the matter.

The object of this article is to consider these rights, and though Lord Cairns, in a recent English case (more particularly cited below,) regretted that the rights and liabilities of this class of stockholders were not better understood, and that "their legal operation and extent should come to be defined, not at the time when they have been given as security, but after difficulties have arisen as to their re-payment," yet we believe that as in the case before that eminent Judge, decisions of questions which may hereafter arise will be reached "without hesitation." Our own and English decisions, and the analogies of decisions enforcing the rights of ordinary stockholders will greatly facilitate the investigation.

A railroad corporation owes it to shareholders is not be guilty of breach of trust by misappropriation of funds, resulting in diminution of dividends and value of shares. (Pierce Am. R. R. Law, p. 508.) A reference to a few decisions will illustrate this principle; and though they are confined to the rights of ordinary stockholders, yet they are pertinent to the present inquiry; for preferred stockholders have of course all the rights of ordinary stockholders, and in addition some "preference." (Opinion Lord Chan. Cranworth in Henry *vs.* Gt. N. R. R. Co. (post.) In Stevens *vs.* Rut. and Burlington R. R. Co., 1 Am. Law Reg., 154, a bill was preferred before the Chancellor of the 3d Judicial District in Vermont, for an injunction against the defendants applying corporate funds or pledging credit to constructing an addition to their road, which though not provided for in their charter was authorized by subsequent legislative authority, assented to by a majority vote of the corporation, though not by the plaintiff. The application was granted.

We observe that the addition might have greatly benefitted the public; but the plaintiff could not be deprived against his will, of rights growing out of his contract with the company.

The same principle was maintained in Kean *vs.* John and Cent. R. R. Co., 1 Stock., Ch., 401 (New Jersey;) Chapman *vs.* Mad River and L. E. R.R., 5 Ohio State; Hester *vs.* Memp. and Charlest. R.R., 32 Miss., 378. Pierce Am. R. R. Law, p. 508, and in numerous other American cases, especially those of defences to calls upon stock subscriptions. An important English case, is:

Stevens *vs.* S. Devon R. R. Co., 13 Beav., 48. Here an ordinary shareholder restrained the defendants from applying their funds to the payment of the costs of an application to Parliament for permission to extend their road. The Court said that the present funds of the company consisted of money paid in and subscribed for purposes in which all the shareholders are interested according to the contract now subsisting between them and the company; which contract the company had no power to alter or modify.

If such then are the rights of ordinary stockholders, we are prepared to find that the rights of debenture and preferred stockholders are much greater, and that there are ample remedies for their protection and enforcement; that they are not only entitled to payment prior to ordinary stockholders, but that they are entitled to be and must be paid out of the *profits* of the company; and that upon failure to pay, they may restrain an

appropriation of profits to *any* other purpose, and have a receiver of them appointed.

Profits are well understood in railroad management in this country, to be the balance remaining after paying the operating expenses, interest on bonds, taxes, and the cost of *ordinary and necessary renewals.*

The system of preferred and debenture stock, originated in England, and has been borrowed in the consolidation and re-organization in late years of a number of our own railroads. It will aid us therefore to briefly consider the English statutes and decision, for upon them our system is based.

"The Companies Clauses Consolidation Act" of 1845, (8 and 9 Vict. Cap., 16,) applies to all joint stock companies, and provides for "borrowing money on bond and mortgage (§ 38)," that bond obligees shall be paid out of tolls, profits and effects without priority among themselves (§ 44); that interest due to them shall be paid in preference to dividends to shareholders (§ 48); and that they may sue in Superior Courts of Law or Equity, and have a receiver appointed, (§ 53.)

The act of 26 and 27 Vict., 118, cited as "Companies Clauses Acts, 1863," provides in part I. for raising additional capital on new ordinary shares and on preference shares (§ 13); and by § 14 that the preferred shares, shall be entitled to a preferential dividend or interest assigned thereto out of the profits of each year, in priority to ordinary shares.

Part III. of same statute relates to *debenture stock* and provides:

§ 22, That companies authorized to raise money on bond and mortgage, may do so by issuing stock called debenture stock, and may attach to it fixed and perpetual preferential interest which (§ 23) is a charge on the undertaking, and (§ 24) has priority of payment over all dividends, or interest, or any shares or stock of the company, whether ordinary, preference or guaranteed, which may be enforced § 25, 26, by appointment of receiver of the whole or competent part of the tolls, &c., and § 27 by a suit for arrears.

§ 35, provides that the word debenture when used in this part of the act, shall be held to include mortgage, preference stock, and funded debt.

The most recent decision under these statutes before referred to is that of Lord Cairns, Gardner *vs.* London, Chatham and Dover R. R. Co., &c., Law Rep. (Eq. Series,) Part 3, March 1, 1867, p. 201.

There were four different suits, the first three of which only are pertinent to our present inquiry. They were brought by holders of debentures, which assigned the several "undertakings," and all tolls or sums of money arising out of it, until the principal secured and ½ yearly interest were paid.—Principal sum due in 3 years from date. The plaintiffs filed bills praying an account of sums due from company for principal and interest, and for the appointment of a receiver of the tolls, &c., and a manager of the road. The Vice Chancellor appointed both a manager and receiver.

This is the appeal to the Lord Justices, and the appointment of a manager was set aside, but that of a receiver sustained; and thus the "tolls and sums of money *ejusdem generis*," made available to satisfy the plaintiffs claim. Sir G. J. Turner, assenting, says at p. 22: "It may be right to avoid any unnecessary alarm as to the safety of investments which have been made upon railway debentures, I should add that I see no reason to doubt the safety of the security whilst the company are carrying on the business to a profit. The debenture holders would have the first charge on the profits."

In Henry *vs.* Gt. North. R. R. Co., 27 Law J. (Chan.) 10. Lord Chancellor Cranworth said: "These statutes in fact guarantee to the favored shareholders a charge on all accruing profits at the stipulated rate, before anything is divided among the ordinary shareholders. This case is one substantially of interest chargeable on profits. We speak of *dividends* payable on £3 per cents, when we mean no more than an annuity of 3*l.* payable out of public revenue." *Held* in this case "that if on the declaration of a dividend the fund to be divided is insufficient to satisfy the claims of preference shareholders, they will be entitled to be paid in full out of all subsequent profits before the ordinary shareholders can receive anything."

The case of Sturge *vs.* Eastern Union R. R. Co., 31 Eng. L. & E., 406, held that holders of ordinary preferred shares (not debentures,) were entitled to payment in any year out of profits earned in that year, *and had a lien therefor.* See also Matthews *vs.* Gt. N. R. R. Co., 28 Law J., 375, Corry *vs.* Londonderry &c., R. R. Co., 29 Beavan, 263, and in this country Gifford *vs.* N. J. R.R. Co., 2 Stock. Ch., 171. These decisions and the principles they involve seem to establish the following conclusions:

(1) That preferred shares, if either expressly guaranteed or issued to take the place of mortgages or other liens, are of the nature of the technical English debentures, and the holders thereof have a lien for arrears as well as current dividends.

(2) That ordinary preferred shareholders have a lien on the profits of the road in any year in which such profits are earned, to the amount of the stipulated percentage.

(3) That such percentage is in the nature of interest due (like interest on a mortgage) for money invested.

(4) That corporations have no right to divert profits from the payment of this stipulated interest, and to apply them to new enterprises, or to paying the principal or interest of subsequently incurred obligations, before satisfying the dividends on preferred shares.

(5) That consequently the failure to pay the percentage in full by cash or its full equivalent, if equivalent profits are made is a breach of contract for which the stockholder has remedies in Law and Equity.

We cannot better close this article than in the words of the master of the rolls in the case of Brown *vs.* Monmouthshire R. R. and Canal Co., 13 Beavan, 32:

"It seems not to be sufficiently considered that a character for fairness and a willingness to meet objections, and facilitate the settlement of disputed questions on fit occasions, would contribute much more to the honor and credit of the companies and their agents, than a character for skill and adroitness in baffling investigation by unnecessary litigation and delay."

In the case of the Erie road, it is understood that a firm demand backed up by a manifest determination to appeal to the Courts, induced the directors to pay their preferred stockholders the full amount of the stipulated dividends, in cash, and such payment has been regularly continued ever since.

It may be said that the policy of preferred shareholders who are seeking only moderate but certain returns from their investments, is opposed to progress, and this may in some sense be true; but the conservative class who invest in preferred shares, would doubtless in most, if not in all cases, as in the recent arrangements between the different classes of stockholders of the Prairie du Chien Company, cheerfully give up all control of affairs to the common stockholders, provided their rights were fully assured and their lien put beyond question and declared by mortgages.

Chicago and Northwestern Railroad.

The earnings of this road for the fiscal years ending May 31, 1866 and 1867, were:

	1865–'6.	1866–'7.
Passenger	$3,003,180 33	$2,952,062 27
Freight	5,744,895 57	6,650,722 01
Express	187,852 44	344,231 49
Mail	84,264 77	121,725 43
Miscellaneous	66,503 02	84,921 92
Total	$9,086,646 13	$10,153,663 12

☞ Proposals will be received up to and including the 15th of June at the Engineers office in Bennington, Vt., and up to 12 o'clock, noon, of June 18th, at the office of the Harlem Railroad Co. in New York, for the construction of the Lebanon Springs Railroad from Chatham Four Corners, N. Y., to Bennington, Vt. Much of the work is heavy and of a desirable character, and will be let in large or small quantities.

☞ A number of gentlemen from the leading New England States, interested in the projected railroad from Portland connecting at Montpelier with the Vermont Central and Ogdensburg line. Visited Oswego on the 6th inst., for the purpose of seeing what connections could be made from from Oswego to Niagara river, and also what connections to the West. A meeting was held, and the project fully discussed. It is proposed to make such connections as will form an all rail route from Portland to the West.

☞ The earnings of the Michigan Central Railroad for the six months ending June 1, 1867, were $1,968,369, against $1,923,196 for the corresponding period of the previous year—an increase of $45,173.

OLD RAILS FOR SALE.

THE GRAND TRUNK RAILWAY COMPANY is prepared to deliver, during the present season of navigation, from FIVE to SIX THOUSAND TONS of OLD RAILS.

Parties desirous of purchasing the whole, or any part of these Rails, can obtain full particulars upon application to the undersigned.

Parties tendering will be required to state the price which they will give, and the places at which they will take delivery.

Delivery to be made on the frontier, the purchaser paying duties

PROPOSALS FOR WASHINGTON STREET TUNNEL.

OFFICE OF THE BOARD OF PUBLIC WORKS, CHICAGO, June 1, 1867.

Sealed Proposals will be received by the Board of Public Works, at their office, until 11 a. m. Saturday, June 22, for the construction of the Tunnel under the South Branch of Chicago river, at Washington street, according to plans and specifications on file at said office.

Proposals will also be received for constructing said work not only according to the plans and specifications filed here, but also in any other manner, the bidder to furnish his own plans and specifications.

Proposals must be addressed to the Board of Public Works, indorsed "Proposal for Washington street Tunnel," and be accompanied with the usual $200 bond, with sureties, to be approved by the Board.

The Board reserve the right to reject any bid not in accordance with the conditions of this advertisement, or to reject all bids, and no proposal will be accepted unless the party offering it shall give evidence satisfactory to the Board that he has the necessary skill, experience, energy, and ability for doing the work, is trustworthy, and has sufficient pecuniary resources.

J. G. GINDELE,
A. H. BURLEY,
J. McARTHUR,

SHIP FELT, CARPET FELT, BOILER FELT.

THE very superior Felt, manufactured by the Lowell Felting Mills, can now be furnished in quantities to suit purchasers, from the new and extensive mills now completed. Also, pipe, truss, upholstery and all other Felts. Apply to the branch office of the Company.

EDW. F. DAVISON, 128 Pearl St.

FOR SALE

3 LOCOMOTIVES,

4-81-2 GAUGE,

All thoroughly REBUILT by one of the best makers in the country, and ready for immediate use.

1—Cylinders 14x22, Link Motion, 4-56 in. Drivers connected, Copper Flues, Weight about 24 tons; 8 wheeled Tender, 1800 gallons.

This Engine has always worked admirably; Steams freely with dry or green wood, works and wears perfectly smooth; Well springed and brassed all around. Proportions every way suited to power. A good and stylish model, all in excellent order.

2—Cylinders 15x20, Link Motion, 4-56 in. Drivers connected, Copper Flues, weight about 23 tons, 8 wheeled tender, 1,800 gallons.

Is a smart smooth working Engine, suitable for any work; has a good record throughout.

3—Cylinders 15x20 Hook Motion, 4-66 in. Drivers connected, Copper Flues, weight about 24 tons; Tender, 8 wheeled.

Every way perfectly sound, well brassed and springed up. All in fine working condition.

These Engines will be sold VERY CHEAP to close a transaction, and are GREAT BARGAINS to any company wanting this sized Engine.

THE UNION PACIFIC RAIL ROAD CO.

Are now constructing a Railroad from

OMAHA, NEBRASKA,

westward towards the Pacific Ocean, making with its connections an unbroken line

ACROSS THE CONTINENT.

The Company now offer a limited amount of their

FIRST MORTGAGE BONDS

having thirty years to run, and bearing annual interest payable on the first day of January and July, in the City of New York, at the rate of

SIX PER CENT. IN GOLD,

AT

Ninety Cents on the Dollar.

This road was completed from Omaha 305 miles west on the 1st of January, 1867, and is fully equipped, and trains are regularly running over it. The Company has now on hand sufficient iron, ties, etc., to finish the remaining portion to the eastern base of the Rocky Mountains, 212 miles, which is under contract to be done September 1st of this year, and it is expected that the entire road will be in running order from Omaha to its western connection with the Central Pacific, now being rapidly built eastward from Sacramento, Cal., during 1870.

Means of the Company.

Estimating the distance to be built by the Union Pacific to be 1,565 miles, the United States Government issues it Six per cent. Thirty-year Bonds to the road as the road is finished at the average rate of about $28,350 per mile amounting to $44,308,000.

The Company is also permitted to issue its own First Mortgage Bonds to an equal amount, and at the same time, which BY SPECIAL ACT OF CONGRESS ARE MADE A FIRST MORTGAGE ON THE ENTIRE LINE, the bonds of the United States *being subordinate to them.*

The Government makes a donation of 12,800 acres of land to the mile, amounting to 20,032,000 acres, estimated to be worth $30,000,000, making the total resources, exclusive of the capital, $118,416,000; but the full value of the lands cannot now be realized.

The authorized Capital Stock of the Company is one hundred million dollars, of which five millions have already been paid in, and of which it is not supposed that more than twenty-five millions at most will be required.

The cost of the road is estimated by competent engineers to be about one hundred million dollars, exclusive of equipment.

Prospects for Business.

The railroad connection between Omaha and the East is now complete, and the earnings of the Union Pacific on the sections already finished for the month of May were $261,782. These sectional earnings as the road progresses will much more than pay the interest on the Company's bonds, and the through business over the only line of railroad between the Atlantic and Pacific must be immense.

Value and Security of the Bonds.

The Company respectfully submit, that the above statement of facts fully demonstrates the security of their Bonds, and as additional proof they would suggest that the Bonds now offered are less than ten million dollars on 517 miles of road, on which over twenty million dollars have already been expended;—on 330 miles of this road the cars are now running, and the remaining 187 miles are nearly completed.

At the present rate of premium on gold these bonds pay an annual interest on the present cost of

Nine Per Cent.,

and it is believed that on the completion of the road, like the Government Bonds, they will go above par. The Company intend to sell but a limited amount at the present low rate and retain the right to advance the price at their option.

Subscriptions will be received in New York by the CONTINENTAL NATIONAL BANK, No. 7 Nassau St., CLARK, DODGE & Co., BANKERS, 51 Wall St., JOHN J. CISCO & SON, BANKERS, No. 33 Wall St., and by BANKS AND BANKERS generally throughout the United States, of whom maps and descriptive pamphlets may be obtained. They will also be sent by mail from the Company's Office, No. 20 Nassau Street, New York, on application. Subscribers will select their own Agents in whom they have confidence, who alone will be responsible to them for the safe delivery of the bonds.

JOHN J. CISCO, *Treasurer,*
NEW YORK.

PLASTIC SLATE ROOFING

JOINT STOCK COMPANY.

OFFICE 157 (Room 19) BROADWAY,

NEW YORK.

W. C. POTTER, Vice Pres't.

PLASTIC SLATE

FOR

Roofing & Other Purposes.

The process of reconstructing Slate Stone from a disintegrated state was

PATENTED FEBRUARY 21ST, 1865.

It is a combination of

Pulverized Slate and Viscous Matter,

(the latter possessing qualities of geological and chemical affinity for the former,) and is a development of one of the simple but unalterable tendencies of nature.

As a Roofing Material it Stands Unrivalled.

A mastic—it adapts itself to every shape and slope. Non-combustible, impervious, non-expansive, and undecaying.

Frost does not Crack nor Heat Dissolve it.

The only roofing material ever discovered that will resist the action of the elements as long as the structure it protects. Being susceptible of little, if any wear, from exposure, and

Perfectly Fire-Proof,

It is unequalled as a coating for Railroad and Farm Buildings, Fences, Bridges, bottoms of Vessels, Vaults, etc.

New York, Saturday, June 22, 1867.

Monongahela Valley Railroad.

An adjourned meeting of the corporators of this road was held at Elizabeth on the 30th ult. Dr. J. S. Van Voorhis, President, in the chair. After the reading of the minutes of the previous meeting held at Pittsburg on the 9th of May, and the Act of Assembly incorporating the company, the following preamble and resolutions were read and unanimously adopted:

WHEREAS, The corporators named in the Act of Assembly incorporating the Monongahela Valley Railroad Company are about to open books of subscription to the capital stock; and, whereas, a certain amount of the stock, according to the terms of the charter, must be subscribed before an organization of the company can be effected; and, whereas, the early completion of said road is of the utmost importance to the interest of the citizens of the Valley, Therefore, be it

Resolved, That we most cordially approve of the project of a railroad along the Monongahela Valley, and that we pledge it our undivided support, and that we will aid, by all lawful and honorable means, the organization of the company and the completion of the road.

Resolved, That inasmuch as it is necessary to have subscribed at least $160,000 before an organization of the company is perfected, this sum be apportioned among the different cities and towns along the river, as follows, viz: Pittsburg, $80,000; Birmingham, $20,000; McKeesport, $10,000; Elizabeth, $6,000; Limetown, $1,000; Monongahela City, $8,000; Webster, $2,000; Bellevernon, $3,000; Cookstown, $4,000; California and Greenfield, $6,000; Bloomfield, $15,000; Frederickstown and Millsborough, $1,000; Rice's Landing, $1,000; New Geneva and Greensburg, $3,000, and that it be recommenned to each place to secure their assessed amount at as early a day as possible, and that we recommend the corporators to give public notice of the time when they will visit the respective towns to receive the amount above mentioned.

Resolved, That a committee of three be appointed to confer with the proper authorities of the different railroads leading into the city of Pittsburg, and solicit their aid and influence in behalf of our enterprise.

The Act of Assembly authorizes the formation of a company to construct a railroad from a point at or near the city of Pittsburg to Waynesburg, in Greene Co., by way of the Monongahela River, diverging from the River at Rice's Landing. The capital stock of the company shall not exceed $20,000 per mile of road, as the same may be constructed and equipped. The company may borrow money and issue bonds to any amount not exceeding the amount of capital stock actually paid in. In reference to the cost of the road, a letter from Hon. B. H. Latrobe, of Baltimore, written in reply to an invitation to be present was presented and read. The following is an extract:

It will not be in my power to attend your meeting at Elizabeth, on the 30th, but you have my best wishes for your success in organizing the "Monongahela Valley Railroad Company." As you desire my views of the enterprise, I will suggest unhesitatingly that I consider it entirely feasible, and of the utmost importance to your valley. The survey made under my direction in 1837, was on the west bank of the river, but I presume that you would prefer the east bank for connection with the Connellsville road, which would save you fourteen miles of expensive road to build. My estimate of the cost of the whole distance, of 53 miles, from Brownsville to Pittsburg, was $748,844 for gradation, masonry and bridging; that is for the road bed ready for the rails. For the 39 miles, to a point opposite McKeesport, it was about $460,000. This was for a *double track* road bed, but in view of the increased prices prevailing, it would require at least as much for a single track road bed at this time. There would be no material difference in cost of road bed on the two sides of the river, I judge. The cost of track would depend on weight of rail, but with a fifty pound rail might, I suppose, be laid for $11,000 per mile. This, added to the cost of grading, &c., would make the cost from Brownsville to Pittsburg, on the west side, $1,331,844, and from Brownsville to McKeesport, on the east side, say $892,000. To this last we must add the cost of a bridge over the Youghiogheny at its mouth, say $50,000, making the total from Brownsville to McKeesport $939,000. Adding again for right of way, (suppose this to be mostly given,) depots, engines and contingencies 10 per cent., on each of the above amounts they would compare thus: $1,465,028 from Brownsville to Pittsburg, and $1,032,900 from Brownsville to McKeesport. These estimates you will observe are but approximate, but I think with due economy should build the road. I would rather rely on those of the road to McKeesport than those to Pittsburg, as the *approaches to the latter city* would be much more costly than estimated thirty years ago.

The Chairman, in his remarks stated that the probable distance from Pittsburg to Waynesburg is 80 miles. The cost per mile, therefore is $27,662 22; or the distance from Pittsburg to the State line of West Virginia being 87 miles, the whole cost would be $2,406,612 14. According to the terms of the charter bonds to the amount of $7,662 22 per mile only will be required to be issued, while the road prepared for the rails would be a sure basis for bonds of a much larger amount.

The amount of capital stock authorized is $20,000 per mile for 80 miles, making $1,600,000, ten per cent. of which, or $160,000, according to the railroad law of 1849, is required to be subscribed, and five per cent. paid in before the company can be organized. An elaborate review was also presented by the Chairmain of the resources of the valley, and the inducements it offers to capitalists for investment.

After which, and the delivery of addresses by several gentlemen who were present, and the appointment of a committee in accordance with the resolutions, the meeting adjourned to meet again at Brownsville on the 13th inst.

Macon and Brunswick Railroad.

The Augusta *Chronicle* says that the President of this road has succeeded in making arrangements with persons at the North which will secure the completion of the road in a very short time. The road is already finished and the cars running over it daily from Macon to Hawkinsville, some 53 miles. The grading is also finished on the

lower end of the line from Brunswick to the "Initial Point" on the Savannah and Gulf Road, some 47 miles from Brunswick. The intermediate portion of the line has been located, and some progress made in the work of grading and grubbing.

Central Railroad of New Jersey.

The Directors of the Central Railroad Company of New Jersey present to the stockholders the following report, for the year ending December 31st, 1866. For convenience of comparison, many of the statements are made to cover the year 1865, as well as the past year.

SERVICE OF THE ROAD AND FERRY.

The service of the road has been as follows:

	1866.	1865.
Miles run by passenger trains.	448,545	431,334
" merchandise "	292,110	230,361
" coal trains	494,160	393,693
Total by transportat'n trains.	1,234,815	1,055,388
Miles run by wood trains	2,100	3,100
" gravel and constr'ct'n trains	138,110	129,490
Total miles run by trains	1,375,025	1,187,978

During the year the ferry boats have made 12,717 trips between New York and Jersey City, 1,684 round trips between New York and Elizabethport, and 7,536 miles in carrying live stock and on excursions; making a service of 40,461 miles. In 1865 they ran 47,072 miles.

PASSENGERS, COAL AND FREIGHT.

A comparison of the passenger-business of the year 1866 with the year 1865 gives the following results:

	1866.	1865.
Number of passengers	1,083,592	928,806
Miles traveled by pass	25,866,378	23,831,715
Equal to through pass'ng'rs	344,885	319,889

A comparison of the merchandise business of the two years, in tons of 2,000 lbs., (excluding iron,) gives the following results:

	1866.	1865.
Number of tons carried	434,002	317,181
Tons carried one mile	24,045,007	17,338,585
Equal to through tonnage.	320,067	231,181

A comparison of the iron tonnage of the two years, in tons of 2,240 pounds, gives the following results:

	1866.	1865.
Number of tons carried	103,008	75,469
Tons carried one mile	6,592,512	4,830,016
Equal to through tonnage.	103,008	75,469

A comparison of the coal business of the two years, in tons of 2,240 pounds, gives the following results, the through tonnage being calculated from Easton to Elizabethport:

	1866.	1865.
Number of tons carried	1,289,249	1,004,506
Tons carried one mile	69,421,516	55,683,624
Equal to through tonnage.	1,084,711	870,057

There was an increase in Lackawanna coal of 283,486 tons, and in Lehigh coal of 1,257 tons.

The coal tonnage over the road since the transportation of coal was commenced, has been as follows:

	Lackawanna. Tons.	Lehigh. Tons.	Total. Tons.
1856	98,670	33,325	131,995
1857	209,950	84,841	294,791
1858	417,726	122,923	540,649
1859	455,681	183,277	638,958
1860	590,863	263,906	854,769
1861	568,869	254,345	823,214
1862	502,375	314,195	816,570
1863	613,954	435,927	1,049,881
1864	675,743	474,221	1,149,964
1865	494,687	509,819	1,004,506
1866	778,173	511,076	1,289,249
Total	5,406,691	3,187,855	8,594,546

EQUIPMENT.

The company own 83 engines, of which 18 burn wood or soft coal, and 65 hard coal. Of these engines 71 are narrow gauge and 12 broad gauge. Their condition is reported to be as follows: 51 in good order, 20 in fair order, 9 wanting general repairs, 2 in shop rebuilding, and one not in use. Eighteen new locomotives have been placed on the road during the year, and 7 more are ordered but not yet delivered. About 50 engines are required for the ordinary daily service.

The equipment of cars is as follows: 52 first class passenger cars, 6 second class passenger cars, 6 first class smoking cars, 12 baggage and mail cars, 2 express cars, 106 eight-wheel house freight cars, 40 four wheel house freight cars, 20 eight-wheel cattle cars, 153 eight wheel platform cars, 133 six-wheel platform cars, 15 six-wheel lime cars, 806 eight-wheel coal cars, 109 four-wheel coal cars, 142 four-wheel dirt cars, 4 eight-wheel caboose cars, 17 four-wheel caboose cars, 10 eight-wheel gondola cars, and 2 wrecking cars.

Large additions have been made during the year, as will appear by a comparison with last year's report.

TRANSPORTATION ACCOUNT.

The following is a statement of the ordinary receipts and expenses for the year 1866 compared with 1865:

	1866.	1865.
Receipts:		
Passengers	$762,479 56	$688,774 05
Merchandise	1,099,239 13	898,287 32
Coal	1,619,744 24	1,388,492 82
Mail	10,183 33	7,600 00
Express	42,147 31	32,803 49
Rents	27,119 50	8,361 48
Miscellaneous	20,340 21	12,070 73
Total receipts	$3,581,244 28	$3,036,389 89
Expenses:		
Running expenses	$425,850 94	$356,788 25
Wood consumed	69,938 70	90,746 71
Coal consumed	244,026 98	259,238 66
Repairs of road	314,461 77	249,074 01
Repairs of engines	176,565 28	155,312 89
Repairs pass'nger cars.	38,287 99	37,131 86
Repairs freight cars	50,316 46	44,303 83
Repairs coal cars	53,511 47	33,342 31
Repairs docks, Elizabethport	23,237 90	24,440 55
Repairs b'ld'gs, bridges	66,915 27	48,314 02
Repairs tools, mach'ry	33,152 01	25,813 14
Expense account	86,700 03	49,041 18
Miscellaneous expenses	124,734 01	56,602 38
Ferry running expenses	118,270 05	108,258 30
Ferry boat repairs	40,312 08	45,522 14
Ferry miscel. expenses	11,869 82	24,918 66
Car service	85,824 93	139,584 83
Total expenses	$1,963,975 69	$1,748,433 72
Balance net earnings.	$1,617,268 59	$1,287,956 17

The following table shows the receipts, expenses and net earnings from the beginning of the annual reports to the Legislature, to the present time:

	Receipts.	Expenses.	Net Earnings.
1853.	$349,018	$197,629	$151,389, or 43 p.c.
1854.	378,145	197,349	180,796, or 48 "
1855.	398,729	208,856	184,873, or 47 "
1856.	553,479	258,308	295,171, or 53 "
1857.	682,314	340,502	341,812, or 51 "
1858.	836,934	345,614	491,320, or 58 "
1859.	971,702	385,716	585,986, or 61 "
1860.	1,185,848	475,457	710,391, or 60 "
1861.	1,201,895	522,452	679,443, or 57 "
1862.	1,397,586	623,245	774,341, or 56 "
1863.	1,941,976	814,732	1,127,244, or 58 "
1864.	2,587,185	1,231,554	1,305,631, or 51 "
1865.	3,036,390	1,748,434	1,287,956, or 43 "
1866.	3,581,244	1,963,976	1,617,268, or 45 "
Tot.	$19,047,445	$9,313,824	$9,733,621, or 51 p.c.

An increase in receipts is here shown of $544,854 39, or 18 per cent. The increase in passenger receipts was $73,696 51, or 11 per cent.; in merchandise receipts, $200,951 81, or 22 per cent.; in coal receipts, $231,251 42, or 16 per cent.

The expenses show an increase of $265,541 97, or 12 per cent. There has been an increase in running expenses of $69,062 69; in repairs of road of $65,387 76; in repairs of equipment of $548,590 31; in other repairs of $24,737 47; in general expenses of $105,790 48. There has been a decrease in fuel consumed of $36,019 69; in ferry accounts of $8,247 15, and in car service of $53,759 90.

The gross receipts per mile run have been as follows: From passenger trains, $1.70, against $1.73 in 1865; from merchandise trains, $3.76, against $3.88; from coal trains, $3.28, against $3.52. The average receipts per mile run from all trains has been $2.90, against $2.87 the previous year.

The gross expenses per mile run have been $1.59, against $1.66 the previous year.

FINANCIAL CONDITION.

The following is a statement of the financial operations during the year:

Gross earnings, as per statement		$3,581,244 28
Capital instalments paid on new stock	$2,314,060	
Less first mortgage bonds paid off	9,000	
		2,305,060 00
Property transferred to American Dock and Improvement Company		707,356 09
Total		$6,593,660 37
Ordinary expenses, as per statement.		$1,963,975 69
Grading, second track, extension, etc.		174,385 72
Masonry		99,268 68
Railway superstructure		285,012 10
Bridge superstructure		37,636 82
Engineering		13,168 15
Land damage		77,876 93
Ferry boats		74,201 52
Station houses		74,684 35
Port Johnston coal wharf		131,365 46
Docks in New York		42,949 77
Engines		287,482 26
Passenger cars		32,433 59
Freight cars		97,617 04
Coal cars		364,436 63
Lands, machinery, miscel. property, increase		529,625 39
Sundry accounts, material, etc., increase		154,524 42
Quarterly dividends for year, 10 per cent		1,146,483 76
Interest account for year		215,784 00
State taxes for year		36,998 40
United States taxes		111,147 81
Cash and accounts receivable, increase		642,601 88
Total		$6,593,660 37

The profit and loss account has been credited.

Gross earnings		$3,581,244 28
It has been debited as follows:		
Ordinary expenses	$1,963,975 69	
Interest account	215,784 00	
Taxes to State	36,998 40	
United States taxes	111,147 81	
Dividends, 10 per cent.	1,146,483 76	
		3,474,389 66
Balance		$106,854 62

This balance has been appropriated to the reduction of the various property accounts, to make the purchases during the year correspond with the inventories. Large expenditures for personal property have also been included in the current expense accounts with the same object.

The balance of surplus profits, therefore, remains $628,159 26, as at the close of the previous two years.

The increase in the construction accounts of the railroad and appendages, after allowing for the

cost of filling and bulkheads refunded by the American Dock and Improvement Company, has been	$308,400 60
Increase in equipment accounts, after deducting for depreciation	680,827 45
Increase in all other property acc'nts.	678,942 62
Increase in cash and accounts receivable	381,196 61
Total	$2,049,367 28

This corresponds with the increase in capital stock, less the reduction in bonded debt and accounts payable.

The cost of the railroad, doubled tracked, with its coal wharves, station houses, shops, and other appendages, stands at $7,708,079 64, and that of the equipment at $1,964,600.

CONSTRUCTION.

A steady progress in the construction and completion of the various improvements undertaken has been made during the past year. The North Branch bridge has been rebuilt. The filling up of the Bloomsbury bridge is advancing rapidly. The Springtown bridge, like the high bridge, is a thing of the past, and the tracks in place on the embankment. The Lopatcong stone viaduct is built to the spring of the arches. At Phillipsburg, superior dumps and pockets have been provided, on an extensive scale, for coaling the engines; the new engine houses occupied, and the tracks and other facilities for economical management of the business much increased.

Though the second track is now in use over the entire road, yet it has been found necessary to commence work at certain points for the third track. This will first be laid between Jersey City and Elizabeth, where the trains are the most numerous, and the complication of business the greatest; where also the grading is already done and much of the track laid. Several miles are also urgently required between New Market and Bound Brook, as a passing place for trains, and have been put under contract. This is all that is likely to be necessary the present season.

One of the large piers at Jersey City has been covered with a building to facilitate the transfer of freight coming or going by water. Additional buildings and several miles of track have been added at the same place, and many acres of land prepared for business. All the cuts on the extension, except the Bayonne cut, have been taken out to their full width for four tracks, and the banks have been filled out to the same width. Much of the earth excavated has been taken to Jersey City, much used in filling up the approaches to Port Johnston, and the balance advantageously employed at other points. The Bayonne cut will be finished during the season.

Station houses have been built at Greenville and Bayonne.

But little important work is now on hand, and the expenditures, in construction, the coming year will not be large.

PORT JOHNSTON.

The first coal wharf at the new coal terminus, described in the last report, was completed in June, and has been in use since. The arrangements are found very convenient, and a great improvement on the confined space at Elizabethport. During the present dullness in the trade, the two places together furnish ample accommodation for all the business likely to offer. At the new port the shipping is done by the company at rates intended simply to clear expenses, without giving a profit; and it is proposed to apply the same system to Elizabethport while it remains in use as a coal station.

STOCK YARD AND MARKET.

During the past season an extensive establishment for the purchase and sale of cattle, and for slaughtering on the most improved modern plans, has been built and put in active operation on forty acres of meadow land, just south of Communipaw, by a company chartered for that purpose. The arrangements are remarkably convenient, and the abattoir bids fair to be a complete success. While it removes from the City of New York the nuisances that have been so long complained of, it is so arranged, and with such perfection of detail, as to be itself perfectly harmless to the neighborhood where it is situated. A large hotel is connected with the premises.

AMERICAN DOCK AND IMPROVEMENT COMPANY.

A controlling interest in the stock of the American Dock and Improvement Company having been acquired, all the lands under water, in and south of Communipaw Bay, purchased from necessity or convenience while extending the road across the waters of that bay to its terminus in the Hudson, have been transferred to that company, and are now held under its valuable charter. For various reasons, and more particularly to avoid any question of boundaries between the two companies, the station grounds were included in the general conveyances, and a re-conveyance taken by metes and bounds of the tract, which it was deemed desirable to retain for the station grounds, shops, &c. The right to run railway tracks over the other ground, as reclaimed, was expressly reserved, and locations of the principal tracks have been filed under the provisions of the charter.

The bulkheads and filling-in commenced by the Railroad Company have been vigorously prosecuted by the Dock Company with great success, and will be continued with especial reference to developing the general plans and getting the more valuable portions in a position for sale or lease, so as to reduce the interest running against the property, and also to ensure the working of all improvements toward a common end.

The contract for the removal of dirt, rubbish, etc., from the city was transferred to the Dock Company in July last, and has been carried on by them since, very satisfactorily to all concerned.

LAND AND LAND COMPANY.

The land under water being thus disposed of, there remains a large amount of land along the line of the road, acquired also from necessity, or convenience, in widening the right of way to 100 feet, and in locating new lines. Together, these form a very valuable body of land, which can be made much more valuable by a gradual development and sale of the same. To facilitate this, application has been made to the Legislature for a charter for the "Central New Jersey Land Improvement Company," under which charter it is intended to hold the said lands, for the benefit of the stockholders generally, till they can be gradually disposed of. In this way a considerable profit can be realized, the right of way secured without charge, and the local business of the road much fostered and improved by the impetus given to the growth of the villages along the line.

PROSPECTS OF BUSINESS.

At present the Lehigh coal trade is very dull, and the rates for transportation will have to be low during the season. The Lackawanna coal trade is brisk, and, under the fixed price of 1865, is now remunerative. Passenger business bids fair to remain good. General freight is good, but uncertain in its prospects. The cattle trade is likely to be large, with the stimulus of the abattoir. Western business is steadily improving. Local trade, both passengers and freight, is excellent.

BALANCE SHEET, CENTRAL RAILROAD COMPANY OF NEW JERSEY, January 1, 1867.

Capital stock		$13,000,000 00
1st mort. bonds, due 1870	$900,000	
2d " " " 1875	600,000	
		1,500,000 00
Dividend 2½ per cent., payable in January		299,293 00
Interest on bonds, accrued, not yet due		33,250 00
Accounts payable		250,400 07
Renewal fund, balance to credit		628,159 26
		$15,711,102 33

President.—JOHN TAYLOR JOHNSTON.

Directors.—John Taylor Johnston, John C. Green, William E. Dodge, Adam Norrie, Moses Taylor, Benjamin Williamson, F. T. Frelinghuysen, Henry D. Maxwell, Asa Packer.

Secretary & Treasurer.—SAMUEL KNOX.

Engineer.—JAMES MOORE.

Superintendent.—JOSIAH O. STEARNS.

Interest on Virginia State Debt.

By reference to the annexed statement of the Second Auditor of Virginia, it will be seen that the interest on the State debt, including coupons heretofore payable in New York, will be payable at the Treasury in Richmond on the 1st of July next. It is estimated that there will be a large surplus in the Treasury after the interest is paid. The Auditor says:

Under the act of March 2, 1866, all interest due to January 1, 1867, may be funded at the option of the owner, in the mode therein prescribed. No provision has yet been made for payment of interest on certificates issued under that act.

The General Assembly, at its late session, provided for paying 1st of July next, and semi-annually thereafter, two per cent. on account of the interest accruing since January 1, 1867.

Where the stock is registered the interest will be paid to the owner or his order, and the balance, one per cent., will stand to his credit on the books.

The interest on the coupon five per cent. sterling debt, payable in London, will be paid there, and funds have already been transmitted to meet the amount due first of July.

All other coupons for interest, including those heretofore payable in New York, will be presented for payment here. Two per cent. in money will be paid, a new coupon given for the balance, when the original will be surrendered and cancelled.

The law also provides that parties who choose to do so, may, after the first of July, get certificates in the nature of coupons, for interest due first of January next, which are receivable in payment of taxes and public dues.

In the case of coupons they will be presented here, and certificates for two per cent. and coupons for the residue, one per cent. will be issued in lieu of them.

Where the stock is registered, the order of the owner will be sufficient; but the bonds must, in these cases, be presented so that an endorsement may be made upon them that such certificates have been issued.

☞ The Ohio River Survey party, under the direction of W. Milnor Roberts, Esq., were to have left Pittsburg on the 19th inst., with a view to commencing their labors. The party will proceed first to Marietta, at which point the survey will be commenced. The middle division of the work extends as far as Cincinnati, and from that city to Cairo has been designated as the Western Division.

Tide-Water Receipts.

The quantity of flour, wheat, corn and barley, left at tide water from the commencement of navigation to 31st May, inclusive, during the years 1866 and 1867, was as follows:

	Flour, bbls.	Wheat, bu.	Corn, bu.	Barley, bu.
1866...	21,700	169,800	1,384,200	40,700
1867...	3,200	50,500	432,000	19,500
Dec..	18,500	119,300	952,200	21,500

By reducing the wheat to flour, the quantity of the latter left at tide-water this year, compared with the corresponding period last year, shows a decrease of 42,360 bbls. flour.

The following comparative table shows the quantity of some of the principal articles of produce left at tide-water from the commencement of navigation to and including the 31st of May, in the years indicated:

	1865.	1866.	1867.
Canal opened—	May 1.	May 1.	May 1.
Flour, bbls.	64,100	21,700	3,200
Wheat, bushels	403,800	169,800	50,500
Corn, bushels	560,500	1,384,200	432,000
Barley, bushels	97,800	40,700	19,500
Oats, bushels	1,741,000	570,700	193,900
Rye, bushels	29,800	55,600	14,600
Malt, bushels	92,400	40,100	28,500
Beef, bbls	2,990	100	.....
Pork, bbls	6,810	3	4
Bacon, lbs	724,600	.....	.....
Butter, lbs	8,500	100	200
Lard, lbs	200,500	5,600	.....
Cheese, lbs.	34,200	39,700	4,800
Wool, lbs	16,100	36,400	4,500

Metropolitan Branch Railroad.

We learn from the Washington *Star* that work has been commenced upon this road within the city limits, and that a large force will be constantly employed pushing it forward to completion. Several gangs of men are at work at different points on the line—one within the city, another about half a mile out, and another where the road intersects the Washington Branch track. A large force has been employed for some months upon the heavy cutting at Parr's Ridge, working toward Washington, and another body of men are engaged at the junction of the road with the main stem of the Baltimore and Ohio Railroad at Point of Rocks. Mr. S. G. Myers is Superintendnt of construction.

Virginia State Debt.

The Auditor of Public Accounts for the State of Virginia has published the following letter on the subject of the indebtedness of that commonwealth:

STATE OF VIRGINIA, AUDITOR'S OFFICE, Richmond, May 27, 1867.

H. G. FANT, Esq., *President of the First National Bank of Richmond.*

DEAR SIR—In reply to your favor of the 17th instant, I beg leave to state that an act was passed at the last session of the General Assembly, bearing date the 21st of March, 1867, providing "That the accounting officers of the treasury pay on the 1st of July, 1867, and January, 1868, two per centum interest on the principal of the public debt of the State, excluding therefrom the bonds given for interest on said debt, under the act of the General Assembly, passed the 2d of March, 1866 (the 'act to provide for funding the interest on the public debt,') that being the interest which the State feels obliged to pay until there is a settlement of accounts between this State and West Virginia." You will observe that in this act no provision is made for continuing the payment of interest beyond the 1st January, 1868, but an act was subsequently passed, to wit, on the 23d of April, which declared, among other things, that "the semi-annual payments of interest required by the said act (21st of March, 1867) *be continued until otherwise provided by law.*" The tax imposed by the Legislature, much of which is now in process of collection, is amply sufficient to meet all the demands on the treasury. The greater portion of the amount required to pay the July interest is already in the treasury.

The form of evidence to be given to the bondholders for the amount of their interest held by the State in abeyance will be: 1. In respect to the registered debt: The amount unpaid will remain at the credit of the holders upon the books of the Second Auditor, for which a certificate will be issued if required. 2. Interest coupons: These coupons will be presented at the office of the Second Auditor; two per cent. will be paid thereon in money, and for the remainder, not provided for, a new coupon will be issued of the same number and date as the original. I may here remark that the interest on both the registered and coupon debt will be only for the six months preceding the 1st of July, 1867.

In respect to the probable reduction of our State debt, I would remark that three acts were passed at the last session of the General Assembly—one on the 1st of March, 1867, incorporating the Chesapeake and Ohio Railroad Company, which consolidated the following roads, to wit: The Covington and Ohio Railroad, the Blue Ridge Railroad, the Virginia Central Railroad, the South Side Railroad, and Norfolk and Petersburg Railroad. The interest of the State in the above roads, exclusive of the Covington and Ohio, is, in the aggregate, $6,893,680 85. The act of incorporation provides that this company (the Chesapeake and Ohio) "shall have the right within *two years* after its organization to purchase the stock held by the State in said companies at the date of purchase, by transferring to the Board of Public Works bonds of the State for an amount equal to the stock proposed to be purchased.

Another act was passed the 18th of April, 1867, providing that it shall be lawful for the Virginia and Tennessee Railroad Company, the Southside Railroad Company, the Norfolk and Petersburg Railroad Company, and the Virginia and Kentucky Railroad Company, to form one joint stock company, to be thereafter known as the Atlantic, Mississippi and Ohio Railroad Company. The interest of the State in these corporations, provided it is not extinguished as to the Southside and Norfolk and Petersburg Railroad Companies by the act of the 1st of March, 1867, is $5,506,909 69. Upon the organization of this company the Board of Public Works are empowered and instructed to sell to it the State's interest in the several companies composing it for State bonds *at par*, provided that such purchase of stocks of the State in the said railroads and bonds of the Southside railroad and Norfolk and Petersburg railroad shall be made on or before the 1*st day of May*, 1868.

An act was passed on the 24th of April, 1867, authorizing the Richmond and Danville railroad, in a certain contingency, to purchase the entire interest of the State in said road, amounting to $4,988,598, for State bonds at par.

The aggregate amount of the State's interest in the roads embraced in the companies aforementioned, to be exchanged for the bonds at par, is $11,285,715 54. When the provisions of these laws are carried out, the debt of the State as it stood on the 17th day of April 1861, to wit., $34,977,298 38, will be reduced by that amount, to wit, $11,285,715 54, making the principal of the debt, (after deducting the amount to the credit of the sinking fund, say $2,000,000) $21,691,579 84.

The interest of the State in the railroads not embraced in the organization above mentioned is	$6,277,481 85
To which may be added the interest in the James River and Kanawha canal	10,400,000 00
Total	$16,677,481 85

Several of the roads are among the best in the State.

Having answered substantially the several queries propounded to me, I may be pardoned for remarking, in conclusion, that there is nothing in the future, so far as I can foresee, to induce the supposition that the interest on the public debt of the State will not be regularly and punctually paid. The debt itself will doubtless be reduced by an exchange of the interest of the State in the roads aforesaid for its bonds at par, either by the organization indicated in this letter or by authority granted to the Board of Public Works to dispose of the same with a view to its extinguishment. Very respectfully,

WILLIAM F. TAYLOR,
Auditor Public Accounts.

Chicago, Rock Island and Pacific Railroad.

The gross receipts of the Chicago and Rock Island Railroad (228¼ miles) from April 1, 1866, to August 20, 1866, and of the entire line (409¾ miles) from August, 20, 1866, to March 31, 1867 were as follows:

From passengers		$988,960 86
" freight		2,428,824 26
" mails		21,199 94
" rents and other sources		61,156 66
" interest on loans and deposits		73,891 99
		$3,574,033 71

And the expenses were:

Repairs of road	$308,507 18	
" engines	205,151 97	
" cars	153,415 00	
" bridges	19,938 49	
" buildings	53,472 19	
" fences	22,892 11	
Cost of iron for repairs	175,466 26	
Fuel	271,736 10	
Oil, waste, etc	37,291 89	
Loss and damage	24,513 50	
Contingent account	33,682 80	
Salaries of agents, etc	100,819 42	
Handling freight	138,231 55	
Pay of train hands	214,960 98	
Station house expenses	33,629 71	
Books, printing, etc	20,929 61	
Tools and machinery	13,213 01	
		1,827,851 77
Earnings less operating expenses		$1,746,181 94
Taxes on real estate	$106,301 41	
U. S. Gov. tax	52,291 30	
Legal expenses	8,590 20	
		167,182 91
Net earnings		$1,578,999 03
Rent of Peoria and Bureau Valley railroad	$125,000 00	
Interest on bonds	256,131 20	
Dividends 10 per cent. & U. S. tax	820,878 94	
Interest on Bridge bonds	40,000 00	
		1,242,010 14
Leaving a surplus of		$336,988 89

The sum of $322,037 26 has been expended during the year in the purchase of the following material for repairs and renewals of track, viz: 76,166 ties; 101 tons steel rails, at $192 20; 25 tons steel head rails, at $123 97; 804 tons iron rails, at $92 32; 3,511 tons re-rolled rails, at $44. 07; 50,575 lbs. wrought chairs, at 6.24 cents; 152,450 lbs. spike, at 6.28 cents; 230,785 lbs. fish bars, at 5.69 cents; and 59,480 fish bar bolts at 8.5 cents.

The number of miles relaid during the year was 41.7; of which 37.2 miles were with re-rolled rails, and 4.5 miles with new rails.

The number of rails repaired at the shops of the company was 25,038, costing an average of

91.04 cents. The 101 tons steel rails were placed in the track at an expense over iron rails of $9,724 28; the 25 tons steel head rails costing $733 50 more than iron rails; steel frogs have been substituted for iron, at a difference in first cost of $1,725. The extra expenses incurred in the use of steel instead of iron, as well as all repairs on locomotives and cars, are included in the above statement of expenses. The report says:

By the report of 1866 of the Chicago and Rock Island Railroad Company, you were informed that that company had made a contract for the ultimate control and use of the Railroad Lands and other property of the Mississippi and Missouri Railroad Company. In order to carry out that plan, a company was organized under the General Incorporation Laws of the State of Iowa, under the name of the Chicago, Rock Island and Pacific Railroad Company, with power to purchase the property and to complete the construction of the line of Railroad in Iowa. On the 9th July, 1866, the entire railroad, franchises, lands, and all other property of the Mississippi and Missouri Railroad Company were sold (under a decree of foreclosure of all the mortgages upon the property) by order of the Circuit Court of the United States for the District of Iowa, and at such sale the said Chicago, Rock Island and Pacific Railroad Company became the purchaser, and in due time the sale was confirmed by the court, and the necessary conveyances made and delivered to vest the title completely in that company. The necessary steps required by the laws of the States of Illinois and Iowa having been taken by the Chicago and Rock Island Railroad Company, and by the Chicago, Rock Island and Pacific Railroad Company, a consolidation of the stock and property of the two companies was made on the 20th day of August, 1866, and the whole merged and consolidated in a new corporation by the name of the "Chicago, Rock Island and Pacific Railroad Company." The capital stock of the consolidated company was fixed at the aggregate amount which the two companies respectively were authorized by their acts of incorporation and by the laws of the States of Illinois and Iowa, to create and issue, but the total amount of the capital stock of the consolidated company at the time it should commence and go into operation was limited to the aggregate amount which the two companies had issued or agreed to issue, which amount was $9,200,000, of which $9,100,000 had been issued, and which is the present amount of the capital stock issued. The capital stock of the Chicago and Rock Island Railroad Company was increased in June, 1866, $2,600,000 by the conversion of that amount of bonds.

The liabilities of the corporation of Iowa which the consolidated company assumed were $5,500,000, to be paid by an issue of bonds as specified in the agreement of November 1st, 1865, a copy of which was published in the annual report of the Chicago and Rock Island Railroad Company of 1866.

The property of the corporation in Iowa, which by the consolidation became the property of the consolidated company, consisted of 183 miles railroad in operation, with a moderate equipment—good shops, station buildings, &c., a supply of fuel, materials, &c. for operating, and the lands granted by Act of Congress and of the Legislature of Iowa to aid in the construction of the Mississippi and Missouri Railroad of which there has been certified by the Government of the United States to the company 481,000 acres.

Since the consolidation, this company have been engaged in constructing the road in Iowa, from Kellogg to Des Moines, a distance of about forty-two miles, and it is now nearly completed. It is expected that it will be opened to Des Moines for business in the month of July. The company will then own absolutely 406 miles of railroad in operation, and in addition thereto have a perpetual lease of the Peoria and Bureau Valley Railroad, a distance of 46 miles.

There has been a large amount of new rolling stock purchased and constructed and placed upon the line during the past year. A new passenger depot and offices, in common with the Michigan Southern and Northern Indiana Railroad Company have been erected at Chicago, additional lands have been acquired, a large additional amount of side-track has been constructed, masonry in bridges and culverts has been substituted for the temporary work, &c., all of which has involved a considerable expenditure of money, but it was all necessary to be done to facilitate the transaction of the increasing business of the company.

The books of the company show the cost of the road, equipments, lands, and all other property to be $15,313,822 84. This includes the cost of the Chicago and Rock Island Railroad Company's property, the sum of $5,500,000 which was paid for the property in Iowa, the amount paid on account of construction of the new road from Kellogg to Des Moines, the additional equipment and other expenditures for land and construction for the past year.

The company have issued of the new Sinking Fund Bonds $6,669,000, of which about $4,875,000 has been paid for the purchase of the Iowa property, and the balance has been sold, a portion of the proceeds expended in construction and equipment, as before stated, and for the balance the company have the money on hand.

The company have 92 locomotives, of which 35 are coal burning and 57 wood burning; 46 passenger coaches, 20 baggage, mail and express, 1,109 box, 202 stock, 468 flat and 1 pay cars.

In addition to general repairs on locomotives, which have in many cases been quiet heavy, 2 have been entirely rebuilt, 8 changed from wood to coal burners, furnished with copper fire boxes, at an estimated expense for the latter item alone of $10,000; 36 iron tires have been replaced with steel, and the repairs alone on the 41 locomotives in shop have been of the most thorough and substantial character.

There have been purchased during the year 14 locomotives, 25 box and 25 stock cars: and there have been built in the company's shops 145 box, 40 coal, 5 baggage, 3 drovers and 1 passenger cars. Repairs on all the cars have been fully maintained. Four coaches have been rebuilt at a cost of $12,000, and 13 coaches repaired, painted and varnished.

The number of miles run by locomotives with passenger trains was 467,763; with freight trains, 1,058,136; with wood and gravel trains, 95,408—total, 1,621,307, at an average cost per mile run, for engineers, firemen, wipers, oil, fuel and repairs, of 38.68 cents.

The whole amount of freight transported over the road during the year was 1,197,827,158 lbs.—an increase over the previous year of 919,972,110 lbs., or 30.2 per cent. Number of loaded cars going east, 36,176; going west, 30,176—total, 66,352. Average tonnage to each loaded car, 9.026. Average earnings per ton per mile, 3.05 cents. Tons carried one mile, 79,565,702.

The number of passengers carried was 463,100, of which 458,925 were first-class, and 4,175 2d class; of these, 44,491 were through, and 418,609 way; 220,415 went east, and 242,685 west. Passengers carried one mile, 22,701,661. The average rate per mile for transporting passengers was 4.357 cents.

The number of pounds of freight transported over the Mississippi Bridge during the year was 424,299,300—an increase over the previous year of 139,647,494 lbs. The number of loaded cars passing for the same period was 23,877. Number of foot passengers, 83,163. Number of boats, barges and rafts passing the draw, 2,498.

INCOME ACCOUNT.

American Railroad Journal.

Saturday, June 22, 1867.

Stock Exchange and Money Market.

The Money Market has been more freely supplied, since our last, especially through private channels, in which there has been a steady accumulation of balances. The receipts from the interior have been increasing, domestic exchanges ruling generally in favor of this point. The Government office has been disbursing at the average daily rate of the full measure of its receipts. Since Monday, its payments have been in excess of its income from all sources. It has been purchasing compound-interest and Seven-Thirty notes, as freely as they have been offered. It has retired all that was available of the June 1864 compound notes. Many of them held by the National banks have not been surrendered, and are not likely to be, until the banks shall have passed the ordeal of making their quarterly returns for July to the Currency Bureau, as the banks seem reluctant for the present to diminish in any way their reserve of legal tenders, plain or interest bearing. The inevitable loss of interest on the matured compound notes is of less consequence to them, than the danger of a poor showing of legal tender notes in their July exhibit. The Government office has been discharging, as promptly as they have been presented, all interest claims of the holders of the June issue of the Seven-Thirties. It has also been ready to anticipate the July coin-interest on the latest issue of the Five-Twenties of 1865, known in the street as consols. In this way, the Treasury has been prudently aiding in the restoration of an easy money market, and in the cheapening of the price of money for all legitimate business purposes. On call loans, the rates here have settled down to 5 per cent. on Government, and 6@7 per cent. per annum on other prime stock collaterals. On strictly choice to prime short date commercial paper, the discount rates have been, through private houses, quoted at 6@7 per cent. per annum. The demand for accommodation has been less active. The last city bank statement shows a loss of $4,412,572 in the deposit line, and $3,042,049 in the specie reserve, with a gain of $2,001,187 in the legal tender reserve during the past week. The loans were reduced $4,248,282. The specie reserve of the banks is now $12,656,389, against $11,217,305 same time last year. The city bank deposits are now $180,713,763, against $202,415,656 week ending June 16, 1866. The legal tender reserve amounts to $57,924,294, against $79,179,304 same time last year. The circulation now stands at $33,707,109, against $25,887,876 same time last year. The loans are now $246,228,465, against $247,301,547 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $76,828,100 a day, against a daily average of $76,955,703 the preceding week, and $73,779,264 the week ending with June 1. The current week's exchanges average $80,686,730 a day.

National Bank notes to the amount of $75,650 were issued last week, making the total issue to 1,671 banks thus far, as given in our last, $303,012,456, against $282,555,440 at the close of the last fiscal year, June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $4,861,527, leaving, with the existing 1,647 banks, (having an aggregate capital of $422,913,861,) an actual circulation at this date, of $298,150,929. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $340,586,500; and for the public deposits, $38,983,950—making a total of $379,590,455. The Treasury Department last week redeemed and destroyed $384,600 of worn and mutilated fractional currency, and issued $249,931 worth of new.

The Philadelphia Bank movement the past week shows an increase in loans, of $34,925, and $21,646 in specie; with a decrease in legal tenders of $500,710; in deposits, $78,343, and $596,712 in circulation. The Bank Clearings show an increase of $81,165, and the balances, $365,073.

The U. S. Sub-Treasury receipts, week ending with June 15, were $17,834,629, including $1,895,713 from customs duties; payments, $17,331,277; balance at the close of the week, $134,616,271,

against $134,112,920, at the close of the preceding week, showing an increase of $503,352. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $2,932,486 including $359,008 from customs, and payments, $3,525,516; on Tuesday, receipts, $1,524,793; payments, $2,032,337. The balance at the close of business on Tuesday stood at $133,506,897, against $134,405,663 a week previous.

The cash balance in the hands of the United States Assistant Treasurer at Boston, at the close of business on Saturday, was $6,846,613 94, being a decrease of $1,362,951 07 during the week. The coin balance was $6,055,197 64. Amount of Compound Interest Notes paid, $2,472,275 61. The interest paid on the Seven-Thirty Bonds on Saturday the day of maturity of the coupons, was $446,540 26. Customs received during the week, $315,100.

Government revenues have been comparatively fair for the season. The customs revenue has been better than could have been expected from the reported dullness and depression in the importing interest. The excises have yielded quite encouragingly. The revenue officers look for a marked improvement in this particular, within the next six weeks, from the payment of income and other annual taxes. The excises, last week, yielded $4,169,549, against $5,450,239 the preceding week; customs at the port of New York $1,895,713, and at the outports, about $630,000 (in coin) more, making the grand total income for the week equal about $7,327,049 in currency. The total receipts of the National Treasury, from excises, since July 1, 1866, have been about $259,000,000.

The Gold market has been more active, since our last. The speculative demand has improved, partly on account of a rather extensive *short* interest made toward the close of last week, and to protect which more than usual eagerness has been exhibited. The discussions, relative to a July session of Congress, had been used by the inflationists to promote their purposes. The Government has not been a seller of gold, to any notable extent, for a number of days. The customs inquiry has been fair for the season; and the export drain, comparatively moderate. The price was as high on Tuesday as 138. On Wednesday, the opening rate was 137⅞, the range through the day, from 137⅞@138⅜; and the latest quotations 138 on a rather heavy market. The temporary rise on Wednesday was partly owing to the reported fall in United States bonds in London, which itself was the result of the previous rise in gold here. The specie exports on Wednesday were only $215,000. The total imports of specie from Europe, and other foreign ports since Jan. 1, 1867, have been $1,458,960. The customs demand for Gold last week, averaged $315,952 a day; thus far, this week, it has been equal to $429,416 a day, or equal to a weekly aggregate of $2,576,496. The arrivals of specie from Europe, Havana and other foreign ports, during the past week were $144,344, and from California, none. The total customs revenue of the Government, in coin, at this port since July 1, 1866, has been $118,689,903, against $128,486,284 same time in the preceding fiscal year. The total receipts of California gold at this port since July 1, 1866, have been $37,300,596, against $28,230,736 same time last year, showing an increase this year, of $9,069,860. The exports of specie from this port, last week, were $2,784,963. The total outflow of specie from the port, thus far in the current fiscal year has been $39,644,444, against $55,622,202 same time in the preceding year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $402,000, making the total coin interest disbursements through the Government office, since July 1, 1866, $53,972,310, against $45,740,696 for the same time in the preceding fiscal year. The specie exports from San Francisco, from Jan. 1, to May 17, reached $13,680,512, against $13,646,731 same time last year, showing an increase, in 1867, of $33,781.

There were $103,000,000 in gold in the National Treasury on Saturday last $85,000,000 of which belonged absolutely to the Government.

A more liberal supply of bankers' and commercial bills of exchange has been available, since our last, and as the demand has not been particularly urgent, prices have favored buyers, slightly. Bankers' 60 day bills on London closed on Wednesday at 109⅞@110⅛, and on Paris to 5.15@5.11¼; sight bills on London to 110⅜@110½; and on Paris to 5.12½@5.10. The offerings of produce bills have been fair, this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $3,085,804, making the total value of exports since July 1, 1866, $171,913,527, against $209,374,015 same time in the preceding fiscal year.

Business in the public funds was quite brisk through most of the week. The home and foreign investment demand for the coin bearing bonds was more animated at advancing prices. The Five-twenties of the several issues were in especial favor. The Seven-Thirties and Compound Interest Notes were also in good request, chiefly for banking purposes, at buoyant rates. On Wednesday, there was a marked falling off in the demand for the National interest bearing obligations, and a fractional decline in prices of the funded debt was the result. The June 1864 issue of the compound notes, having matured, have ceased to be quotable. U. S. sixes of 1867 closed tamely here on Wednesday at 133½; U. S. sixes of 1868, at 134; U. S. sixes of 1881, 112½@113; U. S. Five-twenties of 1862, 110⅜@110⅝; U. S. Five-twenties of 1865 at 107@107⅛; U. S. Five-twenties of 1865, consolidated, 109⅜@109⅞; U. S. Ten-forties at 100@100⅛, and U. S. Seven-thirties at 106¼@106⅜. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

June, 1864.....119	May, 1865 .....116⅜
July, 1864.....119	August, 1865....115⅜
August, 1864....118⅝	September, 1865..115⅜
October, 1864....117¾	October, 1865....114½
December, 1864..117	

There has been less hesitancy in the railway and miscellaneous share speculation. A good speculative demand, chiefly on street account, prevailed through the better part of the week, at a firmer range of prices. Toward the close, however, something of a *bearish* temper was developed, and the general market closed heavily, with a downward tendency, under a moderately energetic hammering process.

General business has been comparatively tame, since our last. Breadstuffs have been more freely offered, and have been much depressed in price, Yet the demand has been very moderate. Provisions have been less active at declining prices, closing heavily. In most other miscellaneous home products, transactions have been restricted, though buyers have had any existing advantage. Cotton has been inclined to yield within the past two or three days, though holders have not made any important concessions. The demand for it has been moderate. Middling grades left off here on Wednesday languidly at 26½@28 cents per lb. as extremes. The stock of cotton now here is estimated at about 92,500 bales. The receipts at the port this week, have averaged about 1,900 bales a day. The receipts since the commencement of the current cotton year, Sept. 1, have been 591,500 bales, against exports of 412,600 bales. The receipts at all the shipping ports from September 1, to latest mail dates have been 1,797,000 bales against 1,918,698 bales same time last year; exports, 1,408,000 bales, against 1,447,600 bales same time last year; estimated stock at latest dates, 258,000 bales, against 316,000 bales same time last year. At the Live Stock markets this week Beeves are in less request at from 14@19c. per lb.; receipts, 5,163. Calves are more inquired for at 7@12c. per lb.; receipts, 2,032. Sheep and Lambs are tamer and heavy at 5@7½c., and 11@14c. per lb., respectively; receipts, 15,588. Swine have been more sought after at 6½@7c. per lb., all live weight; receipts, 14 784. Foreign merchandise has been lightly dealt in, as a rule. Groceries, hides and wool have been in most request held with most firmness. Dry goods have been pressed for sale, and all other than strictly desirable fabrics have been quite heavy in price. The total imports of foreign dry goods, last week, were $925,695, and the total amount marketed $833,029. The value of foreign merchandise imported last week, was $4,070,114—making the grand total specie value of last week's imports of dry goods and merchandise, $4,995,809, and since July 1, 1866, $249,760,428, against $287,778,664 same time in the preceding fiscal year. The ocean freight market has been less active, owing to the advanced rates claimed by shipowners, since our last, with 556 vessels of all classes in port. For Liverpool we quote flour at 1s.@1s. 3d. per bbl.; grain at 3½c.@4d. per bushel; cotton at 3/16@¼d. per lb.; and heavy goods at 10s.@20s. per ton, all by sailing vessel.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	June 5.	June 12.	June 19.
Consols	94½	95	94½
U. S. 5-20's of 1862	72¾	73	73

India Rubber Car Springs.

The use of these springs having become a necessity for safety, durability and ease on railway and City cars. Mr. C. V. Mead, one of the first to engage in their manufacture, has recently erected extensive works at Hamilton Square, near Trenton, N. J., known as the Hamilton Square Rubber Works.

We take pleasure in calling the attention of all Railway Companies and Car Builders to the challenge in our issue of to-day to manufacturers for a test of their springs at the National Convention of Car Masters to be held at Altoona, Pa., in September next.

Locomotives for Sale.

Messrs. Kasson & Co., 62 Broadway, N. Y., have for sale three locomotives of the ordinary gauge, all thoroughly rebuilt by one of the best makers. They will be sold very cheap to close a transaction. They are really very serviceable engines, and in excellent order. Full descriptions of them will be found in an advertisement on another page.

Consolidated Iron Interests.

We learn from the Albany *Argus* that the Rensselaer Iron Works, Bessemer Steel Works, Fort Edward Blast Furnace, and Columbia County Blast Furnace, heretofore doing business as separate firms, have been consolidated, and are now owned and operated by the one firm of John A. Griswold & Co., composed of John A. Griswold, Erastus Corning, Sr., Erastus Corning, Jr., and John F. Winslow. This makes one of the largest and most complete establishments in the country, if not in the world. On the completion of the new mill in process of construction, the firm will have a capacity of producing annually 20,000 tons of pig iron 15,000 tons of Bessemer steel, 35,000 to 40,000 tons iron and steel rails, and 8,000 to 10,000 tons merchant iron. The various iron works and pieces of property consolidated in the firm of John A. Griswold & Co. foots up a value of about two million dollars, while the partners in the firm represent a capital of about ten million dollars. The various branches of manufactures represented in these consolidated interests will be carried on on a scale hardly ever attempted in this country before.

☞ Work on the Louisville and Cincinnati Railroad is being prosecuted with vigor all along the route—tunneling, bridging, grading, etc. Among the bridges will be one over the Kentucky River. The road diverges from the Louisville and Frankfort road at Lagrange, traverses the intervening counties, several miles from the Ohio River, making the distance from Louisville to Cincinnati one hundred and five miles, or four hours' travel.

Railroad Earnings.--Weekly.

The earnings of the Detroit and Milwaukee Railroad for the week ending June 13th, 1867, were $35,112 00
Corresponding week of 1866..... 32,739 00

Increase..... $2,373 00

The earnings of the Michigan Southern and Northern Indiana Road for the 2d week in June, 1867, were..... $73,941 00
Corresponding week of 1866 ..... 89,920 00

Decrease $15,979 00

The earnings of the Western Union Railroad for the week ending June 14, 1867. ..$14,829 57
Corresponding week previous year.... 23,455 68

Decrease $8,626 11

The earnings of the Chicago and Northwestern Railroad for 1st week in June, 1867..$211,984 00
Corresponding week previous year .. 218,651 00

Decrease $6,667 00

The earnings of the Michigan Central Railroad for the 1st week in June, 1867, were. $67,410 00
Corresponding week of previous year.. 72,804 00

Decrease $5,394 00

The earnings of the Marietta and Cincinnati Railroad the 1st week in June, 1867...$22,329 00
Corresponding week previous year.... 24,226 00

Decrease $1,897 00

The earnings of the Atlantic and Great Western Railroad for the first week in June, 1867, were..... $95,073 00
Corresponding week previous year... 107,839 00

Decrease..... $12,766 00

The earnings of the Virginia and Tennessee Railroad for the first week of June, were $13,231, an increase of $3,281 on the same week last year. Total for the fiscal year commencing 1st of July, $978 095, an increase of $139,600 on same time of 1866.

Union Pacific Railroad—Eastern Division.

At a meeting held by Senator Wade's excursion party at St. Louis, before they left that city, a committee was appointed to draft resolutions embodying the views of the party. The following were unanimously adopted:

First—That we highly appreciate and applaud the wisdom and the courageous persistence of the patriotic men who inaugurated the grand enterprise of the Pacific Railroad; and, believing its feasibility and utility have been already demonstrated, we congratulate them and the country upon the success which has crowned their efforts.

Second—That, being fully satisfied of the many advantages attending the location of a road through Kansas by reason of the inexhaustible fertility of its soil, the salubrity of its climate and the industry and intelligence of its rapidly increasing population, we earnestly recommend it to the cordial support of the government and the capitalists of the country.

Third—That after a personal survey of the part of the country through which the Eastern division of the Pacific Railroad is located, we confidently predict that the successful prosecution of that road will effect the best and most economical solution of the Indian question, by inviting a continuous line of settlement across the continent, and by affording at every station a base of operations for such military movements as may hereafter become necessary.

Fourth—That this railway to the Pacific, by a large reduction in the cost of transportation, will more than repay the government of the United States for the bonds loaned to aid in its construction, and that the interests of the Government and the American people require that this road should be completed to the Pacific coast in the shortest practicable time.

☞ A railroad connecting Columbus *via* San Antonio with the Rio Grande was chartered by the last Legislature of Texas.

Philadelphia, Wilmington and Baltimore Railroad.

The earnings of this road for the years ending October 31, 1865 and 1866, were as follows:

	1865.	1866.

Add balance to credit of revenue Nov. 1, 1865.....		727,046 20
Total, as in General Balance Sheet.		$1,234,694 10

Compared with the previous year, the aggregate receipts show a decrease of more than thirty-five per cent. There was also a reduction in expenses to the extent of more than forty-nine per cent., as compared with those of the previous year. This reduction was made without detriment to the interests of the company, in consequence of the liberal outlay for stock and equipment made in 1865; and the close of the last fiscal year finds the road and rolling stock in good condition, and the amount standing to the credit of revenue (after deducting $474,700 for the January dividend,) larger by the sum of $32,947 90 than it was at the same date in 1865.

The second track has been completed, excepting between Aberdeen and Chases' Station, a distance of about 14 miles, exclusive of the bridges over Bush and Gunpowder Rivers. The grading has also been completed for a part of this distance. There has been expended upon second track, to November 1, 1866, $1,266,070 33; of which $934,213 97 was charged to revenue, and $331,856 36 to construction.

The work on the Susquehanna Bridge had been brought so near to completion as to have been regularly used for passenger traffic since November 28, 1866. There had been expended for this bridge to October 31, 1866, $1,479,176 53; and advanced to contractors on account thereof, $140,125 36—making the total outlay on bridge to October 31, 1866, $1,619,301 89. Of this amount there was charged to revenue, $627,933 51; to contractors, $140,125 36, and to construction, $851,243 02.

The Port Deposit Branch, extending from the eastern terminus of the Susquehanna Bridge to Port Deposit, a distance of about four miles, was opened for travel December 17, 1866. The amount expended on this branch to Oct. 31, 1866, was $159,649 91, and further outlay will be necessary for the erection of buildings at Port Deposit.

The company have issued and sold during the year bonds to the amount of $1,000,000; of which $600,000 are due in 1871, and $400,000 in 1876. These are 6 per cent. bonds, and were sold at rates varying from 95 per cent. to par.

The company have 58 locomotives, (11 of which are in use on the New Castle and Wilmington, New Castle and Frenchtown, Delaware, Eastern Shore, and Junction and Breakwater Railroads); 70 passenger, 17 baggage and mail, 9 express, 1 special, 1 paymaster's, 382 house freight, 62 stock, 219 platform, 80 market, 57 lumber, and 125 dump cars.

The number of miles run by locomotives with passenger trains, was 558,398; with freight trains, 252,929; with other trains, 69,609—total, 880,936.

Secretary and Treasurer.—Alfred Horner.

Superintendent.—H. F. Kenney.

How the Union Pacific Railroad is Built.

An intelligent correspondent of the Cincinnati *Gazette* has written a very interesting letter, showing the manner in which this last wonder of the century is being completed. He says:

There is nothing connnected with the Union Pacific Railroad that is not wonderful. The possibility of constructing such a road at some future day has long loomed up as one of the events of a grander future which all believed was to come for the land. To look upon so much of it accomplished, to watch the marvelous progress of each day, and feel sure that the great enterprise which we had consigned to the future of our dreams, is to be a reality for us, makes one prouder of the noble days in which we live. In one sense the road is as great an achievement as the war, and as grand a triumph. To those who have seen much of the former and looked from this point upon the unfoldings of the latter, they appear equally impressive. What the country has dreamed about for many years is becoming a reality much faster than the people know. One year ago, but forty miles were finished, this morning, we look back from our train over a day's rapid run, and forward sixtv miles. To-night, three additional miles of rail will mark the track of the day's advance,

Our party left the depot at Omaha at 9 o'clock on the morning of the 3d inst. The station-house and the common passenger-cars, were better than those on the road from Washington to New York; those who have been so unfortunate as to make the latter trip will all hope they are very much better, if the love of country be in their hearts.

The train, which was made up for the excursionists, consisted of cars as elegant as any that can be found east of the Missouri. It was very difficult to look at them and realize that before night they would be roaring along over plains from which hostile Indians, deer and antelope have not been driven yet.

VALLEY OF THE PLATTE.

Long before the valley is reached, it spreads before the eye like a vast bay opening out into an ocean, whither the track appears to lead. It is forty miles from the low, rolling hills on the north, to the opposite and similar range on the south. Between, the surface is almost perfectly flat, though its regular ascent toward the west, of about ten feet to the mile, gives ample drainage. The soil is very rich, and the mind falters in its attempt to estimate the future of such a valley, or its immense capabilities. The grain fields of Europe are mere garden-patches beside the green oceans which roll from Colorado to Indiana. The valley widens with the advance. The hills behind sink into the plain until the horizon there is perfect. Those on either side grow fainter, till through the heated air they take on the appearance of low islands seen across many miles of water.

Much of the land at the month of the valley is under cultivation, and the deep black of the freshly turned loam, the dark green of the wheat, the lighter grass, the deeper shades, and the brown of that which the fires of the autumn spared, make up the wide expanse a mosaic which nature alone could color, and the prairies only find room to display. Further on, hugh plows, drawn by eight oxen, labored slowly along, each furrow being an added ripple to the tide which is sweeping up over all these rich regions—a tide whose ebb the youngest will never know."

After a rapid run of 150 miles, we stopped for an excellent dinner at Grand Island.

A CONTINENTAL MILESTONE.

The common mile post seem to measure insignificant distances upon the wide plains. Only each five miles are noted on this road, and when one has passed between two of these, the step taken hardly appears like an advance. But there is one point marked in a manner to suggest the distance which has been overcome, and the gigantic character of the work. At a point in the plain which otherwise seems as interminate as the position of a floating log at sea, a wide arched sign between two strong set posts, bears this inscription: '100th meridian—247 miles from Omaha.' Here was the terminus of the road only last September. Now it is complete to a point near the 102d meridian, and the distance from Omaha is 365 miles. Thus the work moves on, measuring its distance by the hour circles.

A FRONTIER CITY.

Crossing the North Platte, on a bridge about three thousand feet long, the train stopped at North Platte Station, which can probably, for a time, be regarded as a frontier town. Last Fall there was no building here. Now, the railroad company have fine brick car houses, there is a good hotel, where excellent fare is provided, and on the main street, fronting the track, are thirty-six buildings. The depot and warehouse are overflowing with stores of all kinds.

Within twenty miles of the end of the track a few of the party rode on the cow-catcher. It seemed marvelous to drive on at twenty miles an hour over rails that had only been down for ten days. But the perfection with which the work is done allows it, and makes it safe. It was exhilarating in the extreme, thus under the flags which streamed on either side, to rush over these prairies so lately bound with links of iron to the Empire of the East.

Three hundred and twenty-five miles out, a construction train of eighty cars stood on a side track. It was loaded with iron, ties, spikes and chairs, in exactly such proportions as were needed. It looked the very embodiment of system, and was one key to the rapidity with which the work progresses. A little further on stood a similar train, and next we stopped in rear of the one where the tracklayers resided. Seventy-six hours swift riding has brought us to this goal. The hills of Colorado were in plain sight. San Francisco was nearer than Boston.

The road had been a constant wonder from the start. Its depots, its car-shops, its equipment, its remarkable smoothness, its high rate of speed, its long bridges and its well ordered eating-houses had attracted constant attention to it as a railroad alone.

Every step trod revealed new wonders. The great achievement grew upward toward its real proportions with every throb of the engine. But all we saw was commonplace and natural beside the scene that awaited us where the track was being laid. If the rest had excited amazement this new wonder took all the attributes of magic. Fictions of the East must be rewritten to match the realities of the West.

HOW THE ROAD IS BUILT.

The plain fact will reveal the magnitude of the work. There is really little known by the people of the character of the enterprise. Most think that a company of capitalists are hastily putting down a rude track, over which cars can be moved with care, for the purpose of securing lands and money from the Government. The fact is that one of the most complete roads of which the country can boast, with equipments that surpass many, is being laid with a speed that fails to impress the nation, simply because it is not believed. But let the facts tell their plain yet wonderful story.

Gen. J. S. and D. C. Casement, of Ohio, grade the road, lay the track, and put up the telegraph. The graders go first. There are 2,000 of them. Their advance is near the Beach Hills, and their work is done to Julesburgh.

Of tie-getters and wood-choppers there are 1,500. Their axes are resounding in the Black Hills, over Laramie Plains, and in the passes of the Rock Mountains. They have 100,000 ties in these hills awaiting safe-guards for trains to haul them. Then follow the tie-layers carefully performing their share of the work.

Now go back twenty miles on the road and look at the immense construction trains loaded with ties and rails, and all things needed for the work. It is like the grand reserve of an army. Six miles back are other trains of like character. These are second line. Next, near the terminus, and following it hour by hour, are the boarding cars and a construction train, which answer to the actual battle line. The one is the camp; the other is the ammunition used in the fight. The boarding cars are each eighty feet long. Some are fitted with berths; two are dining-halls; one is a kitchen, storeroom and office.

The boarding cars go in advance. They are pushed to the extremity of the track; a construction train then runs up, unloads its material and starts back to bring another from the second line. The boarding train is then run back till it has cleared the unloaded material.

The trucks, each drawn by two horses, ply between the track-layers and their supplies. One of these trucks takes on a load of rails, about forty, with the proper proportion of spikes and chairs, making a load, when the horses are started off on a full gallop for the track-layers. On each side of these trucks are rollers to facilitate running off the iron.

The rails within reach, parties of five men stand on either side. One in the rear throws a rail upon rollers, three in advance seize it, and run out with it to the proper distance. The chairs have, meantime, been set under the last rails placed. The two men in the rear, with a single swing, force the end of the rail into the chair, and the chief of the squad calls out 'Down,' in a tone that equals the 'Forward' to an army. Every thirty seconds there came that brave 'Down,' 'Down,' on either side the track. They were the pendulum beats of a mighty era; they marked the time of the march and its regulation step.

It is asked: 'How does the work get on? again let the facts answer. On the 9th of May, 1866, but forty miles of road were completed. In a hundred and eighty-two working days thereafter, two hundred and forty-five additional miles were laid, and put in prime condition, every rail and tie and spike having been brought up from the rear. Seven saw mills furnish the ties and lumber. All bridges are framed, the pieces numbered, and set up where wanted without the least delay. The bridge at Loup Fork is 1,500 feet long, and as fine a Howe truss as can be found in the land. Whil

our train was running the sixty miles from North Platte, over a mile of track had been put down, and one train passed over it. From 1 o'clock till 4 in the afternoon, a mile and two hundred feet were added to this while the party was looking on.

WESTERN CAR SHOPS.

After the return of the party to Omaha, it visited the extensive shops of the railroad company at that point.

The depot grounds upon which they are situated, contain forty acres, specially devoted to these buildings, and to passenger and freight traffic. Within five years it is estimated that the whole of this space will be needed for the business of the road.

The engine-house will hold twenty-one locomotives. There are two others further West. Thirty-two engines are already in use on this road, whose terminus is in the 'desert, and twenty-three more are on the way, and already wanted. Those last constructed are coal burners. The fuel to move them is to come from the Black Hills. In a few years it is confidently expected that the iron to supply these very works will be obtained from the same point. Think of importing iron for Omaha from the West.

Passenger cars are in progress of construction equal to the best. Emigrant cars were being built, and the frames of an hundred freight cars were ready to be put together. Several traveling post office cars are already finished. For stations on the route, the distributing boxes will be marked 'North Platte,' 'Fort Laramie,' 'Salt Lake,' 'Sacramento,' and 'San Francisco; while the closed ponches, at no distant day, will be labeled 'China, Through,' 'India, Official,' 'Sandwich Islands,' 'Russian America,' and 'Japan.' And the cars are built as if the service were already secure. Every particle of work, in all the multifarious kinds demanded, shows implicit faith in a future of grand proportions for the road.

Interest and Dividends.

The Boston and Providence, Boston and Worcester, Western, and Boston and Maine Railroad Companies have each declared semi-anaual dividends of 5 per cent., payable in Boston on the 1st of July. The Cape Cod Branch Co., $2 per share. The Eastern Railroad of Mass. and N. H., each 4 per cent. The New York and Harlem, 4 per cent. on both common and preferred stock. The New York and New Haven 5 per cent., both payable in New York. The Philadelphia, Wilmington and Baltimore Railroad Co., 4 per cent., payable in Philadelphia and Baltimore. The Central Railroad Co. of Georgia, 5 per cent. The Augusta and Savannah Railroad Co., 3½ per cent. The Western Union Telegraph Co., 2 per cent., and the Union Trust Co., 4 per cent.

Interest on the bonds of the Western Pacific R. R. Co., of California due June 1, will be paid by Geo. T. M. Davis, 47 Exchange Place, N. Y.

Interest on the 7 per cent. bonds of 1882 of the Central Pacific Railroad of California due July 1, will be paid by Eugene Kelly & Co., 24 Nassau st. Interest on the 1st mort. 6s, of 1896 will be paid by Fisk & Hatch, 5 Nassau st.

Interest on the debt of the State of Tennessee due July 1 will be paid at the Fourth National bank.

Interest on the stock of the State of Illinois due July 1 will be paid at the Am. Ex. Nat. Bank.

Two-thirds of the interest due July 1 on the Virginia State debt will be payable at the Treasury in Richmond on the 1st of July. A new coupon will be given for the remaining one-third.

☞ A corps of engineers are surveying the route for a new railroad from Sunbury to Wilkesbarre Penn.

Central Pacific Railroad.

The Sacramento *Union* says that during the past year the Central Pacific Railroad Company had their surveying parties running lines in all directions between the Wasatch Mountains on the east, the East Humboldt Mountains on the west, the Snake River on the north, and the Overland mail route on the south, in order to determine the best route for their railroad. Lines were run both north and south of Great Salt Lake. These surveys have demonstrated the great superiority of the route by the north end of the lake. One great obstacle to the location by the south end is the great salt mud plain, about seventy miles in width, which is destitute of fresh water and will require to be piled, and which is entirely avoided by the northern route.

Vineyard Sound Railroad.

Mr. E. N. Winslow, the Engineer, has completed his survey of the route of this road between Monument Station and Wood's Hole. The length of the route is about seventeen miles by the Falmouth village line, and about a mile less by the Quamquisset line. The estimate of cost (exclusive of equipments) by the former line is $345,000; and by the latter line $315,000. The equipment is estimated to cost $73,000; but this could be supplied by the Cape Cod Branch road.

Costa Rica Railroad.

We learn from Costa Rica that workmen are clearing the old road from Port Simon on the Atlantic towards San Jose, from undergrowth in preparation for the survey of the proposed railroad to connect the Atlantic with the Pacific, over that route.

☞ The Hunter's Point and Astoria Railroad has been commenced, and is progressing rapidly. At the election for officers Cornelius R. Trafford was chosen President, Henry S. Anable, Vice President; Wm. Radde, Treasurer, Frederick W. Blenekween, Secretary.

☞ The Western Pacific Railroad line from Sacramento to San Jose, Cal., has been sold to a number of prominent capitalists of that State. The negotiations, which had been pending for some time, were closed on the 13th inst.

☞ The earnings of the New Jersey Railroad and Transportation Co. for the first four months of 1867, were $499,551 66, against $508,234 14 for the corresponding period of the preceding year—a decrease of $8,682 48.

☞ Thomas W. Spencer has been elected Chief Engineer of the Utica, Chenango and Susquehanna Valley Railroad Company. He was formerly engineer of the Albany and Susquehanna Railroad Company.

WHAT IS A TRUST COMPANY?

A TRUST COMPANY IS THE SAFEST AND MOST CONSERVATIVE OF FINANCIAL INSTITUTIONS. A careful perusal of the following paragraphs will amply substantiate this proposition.

TRUST POWERS.

To receive money from individuals and corporations and allow such interest as may be agreed upon.

The Company is constituted by its Charter a Legal Depository of Money paid into Court.

To accept and execute all Trusts, in reference to both real and personal estate, committed to the Company by any person or corporation, or transferred to the Company by order of any of the Courts of Record, or by any Surrogate, etc., etc.

To act as Financial Agent of State and City Governments and of Counties, in the management of their business at the financial center of the country.

To act as Agent for foreign Banks, Bankers, Business Men, and Corporations, having business transactions in the City of New York.

GUARANTEES.

Among the Guarantees afforded by the Charter of this Company, are the following:

Every Director or Trustee must be a citizen of this State, and be a stockholder in the Company to the amount of five thousand dollars, at least.

No loan shall be made, directly or indirectly, to any trustee, officer, or employee of said Corporation.

It is not permitted to discount or deal in Commercial or Business Paper.

ON WHAT SECURITY MAY THIS COMPANY LOAN ITS DEPOSITS?

The National Trust Company can only invest the funds entrusted to it in United States Stocks or Stocks of the State of New York or other States, or of any City incorporated by the State of New York.

Therefore, it is adapted for the investment of funds which the public desire very safe investments for. Its Stock will probably pay dividends equal to, or greater than the interest on Government securities, and deposits made in this Company will earn as liberal a rate of Interest as is possible, taking into consideration the great security.

COUPON Government Bonds, the Secretary of the Treasury says, he will pay to any holder, whether stolen or not; therefore is it not wise to sell those COUPON Bonds and take the stock in the National Trust Company which will have its permanent investments in REGISTERED United States Bonds, State Stocks, and Bonds of Incorporated Cities of this State?

GENERAL REMARKS.

The success of other Trust Companies and the high prices of their stocks in the market are sufficient evidence of the profitable character of the business, and the Trustees feel justified in recommending the Stock of this Company to capitalists and others seeking a safe investment.

It is believed that the Stock of this Company is more desirable than that of most other moneyed corporations, and as safe as Government Securities; that the increase in the value of the stock will be more rapid than Government Bonds, and the dividends quite EQUAL to, if they do not EXCEED the interest of such Bonds.

The decision of the Secretary of the Treasury that he will pay COUPON Government Bonds to the holders whenever presented, without reference to any disputed ownership, will lead, in many cases, to the sale of such Bonds; This Company will take in exchange of its Stock any United States Bonds, 7-30 Treasury Notes, or Compound Interest Notes at the market price on the day of transfer.

OFFICERS FOR FIRST YEAR.

THE UNION PACIFIC RAILROAD CO.

Are now constructing a Railroad from

OMAHA, NEBRASKA,

westward towards the Pacific Ocean, making with its connections an unbroken line

ACROSS THE CONTINENT.

The Company now offer a limited amount of their

FIRST MORTGAGE BONDS

having thirty years to run, and bearing annual interest payable on the first day of January and July, in the City of New York, at the rate of

SIX PER CENT. IN GOLD,

AT

Ninety Cents on the Dollar.

This road was completed from Omaha 305 miles west on the 1st of January, 1867, and is fully equipped, and trains are regularly running over it. The Company has now on hand sufficient iron, ties, etc., to finish the remaining portion to the eastern base of the Rocky Mountains, 212 miles, which is under contract to be done September 1st of this year, and it is expected that the entire road will be in running order from Omaha to its western connection with the Central Pacific, now being rapidly built eastward from Sacramento, Cal., during 1870.

Means of the Company.

Estimating the distance to be built by the Union Pacific to be 1,565 miles, the United States Government issues its Six per cent. Thirty-year Bonds to the Company as the road is finished at the average rate of about $28,250 per mile amounting to $44,208,000.

The Company is also permitted to issue its own First Mortgage Bonds to an equal amount, and at the same time, which BY SPECIAL ACT OF CONGRESS ARE MADE A FIRST MORTGAGE ON THE ENTIRE LINE, the bonds of the United States *being subordinate to them.*

The Government makes a donation of 12,800 acres of land to the mile, amounting to 20,032,000 acres, estimated to be worth $30,000,000, making the total resources, exclusive of the capital, $118,416,000; but the full value of the lands cannot now be realized.

The authorized Capital Stock of the Company is one hundred million dollars, of which five millions have already been paid in, and of which it is not supposed that more than twenty-five millions at most will be required.

The cost of the road is estimated by competent engineers to be about one hundred million dollars, exclusive of equipment.

Prospects for Business.

The railroad connection between Omaha and the East is now complete, and the earnings of the Union Pacific on the sections already finished for the month of May were $361,782. These sectional earnings as the road progresses will much more than pay the interest on the Company's bonds, and the through business over the only line of railroad between the Atlantic and Pacific must be immense.

Value and Security of the Bonds.

The Company respectfully submit, that the above statement of facts fully demonstrates the security of their Bonds, and as additional proof they would suggest that the Bonds now offered are less than ten million dollars on 517 miles of road, on which over twenty million dollars have already been expended;—on 330 miles of this road the cars are now running, and the remaining 187 miles are nearly completed.

At the present rate of premium on gold these bonds pay an annual interest on the present cost of

Nine Per Cent.,

and it is believed that on the completion of the road, like the Government Bonds, they will go above par. The Company intend to sell but a limited amount at the present low rate and retain the right to advance the price at their option.

Subscriptions will be received in New York by the CONTINENTAL NATIONAL BANK, No. 7 Nassau St., CLARK, DODGE & CO., BANKERS, 51 Wall St., JOHN J. CISCO & SON, BANKERS, No. 33 Wall St., and by BANKS AND BANKERS generally throughout the United States, of whom maps and descriptive pamphlets may be obtained. They will also be sent by mail from the Company's Office, No. 20 Nassau Street, New York, on application. Subscribers will select their own Agents in whom they have confidence, who alone will be responsible to them for the safe delivery of the bonds.

JOHN J. CISCO, *Treasurer,*

PLASTIC SLATE

FOR

Roofing & Other Purposes.

The process of reconstructing Slate Stone from a disintegrated state was

PATENTED FEBRUARY 21st, 1865.

It is a combination of

Pulverized Slate and Viscous Matter,

(the latter possessing qualities of geological and chemical affinity for the former,) and is a development of one of the simple but unalterable tendencies of nature.

As a Roofing Material it Stands Unrivalled.

A mastic—it adapts itself to every shape and slope. Non-combustible, impervious, non-expansive, and undecaying.

Frost does not Crack nor Heat Dissolve it.

The only roofing material ever discovered that will resist the action of the elements as long as the structure it protects. Being susceptible of little, if any wear, from exposure, and

Perfectly Fire-Proof.

It is unequalled as a coating for Railroad and Farm Buildings, Fences, Bridges, bottoms of Vessels, Vaults, etc.

FOR SALE

3 LOCOMOTIVES,

4-81-2 GAUGE,

All thoroughly REBUILT by one of the best makers in the country, and ready for immediate use.

1—Cylinders 14x22, Link Motion, 4-56 in. Drivers connected, Copper Flues, Weight about 24 tons; 8 wheeled Tender, 1800 gallons.

This Engine has always worked admirably; Steams freely with dry or green wood, works and wears perfectly smooth; Well springed and brassed all around. Proportions every way suited to power. A good and stylish model, all in excellent order.

2—Cylinders 15x20, Link Motion, 4-56 in. Drivers connected, Copper Flues, weight about 23 tons, 8 wheeled tender, 1,800 gallons.

Is a smart smooth working Engine, suitable for any work; has a good record throughout.

3—Cylinders 15x20 Hook Motion, 4-66 in. Drivers connected, Copper Flues, weight about 24 tons; Tender, 8 wheeled.

Every way perfectly sound, well brassed and springed up. All in fine working condition.

These Engines will be sold VERY CHEAP to close a transaction, and are GREAT BARGAINS to any company wanting this sized Engine.

PROPOSALS FOR WASHINGTON STREET TUNNEL.

OFFICE OF THE BOARD OF PUBLIC WORKS,
CHICAGO, June 1, 1867.

Sealed Proposals will be received by the Board of Public Works, at their office, until 11 a. m. Saturday, June 22, for the construction of the Tunnel under the South Branch of Chicago river, at Washington street, according to plans and specifications on file at said office.

Proposals will also be received for constructing said work not only according to the plans and specifications filed here, but also in any other manner, the bidder to furnish his own plans and specifications.

Proposals must be addressed to the Board of Public Works, indorsed "Proposal for Washington street Tunnel," and be accompanied with the usual $200 bond, with sureties, to be approved by the Board.

The Board reserve the right to reject any bid not in accordance with the conditions of this advertisement, or to reject all bids, and no proposal will be accepted unless the party offering it shall give evidence satisfactory to the Board that he has the necessary skill, experience, energy, and ability for doing the work, is trustworthy, and has sufficient pecuniary resources.

New York, Saturday, June 29, 1867.

Boston and Worcester Railroad.

A special meeting of this corporation was held in Boston on the 19th inst., for the purpose of considering the question of the consolidation of this and the Western Railroad corporation, and taking such action as they shall deem expedient in reference thereto, and to the Act, passed by the last General Court, "to authorize the extension of the Western Railroad to the City of Boston, and for other purposes."

Resolutions were offered by Hon Wm. Brigham agreeing to unite according to the act above referred to; also, that a committee be appointed with authority to endeavor to ascertain upon what terms such consolidation may be made, and either to refer the same, if ascertained, to the stockholders of this corporation, or to petition to the Supreme Judicial Court for the appointment of commissioners as provided by said act.

Mr. Crocker offered an amendment to the second part of the motion of Mr. Brigham directing the President and Directors to offer the entire property of this corporation to the Western Corporation for not less than $160 per share for stock of 50,000 shares.

Mr. Ellis said it seemed to him that consolidation is a foregone conclusion. In speaking of the resolutions, he said the members of the Western road desired to avoid the Supreme Court and the Commissioners. He believed Mr. Crocker's amendment to be the best of the two; but preferred that the settlement be made first. He then offered as an amendment to Mr. C.'s resolution, that a committee of three or five be appointed to confer with a committee to be appointed by the Western road to consider and report upon what terms they will purchase or unite with this road.

The clerk then read the act passed by the Legislature, and approved the 24th of last May.

Mr. Rand contended that under the provisions of the act the committee proposed by Mr. Ellis cannot be appointed. This corporation must first vote not to consolidate, before it proposes to sell its property.

Mr. Ellis said his motive in presenting his resolution was to prevent litigation. He then withdrew his substitute to Mr. Crocker's resolution.

A motion made by Mr. Rupp, to lay the first resolution of Mr. Brigham, to consolidate, on the table, was lost.

A stock vote was then taken on the resolution, with the following result: Whole number of shares represented, 8,794; 8,235 for consolidation, 559 against, and the resolution was declared adopted.

Pending the declaration of the above vote, a motion to ratify the vote passed May 28th, last, at the directors' meeting, "to increase the capital stock of this coporation in the sum of $500,000 to be divided into shares issuable for a sum not less than $100 each, and that the same be offered to the present holders of stock in the proportion of one share for every nine now held by them," &c., was unanimously passed.

The question then recurred upon the second resolution, presented by Mr. Brigham, appointing a committee to ascertain what terms of consolidation may be made, &c., and to report to the stockholders, or to petition the Supreme Court for the appointment of commissioners, &c.

Mr. Ellis then presented his resolution as a substitute. Mr. Crocker accepted the substitute in place of the one presented by himself. The resolution was rejected; and that presented by Mr. Brigham was adopted, it being amended so that the committee appointed shall consist of the President and Directors of the Boston and Worcester Railroad.

The resolution directing the President and Directors of the B. & W. R. R. to offer the entire property of that road to the Western R. R. corporation, at not less than $160 per share, for 50,000 shares, was referred to the Board of Directors.

Hon. Ginery Twitchell, the President of the road, briefly addressed the stockholders, after which the meeting adjourned without day.

Portland and Kennebec Railroad.

At a meeting of the directors of this company held at Portland on the 22d inst., it was voted that a dividend of three per cent. on all stock of record on the 1st of July next be declared, and paid on the 1st of August, 1867, at the office of the treasurer in Augusta. It is requested that all persons holding bonds or fractional parts of bonds return them as rapidly as possible to the treasurer of the road for conversion into stock, in order that they may participate in this dividend. The road has been in operation nearly twenty years and has never before paid a dividend. It is now in the hands of men who are able and determined to make it pay.

St. Louis, Alton and Terre Haute Railroad.

At the annual election of this company, held at St. Louis on the 13th inst., Charles Butler, Robert Bayard, Russell Sage, Samuel J. Tilden and Thomas Denny, of New York; W. H. Underwood, of Bellville, Ill.; John S. Hayward, of Hillsboro, Ill.; Levi Davis, Alton, Ill.; Anthony Thornton, Shelbyville, Ill.; George W. Parker, Charleston, Ill.; Carlos S. Greeley, St. Louis; M. M. Dill, Paris, Ill.; and Jacob H. Hager, Terre Haute, were elected directors. At a subsequent meeting of the Board Charles Butler, Esq., was re-elected president.

☞ The Jamestown and Franklin Railroad was formally opened on the 25th inst. Freight and passenger trains are now running regularly.

New York and New Haven Railroad.

The income of this company for the years ending March 31, 1866 and 1867, has been as follows:

	1866.	1867.
From passengers	$1,548,580 18	$1,612,638 25
" freight	340,017 79	333,381 99
" mails, expresses, extra baggage, etc.	93,614 75	122,239 81
	$1,982,212 72	$2,068,260 05
Expenses, viz:		
Transp. expenses	$469,689 31	$548,817 60
Repairs of road etc	385,485 84	324,798 60
" equipment.	221,712 39	247,339 54
Fuel, oil and waste	194,143 39	173,497 09
Haulage by horse-power	78,692 30	69,790 75
	$1,349,723 49	$1,364,243 58
Leaving as earnings on transportation	$632,489 25	$704,016 47

The resources for the past year, and the disposal of the same, have been as follows:

RESOURCES.

Cash on hand, April 1st, 1866	$407,051 80
Materials " " "	338,998 41
Proceeds of allotted stock	995,000 00
Increase of accounts payable	117,260 60
Earnings of transportation	704,016 47
	$2,562,327 28

PAYMENTS.

Coupons for the year	$129,120 00
Loss in operating "Canal Road,"	30,705 13
Dividends paid in May, 1866, and in January, 1867, 5 per cent. each, free of Government tax	550,000 00
Retired Bonds due Dec. 1st, 1866	901,000 00
Purchased Bonds, due Oct 1st, 1875	19,500 00
Equipment, viz: 2 new locomotives, 3 new mail cars, and 4 new freight cars; less 1 locomotive, disposed of	51,452 68
Real estate, viz: in New Haven, $25,587 50; in Bridgeport, $5,152 50.	30,740 00
Schuyler Fraud, additional settlements of spurious stock cases	64,540 29
Railroad, viz: new depots at Stamford and Norwalk; engine-houses at New Haven and Norwalk	21,508 54
Materials for the coming season	247,024 59
Cash on hand April 1st, 1867	516,736 05
	$2,562,327 28

The result of the year's operations has been as follows:

Receipts for transportation		$2,068,260 05
Expenses of transp	$1,364,243 58	
Coupons for the year.	129,120 00	
Loss, operating "Canal Road"	30,705 13	
		1,524,068 71
Leaving for net profits		$544,191 34

One dividend was paid in May last, free from Government Tax, of five per cent. on the capital, (then $5,000,000,) which had been earned in the preceding fiscal year, as shown in the report made last May; another dividend was paid in January last, free of Government Tax, of five per cent. on the present capital of $6,000,000, out of the past year's receipts; while the earnings since then, now on hand, are in like proportion for the next semi-annual dividend.

The expenses for the past year have not shown any favorable change worthy of note. As mentioned in our last report, the cost of labor still continues high, and is not likely to be reduced until the expenses of living are lessened. The item of taxes, also, is increased, having amounted to $141,150, as against $125,000 for the preceding year.

In our last report, you were informed that the case of Messrs. Ketchum and others, growing out of the Schuyler fraud, was ordered back from the Court of Appeals for a new trial; it has since been heard, but with a result similar to the other cases growing out of that fraud, and settlement of the same, amounting to $109,125 70, has been made, since the close of the present fiscal year. With a very trifling exception, (9 shares,) the above extinguishes all demands upon the company on account of that fraud.

The 7 per cent. bonds of the company, falling due in December last, the Board of Directors, under authority of law so to do, distributed new stock to retire the same; thereby increasing the capital of the company to six millions of dollars, ($6,000,000.)

There have passed over the road during the year 8,162 passenger trains, and 1,400 freight trains, with their usual regularity and safety. During the past eleven years, 14,350,706 passengers have been conveyed over this road without any accident to any train while on the New York and New Haven Railroad, that caused the loss of a single life or limb of any passenger, which should be satisfactory evidence to the stockholders and the public of careful management, and of the good condition of the road and its running machinery.

Two new engines have been added to the equipment during the year—one from Messrs Danforth, Cooke & Co., and the other from the Rogers' Locomotive and Machine Works, of Paterson, N. J. The mileage of engines has exceeded that of the previous year by 34,612 miles. The cost for fuel was 20.9 cents per mile run against 24.4 cents for the year previous. Two or three new engines will be required during the current year to do the work in a satisfactory manner. The company had under contract 39 new freight cars, to be delivered during the month of May.

During the year the company put down 68,800 cross-ties, 10,000 wrought iron chairs in place of cast iron ones removed, and 1,900 tons of rails, of which 50 tons were steel rails. The latter were placed on the track where the trains are run at a high rate of speed, and in the yard at New Haven where they are kept in almost constant use—and in both places, so far, they have proved to be far superior to iron rails.

The company had on hand for repairs, 51,500 cross-ties and had arranged for 2,000 tons of new rails, a portion of which had been delivered. This will insure the track being kept in good condition during the year. The bridges have been kept at all times in such condition as not to admit of a doubt as to their safety for the passage of trains.

The number of miles run by passenger trains during the year was 551,604; by freight trains, 109,150; by service trains, 16,089—total, 676,843. Number of passengers carried, 1,885,898; do., carried one mile, 65,211,107. Tons of freight moved, 127,765; do., moved one mile, 7,359,912. Of the passengers carried, 1,381,375½ were local, and 504,522½ to and from other roads; 674,795 were passengers over Harlem road; 422,636 commuters over do., and 788,467 beyond do. Of the freight moved, 50,862 tons were local and 76,903 to and from other roads.

The equipment consists of 35 locomotives, 77 passenger cars, 24 mail and baggage, and 395 freight cars—of which 6 locomotives, 6 passenger, 3 baggage and mail, and 150 freight cars are used to operate the Canal road.

CONDENSED BALANCE SHEET.

Railroad; including the franchise, right of way, grading, masonry, bridging, fencing, superstructure, iron, station-houses, shops, fixtures, furniture, machinery, engineering, agencies, interest, discount on bonds, &c		$4,677,811 00

Superintendent.—JAMES H. HOYT.

Treasurer.—WILLIAM BEMENT.

Secretary.—E. S. ABERNETHY.

New Jersey Railroad and Transp. Co.

The annual meeting of the stockholders of this corporation was held at Jersey City on the 5th inst., at which the Report of the Directors for the year ending December 31, 1866, was presented. We have already published the Annual Statement showing the business of the road during the year, and the financial condition of the company at its close. The following will, however, be found of interest as containing facts in relation to the consolidation with the Camden and Amboy Railroad Company and the Delaware and Raritan Canal Company:

The directors of the New Jersey Railroad and Transportation Company submit to the stockholders the report of the financial position of the company on the 1st January, 1867, and the operations of the road for the preceding year, as presented by them to the Legislature of the State.

As was anticipated, the receipts of the road fell off to a considerable extent upon the cessation of Government transportation, the decrease, as compared with the receipts of the previous year, amounting to $105,118 90, but as the Government business yielded but a slight profit, nearly a corresponding reduction, amounting to $90,810 32, was made in the expenses, and a further reduction in interest and taxes, amounting to $3,084 27; so that the net profits for the year, to be appropriated to dividend account, were but $11,224 31 less than for 1865.

The amount paid to the stockholders as dividends, was $499,995—$30,107 50 more than for 1865, owing to the fact that the increased capital

received but one dividend of five per cent. in 1865, while in 1866 two dividends of five per cent. were paid thereon.

The tax paid to the State, together with the Government tax, amounted to $137,327 40, an amount $7,627 45 less than that paid in 1865, owing to the reduction in receipts upon which transit duty is paid.

The Treasurer's statement of the receipts for the first four months of the years 1866 and 1867 is presented herewith, showing a decrease in gross receipts of $8,682 48. The expenses have been reduced an amount more than sufficient to overcome the decrease in receipts. The net earnings are slightly increased over those of last year for the same period.

The equipment of the road is in good condition and the road bed in good order; some of the rails purchased during the war proved to be of inferior quality; these have been taken up and relaid with iron that appears to be more durable.

A few tons of Bessemer steel rails were laid at the most severe curves of the road, which have so well stood the test to which they were put that an order was given for three hundred tons to be laid this year through Bergen Cut; and it is probable that steel rails will be gradually laid the entire length of the road; the greater durability of these rails overcoming the objection to their increased cost.

Negotiations were commenced in the early part of the year between the Camden and Amboy Railroad Company and the Delaware and Raritan Canal Company and this company, for a closer union of the respective interests of the companies. After frequent and protracted meetings, an agreement was entered into consolidating all of the property and interests of the companies named, which was approved by the Legislature of the State, and assented to by more than two-thirds (the legal requirement) of the stockholders of the companies. By the terms of this agreement, which is annexed, the capital of this company is to be increased 25 per cent., or $1,250,000 to be apportioned, to the stockholders in the manner more fully set forth in a circular that has already been communicated to the stockholders.

By the consolidation the property of this company is enhanced in value, by enabling its advantages as the terminus of the great southern and western business to be more fully developed, and the property of the other named companies also becomes of more value, by obtaining through this company a first class avenue for their business pressing for rapid communication to and from New York.

Arrangements have already been completed as to the passenger traffic with nearly all the companies in the South, with whom we had business relations previous to the rebellion, and we are now having a considerable business from that source.

The completion of the connecting road at Philadelphia places us in close alliance with the Pennsylvania Central Railroad, and with that company our road forms one of the four great trunk lines to the West, and may reasonably expect a large increase both in passengers and freight receipts from that section.

These sources of income, though in a measure open to us before, are now much more important to us since the consolidation, as the trade can be classified and proper directions given to each class of business so as to insure its being performed in the most satisfactory and profitable manner.

The foresight of the company in securing property at their termini in Jersey City and New York, is now apparent, and the property in New York, at Desbrosses street and Cortlandt street, and that held in the name of the joint companies (all devoted to the interests of the consolidation,) give us precedence over any other railroad company whose terminus is New York. The position we occupy will secure to us such an accession to our business as will render ample returns for all judicious outlays to accommodate it. The directors are confident as to the wisdom of the consolidation, and feel assured that all parties in interest will be fully satisfied with the results therefrom.

You are respectfully referred to the "First Joint Report of the Associated Companies," presented herewith, for a complete exhibit of all the property and interests of the consolidated companies.

It is proper to express our gratitude that we are still permitted to report an exemption from fatal accidents to all persons who have committed themselves to the care of the company and conformed to our rules, and to acknowledge the fidelity of the employes in the discharge of their duties.

By order of the Board,

A. L. DENNIS, President.

F. Wolcott Jackson, General Superintendent.

Jersey City, June 5, 1867.

Providence and Worcester Railroad.

The earnings and expenses of this road for the years ending November 30, 1865 and 1866, have been as follows:

Earnings:	1865.	1866.
From passengers	$230,602 19	$270,602 36
" merchandise	299,723 81	415,540 56
" mails	5,227 75	5,216 20
" rents	3,614 70	3,885 28
" express	4,827 00	5,902 25
	$543,995 45	$701,146 65
Expenses, viz:		
Fuel	$52,182 37	$58,628 10
Oil	6,299 24	8,684 26
Maintenance of way	85,590 80	126,623 91
Repairs of cars	55,326 98	105,336 72
" locomotives	21,115 56	45,838 00
Freight department	53,337 21	66,775 35
Passenger "	29,317 31	31,102 84
Miscellaneous	100,696 65	108,258 58
	$403,866 12	$551,247 76
Net earnings	$140,129 33	$149,898 89

The gross earnings of 1866, as compared with those of 1865, show an increase of $157,151 20; with an increase in expenses of $147,381 64—making an increase in net earnings of $9,769 56. In their report for 1866, the directors say:

The accounts presented herewith show an increase of more than 28 per cent. in the business of the road over that of the last year, whilst the business of that year exceeded considerably that of any previous year. To accommodate this increase, very large additions have been made to the equipment of the road, consisting in part of four new and first class locomotives of great power, which have been purchased and placed on the road, two of which were built by William Mason, of Taunton, and two by the Rhode Island Locomotive Works, of Providence; and also, four new and elegant passenger cars and forty commodious merchandise cars. There have, also, been turned out from the company's work shop, ninety coal cars and twenty-five lumber cars, and the shops are now working to their full capacity in building a still larger number. The balance sheet will show a surplus of nearly $10,000 carried to the credit of construction.

The double track has been extended, during the year, from the junction at Central Falls to Lonsdale, and the grading is now being done for a continuation of the same, from Lonsdale to the State line at Blackstone, which will be carried through as fast as the interests of the road will warrant.

In order to pay promptly for this large outlay, a sale has been made of five hundred shares of the capital stock of the company, and a loan effected with the Providence Institution for Savings, which loan will be paid at its maturity, in March next, when the road will again be free from indebtedness of any kind.

In addition to the forenamed outlays, two bridges have been rebuilt; one near Woonsocket and one near Quinsigamond. The station house at the Worcester Junction and at Whitinsville have been completed and paid for. A largely increased quantity of new and re-rolled iron and sleepers have been laid down, and the road, bridges and fences, throughout the whole line, have been kept in the best condition.

A new switching engine will be finished the present week, at the Rhode Island Locomotive Works, for the use of the road, in drawing coal and other merchandise from the wharves, which, it is hoped, will prove far less annoying to the public than the long strings of horses that are now used for that purpose.

While it is to be regretted that the receipts of so many of the railroads show a falling off since the closing of the war, it is a gratifying fact that the receipts of this road have steadily increased with the returning prosperity of the country.

The income account of the company for the year ending November 30, 1866, is as follows:

Net earnings as above		$149,898 89
Cash received from sales of stock of this company	$50,000 00	
Premium on sales	10,005 75	
		60,005 75
Materials on hand Nov. 30, 1865		45,974 48
Notes on hand Nov. 30, 1865		10,746 00
Cash on hand Nov. 30, 1865		45,707 94
Received for real estate sold		100 00
Received for the company's note		50,000 00
Total		$362,433 36
Accounted for as follows:		
Purchase of real estate		$8,466 00
New locomotives		47,519 68
New cars		46,225 00
Dividend payable Jan. 1, 1866		68,000 00
Dividend payable July 1, 1866		70,000 00
Previous dividends paid		936 00
Materials on hand November 30, 1866		58,668 93
Cash and cash items		62,617 45
Total, as above		$362,433 06

The equipment of the road consists of 17 locomotives, 16 first-class and 4 second-class passenger cars; 129 8-wheel and 46 4-wheel merchandize cars; 73 8-wheel lumber cars; and 345 4-wheel coal cars.

Miles run by passenger trains, 136,990; by freight trains, 132,327; by other trains, 23,863—total miles run, 293,180. Number of passengers carried, 1,081,575; do., carried one mile, 9,787,563. Tons of merchandize carried, 295,712; do., carried one mile, 8,964,525. Length of road, 43.41 miles. Length of single track, 35.41 miles. Length of double track, 8 miles. Length of branches, 1 mile. Aggregate length of sidings, 9½ miles. Weight of rail, 56 to 63 pounds.

Tonnage of New York.

The number of vessels arriving and departing from the port of New York, together with the tonnage and seamen employed during the first quarter of the year 1867, is officially stated as follows:

Entered at New York from foreign ports during the three months ending March 31, 1867:

	No. of Vessels.	Tonnage.	No. of Seamen.
American vessels	310	189,224	5,908
Foreign vessels	507	357,608	12,852
Total	817	546,832	18,760
Same time in 1866	927	595,545	20,511
" 1865	881	415,855	14 522
" 1864	927	483,256	17,614
" 1863	1,063	522,117	17,255
" 1862	1,246	660,643	20,368
" 1861	965	458,803	15,347
" 1860	808	418,998	14,731

The following is a comparative statement of arrivals of American and Foreign vessels during the first three months of 1861 and 1867:

	American.		Foreign.	
	Vessels.	Tons.	Vessels.	Tons.
1861	680	317,391	285	141,411
1867	310	189,224	507	357,608

Cleared at New York for foreign ports during the three months ending March 31, 1867:

	No. of Vessels.	Tonnage.	No. of Seamen.
American vessels	332	201,948	6,423
Foreign vessels	555	355,801	12,516
Total	887	557,749	18,939
Same time in 1866	948	564,233	20,057
" 1865	834	413,629	14,079
" 1864	1,002	527,040	17,360
" 1863	1,147	612,030	18,632
" 1862	1,093	547,860	17,535
" 1861	966	418,553	16,207
" 1860	709	356,398	13,048

Coastwise commerce of New York during the first three months of each year since 1860:

	Entered Coastwise.		Cleared Coastwise.	
	No. of Vessels.	Tons.	No. of Vessels.	Tons.
1860	376	125,659	1,138	429,757
1861	296	104,554	844	338,677
1862	156	48,234	159	152,517
1863	423	178,552	734	215,978
1864	315	149,921	696	227,484
1865	286	136,341	532	224,841
1866	566	295,283	1,103	527,222
1867	510	325,074	752	419,840

During the first three months of last year the value shipped between New York and foreign ports, in American vessels, amounted to $30,745,607, and the value in foreign vessels to $122,002,445. During the first quarter of this year the shipments by American vessels were $30,302,574, and by foreign vessels $93,783,879.

The Canal Railroad.

A correspondent of the New Haven *Courier* alludes to two very important railroad connections. The first is the extension of the Canal Railroad from Northampton, through Florence and Williamsburg to North Adams, Mass. The second is an extension of the Collinsville branch of the Canal road, through Litchfield and Berkshire Counties, to Lee, in Massachusetts, with a contemplated connection with the railroads to Bennington and Montreal. Several towns have voted subscriptions to the Lee and New Haven Railroad, and the State of Massachusetts has voted a loan of $3,000,000 to the Williamsburg and North Adams project,

Vermont and Massachusetts Railroad.

The following is a comparative statement of the earnings and expenses of this road for the years ending November 30, 1865 and 1866:

Earnings:	1865.	1866.
From passengers	$136,889 03	$146,682 45
From freight	198,300 78	233,391 30
From rent of joint use of road from Fitchburg to Ashburnham, and of engine house, water, station buildings, and service performed at Fitchburg and other stations	39,000 00	39,000 00
From mails	6,000 00	6,000 00
From express	4,586 33	5,487 54
From rents	2,987 71	3,984 83
From tolls	991 55	973 75
From miscellaneous	330 39	445 40
	$390,085 79	$435,965 27
Expenses:		
Repairs of road	$40,691 89	$46,096 65
" buildings	13,327 04	28,599 95
" locomotives	20,995 81	15,819 17
" cars	26,004 00	31,740 51
" bridges	4,247 53	4,123 27
Passenger department	22,005 72	20,876 25
Freight "	25,500 24	26,550 16
Switchmen, watchmen & flagmen	4,777 29	5,246 28
Oil and waste	6,192 27	4,878 70
Fuel	25,513 29	27,266 72
Tools	773 29	4,418 18
Re-rolling and repairing rails	28,528 39	27,575 33
Rent to Conn. River R.R.	1,500 00	1,500 00
Loss and damage	3,083 93	2,229 16
Taxes and insurance	3,127 02	4,165 66
Salaries	7,483 33	7,550 00
United States tax	8,610 76	9,724 94
State tax	16,488 43	14 977 41
All other expenses	8,838 51	11,983 29
	$267,688 75	$295,321 63
Balance of interest	31,167 19	28,824 14
	$298,855 94	$324,145 77
Net earnings	$91,229 85	$111,819 50

The gross earnings of 1866, as compared with 1865, show an increase of $45,879 48; with an increase in expenses of $25,289 83—making the increase in net earnings $20,589 65. The report says:

In September the New London Northern Railroad Company completed their extension from Amherst, forming a connection with our road at Grout's Corner. We anticipate mutual benefits from the connection.

We have built two new depots during the year, one at Grout's Corner, and the other at Ashburnham, in place of a depot burnt.

We have also built a new car house and paint shop, a new stationary engine room, entirely of brick and iron, a new, very large wood-workers' shop of brick with slated roof, and filled the same with new tools and machinery. We have also procured a new stationary engine and force pump. All these structures are at Fitchburg, and replace those lost by fire the previous year. These are much more expensive and valuable than those burnt, and all the extra cost thereof, over insurance, amounting to over $12,000, was charged to running expenses. Our buildings at Fitchburg now furnish us with superior accommodations.

During the past three years we have had several losses by fire, but in no case exhausting our insurance policies.

The public way through our depot grounds at Brattleboro' has been discontinued and a new way made by the town over the hill in place thereof. We contributed $2,325 toward making this change, which besides being beneficial to the public, relieves us from risks to travellers attendant upon using the old way through our grounds, and from the expense of maintaining a crossing.

We have added to our rolling stock new cars of the most modern style at a cost of $9,578, and charged the same to running expenses, in addition to keeping all our rolling stock in good condition.

The questions arising on the subject of the interest scrip are yet unsettled. The parties who have been unsuccessfully seeking to establish the validity of these claims in the Courts in Massachusetts, have now commenced a suit in equity in Vermont, where the question whether these claims are of any validity or not, and whether they can be legally paid, will probably be settled.

Several gentlemen of means, energy and skill have united in rebuilding Turner's Falls Dam (in Montague, on the Connecticut River,) with a view of utilizing that valuable water power. It is expected that manufacturing will ere long be commenced there, laying the foundation of a new manufacturing city. It will be for the interest of our road to furnish the new village with railroad facilities as soon as its growth will require and warrant it.

Our road is in good condition throughout, and we have been prosperous during the year, although the expenses of operating so long a road for our limited business have been large. There has been a continued steady increase of our business from local growth, the net amount of this year, notwithstanding our heavy taxation and great expenses, exceeding that of any other year, being after paying interest $111,819 50. We expect a like continued steady increase from the ordinary growth of business along our line. We paid our first dividend in January last, $2 per share, and a dividend in July and January current, each of $1.50 per share.

During the year we have obtained authority from the Supreme Judicial Court to cancel all our bonds in the sinking fund July 1, 1865, and the old first mortgage bonds, which were held outstanding as collateral to the present bonds. This was done in pursuance of an agreement made with the bondholders, stamped on the bonds, at the time of their extension. In pursuance of this decree, the old bonds held by John Rogers and J. A. Davis as collateral were delivered up and cancelled, and the mortgage running to Trustees dated July 11, 1849, was discharged by J. C. Howe, surviving Trustee thereof. The Trustees of the present mortgage, securing the extended bonds, also delivered up $146,000 of our bonds held in the sinking fund, and they have been destroyed. Our mortgage debt extended to July 1, 1883, and including bonds now owned by the company amounted Nov. 30, to $550,000, and bonds past due and not presented for payment $1,650. Of the latter $1,205 have since been paid.

The Commonwealth, through the Tunnel Commissioners, has contracted for the construction of the Troy and Greenfield Railroad from Greenfield to the Tunnel, and rapid progress is being made in the work. The Fitchburg Railroad Co. and our company have joined in agreeing to take a lease of the road when completed to Shelburne Falls, and of the balance when completed to the Tunnel, at what is considered a reasonable rent for all parties under the circumstances. We have no doubt, in addition to the local business of the line, we can make this new route to the West exceedingly convenient and attractive during the summer months to travellers. The valley of the Deerfield River and the Hoosac Mountain in themselves present attractions to the pleasure traveller hardly equalled, and we think that we can arrange speedy and comfortable conveyances over the mountain between the Troy and Greenfield Railroad and that at North Adams, so that the passage this way may be made as expeditiously as the business may desire. Thus the prospects of our great through line seem to be more and more promising. When the Tunnel is completed, and its completion is now considered a settled fact, the hopes of the projectors of this line will be realized, and they will be then well recompensed

for their efforts in the triumphant success of this great public improvement.

Boston & Worcester & Western Railroads.

Persons interested in the stocks of these two roads, now about to be consolidated, are beginning to study with new interest the respective values of the two properties. The stock dividend of 20,000 shares, or about 30 per cent., by the management of the Western railroad, rather took the public and stockholders by surprise. And though we proved by a few statistics, several days before it was announced, how practicable and justifiable it was, we had no idea that the directors contemplated such a proceeding at present. The division carried the value of the stock in the market at once up to 170 and beyond, and indeed has now taken it altogether out of the market, for the owners are beginning to think that it may be worth even much more, and that it is not well to sell it or even put a price on it until its real and comparative values in the new arrangement are more fully developed.

The capital stock of the Western road, under the increase, amounts to $8,710,000. The net indebtedness, adding a million dollars for the possible chance of having to pay the foreign gold debt with depreciated currency, is but a million and a half dollars. Put this with the capital, and we have a total of $10,250,000, which is a million and three-quarters less than the actual cost of the road and equipment, last reported as $11,967,327. The directors could, therefore, most justifiably have divided a million and three-quarters more of stock to have equalized the capital and debt with the cost of their property. Now as to the capacity of the road to pay income on the enlarged capital: The net income of the road for 1866 was $1,406,790, which is equal to nearly 13 per cent. upon the new capital and the net debt added, or 11 7-10 per cent. on the cost of road and equipments. These are surely assuring and satisfactory results.

Apply the same arithmetic to the Worcester road, and the superior value still of the Western stock becomes evident. The cost of that road is $4,500,000; its net profits last year were $490,201, which is but 10 8-10 per cent. But the capital stock of the road has now been increased to five millions, and the net profits of last year divided upon that, yield but 9 4-5 per cent. We give these facts, not in the interest of one party or the other, neither to depreciate one stock nor exaggerate the other, but for the enlightenment of the stockholders of both corporations, and the benefit of the whole public, which certainly, through the commonwealth's large ownership in the Western road, is really a party to the negotiations now going on. If the roads are put together at their cost—$11,967,327 for the Western and $4,500,000 for the Worcester—surely the stockholders of the latter will have no reason to complain. Their consolidated stock will be more valuable than their present. To unite them on the basis of their capitals and net debts—or $10,250,000 for the Western and $5,000,000 for the Worcester—would be too generous on the part of the Western owners, for it would be to put a 13 per cent. property on a par with a 9 4 5 per cent. one. The Worcester capital, it will be perceived, represents its whole cost and more, something for appreciation, while the enlarged Western capital increased by its net debt, is still a million and three-quarters below its cost.

We ought to add that the Western managers do not admit the justice of adding a million to their foreign indebtedness to meet the present high rate of exchange, and that they guarantee as individuals to pay the whole indebtedness when it matures, if they can be guaranteed the stock that it will or should then represent at par. But, as we said, we are not presenting their cause, but the cause of the community; and, as they seem to have the better stock by all odds, we prefer to charge them in the account or all possible contingencies. The Worcester road has the advantage of a clean bill of accounts, with no debts, and its whole cost and obligations put into capital. Were the Western so far along in its settlements, we have no doubt its stock would stand still better in the comparison than it now does.—*Springfield (Mass.) Republican.*

Taxes on the Manufacture of Locomotives, Cars, Etc.

The following letter from the Commissioner of Internal Revenue, addressed to W. S. C. Otis, Esq., of Cleveland, Ohio, contains important information relative to the mode of taxing cars, etc. Writing from Washington, under date of May 29, 1867, Mr. Rollins says:

The act of July 13, 1866, exempts from taxation repairs of articles of all kinds. This exemption leaves the question of taxation of cars precisely where it was prior to the act of June 30, 1864, with these exceptions: The present law exempts car wheels from taxation; but prior to June 30, 1864, the taxes paid on car wheels were allowed to be deducted from the tax assessed on the finished car, and the present law imposes a tax of five per cent. *ad valorem*, while the act of July, 1862, imposed only three per cent. *ad valorem*.

Under the act of July, 1862, this office ruled that every new car or locomotive must be regarded as a manufacture, and taxable as such, even though it be made to take the place of a car or locomotive which is worn out and thrown aside.

An old car or locomotive would not be liable to an *ad valorem* tax on account of any repairs made thereon, but all articles used in such repairs, or new parts furnished, which have in themselves a commercial value; and which would be liable to tax if sold or removed from the place of manufacture for sale, are equally liable to tax when made for and used in the repairs of old cars and engines.

The ruling is believed to have been strictly in accordance with the law in force at that time, and I know of no reason why it is not entirely and strictly in accordance with the provision of the law as now in force. It is believed to be impracticable to determine what is new work, or what is repairs, by adopting as a rule the relative percentage which the new and the old bear to the finished car or engine.

Repairs, however great, which do not destroy the identity of the article or thing repaired, are still repairs, and not taxable; but when a car or engine is substantially new, though containing some part or pieces which have been more or less used in other cars or engines, they are to be taxed on their entire value, less such deductions as the law allows; car bodies and trucks, when made by different persons, firms, or companies, are considered as separate and distinct manufactures, and each is to be assessed upon them when put together, unless they shall be increased in value by painting, varnishing, or being otherwise more completely finished, or fitted for use or sale, in which event they will be liable to an additional tax of five per cent. on the amount of increased value.

When a new car body is made for an old truck, or new trucks for an old car body, the car body or trucks are to be taxed as new work.

Cars which are reconstructed by placing bodies which have been in use, and on which a tax has been paid, and trucks which have, in like manner, been in use and subject to tax, are not liable to an additional tax, and trucks which are reconstructed from material selected from two or more trucks which have been in use will not be considered "new manufactures," but repairs only.

Wheels and other castings of iron, copper, or brass, which are in themselves separate and distinct manufactures, made for cars or used in the repairs of cars prior to March 2, 1867, were not exempted from tax, but by the act of March 2, 1867, all castings for cars are exempt, whether used in the construction of new work or in repairs. Railroad companies are not required to pay a special tax for any machine shops where only repairs are made.

Central Pacific Railroad.

The Sacramento *Bee* says that the "railroad company prosecuted very extensive surveys during the year 1866, to determine the best location for their railroad from the Big Bend of the Truckee to the Wahsatch Mountains, east of Salt Lake. These surveys demonstrated the fact that the only practicable line lay up the Humboldt river. The company therefore located their line, commencing at the Big Bend of the Truckee thence to Humboldt Lake, thence up the Humboldt river to the Wells, near the head of that stream, at which point the East Humboldt Mountains terminate, and the line can be located easily to the Wahsatch Mountains, either by the north or south end of Great Salt Lake. Under the law, this location required the approval of the Secretary of the Interior. The maps, profiles and reports were laid before him, and after a full examination he has finally approved it. This enables the Central Pacific Company to proceed early with the necessary location surveys, and to prosecute the work to the Humboldt Wells without delay. The distance from the State line to the Humboldt Wells is three hundred and seventy miles."

Union Railroad.

The Baltimore City Councils have passed the ordinance to endorse and guarantee the first mortgage bonds of the Union Railroad Company of Baltimore, from Owing's Mills to Canton. This road has not yet been surveyed or located. As projected, it will pass through the northern part of Druid Hill Park, which will probably require a tunnel, and thence along the eastern portion of the park, immediately alongside of the Northern Central Railway, then across the latter road, over Jones's Falls, as well as the Falls road pike, with a bridge, which, if built in the least expensive manner to be substantial for railroads, will cost at the least estimate $50,000. The road built, as indicated, will cost, with the right of way, at least $1,000,000.

American Railroad Journal.

Saturday, June 29, 1867.

Stock Exchange and Money Market.

Money has been much more abundant in the open market, since our last. The Government disbursements, through the local office, have been extensive, chiefly on account of purchases of maturing Seven-thirties, which have been over six millions for the week. These disbursements of the Sub-Treasury have been in excess of the receipts of the office, and there has been, consequently, a reduction of the cash balance there. The balance on Wednesday morning was $130,116,010, against $133,506,897 the preceding Wednesday, showing a reduction of $3,390,887 during the week. There has been a steady influx of currency from the interior, which has added to the available supply of capital seeking temporary employment in a secure and lucrative form. The speculative demand for accommodation has been rather brisker, but it has not kept pace with the increasing offerings, and call loan rates have receded a point, or to 4@5 per cent. on the public funds, and 5@6 per cent. on other prime stock collaterals. Large balances, which could not be advantageously placed, through private channels, have been invested in the National interest bearing obligations, which have advanced; yet, at the going figures, they pay a handsome and reliable percentage of interest. Much of the demand for the public funds has been from city and country savings banks, which are providing employment for the profits of their last half year's business. There has been a very moderate offering of desirable grades of commercial paper, selections from which have been in request at 6@7, generally at 6½@7 per cent. per annum. Very little partiality has been shown for lower grades, and good to fair names have met a slow sale at from 7½@9 per cent. per annum. Of inferior grades, the supply has been comparatively large and at high and tempting figures, but there has been no call of moment for them. The city banks gained very rapidly in legal tender reserve, through the past week, while they were obliged to contract their loans and circulation. Their specie and deposit lines were cut down, considerably; but the current, this week, is said to be in the opposite direction. A comparison of the last two weekly statements of the city banks shows a decrease of $3,256,804 in the specie reserve, and $810,593 in the deposits, with a reduction of $2,597,983 in the loans, and $73,933 in the circulation, and an increase of $4,991,898 in the legal tender reserve. The specie reserve of the banks is now $9,399,585, against $8,504,096 same time last year. The city bank deposits are now $179,477,170, against $201,969,288 week ending June 23, 1866. The legal tender reserve amounts to $62,816,192, against $80,840,518 same time last year. The circulation now stands at $33,633,171, against $26,585,394 same time last year. The loans are now $243,640,477, against $248,436,808 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $73,740,134 a day, against a daily average of $76,828,100 the preceding week, and $76,955,703 the week ending with June 8. The current week's exchanges average $75,709,811 a day.

The *pro rata* of all the legal tender reserve of the city banks to circulation and deposits, on their last weekly exhibit, was nearly 34 per cent. and $19,000,000 in amount above the required 25 per cent. average.

National Bank notes to the amount of $291,370 were issued last week, making the total issue to 1,671 banks thus far, as given in our last, $303,303,826, against $282,555,440 at the close of the last fiscal year, June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $4,911,947, leaving, with the existing 1,650 banks, (having an aggregate capital of $422,913,861,) an actual circulation at this date, of $298,391,870. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $340,544,500; and for the public deposits, $39,162,950—making a total of $379,647,450. The Treasury Department last week redeemed and destroyed $519,600 of worn and mutilated fractional currency, and issued $291,370 worth of new.

The Philadelphia Bank movement the past week shows a decrease in loans, of $223,578; an increase of $5,047 in specie; a decrease in legal tenders of $335,586; an increase in deposits of $159,010, and $596,016 in circulation. The Bank Clearings show a decrease of $483,906, and the balances, of $59,785.

The U. S. Sub-Treasury receipts, week ending with June 22, were $12,446,169, including $2,039,-064 from customs duties; payments, $14,932,696; balance at the close of the week, $132,129,745, against $134,616,271, at the close of the preceding week, showing a decrease of $2,486,526. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $2,357,266 including $269,426 from customs, and payments, $5,342,673; on Tuesday, receipts, $2,189,573; payments, $1,217,902. The balance at the close of business on Tuesday stood at $139,116,010, against $133,506,897 a week previous.

The cash balance in the hands of the United States Assistant Treasurer at Boston, at the close of business on Saturday, was $7,830,211 47, being an increase for the week of $983,597 53. Of this balance, $6,218,657 45 was in coin, and $1,611,-554 02 in currency. The custom receipts for the week were $353,800. The amount paid for interest on the Seven-Thirties, which became due on the 15th inst., was $953,000. The value of the exports from Boston for the week ending June 21, including specie, was $531,472, against $219,295 for the corresponding week in 1866.

Government revenues have been fair in amount, since our last, a little less liberal in the excise, and a little more prolific in the customs line. The excises, last week, yielded about $3,500,000, against $4,169,549 the preceding week; customs at the port of New York $2,039,064, and at the outports, about $700,000 (in coin) more, making the grand total income for the week equal about $7,266,500 in currency. The total receipts of the National Treasury, from excises, since July 1, 1866, have been about $262,500,000.

A more active speculative movement has been noted in Gold, this week. An adverse view has been taken of the influence on the public credit, and national industry, of the impending July session of Congress. This has been worked to the utmost in the interest of the inflationists in the Gold Room. and with some success. The price has been carried as high as 138⅞. It opened on Wednesday at 138⅜, ranged during that day from 138 to 138¾, and closed at 138¼, on a rather buoyant market, though there was no legitimate inquiry of any moment to strengthen the confidence of operators. The export drain was light. The customs demand was quite moderate. The specie exports on Wednesday were only $152,266. The total imports of specie from Europe, and other foreign ports since Jan. 1, 1867, have been $1,462,224. The customs demand for Gold last week, averaged $339,844 a day; thus far, this week, it has been equal to $328,213 a day, or equal to a weekly aggregate of $1,969,278. The arrivals of specie from Europe, Havana and other foreign ports, during the past week were $3,264, and from California, $1,450,099. The total customs revenue of the Government, in coin, at this port since July 1, 1866, has been $120,791,903, against $130,719,121 same time in the preceding fiscal year. The total receipts of California gold at this port since July 1, 1866, have been $38,750,695, against $29,142,577 same time last year, showing an increase this year, of $9,608,118. The exports of specie from this port, last week, were $582,390. The total outflow of specie from the port, thus far in the current fiscal year has been $40,226,834, against $57,030,488 same time in the preceding year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $143,400, making the total coin interest disbursements through the Government office, since July 1, 1866, $54,115,710, against $45,886,-130 for the same time in the preceding fiscal year. The specie exports from San Francisco, from Jan. 1, to May 29, reached $14,863,783, against $15,035,553 same time last year, showing a decrease, in 1867, of $171,770.

Business has been quite moderate, all through the week, in the foreign exchange line. The supply of bills has been on the increase, the result in part, of the increased outflow of produce, and the partial revival of the export trade in American securities. Rates have favored buyers slightly, but at the close, were steady. Bankers' 60 day bills on London closed on Wednesday at 109¾@110, and on Paris to 5.17½@5.12½; sight bills on London to 110⅜@110½; and on Paris to 5.12½@5.10. The offerings of produce bills have been more liberal this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $3,928,664, making the total value of exports since July 1, 1866, $175,842,191, against $211,762,350 same time in the preceding fiscal year.

A decidedly more active demand has prevailed during the week, for all classes of the public funds. The investment call has been very comprehensive. The country orders have been liberal in amount, mostly for the later Five-Twenty issues, and the Seven-Thirty Notes. There has also been a fair inquiry for the Ten-Forty five per cent bonds, and the Compound Interest Notes, which have been in light supply. Of the latter, we repeat that the June 1864 issue is now wholly out of market, and we have ceased to quote them. The Five-Twenties of 1862 have been in rather more request, on foreign orders, and held very firmly. U. S. sixes of 1867 closed buoyantly here on Wednesday at 135½; U. S. sixes of 1868, at 136; U. S. sixes of 1881, 113@113¼; U. S. Five-twenties of 1862, 110⅝@110¾; U. S. Five-twenties of 1865 at 107½@107¾; U. S. Five-twenties of 1865, consolidated, 110⅜@110½; U. S. Ten-forties at 100⅜@100½, and U. S. Seven-thirties at 106⅜@106½. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent, on these figures:

July, 1864	119	May, 1865	116⅜
August, 1864	118½	August, 1865	115⅜
October, 1864	117½	September, 1865	114⅞
December, 1864	116¾	October, 1865	114⅜

An unusually brisk speculative business has been transacted in railway and miscellaneous share property, since our last, and prices have improved materially. The dealings in all the active stocks on the list were particularly animated on Tuesday and Wednesday of the current week, carrying up prices to the highest point reached for some months past. Late on Wednesday, there was some pressure to realize, and prices consequently yielded a little. There was, however, no generally serious depression of values, and buyers were as numerous as sellers at the going rates, indicating much confidence in the immediate recovery of the market.

General business has shown more activity, especially in the domestic produce line. Breadstuffs have advanced decidedly, influenced by the light receipts, the unfavorable weather, and the reports of crop injuries more or less extensive. Provisions have been somewhat firmer, closing in favor of sellers. Cotton has been quiet, and declining, under adverse foreign news, and growing receipts. Middling grades left off here on Wednesday languidly at 25½@27½ cents per lb. as extremes. The stock of cotton now here is estimated at about 91,000 bales. The receipts at the port this week, have averaged about 1,100 bales a day. The receipts since the commencement of the current cotton year, Sept. 1, have been 597,-600 bales, against exports of 423,756 bales. The receipts at all the shipping ports from September 1 to latest mail dates have been 1,809,000 bales, against 1,931,150 bales same time last year; exports, 1,420,000 bales, against 1,458,000 bales same time last year; estimated stock at latest dates, 247,000 bales, against 310,300 bales same time last year. Beeves have been plenty and heavy this week at from 13@18¼c. per lb.; receipts, 5,401. Veal Calves in moderate request at from 7½@12½c. per lb.; receipts, 2,621. Sheep heavy and a shade easier, selling at 4@7c.; lambs at 10@13c. per lb., receipts, 17,115. Swine in good demand and firmer at 7@7⅜c., all live weight; receipts, 18,148. At the auction sale of Scranton Coal, on Wednesday, 60,000 tons were sold at a shade easier prices, ranging from $4.05 @4.65 per ton of 2,240 lbs., delivered at Elizabethport N. J.; also, 10,000 tons deliverable at Washington, N. J., in July, at from $2.@$3.15 per long ton. Foreign merchandise has been more active. Dry goods and groceries have been more firmly held. The total imports of foreign dry goods, last week, were $1,084,989, and the total amount marketed $928,545. The value of foreign merchandise imported last week, was $4,331,123—making the grand total specie value of last week's imports of dry goods and merchandise, $5,366,-112, and since July 1, 1866, $255,126,540, against $294,525,607 same time in the preceding fiscal year. The ocean freight market has been rather dull and heavy since our last, with 538 vessels of all classes in port. For Liverpool we quote flour at 1s.@1s. 3d. per bbl.; grain at 3½c.@4d. per bushel; cotton at $\frac{3}{16}$@¼d. per lb.; and heavy goods at 10s.@20s. per ton, all by sailing vessel.

Ill. Central	79	79	79¾

The New York exports, exclusive of specie, for the week ending June 25, and since the beginning of the year, compare as follows:

	1866.	1867.
For the week.....	$2,388,335	$3,928,664
Prev. reported.....	102,495,879	90,307,132
Since January 1.....	$104,884,214	$94,235,726

The New York imports for the week compare as follows:

	1866.	1867.
Dry goods	$2,074,282	$1,034,989
Gen. merchandise.....	4,672,661	4,331,123
Total for the week.....	$6,746,943	$5,366,112
Previously reported....	145,694,466	118,827,396
Since January 1.....	$152,441,409	$124,193,508

The commerce of New York from July 1st to date compares as follows:

	1865-'66.	1866-'67.
Imports merchandise.	$294,525,607	$255,126,540
Exports produce.....	211,762,350	175,842,191
Exports specie	57,030,488	40,226,834

The balance in the Sub-Treasury on Wednesday was $132,039,033 35.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—U. S. 5-20s 1865, new issue, 110⅜; N. Y. State Bounty Loan reg., 105; do., 6s, 1873, 99½; Virginia 6s, ex-coupon, 52; do., new, 51½; Georgia 7s, 84½; Brooklyn 6s, Water Loan, 95½; Morris and Essex, 65; do., 1st mort., 94¼; do., 2d mort., 83; N. Buffalo and Erie Railroad.

The consolidation of the Buffalo and State Line and the Erie and Northeast Railroads was completed on the 25th inst., by the action of the stockholders of the former company agreeing to the terms by a vote of 35,936 shares out of a total of 39,637. The following are the officers of the new company, to be known as the Buffalo and Erie Railroad Company:—President, Wm. Williams, of Buffalo; Vice President, Charles H. Lee, of Silver Creek; Secretary and Treasurer, Henry L. Lansing, of Buffalo; Directors, A. Robinson, New York; Charles H. Lee, of Silver Creek; John H. Clark, Auburn; Joseph Field, Rochester; G. W. Patterson, Westfield; Milton Courtright, Erie; Chas. M. Reed, Erie; John A. Tracy, Erie; John M. Hutchinson, Buffalo; Wm. G. Fargo, Buffalo; James C. Harrison, Buffalo.

Rome, Watertown and Ogdensburg R. R.

The following gentlemen have been elected directors of this company for the ensuing year: W. C. Pierrepont, Pierrepont Manor; Marcellus Massey, Samuel F. Phelps, Charles E. Bill, John Ferguson, Edward Strong, New York; H. Alexander, jr., Springfield, Mass.; Gardner Colby, Boston; David Utley, Rome; C. Comstock, do.; Delos De Wolf, Oswego; S. D. Hungerford, Adams; T. H. Camp, Watertown. W. C. Pierrepont, was re-elected president, and Marcellus Massey vice president.

☞ Messrs. Kasson & Co., 62 Broadway, New York, have for sale 3 locomotives, 3 passenger and 16 flat cars—for full descriptions of which see their Advertisements.

Ogdensburg and Lake Champlain R. R.

The annual meeting of this company was held at Ogdensburg on the 19th inst. The old board, consisting of the following persons, John C. Pratt, Jacob W. Pierce, John S. Farlow, Hollis Hunnewell, Thomas Upham, J. D. Farnsworth, E. T. Farrington, Arthur Williams, George M. Barnard, of Boston, William C. Brown, of Ogdensburg, S. M. Felton, of Philadelphia, Calvin T. Hubbard, of Brasher Falls, and Albert Andrews, of Malone, were unanimously chosen. At a meeting of the directors, held subsequently, John C. Pratt, of Boston, was unanimously re-elected President.

Railroad Earnings.--Weekly.

The earnings of the Chicago and Northwestern Railroad for 2d week in June, 1867 ..$214,974 57
Corresponding week previous year .. 191 808 59

Increase. $23,165 98

The earnings of the Michigan Southern and Northern Indiana Road for the 3d week in June, 1867, were $72,874 00
Corresponding week of 1866 .... 86,726 00

Decrease $13,852 00

The earnings of the Detroit and Milwaukee Railroad for the week ending June 20th, 1867, were $32,948 00
Corresponding week of 1866.... .... 27,271 00

Increase. $5,677 00

The earnings of the Michigan Central Railroad for the 2d week in June, 1867, were.. $67,186 47
Corresponding week of previous year.. 72,576 40

Decrease $5,389 93

The earnings of the Chicago and Alton Railroad for the week ending June 15th, 1867, were $91,562 00
Corresponding period previous year.. 98,120 00

Decrease.... .... $6,558 00

The earnings of the Chicago and Rock Island Railroad for the 2d week in June, 1867, were.... .... $61,518 00
Corresponding week of previous year.. 83,179 00

Decrease $21,661 00

The earnings of the Atlantic and Great Western Railroad for the second week in June, 1867, were.... .... $102,394 00
Corresponding week previous year... 123,524 00

Decrease.... .... $21,130 00
From April 1 to June 15, 1867 .... $1,099,866 00
", " 1 " " 15, 1866 .... 1,077,373 00

Increase.... .... $22,493 00

The earnings of the Grand Trunk Railway of Canada for the week ending June 1st, 1867, were.... .... $122,690 00
Corresponding week of previous year. 116,691 00

Increase.. .... $5,999 00

The earnings of the Marietta and Cincinnati Railroad the 2d week in June, 1867... $22,436 00
Corresponding week previous year.... 21,556 00

Increase $980 00

The earnings of the Western Union Railroad for the week ending June 21, 1867. ..$14,340 11
Corresponding week previous year.... 24,910 90

Decrease $10,570 79

The earnings of the Virginia and Tennessee Railroad for the second week of June, were $12,757, an increase of $2,807 on the same week last year. Total for the fiscal year commencing 1st of July, $691,752, an increase of $141,406 on same time of 1866.

Cleveland and Toledo Railroad.

At a meeting of the stockholders of this company held at Cleveland on the 20th inst., John Newell, James Mason, G. N. Wade, and Amasa Stone jr., of Cleveland; John Gardiner, of Norwalk; S. M. Young, of Toledo; William A. Vanderbilt, H. C. Stimson and James H. Banker, of New York, were chosen directors for the ensuing year. Mr. John Newell was subsequently elected president, and William F. Staunton secretary and treasurer.

English Railway Law.

NON-LIABILITY OF RAILWAY COMPANIES WHERE ACCIDENT OCCURS, CAUSED BY DEFECT IN MATERIALS OF WHICH THE MACHINERY IS CONSTRUCTED.

A most important decision has recently been rendered in the Court of Queen's Bench, Durham, as affecting the liability of railway companies for injuries caused to passengers by the breaking down of carriages through latent defects in the materials of their construction. The question was raised in the case of Redhead *vs.* the North Midland Railway Co., reported in the *London Railway News*. The accident for which compensation was claimed arose through the fracture of one of the wheel-tyres, which broke through a latent flaw in the welding. The tyre appeared to be of sufficient thickness and strength, and though in point of fact, by reason of an air-bubble in the welding, it was of less real thickness and strength than it ought to have been, the flaw was not detected by the application of the usual tests (that is, by the ring of the metal when struck by the hammer,) and it was one which even the manufacturer could not have detected, still less the railway company's servants, by whom it was examined in the usual manner just before the journey. The case was tried before Mr. Justice Lush, who directed the jury to the effect that if they believed this evidence the company were not responsible, as they were only liable for negligence, which on this evidence was disproved, and they accordingly found for the company. There was a motion to set aside the verdict for misdirection. On the case having been fully argued, the decision was given on the 15th of May, two of the Judges, Mr. Justice Lush and Mr. Justice Mellor, giving judgment in favor of the company, and Mr. Justice Blackburn against the company.

Mr. Justice Lush, who heard the case, said: Upon the best consideration I have been able to give to it, I adhere to the opinion I expressed at the trial that the law imposes no such liability on railway companies. It is not contended that the obligation of carriers of passengers is co-extensive with that of carriers of goods, who by the custom of the realm are insurers, subject only to certain well-known exceptions—the act of God or the Queen's enemies. The grounds of liability of carriers of passengers, and their obligations, as described in the works of the highest authority, as Mr. Justice Story in his work on *Bailments*, is not absolutely to carry safely, but to exercise due care and diligence in performing his duty. But it is contended that in this particular part of his duty, the providing of a safe and suitable vehicle, his undertaking goes beyond the measure of due care and diligence, and includes a warranty that the carriage is sound and free from all defects which render it unfit for service, though the defects which make it not so are what no amount of care or skill could ascertain. The language of Story does not suggest such a qualification, and surely so important an element in the contract would have been noticed by him if he had supposed it to exist. The proposition is one which I cannot adopt without authority; for I can feel no reason why a carrier should be held to warrant for that which no care or diligence would enable him to secure, especially when he is under no such liability as to any other portion of his undertaking. In the United States the question was very fully argued, and it was decided that the carrier of passengers was only liable for negligence.

Mr. Justice Mellor said: The direction of the learned judge at the trial was to the effect, that though the companies were bound to use the utmost skill and care in all that concerned the safety of their passengers, they were not liable for defects which no care or skill could discover or guard against. And I have come to the same conclusion. The question depends upon the nature and extent of the liability of carriers of passengers for hire. The liability of carriers of goods, which is that of insurers, is quite different, and rests on wholly different grounds. Lord Holt expressly puts it that it is founded on the danger of carriers colluding with thieves, if they were allowed to set up robbery or loss by accident as an excuse for failure to deliver the goods. These reasons, it is obvious, do not apply to carriers of passengers, whose liability has always been based upon negligence. His lordship referred to the case of "Grote *vs.* the Chester and Holyhead Railway Company" (2 *Exchequer Reports*,) when Baron Parke said the company would be liable for an accident arising from a defective vehicle, though they had employed a competent coachmaker; but Lord Wensleydale there only meant that the company could not excuse themselves merely by the fact of their having employed a competent carriage builder, which is a very different thing from saying that they would be liable for latent defects which even the builder could not discover.

Mr. Justice Blackburn, in giving judgment in favor of the plaintiff, said: In my view there is, according to all authority and analogy, a duty incumbent upon the carrier of passengers for hire to provide fit and proper carriages, and he is liable for a failure to perform this duty, even although it is in consequence of a latent defect. I agree that he is not an insurer—that is, he does not insure their safety in all events, and in order to render him liable for accident it is necessary that it should be shown to have arisen from some neglect of duty. But if there is an obligation to provide a vehicle of sufficient strength, then the failure to do so—whether through his fault or not—is a breach of that duty. A liability as to the carriage of goods, and it would be strange if there were a less stringent liability as to passengers, where it involves the safety of their lives and limbs. The passenger is obliged to trust entirely to the carrier as to the safety of the vehicle, and has no means of examining into it himself.

Hoosac Tunnel.

The North Adams *Transcript* says the Tunnel Commissioners have concluded a contract with Messrs. Dull & Gowan, the builders of the Lake Tunnel at Chicago, for a two years' job upon the Hoosac Tunnel. The contract provides for the excavation of six thousand four hundred feet of tunnel at the east end, or nearly a mile of completed tunnel; also the sinking of the central shaft to grade—which will be about five hundred and forty feet of excavation. They contract to do this in two years, and to excavate the shaft, not less than thirty feet per month, and at the east end not less than ninety-one feet per month. The contract will exceed a million dollars in amount.

Journal of Railroad Law.

NEGLIGENCE IN CROSSING PUBLIC STREET—WHAT IS ORDINARY CARE.

In the case of Baxter *vs.* 2d Ave. R. R. Co. lately decided by the Superior Court of this city, it was held that courts never decided what is or is not abstract negligence. Whether a want of care is imputable to a person must always in all cases, depend upon facts which in each case essentially determine the question. Where the plaintiff in the exercise of common or ordinary prudence had ample time to cross a street before the defendant's horse car would reach her, but by an accident she slipped and fell upon the railroad track, and was run over by the horses and car, *held* that the railroad company was liable in damages. The opinion of the court was written by

MONELL, J.—In a claim to recover damages for an injury to the person occasioned by the negligent act, of another, the plaintiff must be free from any fault which may have contributed to the injury. I had occasion in writing the opinion in Williams *vs.* O'Keef 9 Bosw. 536, to state the result of all the cases on this subject. In one case only do I find any attempt to define the nature or quality of negligence, (Wilds *vs.* Hudson R. R. Co. 24 N. Y. 430.) and in that case a distinction which some of the cases have made between gross negligence and common care or prudence is rejected as inapplicable to actions for personal injuries. It is undoubtedly correct to say that there are no degrees in negligence, for whether it be great or small, if it can be seen that in any measure without it, the injury would not have happened, there can be no recovery. We are no where given the criteria or essence of negligence nor can any be given. There are so many different elements, which of necessity must enter into it and vary it, that no general principle can be established. It is prudent of a man possessed of all his senses and faculties to do many things which would be highly dangerous and imprudent for a man deaf or blind or lame to perform. An adult may go in safety where an infant of tender years would be exposed to great peril.

In all cases therefore whether a want of care is imputable to a person must always depend upon facts, which in each case essentially determine the question. Courts never decide what is or is not abstract negligence. They sometimes put a construction upon the evidence intended to establish it, and say that a verdict of a jury is not or would not be supported by it, but they do nothing more.

In getting at some rule, general as far as may be, of what would be negligence or want of proper care, neither of the extremes can be adopted. One man with a high degree of caution will avoid the possibility of danger; another more reckless or confident will rush into any kind of peril. Hence it is that the medium of the two extremes will come nearer to, and conform closer with common sense and justice. What would persons ordinarily do under the circumstances? How would most persons act? Not the most prudent, nor the least careful, but what amount of care would the majority of persons exercise. In the case before us, the exception to the charge was in limiting the plaintiff's negligence to a want of common, ordinary care or prudence. What amount of care or prudence is required of a person in crossing a public street? If more than ordinary care, then what standard shall we adopt? We cannot require the highest degree of caution nor can we admit the lowest. Therefore the common or ordinary degree embraces the middle and only safe standard.

In Munger *vs.* Tonawanda R. R. Co. 4 N. Y. 34, it is said (358) "the result might have been avoided by the exercise of ordinary care on the part of the defendants." Again, "a person injured by an obstruction placed unlawfully upon a highway has been denied a right of action for damages, where it appeared that he had failed to use ordinary care." The cases cited in the opinion in Wilds *vs.* Hudson R. R. Co., (*supra*) all use the same or equivalent words. In Fox *vs.* Glastenbury, 29 Conn. R. 208, the rule is said to be that the party injured must have acted with ordinary prudence, and in Gagaham *vs.* B. & L. R. R. 1 Allen, Mass., 187, it is affirmed that the party must be in the exercise of due care. In Johnson *vs.* Hudson River R. R. 20 N. Y. R. 65, the court say (page 76) the party must have conducted with ordinary care and prudence."

The charge of the judge to the jury was therefore strictly in conformity with authority, and it seems to me also, in conformity with common sense. Had he attempted to form any other standard of negligence, he must have failed, or run into the error of requiring a greater or less degree of care or prudence than is observed by mankind in general. There was no error therefore in the charge.

The refusal to charge as requested and the motion for a nonsuit involve the consideration of other propositions. The motion for a nonsuit was on the ground that the accident was owing to the plantiff's imprudence and negligence. A party seeking redress for personal injuries must satisfy the jury that there was no fault imputable to him. And unless the evidence of negligence is of such a nature as to require the reversal of a verdict if found against it, it would be improper to take the question from the jury. (Johnson *vs.* Hudson River R. R. Co., Williams *vs.* O'Keef, *ubi sup.* Wild *vs.* Hudson River R. R. Co. 29 N. Y. R. 315.)

The plaintiff was a woman of 54 years of age, healthy and in the use of all her limbs and senses; she had with her a grocer's basket which was not heavy. It was mid day, and a clear day. There was a little snow, and a great deal of ice on the ground. She had passed down on the east side of the avenue, from 34th street to the lower side of 35th street, where she attempted to cross on the cross way. As she began to cross, she looked and saw a four horse car coming up the hill. The grade being ascending she felt perfectly sure that she could cross with safety. The car was then above the upper side of 31st street about half way the block between 31st and 32d streets. She looked long enough to make up her mind that it was safe to cross, and concluded that the horses were so far off that she could safely do so. In crossing her heel caught in the westerly rail of the easterly track. It took her whole strength to extricate her foot. In pulling her foot out, the iron sprang up, and pitched her over on the westerly track, and it being slippery she fell. Before she could recover herself the horses and car were upon her.

The only negligence that can be charged upon the plaintiff is in attempting to cross the avenue while the defendant's horse car was ascending a grade, nearly 200 feet away. The catching the foot in the rail, and subsequent falling were accidents. There was ample time to cross. The car was distant, and she had the free use of her limbs. In considering the matter time was the important thing. She could not anticipate what befell her before the car was upon her, and she felt sure that there was time for her to reach the opposite side in safety. And such I think would have been the reasoning and conclusion of any person. Had she not fallen on the track, she would undoubtedly have escaped. Upon all the facts I am clear that the plaintiff was justified in attempting to cross the street, and that the motion for a non-suit was properly overruled. (Brown *vs.* N. Y. Central R. R. Co. 32 N. Y. 597.)

Alexandria, Loudoun and Hampshire R. R.

The stockholders of this company have accepted the act of the Virginia Legislature authorizing the Board of Public Works to sell to the said company all the stock owned in the road by the State, the company agreeing to execute and deliver bonds therefor, secured by a mortgage on the company's franchise and property, payment to be made in three equal instalments—first, when the road is extended from Leesburg to Winchester; second, when completed to the west side of the Little Cacapon River; and third, when finished to its western terminus in Hampshire County, west of Paddytown, West Virginia. The company also ordered the issue of eight millions in bonds, to run thirty years, and bear not more than eight per cent. interest, to complete the road to Paddytown, as authorized by the act of the Legislature above indicated.

Chicago and Northwestern Railroad.

At the annual meeting of this company held at Chicago on the 6th inst., the following gentlemen were elected directors for the ensuing year:—Wm. B. Ogden, Perry H. Smith, George L. Dunlap, John B. Turner, Wm. H. Ferry, Chicago, Ill.; Albert L. Pritchard, Samuel J. Tilden, Wm. A. Booth, Henry H. Boody, Lowell Holbrook, James D. Fish, James W. Elwell, John M. Burke, Benjamin Nathan, Samuel Sloan, A. Iselin, Wm. B. Scott, New York. At a subsequent meeting Wm. B. Ogden, Esq., of Chicago, was elected President, and Perry H. Smith of Chicago, Assistant President.

☞ Gov. Fletcher, of Missouri, took possession on the 21st inst., of the Atlantic and Pacific Railroad, formerly known as the Southwest branch of the Missouri Pacific road, which was purchased from the State by Gen. Fremont and his associates, the purchasers having neglected to pay the first annual instalment, due June 15, and otherwise failed to perform their contract. The road has been placed in charge of Clinton B. Fish, of St. Louis.

☞ A new line of street railroad, running up Main and Liberty streets to the suburbs of Mount Auburn, to the north of the city, was opened in Cincinnati on the 25th inst. Five new cars were placed on the track.

☞ The Union Pacific Railroad is now open to Julesburg, 376 miles west of Omaha.

Interest and Dividends.

The Panama Railroad Co. have declared a quarterly dividend of six per cent., payable at their office in this city on the 5th of July.

The Chemung R. R. Co., a quarterly dividend of two per cent., payable, free of tax, at No. 1 Barclay street, July 1.

The Illinois Central R. R. Co., a dividend of five per cent., payable, free of tax, on the 1st of August.

The Rome, Watertown and Ogdensburg R. R. Co., a semi-annual dividend of five per cent., free of tax, payable July 15th at the Mercantile Bank, N. Y.

The Norwich and Worcester R. R. Co., a dividend of four per cent., free of tax, payable on the 10th of July, at the Farmers' Loan and Trust Co., N. Y.

The Connecticut River Railroad Co., a dividend of 4 per cent., payable July 1.

The Hartford and New Haven R. R. Co., a quarterly dividend of $3, free of Government tax, payable July 1, at the Union National Bank, N.Y.

The Old Colony and Newport R. R. Co., a dividend of $3 per share, payable July 1.

The Fitchburg R. R. Co., a dividend of $4 per share, payable July 1.

The Boston and Lowell R. R. Co., a dividend of four per cent., payable June 29.

The Michigan Central R. R. Co., a dividend of $5 per share, free of Government tax, payable July 3, at New York, Boston and Detroit.

The Providence and Worcester R. R. Co., a dividend of four per cent., payable July 1.

The Pittsburg, Ft. Wayne and Chicago R.R. Co., a quarterly dividend of 2½ per cent. on the capital stock, free of tax, and the semi-annual dividend of 3½ per cent., less Government tax, on the Third Mortgage bonds, payable in New York and Pittsburg on the 16th of July.

The Metropolitan Railroad Company, Boston, a dividend of five per cent., free of all taxes, payable on July 1.

The Western Railroad of Massachusetts has declared a cash dividend of 5 per cent., and a stock dividend of 30 per cent. to represent a portion of the past net income contributed to the sinking fund.

The Chicago, Iowa and Nebraska Railroad Co., have declared a dividend of 5 per cent., payable July 1.

The Portland and Kennebec R. R. Co., have declared a dividend of three per cent., payable at Augusta, Me., on the 1st of August.

The interest due on the 1st of July next, payable in New York on the Pensacola and Georgia and Tallahassee Railroad bonds, upon which the past due coupons have been funded, will be paid at the office of Rogers's Locomotive and Machine Works, No. 44 Exchange Place.

The July Coupons of the First Mortgage bonds of the Wilmington, Charlotte and Rutherford Railroad Co., will be paid by Messrs. Soutter & Co., 53 William street.

Coupons of the mortgage bonds of the Montgomery and West Point Railroad Co., due July 1, will be paid at the National Bank of the Republic.

The July coupons of the bonds of the Macon and Brunswick Railroad Co., indorsed by the State of Georgia, will be paid by the National Bank of the Republic, of this city.

Coupons of the bonds of the East Tennessee and Georgia R. R. Co., indorsed by the State of Tennessee, also those not indorsed, payable in New York, July 1, 1867, will be paid on presentation at the office of Messrs. Wilson, Callaway & Co., No. 44 Broad street, New York.

The coupons due July 1, 1867, on the First Mortgage bonds of the Selma and Meridian Railroad Co. of Alabama, will be paid at the banking house of Messrs. Winslow, Lanier & Co.

Coupon No. 6 of the first mortgage bonds of the Vermont Valley Railroad, due April 1, 1868, will be paid at the Treasurer's office, Bellows Falls, Vt., and at the National Park Bank, N. Y.

Coupons for past due interest of the second mortgage bonds of the Central Ohio R. R. Co., due 1st September and 1st March next, will be paid on presentation, at the Western National Bank of Baltimore, less interest for advance payment.

New Railroad Route from Portland to the West.

We learn that a movement is on foot having for its object a direct railway connection between the Lake cities and the Atlantic seaboard at Portland. The plan is said to have been well matured, the preliminary surveys made, and the feasibility of the route established beyond doubt. The route runs directly from Portland to the White Mountains, by a line considerably shorter than the Grand Trunk; thence, through Crawford's Notch, with a very moderate grade, to Littleton, N. H., crossing the State line near the junction of the Connecticut and Passumpsic, and connecting with the Vermont Central R. R. at Montpelier; thence, *via* the Vermont Central, Ogdensburg, Watertown and Rome roads, to some point on the Eastern shore of Lake Ontario, where it is proposed to build a connection with Oswego and the New York Central R. R.

Marginal Freight Railroad.

We learn from the Boston *Journal* that the charter of the Marginal Freight Railway Company has been accepted by the Board of Aldermen, that the company is organized with a capital of $200,000, the stock being immediately taken. Messrs. Thomas Russell, Edward Crane, Harvey Scudder, Edward Appleton and Jerome W. Tyler were chosen Directors, who organized their Board by the choice of Thomas Russell, President; Edward Crane, Vice President; and William B. Brown of Marblehead, Treasurer. Twenty-five per cent. of the capital has been paid in, the certificate filed with the Secretary of State. We understand that the entire work of construction has been contracted for, to be completed by September 1.

☞ We learn that work has been commenced upon the extension of the Atlantic and Gulf Railroad from its present terminus at Thomasville, Ga. A sufficient number of hands to complete the work will be placed on the line at once, and it is confidently expected that the road will be in operation to Bainbridge in October next. J. A. Maxwell, Esq., is Chief Engineer.

☞ Hon. John H. Clifford has been elected President of the Boston and Providence Railroad Co., Vice Hon. Charles H. Warren resigned.

☞ A railroad is projected from Atlanta, Ga., to Decatur, Ala. The construction of this road would effect a saving of more than 100 miles in the distance, as now traveled, between Memphis and Charleston.

FOR SALE.

16 FLAT CARS—Broad Tread Wheels—Compromise—Just completed at Buffalo, N. Y.
These Cars are built in the most approved style, of the best White Oak Lumber.
Platforms 30 feet long, 8½ wide, Iron Trucks, Capacity 15 Tons, Warranted.

PLASTIC SLATE
FOR
Roofing & Other Purposes.

The process of reconstructing Slate Stone from a disintegrated state was
PATENTED FEBRUARY 21st, 1865.
It is a combination of
Pulverized Slate and Viscous Matter,
(the latter possessing qualities of geological and chemical affinity for the former,) and is a development of one of the simple but unalterable tendencies of nature.

As a Roofing Material it Stands Unrivalled.

A mastic—it adapts itself to every shape and slope. Non-combustible, impervious, non-expansive, and undecaying.

Frost does not Crack nor Heat Dissolve it.

The only roofing material ever discovered that will resist the action of the elements as long as the structure it protects. Being susceptible of little, if any wear, from exposure, and

Perfectly Fire-Proof,

It is unequalled as a coating for Railroad and Farm Buildings, Fences, Bridges, bottoms of Vessels, Vaults, etc.

THE UNION PACIFIC RAIL ROAD CO.

Are now constructing a Railroad from

OMAHA, NEBRASKA,

westward towards the Pacific Ocean, making with its connections an unbroken line

ACROSS THE CONTINENT.

The Company now offer a limited amount of their

FIRST MORTGAGE BONDS

having thirty years to run, and bearing annual Interest payable on the first day of January and July, in the City of New York, at the rate of

SIX PER CENT. IN GOLD,

AT

Ninety Cents on the Dollar.

This road was completed from Omaha 305 miles west on the 1st of January, 1867, and is fully equipped, and trains are regularly running over it. The Company has now on hand sufficient iron, ties, etc., to finish the remaining portion to the eastern base of the Rocky Mountains, 212 miles, which is under contract to be done September 1st of this year, and it is expected that the entire road will be in running order from Omaha to its western connection with the Central Pacific, now being rapidly built eastward from Sacramento, Cal., during 1870.

Means of the Company.

Estimating the distance to be built by the Union Pacific to be 1,565 miles, the United States Government issues it Six per cent. Thirty-year Bonds to the Company as the road is finished at the average rate of about $28,350 per mile amounting to $44,308,000.

The Company is also permitted to issue its own First Mortgage Bonds to an equal amount, and at the same time, which BY SPECIAL ACT OF CONGRESS ARE MADE A FIRST MORTGAGE ON THE ENTIRE LINE, the bonds of the United States *being subordinate to them.*

The Government makes a donation of 12,800 acres of land to the mile, amounting to 20,032,000 acres, estimated to be worth $30,000,000, making the total resources, exclusive of the capital, $118,416,000; but the full value of the lands cannot now be realized.

The authorized Capital Stock of the Company is one hundred million dollars, of which five millions have already been paid in, and of which it is not supposed that more than twenty-five millions at most will be required.

The cost of the road is estimated by competent engineers to be about one hundred million dollars, exclusive of equipment.

Prospects for Business.

The railroad connection between Omaha and the East is now complete, and the earnings of the Union Pacific on the sections already finished for the month of May were $361,782. These sectional earnings as the road progresses will much more than pay the interest on the Company's bonds, and the through business over the only line of railroad between the Atlantic and Pacific must be immense.

Value and Security of the Bonds.

The Company respectfully submit, that the above statement of facts fully demonstrates the security of their Bonds, and as additional proof they would suggest that the Bonds now offered are less than ten million dollars on 517 miles of road, on which over twenty million dollars have already been expended;—on 330 miles of this road the cars are now running, and the remaining 187 miles are nearly completed.

At the present rate of premium on gold these bonds pay an annual interest on the present cost of

Nine Per Cent.,

and it is believed that on the completion of the road, like the Government Bonds, they will go above par. The Company intend to sell but a limited amount at the present low rate and retain the right to advance the price at their option.

Subscriptions will be received in New York by the CONTINENTAL NATIONAL BANK, No. 7 Nassau St., CLARK, DODGE & Co., BANKERS, 51 Wall St., JOHN J. CISCO & SON, BANKERS, No. 33 Wall St., and by BANKS AND BANKERS generally throughout the United States, of whom maps and descriptive pamphlets may be obtained. They will also be sent by mail from the Company's Office, No. 20 Nassau Street, New York, on application. Subscribers will select their own Agents in whom they have confidence, who alone will be responsible to them for the safe delivery of the bonds.

JOHN J. CISCO, *Treasurer,*

NEW YORK.

NATIONAL TRUST CO.,

OF THE CITY OF NEW YORK.

CAPITAL .....$1,000,000.

Shares $100 Each.

The Subscription Books to the Capital Stock of the **National Trust Company** of the City of New York are now open at the

NINTH NATIONAL BANK,

363 Broadway, cor. Franklin street, New York, and will remain open until the whole amount of the Capital Stock of $1,000,000 shall be subscribed.

☞ Inasmuch as the Larger Portion of the Capital has already been applied for, Immediate Application should be made by Parties desiring to secure Stock. ☜

The payments will be as follows:—

10 per cent. on subscribing	$100,000
June 5, 1867, 15 per cent	150,000
July 1, 1867, 15 per cent	150,000
August 1, 1867, 10 per cent	100,000
September 2, 1867, 10 per cent	100,000
October 1, 1867, 10 per cent	100,000
January 10, 1868, 15 per cent	150,000
February 10, 1868, 15 per cent	150,000

The average date of the above payments is September 12, 1867.

After the 22d of May, inst., subscribers may pay in the whole amount unpaid, and be allowed interest at the rate of 7 per cent per annum from the day of payment to September 12, 1867, that being the average day of the payment of the calls.

ELISHA A. PACKER,
THOMAS W. SHANNON,
THOMAS B. READ,
JOSEPH U. ORVIS,
HENRY C. CARTER,
} Commissioners.

☞ Applications for circulars or stock, by mail, promptly attended to.

WHAT IS A TRUST COMPANY?

A TRUST COMPANY IS THE SAFEST AND MOST CONSERVATIVE OF FINANCIAL INSTITUTIONS. A careful perusal of the following paragraphs will amply substantiate this proposition.

TRUST POWERS.

To receive money from individuals and corporations and allow such interest as may be agreed upon.

The Company is constituted by its Charter a Legal Depository of Money paid into Court.

To accept and execute all Trusts, in reference to both real and personal estate, committed to the Company by any person or corporation, or transferred to the Company by order of any of the Courts of Record, or by any Surrogate, etc., etc.

To act as Financial Agent of State and City Governments and of Counties, in the management of their business at the financial center of the country.

To act as Agent for foreign Banks, Bankers, Business Men, and Corporations, having business transactions in the City of New York.

GUARANTEES.

Among the Guarantees afforded by the Charter of this Company, are the following:

Every Director or Trustee must be a citizen of this State, and be a stockholder in the Company to the amount of five thousand dollars, at least.

No loan shall be made, directly or indirectly, to any trustee, officer, or employee of said Corporation.

It is not permitted to discount or deal in Commercial or Business Paper.

ON WHAT SECURITY MAY THIS COMPANY LOAN ITS DEPOSITS?

The National Trust Company can only invest the funds entrusted to it in United States Stocks or Stocks of the State of New York or other States, or of any City incorporated by the State of New York.

Therefore, it is adapted for the investment of funds which the public desire very safe investments for. Its Stock will probably pay dividends equal to, or greater than the interest on Government securities, and deposits made in this Company will earn as liberal a rate of Interest as is possible, taking into consideration the great security.

COUPON Government Bonds, the Secretary of the Treasury says, he will pay to any holder, whether stolen or not; therefore is it not wise to sell those COUPON Bonds and take the stock in the National Trust Company which will have its permanent investments in REGISTERED United States Bonds, State Stocks, and Bonds of Incorporated Cities of this State?

GENERAL REMARKS.

The success of other Trust Companies and the high prices of their stocks in the market are sufficient evidence of the profitable character of the business, and the Trustees feel justified in recommending the Stock of this Company to capitalists and others seeking a safe investment.

It is believed that the Stock of this Company is more desirable than that of most other moneyed corporations, and as safe as Government Securities; that the increase in the value of the stock will be more rapid than Government Bonds, and the dividends quite EQUAL to, if they do not EXCEED the interest of such Bonds.

The decision of the Secretary of the Treasury that he will pay COUPON Government Bonds to the holders whenever presented, without reference to any disputed ownership, will lead, in many cases, to the sale of such Bonds; This Company will take in exchange of its Stock any United States Bonds, 7-30 Treasury Notes, or Compound Interest Notes at the market price on the day of tranfers.

OFFICERS FOR FIRST YEAR.

New York, Saturday, July 6, 1867.

Mont Cenis Railway.

On the 16th of May last, M. Baron de Lepus Saint-Genis, Prefet of the Department de la Savoie, inspected a portion of this railway adjacent to St. Michel. Having minutely examined the engine attached to the train which was to convey the Prefet and his staff along a portion of the completed line, the train started, and at a very short distance from St. Michel it went round several curves, the radius of which is not more than two chains each. Having passed these curves with the same ease as if the line were straight, the train arrived at a steep portion. Here the centre rail, which constitutes the peculiarity of the Fell system, was placed. By a simple arrangement the under works of the engine become connected with the centre rail, and the steam acting on the machinery which moves the horizontal wheels they thus work upon, and in connection with the centre rail, the vertical wheels being acted upon in the same way as in the ordinary engine. The present condition of the works is reported to be as follows: The total length of line from St. Michel on the French, to Susa on the Italian side of the Pass, is forty-eight English miles. Half way in point of distance between St. Michel and Susa is Lanslebourg, the village of France nearest the Italian frontier. St. Michel is 2,493 English feet above the level of the sea, but as Lanslebourg is 2,099 feet higher, the rise between these two places is very gradual, and, during the greater part of the distance, horses conveying carriages are never out of a trot. The summit of the Pass is 6,832 feet above the level of the sea. It is distant from Lanslebourg six English miles; consequently, 2,240 feet in height must be ascended at an average gradient of 1 in 14. From the summit to Susa the distance is seventeen English miles, and the difference in level is 5,140 feet. The average gradient is, therefore, 1 in 17, but as a length of nearly three miles is comparatively level, the remaining portion has an uniform gradient of 1 in 12. To a person coming from Susa the rise and descent would of course be the reverse of those to a person going from Lanslebourg to Susa. This section—the section from Lanslebourg to Susa—will be ready for traffic by the first of July, and the opening of this portion, in the first instance, will be important in many respects, but especially as it will at once put to the severest test the efficiency of the Fell system. The section from St. Michel to Lanslebourg being that which suffered so severely from the inundations of last year, will not be ready for traffic until September, by which time it is expected that the line will be completed from end to end. When this is so, the distance, which is now accomplished by courier-diligencies in never less than 9 hours, and is often 12, 13 or 14, will be traversed in 4½. The existing traffic across the Mont Cenis is perhaps the largest road traffic in the world. The average daily number of passengers that have crossed it in both directions since the commencement of April this year has been 220; tonnage of goods 120 tons per diem. About two-thirds of this tonnage goes from France to Italy, but on the opening of the railway throughout it is expected that, even allowing for considerable expansion of business from France to Italy, goods that now cannot be sent from Italy on account of the high rate of transport, will be conveyed to an extent sufficient to nearly equalize the transit in both directions.

The number of horses now engaged in the conveyance of passengers and goods across the Mont Cenis, is about 1,200, and allowing ten miles a day for each horse, it gives a daily average across the mountain of 12,000 miles.

New System of Rails.

The *Essener Zeitung* says that the introduction by the Rhenish Railway Company of the nine-inch rail on their line, instead of the five-inch rail hitherto in use, is of such importance for all persons connected with the railway interest that it has created the greatest excitement, and everything connected with it is narrowly watched by all civil engineers; for, should it succeed, it will solve the long debated problem of the possibility of doing away with sleepers altogether, which are becoming every year dearer and dearer. The nine-inch rails rest upon a bed of plates, and are then covered with five inches of gravel, on the top of which is a two-inch layer of earth, well stamped down, so that the head of the rail projects only an inch above the surface. The two lines of rails are connected every three feet by round bars of iron, firmly bolted to the rails below the surface, so that the whole forms one compact body, and may be compared to a ladder lying on the ground half buried in it. This mode of construction is said to afford quite as great security as the present system of underground sleepers. These rails are 24 feet long, and are 9 inches high, the head being somewhat narrower and the foot three-quarters of an inch wider than the common rails now in use; their weight is 900 lbs. It is understood a contract has been taken by the Joint Stock Iron Works, New Schottland, for the immediate manufacture of 5,000 pair of these new rails.

Union Pacific Railroad.

Omaha despatches say General Dodge, Chief Engineer Union Pacific Railroad, and the Government commanders have left for the West to accept the last completed section of the road, and select a point at the base of the mountains where the triple subsidy commences.

Wells, Fargo & Co., send regularly three coaches every other day from Julesburg to Denver, one hundred and eighty-two miles. These have military protection, as it is necessary to insure their safety.

Northern (N. H.) Railroad.

The earnings of this road for the years ending March 31, 1866 and 1867, have been as follows:

	1866.	1867.
From passengers	$196,516 52	$204,790 10

Balance in contracts account		84,591 22
		$320,008 89

The bonded indebtedness of the company has been reduced during the past year, by the purchase of its bonds, to the amount of $6,000; leaving the amount outstanding March 31, 1867, $145,400.

The contingent fund amounted, March 31, 1867, to $69,359 23, and continues, as heretofore, safely invested.

The gross receipts of the road for the past year exceeded those of the previous year by $65,573 28; of which increase, $8,273 58 was derived from transportation of passengers, and $56,819 33 from merchandise. The expenses have also been larger by $38,549 73; leaving an increase in the net income of $27,023 55 over that of the preceding year. The increase of expenses is caused by an increase in the State taxes of $16,310 07, and by the expenditure of $22,249 88 for new rails more than last year. The cost of working the road will continue to be large, so long as labor and materials bear so high prices as at present.

The expense of operating the main road during the year has averaged $6,352 23 per mile of road, and the gross receipts averaged $9,873 91 per mile; which is somewhat more for each than for the year ending March 31, 1866. Although our expenses have been large, we have endeavored to keep them as low as a due regard to the interests of the company and the public convenience would admit, for the purpose of enabling us to reduce the rates of transporting passengers and freight; but, we must add to the cost of transportation, not only the high prices of labor and materials, but also the taxes assessed by the State and the General Government, amounting the past year to $73,575 44, which equals about one-ninth part of all the fares and freights collected, or thirty per cent. of the net earnings. This will account in part for the present rates of fares and freight on the road, which can be reduced when this great charge is removed or reduced to its former amount.

The road bed and track are now in as good condition as at any previous time, and more has been expended the past year in repairing buildings and depots than usual. We have put into the track, during the year, 881 tons of new rails and 49,977 new sleepers; and have taken up, repaired, and relaid about 2,300 tons of rails.

During the year two locomotives, and several passenger, baggage, and merchandise cars, formerly belonging to the Sullivan Railroad, and sold by the Trustees for the bondholders, on the foreclosure of the mortgage, have been purchased for this road at the cost of $28,368 87. To liquidate this purchase, the balance remaining on hand of the special fund heretofore set aside for renewals of rolling stock, $22,151 88, has been transferred to the credit of income, and applied towards payment of the amount.

The addition to our rolling stock of the above mentioned locomotives and cars, and of the cars constructed during the year at the shop, are sufficient, we think, to make good all depreciation in that department; and fully sustain the principle, that the best interests of the company, as well as its duty to the public, require such annual appropriation from the earnings as shall fully keep up the good character of the road and machinery, and maintain them in a safe and efficient condition.

The company has paid to the State for taxes during the past year, $46,146 34; and to the United States $10,675 23, for taxes on gross receipts; and there has been paid by the Treasurer $16,753 87 as taxes on dividends—making a total payment for taxes during the year of $73,575 44. Our statement shows that the net receipts the past year have fallen a little short of eight per cent. on the capital stock of the company; but, as the amount which should be paid the company for mail service during the year is sufficient to make up the deficiency, the Directors have thought it best to divide that percentage with the revenue tax in addition, and pay the deficiency from earnings of former years.

Nothing has been received by the company for transportation of mails during the past year, nor has it received any compensation for that service since June 30, 1865; and a considerable sum is due for service prior to that date. We continue to carry the mails, as we desire to accommodate the public; but it is to be regretted that the department will not pay the company for the service, or make arrangements with other parties to perform it. It is a large expense, and one that the company ought not to be required to bear without a proper remuneration.

The purchase of the Timothy Rolfe farm, in Concord, was thought expedient by the Directors, at a moderate price, in order to dispose of questions of damage resulting from the construction of the road.

We continue to keep the company's property well insured, although the rates of premium have been somewhat advanced.

There is some depression in business at this time, and our income may fall off during the coming year; while it is doubtful whether the expenses can be proportionately reduced, as labor is advancing in price, and the materials used in the repairs of the road and machinery continue high.

During the year, the Trustees for the bondholders of the Sullivan Railroad have made a foreclosure of the mortgage by sale of the property, and a settlement of their account of the trust. In order to properly protect the interests of this company, as the holder of most of the bonds secured by the mortgage, it was necessary for it to take stock in the new corporation organized by the purchasers, as provided in the Act of July 3, 1866. It is therefore now the owner of most of the shares of that corporation, received on account of the bonds held by this company, and is entitled to the future income thereof. It will also receive from the Trustees its portion of the sum of $36,725 93, cash assets from the past earnings of the road under them.

Steps have also been taken by the Trustees for the foreclosure of the mortgage of the Concord and Claremont Railroad, in which this company is largely interested as holder of the bonds secured by the mortgage, as stated in the report for last year. But that foreclosure and the settlement of the account of the Trustees have not yet been completed. When that settlement is made, this company will be entitled, on the bonds held by it, to its portion of the funds in the hands of the Trustees, which, together with those received on account of the Sullivan Railroad bonds, will be for such disposition as may be thought proper.

Number of passengers carried, 149,727; do., carried one mile, 6,283,143; do., carried one mile to and from other roads, 4,028,029. Tons of merchandise carried, 268,688; do., carried one mile, 16,829,988; do., carried one mile to and from other roads, 15,531,294. Number of tons of upward freight, 66,271; do., downward, 202,417.

The equipment of the road consists of 24 locomotives, 15 passenger, 8 baggage, 455 merchandise, 18 gravel and 1 drovers' cars. Number of miles run by passenger trains, 155,143; by freight trains, 233,077; by other trains, 4,320—total, 392,540.

Treasurer.—George A. Kettell.

Superintendent.—Wm. M. Parker.

Railways in Holland.

At the close of last year 885⅝ miles of railway were decreed in Holland, of which 616⅞ miles were in operation, while 193¼ miles were in course of construction, leaving 75 miles still to be constructed. In the course of 1866, about 110 miles of line were opened for traffic. It is hoped that in the course of 1868 two bridges in course of construction over the Rhine at Eulenburg and Zalt-Banmal will be completed. There will then be—*via* Liege, Bar-le-Duc, and Utrecht—an almost direct and uninterrupted line between France and Holland.

Montreal and Champlain Railway.

The adjourned Annual General Meeting of this company was held at Point St. Charles, Montreal, on the 12th of June: Hon. James Ferrier, President, in the chair. The Report of the directors, which was read by the Secretary, states that—

The amount accruing to this company, under the agreement with the Grand Trunk Railway Company of Canada, has amounted to $107,714 94, which is sufficient to meet the interest upon the bonds and preference stock, and leaves a balance of $12,060 15 to the credit of the sinking fund. This sinking fund now amounts to the sum of $25,402 18.

The year 1866 is the first, under the agreement with the Grand Trunk Company, in which the amount due to this company was not guaranteed at a minimum rate; and it is satisfactory to find, that, notwithstanding the heavy renewals upon the united system, the great depreciation of American currency, and the high price of materials in the United States, the proportion of net earnings is sufficient to meet all the interest charges, and carry a balance to the credit of the sinking fund.

The accounts have been examined and reported upon by the Joint Committee, as provided for by the agreement between the two companies; and the committee report that the line and rolling stock have been fully maintained during the past year, and are now in a satisfactory condition.

The report was received and accepted; after which the following gentlemen were elected directors for the ensuing year: Hon. James Ferrier, Hon. John Rose, William Molson, Johnston Thomson, C. J. Brydges, E. H. King, E. M. Hopkins, W. E. Phillips, William Dow.

Boston, Concord and Montreal Railroad.

The receipts of this road for the years ending March 31, 1866 and 1867, have been as follows:

	1866.	1867.
From passengers	$169,715 14	$175,089 14
" freight	245,793 87	277,184 89
" mails	2,542 13	11,102 58
" express	3,750 00	3,750 00
" miscellaneous	1,027 53	687 95
Total receipts	$422,828 67	$467,714 56
Expenditures, viz:		
Maintenance of way	$111,570 55	$127,358 17

In hands of superintendent more than last year	.....	3,049 30
Bonds and cash on hand	154,808 26	217,260 29
Total, as above	$250,741 79	$310,851 28

Compared with 1865, the receipts of 1866 show an increase of $44,885 89; with an increase in expenses of $32,634 51—making an increase in net receipts of $12,251 38. The report says:

The foregoing balance of $137,122 38 is exclusive of the amount due from the United States Government for mail service. The amount due us is over $8,000, which is about the same as last year.

The directors have endeavored to conduct the pecuniary affairs of the road as prudently as possible, and to make the expenses as light as its proper management would permit; but the high prices of labor and materials of all kinds have rendered it very difficult to effect any substantial reduction of our expenses in any department, and in some of them there has been a necessary increase.

The roadway and superstructure have been materially improved during the year, and are now in a better condition than at any time since the completion of the road.

The motive power, passenger and freight cars are all in excellent order, and in a better condition than at the date of the last report.

We have laid this year 838 tons of new and re-rolled iron. We have laid 55,154 new sleepers, and have built over (making as good as new) one machine, besides making extensive repairs on the others, and have built new passenger and freight cars, and have put the others in first-rate order.

Our business connections with the lower roads remain much as they did a year since.

The regular payment of $12,500 has been made to the sinking fund, and this fund and its accumulations amounted, on the 1st of April last, to $180,000; and by the 1st of January, 1868, will have reached the sum of $200,000. It will then require for the annual payment to it, and for interest, $25,000 a year. This amount in each year will very rapidly reduce the bonded debt of the road, and will absorb the whole of it before these bonds mature.

In investing the amount thus paid to the sinking fund in each year, a preference by law is to be given to these bonds, (sinking fund,) and the demand thus created must inevitably keep up the market price, and thus make them an investment as safe and as desirable as any security which is offered to the public.

The rates of interest paid upon the securities of the Federal and State Governments at this time, and the large number of these now in the market, make it difficult to dispose of any six per cent. securities at present, unless at a discount, which the Directors have not thought advisable; and there is therefore a large amount of the bonds of the road due in 1865, which have not yet been provided for; but, notwithstanding these overdue liabilities, the directors, at the request of some of the holders of preferred stock, who have also taken the sinking fund bonds, have declared a dividend of three per cent. (less the revenue tax) on the preferred stock, and this dividend is now payable at the Treasurer's office.

The subject of the extension of the White Mountains N. H. Railroad, from Littleton to Whitefield and Lancaster, has been more or less agitated for the last four years, and during the past season, surveys have been made of some of the routes which have been thought most favorable for this proposed extension.

This extension would be of very great value to the towns through which it would pass, and would also be beneficial to our own road. The towns and individuals who would gain by its construction, have proposed to aid the enterprise by grants of rights of way and by liberal subscriptions; and should they do this, and take hold earnestly and strongly to carry out the plan in such a manner as to justify our co-operation, it would certainly be advisable for the directors of this corporation to have the necessary authority to aid them in the enterprise. This matter will be submitted for your consideration.

There have been cancelled, of the mortgage bonds, due in 1865, $296,000; and we have issued instead of them an equal amount of sinking fund bonds, as authorized by act of Legislature.

A large portion of the sinking fund bonds are still on hand, as will be seen by the trial balance of the treasurer, which also shows how the money of the corporation has been appropriated, and the improvement in the financial condition of the road as per annexed statements.

The total number of passengers carried in 1866 was 124,449. Total number of tons of freight carried 56,264.

The following statement will show the financial condition of the company on the 31st of March 1866 and 1867:

	1866.	1867.
Construction	$2,850,000 00	$2,850,000 00

President.—JOHN E. LYON.

Directors.—John E. Lyon, Alexander H. Tilton, Joseph P. Pitnam, Peter Butler, John L. Rix, John A. Parks and Joseph W. Lang.

Treasurer.—EDWARD D. HARLOW.

Superintendent.—J. A. DODGE.

Virginia Central Railroad.

A meeting was held at Staunton, Va., on the 24th ult., to consider the proposed extension of the Virginia Central Railway line to the Ohio River. Speeches were made by Judge Sheffey, Colonel Fontaine, President of the road, and others. Various resolutions were passed, the most important being one requiring the County Court to take the sense of the people, as soon as practicable, upon the proposition to subscribe, on behalf of the County, $500,000 of the stock of the railway company. Judge Sheffey said that this movement would not only give that section the advantage of the Virginia Railroad from the Atlantic to the Ohio, but would insure the completion of the Valley Railroad. He said that they now had assurances that the Winchester and Strasburg Railroad will be built, and the Manassas Gap Railroad repaired, so that in twelve months Harrisonburg, near Staunton, will have direct railroad communication with Baltimore by this route, which would soon reach Staunton, and in all probability, be extended to Salem, on the Virginia and Tennessee Railroad, in twelve months more.

☞ The new extension of the Allegheny Valley Railroad to Brady's Bend, was formally opened on the 26th ult.

Pennsylvania Railroad Company.

The aggregate receipts of the company from the operations of its works, including the Philadelphia and Erie Railroad, for the years 1864, 1865 and 1866, have been as follows:

	1864.	1865.	1866.
Pennsylvania R. R	$14,759,057 66	$17,459,169 49	$16,583,882 84
Penn. Canals	308,615 23	181,015 38	297,867 16

New 2d track and sidings	191,220 28	269,575 97	250,965 09
Maintenance of cars	853,929 12	1,330,467 52	1,070,912 77
New cars added to stock	1,151,063 92	327,157 87	890,129 43
General expenses	152,599 33	166,137 34	288,852 55
Total expenses	$10,693,944 19	$13,270,058 54	$12,790,909 27
Earnings less expenses	$4,065,113 47	$4,189,110 92	$3,792,973 57
Of the expenses the following division is made:			
Ordinary expenses	$8,225,659 67	$10,881,930 04	$10,616,362 17
Extraordinary expenses	2,468,284 52	2,388,128 50	2,174,547 10
Total	$10,693,944 19	$13,270,058 54	$12,790,909 27

The mileage of track in use on the road and branches, including sidings and second tracks at the commencement of the years respectively, was 942.40 / 989.00 / 1,046.50

Added during the year	46.60	57.50	62.00
In use at end of year	989.00	1,046.50	1,108.50
—accounted for as follows:			
Main Line	807.20	828.20	850.50
Branches owned	88.60	38.70	44.60
" leased	123.10	158.10	182.10
Private sidings	20.10	21.50	31.30
Total length in miles	989.00	1,046.50	1,108.50

The single track on the main line is now limited to the following sections:

At Susquehanna Bridge	1 mile, 559 feet.
At Maye's Bridge	850 "
Between Manayunk and Newton Hamilton	4 mile, 1,388 "
Between Mount Union and Bridgeport	4 mile, 288 "
Over Conemaugh Bridge, at Johnstown	530 "
Total	9 mile, 3,615 feet.

The number of locomotives on the road at the commencement of the year was 290 / 321 / 352

And at its termination	321	352	362
The condition of these was as follows:			
In good order	158	171	175
In running order	86	101	57
Wanting general repairs	..	...	33
Wanting ordinary repairs	..	...	16
In shops for slight repairs	25	34	29
" for general repairs	52	29	40
" for rebuilding	..	17	12
Total in all conditions	321	352	362

The mileage of engines in each year was as follows:

	1864.	1865.	1866.
Passenger engine mileage	1,370,347	1,622,748	1,775,472
Freight "	4,383,559	4,715,284	5,304,554
Distributing "	257,612	266,268	273,240
Total mileage	6,011,518	6,604,300	7,353,266

And the cost of repairs, &c., as follows:

	1864.	1865.	1866.
Repairs	$866,748 94	$1,051,735 66	$897,805 75
Fuel	552,932 86	757,457 93	658,910 68
Oil and waste	172,452 34	233,982 59	174,904 03
Total cost	$1,592,134 14	$2,043,176 18	$1,726,620 46

—averaging per 100 miles run, for

	1864.	1865.	1866.
Repairs	$14.41	$15.92	$12.21
Fuel	9.19	11.17	8.89
Stores	2.87	3.54	2.38
Total cost per 100 miles	$26.47	$30.63	$23.48

The number of cars on the road at the end of each year was as follows:

	1864.	1865.	1866.
Passenger, baggage and express	225	262	276
Freight and coal	5,381	5,336	5,606
Other cars (in maintenance department)	548	542	599
Individual cars	...	.....	2,426
Total	6,154	6,140	8,907

The number and mileage of passengers carried were as follows:

	1864.	1865.	1866.
Passengers	2,336,213	2,861,836	2,673,568
Miles traveled	146,873,005	204,564,393	139,085,550

The tons of freight and the miles each ton was carried was as follows:

	1864.	1865.	1866.
Tons, through, eastward	322,497	302,842	316,534
" local "	1,482,647	1,418,647	1,841,304
" through, westward	147,972	160,899	164,250
" local "	632,263	673,327	864,271
" through, both ways	470,469	463,741	480,784
" local, both ways	2,114,910	2,091,965	2,705,575
" free goods	179,497	....	....
Total tons carried	2,764,876	2,555,706	3,186,359
Tons carried one mile	420,627,222	420,060,260	513,102,181

PHILADELPHIA AND ERIE RAILROAD.

The earnings of the Philadelphia and Erie Railroad for the years 1864, 1865 and 1866, compare as follows:

	1864.	1865.	1866.
From passengers	$479,822 44	$828,590 21	$686,621 78
" troops	31,389 18	94,451 46	48,103 13
" freights	545,037 45	1,083,925 31	1,744,299 13
" express matter	16,345 16	26,887 20	26,941 43
" mails	14,390 03	19,085 61	18,501 96
" miscellaneous sources	44,163 72	21,201 00	16,584 36
Total earnings	$1,131,147 98	$2,074,140 79	$2,541,051 79
The operating expenses for the same years were:			
Transportation	$217,245 96	$537,517 74	$768,260 48
Motive power	234,698 75	562,648 89	682,947 62
Maintenance of way	354,168 22	627,050 09	624,245 02
" cars	32,485 91	18,835 56	11,521 41
Total operating expenses	$838,593 83	$1,746,052 28	$2,086,974 53
Thirty per cent. due on lease to meet interest on bonds, etc.	335,708 95	598,708 00	732,738 80
	$1,174,302 78	$2,344,760 28	$2,819,713 33
Loss on operation	$43,154 89	$270,619 49	$278,661 04

COMPANY'S CANALS.

The earnings of the company's canals were:

	1864.	1865.	1866.
Susquehanna Division, 46 m.	$253,787 57	$140,912 38	$252,681 42
Juniata Division, 127 m.	29,532 76	22,186 42	85,175 32
Western Division, 73 m.	12,174 72	105 00	....
Miscellaneous	13,120 18	17,811 58	10,010 42
Total 246 miles	$308,515 23	$181,015 38	$297,867 16

The cost of maintaining, enlarging and operating was:

	1864.	1865.	1866.
Susquehanna Division	$153,794 03	$183,779 86	$130,212 93
Juniata Division	126,560 02	87,268 69	101,501 50
Western Division	30,200 37	8,795 46	1,723 55
Total expenses	$310,555 32	$279,843 51	$233,437 98
Loss on operating	$1,940 09	$98,828 13	
Net profit			$64,429 18

The total tonnage transported on the canals was as follows:

	1864.	1865.	1866.
Coal	629,820	422,805	603,975
Lumber	196,940	62,809	179,459
Miscellaneous	227,584	79,248	149,170
Total tons transported	1,052,344	564,862	932,604

The following summary exhibits the condition of the captial account for the past twelve years embracing the whole period since the completion of the line:

Year ending Dec. 31.	Share Capital.	Bonds and Mortgages.	Total Amount.	Cost of Property.
1855	$12,355,525	$7,519,096	$19,874,621	$18,483,489
1856	12,646,625	8,516,841	21,163,466	19,048,968
1857	13,206,625	14,929,940	28,136,565	27,266,981
1858	13,240,225	16,094,451	29,334,676	27,670,672
1859	13,349,125	16,469,159	29,818,284	28,484,321
1860	13,261,960	16,680,804	29,942,764	28,846,442
1861	13,264,100	16,936,764	30,200,864	29,587,678
1862	13,274,100	16,696,764	29,970,864	29,888,552
1863	13,430,250	16,949,124	30,379,374	30,592,298
1864	19,896,060	16,802,124	36,698,184	31,024,891
1865	20,000,000	16,750,124	36,750,124	31,809,334
1866	20,000,000	18,209,040	38,209,040	29,013,854

In 1857, and since, the funded debt and cost of properrty includes the State Works purchased by the company for $7,500,000, which is payable in annual instalments, which diminish the amounts debited and credited to the State and company respectively.

The earnings and expenses of the railroad and dividends for the same years have been as follows:

Year ending Dec. 31.	Gross Earnings.	Operating & Repairs.	Profits on operations.	Dividends.
1855	$4,270,070	$2,340,788	$1,829,277	6
1856	4,720,124	2,814,568	1,905,626	6
1857	4,855,659	3,000,743	1,854,826	3½
1858	5,185,331	3,021,885	2,163,436	5½
1859	5,362,355	2,130,738	2,231,617	6
1860	5,932,701	3,636,659	2,296,042	6
1861	7,300,001	3,653,063	3,646,938	6
1862	10,304,291	5,431,073	4,873,218	8
1863	11,891,415	6,780,000	5,111,413	9
1864	14,759,058	10,693,944	4,065,114	10
1865	17,459,169	13,270,058	4,189,111	10
1866	16,583,883	12,790,909	3,792,974	9

Stock dividend paid in May, 1864 30

The earnings and expenses of the canals, not included in the above, were:

Year ending Dec. 31.	Gross Earnings.	Operating Expenses.	Profits on operations.	Losses on operations.
1857 (5 months)	$92,434	$73,191	$19,243	$.....
1858	179,100	124,058	55,042	.....
1859	197,549	175,452	22,097	.....
1860	209,366	154,761	54,605	.....
1861	176,109	147,872	28,237	.....
1862	251,482	258,092	.....	6,610
1863	287,156	362,374	.....	75,218
1864	308,615	310,555	.....	1,940
1865	181,015	279,843	.....	98,828
1866	297,867	233,438	64,429	.....

The company entered on possession of the Philadelphia and Erie Railroad on the 1st February, 1862, since which date the earnings and expenses thereof has been as follows:

Year ending Dec. 31.	Gross Earnings.	Operating and Repairs.	Earnings less Expenses.	30 per cent. of Gross Earnings.*
1862 (11 months)	$425,687	$226,647	$199,040	$122,697
1863	725,670	336,596	389,074	218,301
1864	1,131,148	838,594	292,554	335,709
1865	2,074,140	1,746,052	328,088	598,708
1866	2,541,052	2,086,975	454,077	732,789

* This amount (after all drawbacks) is set apart under the lease to pay interest on the bonds of the Philadelphia and Erie Railroad Company.

The following quantities of materials have been used during the year on the main line and branches: 15,830 tons of iron rails, 1,541 tons of steel rails, 16,293 wrought iron chairs, 86,854 splice joints, 543,420 lbs. spikes, and 412,105 cross ties; 10,849 tons of the iron rails were obtained from re-rolling. In July, 1864, 78 tons of crucible steel rails were laid down at Altoona. In October, 1864, the same quantity was laid at Pittsburg, and in June, 1865, 100 tons of the same description of rails were laid at Philadelphia and Altoona. These rails were of the Philadelphia and Erie pattern, 4 inches in height, weighing 56 pounds per yard. They were placed on sidings, upon which a large amount of work is done at slow rates of speed; none of them have broken, and they show at this date very slight appearance of wear. During October and November, 1865, 270 tons of Bessemer rails of the same pattern were laid on similar sidings, at the principal stations. At some of the points where the above rails have been in use, two or three sets of iron rails would have been worn out, while the steel rails are yet in good condition. During the past year, 1,541 tons of Bessemer rails have been laid down in the main tracks; about 600 tons of which are of the Philadelphia and Erie pattern, and the balance are of the pattern adopted on this road, having a height of 4½ inches, and weighing 67 pounds per yard. Experiments are now in progress to determine the relative endurance of iron and steel rails, by placing them where they are subjected to exactly the same usage.

General Account.

The General Account, showing the financial condition of the company December 31, 1864, 1865 and 1866, presents the following balances:

	1864.	1865.	1866.
Capital stock	$19,896,060 00	$20,000,000 00	$20,000,000 00

American Railroad Journal.

Saturday, July 6, 1867.

Stock Exchange and Money Market.

Money has been remarkably easy all through the past week. The supply has been gaining on the demand, especially since Monday, under the heavy interest and dividend disbursements. The demand has been more active, but not sufficient to absorb the available offerings. The call loan rates have been to the Government houses generally 4 per cent.; and to the Stock Exchange firms, 5@6 per cent. Discounts have been quiet. Choice to prime short-date commercial paper has been in light stock, and in fair request at bank and through private channels at 6@7 per cent. per annum. The banks have all completed their quarterly settlements with the Currency Bureau at Washington quite satisfactorily, making an unexpectedly good showing in their currency reserve, and in their deposit line, which are now again on the increase. The last city bank statement shows a decrease of $1,092,523 in loans and discounts, $1,630,589 in specie, and $90,611 in circulation, with a significant increase of $7,358,463 in legal tender, and $6,736,087 in net deposits. The specie reserve of the banks is now $7,768,996, against $7,797,218 same time last year. The city bank deposits are now $186,213,257, against $204,357,272 week ending June 30, 1866. The legal tender reserve amounts to $70,174,755, against $81,822,640 same time last year. The circulation now stands at $33,542,560, against $26,706,622 same time last year. The loans are now $242,547,954, against $250,884,168 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $82,324,059 a day, against a daily average of $73,740,134 the preceding week, and $76,828,100 the week ending with June 15. The current week's exchanges average $107,000,000 a day.

National Bank notes to the amount of $310,400 were issued last week, making the total issue to 1,671 banks thus far, $303,614,226, against $282,555,440 at the close of the fiscal ending year, June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $4,988,847, leaving, with the existing 1,650 banks, (having an aggregate capital of $422,913,861,) an actual circulation at this date, of $298,625,793. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $340,571,500; and for the public deposits, $39,180,450—making a total of $379,709,950. The Treasury Department last week redeemed and destroyed $324,689 of worn and mutilated fractional currency, and issued $702,356 worth of new.

The Philadelphia Bank movement the past week shows a decrease in loans, of $429,479; of $8,121 in specie; an increase in legal tenders of $140,637; a decrease in deposits of $716,432, and $913 in circulation. The Bank Clearings show a decrease of $2,362,478, and the balances, an increase of $221,190.

The U. S. Sub-Treasury receipts, week ending with June 29, were $25,416,297, including $1,726,400 from customs duties; payments, $25,086,873; balance at the close of the week, $132,459,170, against $132,129,745, at the close of the preceding week, showing an increase of $329,425. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $5,253,331 including $406,976 from customs, and payments, $5,403,676; on Tuesday, receipts, $1,345,056; payments, $3,405,315. The balance at the close of business on Tuesday stood at $130,248,565, against $139,116,010 a week previous.

Government revenues were comparatively moderate last week. The excises, last week, yielded about $2,500,000, against $3,500,000 the preceding week; customs at the port of New York $1,726,400, and at the outports, about $600,000 (in coin) more, making the grand total income for the week equal about $5,700,000 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with July 30, 1867, were $265,853,195. The new fiscal year, which began on the 1st inst., opens on a daily excise revenue of over two million dollars. The aggregate receipts from excises for the fiscal year ending June 30, 1867, shows a decrease of about $40,-

000,000 for the year as compared with the preceding year's income and is just equal to the Commissioner's revised estimates made after the reductions in the tax law were agreed upon. The following tabular statement of monthly receipts from internal revenue for the fiscal years 1866 and 1867 is interesting:

	1866.	1867.
July	$21,693,470 75	$27,079,103 38
August	34,087,539 09	38,043,340 81
September	37,939,415 82	33,714,718 66
October	30,457,983 63	26,414,430 29
November	26,849,695 39	21,107,122 59
December	24,528,353 34	20,050,824 13
January	25,383,510 07	17,604,396 34
February	20,452,169 60	14,838,411 90
March	22,498,067 18	15,183,226 21
April	19,425,851 22	14,414,030 56
May	21,724,680 40	16,971,207 81
June	20,823,446 23	20,432,382 20
Total	$305,864,182 18	$265,853,194 88

Gold has been in rather brisk request, this week, and though the fluctuations have been unimportant, the speculation has been a more confident one. The closing price on Wednesday was 138⅝, on a fair business, chiefly on speculative account. The total imports of specie from Europe, and other foreign ports since Jan. 1, 1867, have been $1,554,989. The customs demand for Gold last week, averaged $287,733 a day; thus far, this week, it has been equal to $406,976 a day, or equal to a weekly aggregate of $2,034,880. The arrivals of specie from Europe, Havana and other foreign ports, during the past week were $92,765, and from California, none. The total customs revenue of the Government, in coin, at this port, year ending with June 30, 1867, was $122,667,016, against $133,617,484 same time in the preceding fiscal year. The total receipts of California gold at this port year ending June 30, 1867, were $38,750,695, against $29,142,577 same time last year, showing an increase this year, of $9,608,118. The exports of specie from this port, last week, were $1,140,098. The total outflow of specie from the port, during the late fiscal year was $41,371,932, against $57,870,354 same time in the preceding year. Government disbursed last month through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $1,237,082, making the total coin interest disbursements through the Government office, during the year ending June 30, 1867, $54,218,392, against $46,145,548 for the preceding fiscal year. The specie exports from San Francisco, from Jan. 1, to May 29, reached $14,863,783, against $15,035,553 same time last year, showing a decrease, in 1867, of $171,770.

The total amount of gold certificates issued and redeemed by the U. S. Sub-Treasury, together with the outstanding balance on the 8th May, and at subsequent weekly intervals, is thus stated:

	Issued.	Redeemed.	Outstanding
20s	$333,900	$206,600	$127,300
100s	5,321,000	3,758,400	1,562,600

Foreign exchanges have been in moderate supply and demand, without any remarkable changes in prices. Bankers' 60 day bills on London closed steadily on Wednesday at 109¾@110, and on Paris to 5.17½@5.13⅛; sight bills on London to 110¼@110½; and on Paris to 5.12½@5.10⅝. The offerings of produce bills have been fair this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $3,541,893, making the total value of exports from July 1, 1866, to date, $179,384,084, against $213,962,363 same time in the preceding year.

Government securities have been in fair investment demand throughout the week, and have been generally firm in price. They closed with an upward tendency, on a growing investment business. Much of the idle capital here is being turned into Government stocks, as the safest and most profitable channel of employment. Washington advices state that: "The Treasury Department has given notice to the holders of Seven-thirty notes that it is now prepared to give in exchange for such notes Five twenty bonds issued under the act of March 3, 1865, redeemable after five years, and payable in twenty years from 1st of July, 1867. Holders are also notified that the department will consider that they have waived their right to demand bonds in exchange for their notes, unless the notes are presented for conversion by the 15th of August next. Seven-thirty notes transmitted for conversion must in every case be indorsed to the Secretary of the Treasury, by the party presenting them, and must also, when payable to the order of another person, be indorsed by such payee or his legally authorized representative. Careful attention to this regulation will save parties converting such notes much unnecessary expense." The right of conversion belongs to the holders of only the August Seven-thirties, under these orders. The very first issues of the new Five-twenty bonds of 1867, were received in this city on Monday. The new bonds of the several denominations were printed from the same plates as the Five-twenty Consols of 1865. The number and date of each bond of the new issue were printed in red ink on the face of the bonds. They are quoted in the open market here at precisely the same price as the latest Five-twenty issue of 1865, ex the July coupon. The six per cents of 1881 and the 1865 consolidated Five-twenties are now quoted without the July coupon. U. S. sixes of 1881 closed here on Wednesday at 109⅛@109¼ ex July coupon; U. S. Five-twenties of 1862, 110¾@111; U. S. Five-twenties of 1864 at 107¾@107⅞; U. S. Five-twenties of 1865 at 107⅞@108; U. S. Five-twenties of 1865, consolidated, 106⅝@106¾, ex July coupon; U. S. Five-twenties of 1867, 106⅝@106¾; U. S. Ten-forties at 101@101¼, and U. S. Seven-thirties at 106½@106¾. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

July, 1864	119
August, 1864	118½
October, 1864	117½
December, 1864	116¾
May, 1865	116⅜
August, 1865	115½
September, 1865	115
October, 1865	114½

Railway and miscellaneous stocks have been quite briskly dealt in, since our last, and prices have again advanced materially, with wide and frequent fluctuations. The dealings at the close were extensive on a rising market.

General business has been comparatively tame, since our last. Breadstuffs have been less urgently sought after, closing heavily. Provisions have been in moderate demand, and irregular in price Live stock have been more abundant and cheaper. Cotton has been in fair request, closing in favor of buyers. Middling grades left off here on Wednesday tamely at 26@27½ cents per lb. as extremes. The stock of cotton now here is estimated at about 85,000 bales. The receipts at the port this week, have averaged about 2,500 bales a day. The receipts since the commencement of the current cotton year, Sept. 1, have been 605,000 bales, against exports of 431,000 bales. The receipts at all the shipping ports from September 1 to latest mail dates have been 1,812,000 bales, against 1,931,150 bales same time last year; exports, 1,432,000 bales, against 1,458,000 bales same time last year; estimated stock at latest dates, 233,500 bales, against 310,300 bales same time last year. An improved demand has been experienced for imported goods, especially for dry goods and groceries, which have been held with more firmness. The total imports of foreign dry goods, last week, were $1,138,165, and the total amount marketed $1,006,742. The value of foreign merchandise imported last week, was $3,233,382—making the grand total specie value of last week's imports of dry goods and merchandise, $4,371,547, and during year ending June 30, 1867, $259,498,087, against $297,539,212 same time in the preceding fiscal year. The ocean freight market has been quiet, but firm, since our last, with 529 vessels of all classes in port. For Liverpool we quote flour at 1s.@1s. 3d. per bbl.; grain at 4c.@4½d. per bushel; cotton at $\frac{3}{16}$@¼d. per lb.; and heavy goods at 10s.@20s. per ton, all by sailing vessel.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	June 19.	June 26.	July 12.
Consols	94½	94	94½
U. S. 5-20's of 1862	73	73	72¾
U. S. 5-20's of 1865	71	71	70½
Erie	39¾	40¾	43½
Ill. Central	79	79¾	79

The New York exports, exclusive of specie, for the week ending July 2d, and since the beginning of the year, compare as follows:

	1866.	1867.
For the week	$2,200,013	$3,541,893
Prev. reported	104,884,214	94,235,796
Since January 1	$107,084,227	$97,777,689

The New York imports for the week compare as follows:

	1866.	1867.
Dry goods	$1,278,778	$1,138,165
Gen. merchandise	1,734,827	3,233,382
Total for the week	$3,013,605	$4,371,547
Previously reported	152,441,409	124,193,508
Since January 1	$155,455,014	$128,565,055

The commerce of New York from July 1st to date compares as follows:

	1865–'66.	1866–'67.
Imports merchandise	$297,539,212	$259,498,087
Exports produce	213,962,363	179,384,084
Exports specie	57,581,062	41,366,932

☞ We would refer those readers of our JOURNAL who are interested in the use of steel, to an advertisement which appears in our columns from the old established house of WM. JESSOP & SONS, whereby it appears that they have contracted for the whole annual make of the most celebrated of the Dannemora Irons.

(L) This Iron has stood at the head of the list as a Steel Iron for more than half a century, and has a world wide reputation—no better Steel can be produced than that made from this Iron.

Little Rock and Ft. Smith Railroad.

Capt. J. H. Haney, Chief Engineer of the Little Rock and Ft. Smith Railroad, having completed the work of re-locating the line between Little Rock and Lewisburg, has returned to Little Rock. The *Gazette* of that city says the estimates for building the road will be made at once, and hopes to be able to announce at an early day, that a contract for construction has been let.

Winona and St. Peters Railroad.

At the recent annual meeting of the stockholders of this company held at Winona, Minnesota, on the 12th ult., the following gentlemen were elected directors for the ensuing year:

D. N. Barney, A. H. Barney, Jesse Hoyt, Alfred M. Hoyt, Charles F. Latham, New York; Wm. G. Fargo, Buffalo; Benjamin P. Cheney, Boston; J. W. Sprague, Winona; Angus Smith, Milwaukee.

The active management of the company's interests at Winona will doubtless continue in the hands of Gen. Sprague, the managing director, a gentleman of acknowledged vigor, and superior executive abilities.

The extension of the road beyond Owatonna is being prosecuted as rapidly as possible, and the line will be opened for business to a point near Clear Lake, about 15 miles west of Owatonna, by the first of September. The iron necessary to lay the track to that point is mostly in hand, and what is still lacking is now *en route* from New York.

Interest and Dividends.

The Philadelphia and Reading Railroad Company have declared a dividend of five per cent. on the common and preferred stock, payable, clear of National and State taxes on the 15th inst.

The Lehigh Valley Railroad Company a quarterly dividend of 2½ per cent., payable July 15th.

The Minehill and Schuylkill Haven Railroad Company a semi-annual dividend of four per cent., payable, clear of State and U. S. taxes, on the 11th inst.

The Cayuga and Susquehannah Railroad Company will pay a dividend of four and one-half per cent. on the 1st of July.

The New Bedford and Taunton Railroad Co., have declared a semi-annual dividend of 4 per cent., free of Government tax, payable July 1.

The Worcester and Nashua Railroad Company have declared a dividend of $4 per share, payable July 1.

The Concord and Portsmouth Railroad Co., have declared a semi-annual dividend of $3.50 per share, payable July 1.

The Quincy Granite Railroad Company have declared a semi-annual dividend of 3 per cent., payable August 1.

The Paterson and Ramapo Railroad Company have declared a dividend of 2½ per cent., payable July 3.

The Paterson and Hudson River Railroad Co., have declared a semi-annual dividend of four per cent., payable July 3.

The Citizens Passenger Railroad Co., Philadelphia, have declared a dividend of $3 per share, payable on demand.

☞ The Pennsylvania Railroad Company has purchased a majority share interest in the West Branch and Susquehanna Canal Company, whose main line is 114 miles long. This acquisition puts the Pennsylvania Railroad in control of 87 miles of canal in the Susquehanna Valley, from Columbia to Northumberland, and of 73 miles of canal in the West Branch Valley, from Northumberland to Farrandsville, besides the 127 miles of canal in the Juniata Valley—making a total of 287 miles all in river valleys, and in the very centre of the State.

Railroad Earnings.—Weekly.

The earnings of the Chicago and Rock Island Railroad for the 3d week in June, 1867, were $64,400 00
Corresponding week of previous year.. 94,397 00

Decrease $29,997 00

The earnings of the Michigan Central Railroad for the 3d week in June, 1867, were.. $59,113 00
Corresponding week of previous year.. 79,043 00

Decrease $19,930 00

The earnings of the Detroit and Milwaukee Railroad for the week ending June 27th, 1867, were $33,821 00
Corresponding week of 1866..... 30,876 00

Increase..... $2,945 00

The earnings of the Marietta and Cincinnati Railroad the 3d week in June, 1867... $21,446 00
Corresponding week previous year.... 25,415 00

Decrease..... $3,969 00

The earnings of the Atlantic and Great Western Railroad for the third week in June, 1867, were..... $90,825 00
Corresponding week previous year... 131,316 00

Decrease..... $40,491 00

The earnings of the Virginia and Tennessee Railroad for the third week of June, were $13,129, an increase of $3,179 on the same week last year. Total for the fiscal year commencing 1st of July, $704 881, an increase of $145,585 on same time of 1866.

Journal of Insurance Law.

ACTION BY INSURANCE COMPANY FOR LOSS OF FREIGHT INSURED.—SUBROGATION.

The case of The Home Ins. Co. *vs.* The Western Transportation Company in the N. Y. Superior Court is an important case of equal interest to insurance and railroad companies. It holds that the payment of loss alone as a total one by the insurer, entitles it to be subrogated to the rights of the insured against a common carrier by whose negligence the loss was caused. It also holds that a settlement between the common carrier and the insured, with knowledge of the insurer's rights would be void.

The opinion of Ch. J. Robertson was concurred in by Monell, J.

ROBERTSON, Ch. J.—The plaintiffs in this case, if they were assignees of the cause of action before any settlement made by the defendants with the consignees, unless such defendants had no notice of such assignment, were entitled to recover; or, so, too, if they had a legal right in equity to such assignment before such settlement, and the defendants knew the facts out of which such equitable rights arose, a settlement made in fraud of such right would be void. It has been frequently held in the Courts of this State, as well as those of Massachusetts, that where an owner of goods insured, and damaged by perils insured against, abandons all *spes recuperandi* to the underwriter, the latter, on paying the loss, is entitled to be subrogated to all the rights of the insured—to recover against third parties who caused the damage, by neglect or otherwise, and the entire destruction of the subject of insurance, or the payment of the loss, has been considered equipol. lent with an abandonment in giving the insurer such right of subrogation. In the case of a common carrier, it is true, the owner of goods transported by him may, by agreement, give him the benefit of an insurance on them, affected by such owner, so as at least to deprive the underwriter of any remedy against such carrier, although such insurance was made without knowledge by the underwriter of such agreement with such carrier. (Mercantile Mutual Insurance Co., *vs.* Calebs, 20 N. Y. R., 173.) In fact, such carrier is an insurer as well as the underwriter, and their rights seem to depend entirely on the action of the owner, who may, by previous agreement, give either the preference in having a claim against the other, in case of a loss.

The referee in the present case appears to have assumed that an abandonment of some kind was necessary to entitle the plaintiffs to recover. He states in his report, that the plaintiffs, "by reason of" an abandonment which he had previously found as a fact, and their payment to the consignees of the amount of their loss, "as well" (meaning, undoubtedly, "as much") as *by virtue* of the assignment to them, acquired the rights of the consignees. That he meant that such rights were acquired by either means, separately and indifferently, I think evident from his contrasting the phrases "by reason of" and "by virtue of," as well as his use of the word "subrogated," to express the mode of acquiring such rights, which is not appropriate to an assignment, and his succeeding statement "that the circumstances of the case constituted notice to the defendants of the intervening rights of the plaintiffs" [not as assignees, but] "as insurers of the property injured;" and that, therefore, "their settlement * * * was without effect on the previously acquired rights of the plaintiffs." I cannot doubt, therefore, that the referee meant to rest his conclusions as much, if not more, on the right of the plaintiffs, *as insurers* to whom the consignees had, by other means, transferred all their interest in the goods, than on their right as assignees, particularly as he does not speak of any express or implied notice of *the assignment* as such before the settlement, which would be necessary to defeat it.

There is no evidence in this case of a direct and formal relinquishment by the consignees of all their interest in the damaged grain to the plaintiffs; and the question of its abandonment as a fact is, therefore, not without difficulty in this case. The preliminary steps of possession taken by the plaintiffs of such damaged part, by direction of the defendants, after a series of notices of the loss, first by the latter to the consignees, then by them to the plaintiffs, and finally some negotiations between the parties to this action, did not constitute an abandonment; nor would the mere sale of part of the cargo and the receipt of its proceeds by the plaintiffs, unless by the consent of the consignees, operate as such. In fact, at the time when the plaintiffs thus took possession of the cargo, it was still in possession of the defendants as carriers; and they only delivered it to the plaintiffs to take charge of it for the parties interested. There is no direct evidence that the consignees, at that time, had any agency in the transfer of the property. Subsequently, however, *their* agent, in the very receipt given by him to the agent of the defendants, on the 9th of May, 1861, and which they claim to be a settlement, admitted that the damaged grain *had been received by the consignees* at Fort Plain, thus recognizing the delivery to the plaintiffs as a receipt by themselves. The damaged grain having been sold by the agent of the plaintiffs, and its proceeds received by them, they *settled with the consignee as for a total loss of the damaged grain*, without regard to such sum so received. That evidence was certainly strong enough to have defeated any action by the consignees against the plaintiffs for the conversion of such damaged grain. I think it was also evidence from which the Referee was at liberty to infer an abandonment of the damaged grain. (See N. Y. Ins. *vs.* Roulet, 24 Wend., 513.) And if necessary for the determination of the case, we ought not to disturb his finding upon that point.

I am, however, inclined to think that even the payment of the loss alone, particularly as a total one of the grain damaged, entitled the plaintiffs to be subrogated to the rights of the consignees so far as such was concerned. Otherwise, the consignees would be entitled to double compensation, and the policy of the plaintiffs become a mere wager one, since the consignees were entitled to be fully indemnified by the defendants, who were in fact equally insurers. In such case, neither would be entitled to recover against the other what they might be compelled to pay. In this very case, the consignees received fifty dollars from the defendants, for damage to the cargo, which was not credited to the plaintiffs in their settlement with them. On the payment of a partial loss, the inchoate right or equity of the plaintiff must become complete, because there can be no abandonment. In the case of The Mayor, &c., of New York *vs.* Pentz (24 Wend. 668), it was held that the plaintiffs were entitled to recover the full value of property destroyed by municipal authorities to prevent the spread of a conflagration, without regard to an insurance made thereon, because the insurers were entitled to be subrogated, or a reduction of their liability, to the extent of the amount recovered from the city without regard to an abandonment, which would have been useless. It is laid down, in a case in the same volume of reports (p. 576, The New York Insurance Co. *vs.* Roulet) that the mere payment of the loss by an underwriter entitles him in equity to *what may be recovered* from other parties on account of the loss, and neccessarily to be subrogated so *as to recover* such money, and nothing is said of abandonment. In the Atlantic Insurance Co. *vs.* Storrow (*vide sup.*) a cancelment by the owner of goods of a bill of lading, and a discharge of the ship-owner from liability for the loss of such goods by thieves, was held to entitle the insurer in equity after a judgment against him for the loss, to be relieved from it, and no question was raised of any necessity of abandonment. Of this equity of the plaintiffs, the defendants were bound to take notice, as they knew of the policy, and invited the plaintiffs to take possession of the goods for the benefit of all parties, and any settlement made by them was subject to such rights.

If the plaintiffs could entitle themselves by any act to take the place of the consignees in prosecuting the defendants for the damages to the grain, caused by the negligence of the latter, a settlement between the defendants and consignees for fifty dollars of all claims for such loss, admitted to have been over two thousand dollars,

with knowledge of the facts out of which the right of the plaintiffs arose, and of the extent of the loss, would have been a fraud on them. But, in fact, on the evidence, the Referee was not bound to find that any such settlement took place. He has ignored it in his report, and in order to sustain that, we want and must presume he found against it, if the evidence justified such finding.

There is apparently no evidence in the case to sustain the Referee's finding of a settlement between the consignees and defendants three days after the assignment to the plaintiffs, although Mr. Requa does testify that he paid Mr. Stout *a certain sum* ($257 38), as part of the sum due according to the previous settlement, and "took a receipt, *the one already produced in evidence*." No such receipt appears in the case, but the sum is the same as that specified in the imaginary receipt set out in the Referee's report. Such a receipt, if it existed, would have a strong bearing upon the question of any prior adjustment of the claim for damages, if given with knowledge of the assignment; but it is not before us, and may be considered as stricken out of the report, with whose findings of fact and legal principles it does not interfere, particularly as no exception was taken to the finding of fact based upon such receipt.

The judgment should therefore be affirmed, with costs.

Railways in India.

The following statistics, communicated to the London *Times*, by its Calcutta correspondent, show the state and progress of railway traffic in India during the past two years. The lines are arranged in the order of merit. Seven of them are not yet complete. The East Indian and Great Indian Peninsular were to join hands at Jubbulpore, and in these figures the extension of the latter to Nagpore does not show. The Bombay and Baroda has to be united with the East Indian at Delhi by a great line through Rajpootana. The Eastern Bengal is going on to Goalundo, and must yet run up by Dacca to Delrcoghun on one side, and through Rajshaye to Darjeeling on the other. The Sindh has to run up the left bank of the Indus to the Punjab at Mooltan, and the Punjab to run down to Delhi; the section of the last from Delhi to Meerut is ready. The North Western Madras line has to tap the Nizam's country and join the Great Indian Peninsular at Goolburga.

	Mean Mileage open. 1866.	Total Revenue per year. 1866. £	1865. £
East Indian	1,129¼	2,010,045	1,673,253
Great Indian Peninsular	738	1,240,839	1,171,120
Bombay & Baroda.	306	399,755	310,413
Eastern Bengal	110	129,792	123,505
Sindh	109	98,207	81,538
Madras	625	428,389	319,464
Great Southern	83	45,580	35,128
Mutlah	28	10,372	9,934
Punjab	253	94,098	54,125
	3,381¼	4,466,127	3,858,477

In a few weeks the Jubbulpore line from Allahabad will be opened as far as Myhere, and an engine will run the whole length of 224 miles. Already, before their completion, not ten years after the death of their great designer, the Marquis of Dalhousie, our nine Indian Railways yield a revenue of 4½ millions sterling, more than the whole revenue of Mexico, nearly that of Brazil, nearly twice that of Canada, and more than twice that of Denmark; in three years, at the present rate of progress, Indian railways will yield as much as the whole State revenue of Belgium. The sooner the great lines are finished the better, by the Rajpootana, Indus Valley and Peshawur extensions.

Turned Rails.

A Board of Trade Report on Railways Accidents has recently been issued in London, which includes the official description of a casualty that took place in the Watford tunnel of the London and North Western Railway on the 6th of April last. An express train, with two engines, 15 carriages, and three breaks was passing through this tunnel at the usual speed of about 40 miles an hour, when the 11 aftermost vehicles suddenly jerked off the rails. The train was pulled up, and it was eventually found that a broken rail was the cause of the accident, and that this rail was a turned rail. The rails of this permanent way, when new, are said to be very good and substantial, and usually weigh 84 lb., being fixed in cast-iron chairs, each weighing 35 lb., by means of wooden keys. It is generally admitted that the turning of a rail will cause it to break sooner than it would othewise do if retained in its original position. Colonel Yolland, R. E., who was appointed by the Board of Trade to investigate the particulars of this accident, considers that the practice of turning rails which is followed on the London and North Western, as well as many other lines, is very objectionable, and very liable to increase the casualties that are due to trains getting off the rails. He specially emphasises the opinion with respect to a main line, where very high speed is attained, but remarks that turned rails can be used without objection in sidings. It is a curious fact that if another week had passed without the occurrrence of an accident this rail would have been replaced by one of steel, the company having on the previous Sunday been engaged in relaying this portion of their line.

Baby Law.

The railroads generously permit a baby to be carried without charge; but not, it seems, without incurring responsibility. It has been lately decided, in "Austin *vs.* the Great Western Railway Company," 16 L. T. Rep., N. S., 320, reported in the *Law Times*, that where a child in arms, not paid for as a passenger, is injured by an accident caused by negligence, the company is liable in damages under Lord Campbell's Act. Three of the judges were clearly of opinion that the company had, by permitting the mother to take the child in her arms, contracted to carry safely both mother and child; and Blackburn, J., went still further, and was of opinion that, independently of any such contract, express or implied, the law cast upon the company a duty to use proper and reasonable care in carrying the child, though unpaid for. It may appear somewhat hard upon railway companies to incur liabilities through an act of liberality, but they have chosen to do so. The law is against them, that is clear; but they have the remedy in their own hands. There was some reason for exempting a child in arms, for it occupies no place in the carriage, and is but a trifling addition of weight. But now it is established that the company is responsible for the consequence of accident to that child, the company is clearly entitled to make such a charge as will secure them against the risk. The right course would be to have a tariff, say of one-fifth or one-fourth of the full fare, for a child in arms; and if strict justice were done, this should be deducted from the fares of the passengers who have the ill-luck to face and flank the squaller.

Railroads to New York.

There is no outlet from Minnesota and that vast region of country to St. Louis by railroad, and its trade and commerce therefore are mainly lost to this city.

There are now six railroads being constructed through Iowa—running east and west—all pointing to Chicago and New York. These roads will be completed at an early day, and will drain that rich and splendid country, as well as Nebraska; but St. Louis, having no connection by rail, will lose all this trade and commerce.

There is a railroad running from Hannibal to St. Joseph, draining and carrying off the trade of all North Missouri eastward, as well as a large portion of the trade and commerce of Kansas. The building of this road was the severest blow ever given to St. Louis. She has lost on account of it a trade equal to hundreds of millions of dollars. There is a road being constructed from Moberly to Hannibal, thence to Naples, Ill. This branch will carry off a large portion of the trade and commerce of the Missouri and Kansas valleys to Chicago and New York.

There is a company being organized to build a road from Mexico, on the North Missouri railroad, to Louisiana, in Pike county, and thence to Pana, on the Alton and Terre Haute road. Pike county has already voted a subscription of $300,000; Audrian county will, in a few days, vote $100,000 more. This road will be built in a short time, and by it a large portion of the trade of Central Missouri is carried direct to Chicago and New York.

They have even started the project of a road from St. Charles to Alton, to connect there with roads to Chicago. So that in a short time the trade of St. Louis will be a river trade, and beyond this, it will be mainly confined to the Merimec and Missouri rivers on the west side of the Mississippi river and St. Clair county, Ill., on the east side.—*St. Louis Republican.*

Wellington, Grey and Bruce Railroad.

A meeting of the stockholders of this company was held in Hamilton, Ca., on the 21st ult., and the following gentlemen chosen directors for the ensuing year: John Ferrie, A. T. Wood, Adam Brown, James Turner, John Brown, Donald Mc Innes, and Wm. McGiverin, of Hamilton; Mr. J. M. Fraser, of Elora; Messrs. James Wilson and George D. Ferguson, of Fergus; and Dr. Parker, of Guelph.

At a subsequent meeting of the directors, Mr. Adam Brown, of Hamilton, was chosen President; Mr. Geo. D. Ferguson, of Fergus, Vice-President; Mr. Erskine Irvine, of Hamilton, Secretary, and Mr. Geo. W. Burton, Q. C. Solictor.

The first sod of the road was to have been turned near Fergus on the 28th of June. The prospect of an early commencement and speedy completion of this important work is considered most favorable.

McGregor Western Railroad.

The following gentlemen have been elected directors of this company for the ensuing year: George Green, N. A. Cowdrey, James Buel, James M. Bockee, Edward P. Scott, H. M. Hubbard, John Johnson, James M, Whaling, Alanson Cary. President, George Green; Secretary and Treasurer, H. C. Atkins.

☞ The Albany and Susquehanna railroad will soon be opened to Bainbridge.

Finances of Ohio.

The Commissioners of the Sinking Fund of the State of Ohio have made the following report to the Governor:

OFFICE OF THE COMMISSIONERS OF THE SINKING FUND,
COLUMBUS, Ohio, June 8, 1867.

To His Excellency the Governor of the State of Ohio:

The Commissioners of the Sinking Fund would respectfully report that, during the six months ending on the 15th of May, 1867, the Public Funded Debt of the State was reduced $633,065 58, and that an additional sum of $53,092 67 ceased to bear interest. The following table will show at a glance the loans that have been in part reduced, and also the condition of the debt at the close of business on the 15th ultimo:

On the 15th of November, 1866, the public funded debt of the State was		$11,814,768 14
The redemptions during the six months were:		
Foreign loan of 1860	$412,929 58	
Foreign loan of 1865	2,000 00	
Foreign Union loan of 1868	99,500 00	
Domestic Union loan of 1868	120,636 00	
		635,065 58
Outstanding May 15, 1867		$11,179,702 56

This sum consists of the following loans:

FOREIGN DEBT PAYABLE IN NEW YORK.

Loan payable after Dec. 31, 1860, not bearing interest	$55,092 67
Loan payable after Dec. 31, 1865, not bearing interest	5,000 00
Loan (Union) payable July 1, 1868, bearing six per cent. interest	280,366 00
Loan payable after Dec. 31, 1870, bearing six per cent. interest	2,183,531 90
Loan payable after Dec. 31, 1875, bearing six per cent. interest	1,600,000 01
Loan payable after June 30, 1881, bearing six per cent. interest	4,095,309 47
Loan payable after Dec. 31, 1886, bearing six per cent. interest	2,400,000 00
	$10,619,300 07

DOMESTIC DEBT PAYABLE AT COLUMBUS.

Stock of 1849, not bearing interest	$1,765 00	
National road bonds, not bearing interest	60 36	
Union loan of 1868, bearing six per cent.	158,577 13	
Union Loan of 1871, bearing six per cent.	400,000 00	
		560,402 49
Total amount of public funded debt, May 15, 1867		$11,179,702 56

It will be observed that the sum of $220,136 of the Union loan of 1868 has been redeemed. This has been done without the payment of premium, and the Commissioners are prepared to continue the redemption of that loan until $300,000 of it have been retired.

The "act making appropriation for the year 1867, and the first quarter of the year 1868," passed April 16, 1867, authorizes the Auditor of the State, upon the written request of the Commissioners of the Sinking Fund, temporarily to transfer to the Sinking Fund other funds in the State Treasury unappropriated or not required for the purposes for which they have been appropriated, that the same may be applied to the reduction of the public debt of the State. Under this authority transfers from the following funds have been made:

General revenue	$113,414
Canal	10,000
Common school	76,586
Total amount transferred	$200,000

The amount thus transferred was applied to the payment of the principal of the Union loan of 1868, and the interest saved to the State thereby will be paid into the State Treasury, to the credit of the General Revenue Fund.

The receipts into the Sinking Fund, and the disbursements therefrom, for the period covered by this report, were as follows:

RECEIPTS.

Balance in the Treasury, Nov. 15, '66.		$554,700 67
Taxes		747,843 34
School lands		23,817 52
Surplus revenue		5,831 07
Turnpike stock		2,073 00
Canal lands		150 00
Agricultural College land scrip		84,122 90
Common school fund, temporarily transferred		76,586 00
Canal fund, temporarily transferred		10,000 00
General revenue fund, temporarily transferred		113,414 00
		$1,618,537 60

DISBURSEMENTS.

Principal of foreign d'bt.	$446,022 25	
Principal Union loan	220,136 00	
Interest on foreign debt.	323,436 91	
Interest irreducible d'bt	199,866 63	
Interest Union loan	33,280 28	
Expenses of home office	1,143 90	
Expenses N. York office	1,959 95	
Expenses fund commissioners	900 00	
		1,226,745 92
Balance in Treasury, May 15, 1866		$391,791 68
Balance in New York, May 15, 1867		59,711 35
Total amount of Sinking Fund on hand May 15, 1867		$451,503 03

The balance in New York is funds deposited there for the payment of the certificates of the loans of 1860 and 1865, that have not yet been presented for redemption.

Respectfully submitted,
JAS. H. GODMAN, Auditor of State,
WM. HENRY SMITH, Secretary of State,
W. H. WEST, Attorney General,
Commissioners of the Sinking Fund.

St. Paul and Chicago Railway.

At last the prospects for active operations on the St. Paul and Chicago Railroad grow flattering. An interest has been awakened in Chicago, and the journals of that city are fully aroused to the importance of communication with St. Paul by the direct route down the valley of the Mississippi River to Winona, and thence almost an air line to Chicago. This route will shorten the distance between this city and Chicago by rail from eighty to one hundred miles, and is a route which connects all the principal points in the State with Chicago.

The contract for the construction of this road from this city to St. Paul, including the bridge across the Mississippi at this point, we understand has been let to Messrs. Morris, Reynolds, Saulspaugh & Co., of Rock Island, Ill., and the prospects are excellent for the completion of the road between here and St. Paul this fall.

This line of road will be the great commercial route of the State, connecting as it does with the St. Paul and Pacific, the Minnesota Valley, the St. Paul and Superior, and the Hastings and Dakota Railway, and at Winona with the Winona and St. Peter Railway; in fact this becomes the great trunk line for the entire commerce between Minnesota and Chicago.—*Hastings (Minn.) Gazette, June 15th.*

☞ The following gentlemen have been elected directors of the Milwaukee Division of the Chicago and Northwestern Railway: W. B. Ogden, P. H. Smith, G. L. Dunlap, J. R. Young, H. W. Blodgett, E. H. Sheldon, L. Holbrook, G. L. Scott, and J. B. Redfield. President, H. W. Blodgett; Vice President, E. M. Sheldon; Secretary and Treasurer, A. S. Downs.

FOR SALE.

16 FLAT CARS—Broad Tread Wheels—Compromise—Just completed at Buffalo, N. Y.

These Cars are built in the most approved style, of the best White Oak Lumber.

Platforms 30 feet long, 8½ wide, Iron Trucks, Capacity 15 Tons, Warranted.

KASSON & CO.,
62 Broadway,
26tf **New York.**

FOR SALE.

3 PASSENGER CARS—4 8½ or 4-10 Gauge—Rebuilt at Buffalo—first-class finish—Patent Trucks—will seat 56 @ 58 Passengers.

To be had separately or together at a Bargain.

KASSON & CO.,
62 Broadway,
26tf **New York.**

JAMES CLAYTON'S Patent Steam Pump and Steam Engine Combined. These Pumps contain every desirable quality in a Steam Pump, they are made of the best materials and in the best manner, and are the most reliable and cheapest Steam Pumps in the market and are especially suitable for railroad stations, &c. Please send for Circular.

JAMES CLAYTON,

J. M. ALLEN, Sec. and Treas. **LICENSES GRANTED.**

PLASTIC SLATE

FOR

Roofing & Other Purposes.

The process of reconstructing Slate Stone from a disintegrated state was

PATENTED FEBRUARY 21ST, 1865.

It is a combination of

Pulverized Slate and Viscous Matter,

(the latter possessing qualities of geological and chemical affinity for the former,) and is a development of one of the simple but unalterable tendencies of nature.

As a Roofing Material it Stands Unrivalled.

A mastic—it adapts itself to every shape and slope. Non-combustible, impervious, non-expansive, and undecaying.

Frost does not Crack nor Heat Dissolve it.

The only roofing material ever discovered that will resist the action of the elements as long as the structure it protects. Being susceptible of little, if any wear, from exposure, and

Perfectly Fire-Proof,

It is unequalled as a coating for Railroad and Farm Buildings, Fences, Bridges, bottoms of Vessels, Vaults, etc.

THE

UNION PACIFIC RAILROAD CO.

Are now constructing a Railroad from

OMAHA, NEBRASKA,

westward towards the Pacific Ocean, making with its connections an unbroken line

ACROSS THE CONTINENT.

The Company now offer a limited amount of their

FIRST MORTGAGE BONDS

having thirty years to run, and bearing annual interest payable on the first day of January and July, in the City of New York, at the rate of

SIX PER CENT. IN GOLD,

AT

Ninety Cents on the Dollar.

This road was completed from Omaha 305 miles west on the 1st of January, 1867, and is fully equipped, and trains are regularly running over it. The Company has now on hand sufficient iron, ties, etc., to finish the remaining portion to the eastern base of the Rocky Mountains, 212 miles, which is under contract to be done September 1st of this year, and it is expected that the entire road will be in running order from Omaha to its western connection with the Central Pacific, now being rapidly built eastward from Sacramento, Cal., during 1870.

Means of the Company.

Estimating the distance to be built by the Union Pacific to be 1,565 miles, the United States Government issues it Six per cent. Thirty-year Bonds to the Company as the road is finished at the average rate of about $32,350 per mile amounting to $44,208,000.

The Company is also permitted to issue its own First Mortgage Bonds to an equal amount, and at the same time, which BY SPECIAL ACT OF CONGRESS ARE MADE A FIRST MORTGAGE ON THE ENTIRE LINE, the bonds of the United States *being subordinate to them.*

The Government makes a donation of 12,800 acres of land to the mile, amounting to 20,032,000 acres, estimated to be worth $30,000,000, making the total resources, exclusive of the capital, $118,416,000; but the full value of the lands cannot now be realized.

The authorized Capital Stock of the Company is one hundred million dollars, of which five millions have already been paid in, and of which it is not supposed that more than twenty-five millions at most will be required.

The cost of the road is estimated by competent engineers to be about one hundred million dollars, exclusive of equipment.

Prospects for Business.

The railroad connection between Omaha and the East is now complete, and the earnings of the Union Pacific on the sections already finished for the month of May were $261,782. These sectional earnings as the road progresses will much more than pay the interest on the Company's bonds, and the through business over the only line of railroad between the Atlantic and Pacific must be immense.

Value and Security of the Bonds.

The Company respectfully submit, that the above statement of facts fully demonstrates the security of their Bonds, and as additional proof they would suggest that the Bonds now offered are less than ten million dollars on 517 miles of road, on which over twenty million dollars have already been expended;—on 330 miles of this road the cars are now running, and the remaining 187 miles are nearly completed.

At the present rate of premium on gold these bonds pay an annual interest on the present cost of

Nine Per Cent.,

and it is believed that on the completion of the road, like the Government Bonds, they will go above par. The Company intend to sell but a limited amount at the present low rate and retain the right to advance the price at their option.

Subscriptions will be received in New York by the CONTINENTAL NATIONAL BANK, No. 7 Nassau St., CLARK, DODGE & Co., BANKERS, 51 Wall St., JOHN J. CISCO & SON, BANKERS, No. 33 Wall St., and by BANKS AND BANKERS generally throughout the United States, of whom maps and descriptive pamphlets may be obtained. They will also be sent by mail from the Company's Office, No. 20 Nassau Street, New York, on application. Subscribers will select their own Agents in whom they have confidence, who alone will be responsible to them for the safe delivery of the bonds.

JOHN J. CISCO, *Treasurer,*
NEW YORK.

NATIONAL TRUST CO.,

OF THE CITY OF NEW YORK.

CAPITAL ..... $1,000,000.

Shares $100 Each.

The Subscription Books to the Capital Stock of the **National Trust Company** of the City of New York are now open at the

NINTH NATIONAL BANK,

363 Broadway, cor. Franklin street, New York, and will remain open until the whole amount of the Capital Stock of $1,000,000 shall be subscribed.

☞ Inasmuch as the Larger Portion of the Capital has already been applied for, Immediate Application should be made by Parties desiring to secure Stock. ☜

The payments will be as follows:—

10 per cent. on subscribing	$100,000
June 5, 1867, 15 per cent	150,000
July 1, 1867, 15 per cent	150,000
August 1, 1867, 10 per cent	100,000
September 2, 1867, 10 per cent	100,000
October 1, 1867, 10 per cent	100,000
January 10, 1868, 15 per cent	150,000
February 10, 1868, 15 per cent	150,000

The average date of the above payments is September 12, 1867.

After the 22d of May, inst., subscribers may pay in the whole amount unpaid, and be allowed interest at the rate of 7 per cent per annum from the day of payment to September 12, 1867, that being the average day of the payment of the calls.

} Commissioners.

☞ Applications for circulars or stock, by mail, promptly attended to.

WHAT IS A TRUST COMPANY?

A TRUST COMPANY IS THE SAFEST AND MOST CONSERVATIVE OF FINANCIAL INSTITUTIONS. A careful perusal of the following paragraphs will amply substantiate this proposition.

TRUST POWERS.

To receive money from individuals and corporations and allow such interest as may be agreed upon.

The Company is constituted by its Charter a Legal Depository of Money paid into Court.

To accept and execute all Trusts, in reference to both real and personal estate, committed to the Company by any person or corporation, or transferred to the Company by order of any of the Courts of Record, or by any Surrogate, etc., etc.

To act as Financial Agent of State and City Governments and of Counties, in the management of their business at the financial center of the country.

To act as Agent for foreign Banks, Bankers, Business Men, and Corporations, having business transactions in the City of New York.

GUARANTEES.

Among the Guarantees afforded by the Charter of this Company, are the following:

Every Director or Trustee must be a citizen of this State, and be a stockholder in the Company to the amount of five thousand dollars, at least.

No loan shall be made, directly or indirectly, to any trustee, officer, or employee of said Corporation.

It is not permitted to discount or deal in Commercial or Business Paper.

ON WHAT SECURITY MAY THIS COMPANY LOAN ITS DEPOSITS?

The National Trust Company can only invest the funds entrusted to it in United States Stocks or Stocks of the State of New York or other States, or of any City incorporated by the State of New York.

Therefore, it is adapted for the investment of funds which the public desire very safe investments for. Its Stock will probably pay dividends equal to, or greater than the interest on Government securities, and deposits made in this Company will earn as liberal a rate of Interest as is possible, taking into consideration the great security.

COUPON Government Bonds, the Secretary of the Treasury says, he will pay to any holder, whether stolen or not; therefore is it not wise to sell those COUPON Bonds and take the stock in the National Trust Company which will have its permanent investments in REGISTERED United States Bonds, State Stocks, and Bonds of Incorporated Cities of this State?

GENERAL REMARKS.

The success of other Trust Companies and the high prices of their stocks in the market are sufficient evidence of the profitable character of the business, and the Trustees feel justified in recommending the Stock of this Company to capitalists and others seeking a safe investment.

It is believed that the Stock of this Company is more desirable than that of most other moneyed corporations, and as safe as Government Securities; that the increase in the value of the stock will be more rapid than Government Bonds, and the dividends quite EQUAL to, if they do not EXCEED the interest of such Bonds.

The decision of the Secretary of the Treasury that he will pay COUPON Government Bonds to the holders whenever presented, without reference to any disputed ownership, will lead, in many cases, to the sale of such Bonds; This Company will take in exchange of its Stock any United States Bonds, 7-30 Treasury Notes, or Compound Interest Notes at the market price on the day of tranfers.

OFFICERS FOR FIRST YEAR.

JOSEPH U. ORVIS, President.
HENRY C. CARTER, First Vice-President
BARNET L. SOLOMON, Second Vice-President.
JAMES MERRELL, Secretary.
GEORGE STEVENSON, Attorney and Counsel.

FOR SALE

3 LOCOMOTIVES,

4-8 1-2 GAUGE,

All thoroughly REBUILT by one of the best makers in the country, and ready for immediate use.

1—Cylinders 14x22, Link Motion, 4-56 in. Drivers connected, Copper Flues, Weight about 24 tons; 8 wheeled Tender, 1800 gallons.

This Engine has always worked admirably; Steams freely with dry or green wood, works and wears perfectly smooth; Well springed and brassed all around. Proportions every way suited to power. A good and stylish model, all in excellent order.

2—Cylinders 15x20, Link Motion, 4-56 in. Drivers connected, Copper Flues, weight about 23 tons, 8 wheeled tender, 1,800 gallons.

Is a smart smooth working Engine, suitable for any work; has a good record throughout.

3—Cylinders 15x20 Hook Motion, 4-66 in. Drivers connected, Copper Flues, weight about 24 tons; Tender, 8 wheeled.

Every way perfectly sound, well brassed and springed up. All in fine working condition.

These Engines will be sold VERY CHEAP to close a transaction, and are GREAT BARGAINS to any company wanting this sized Engine.

Merchants' Union Express Co.

We notice in our exchanges that large and enthusiastic meetings of stockholders of the Merchants' Union Express Co., are being held at several important points in the West, at which great determination is evinced to support the company by a prompt response to all calls upon its stock, and renewed exertions to increase the business by all honorable and legitimate means. The Buffalo *Express* of June 28th, says:

Resolved, That we will stand by the Merchants' Union Express Co., through evil or good report to the extent of our ability, and that we pledge to each other and the company our business and influence.

Resolved, That we hereby pledge ourselves to pay promptly this last and all future assignments (if any) on our stock, up to its full par value, if the same shall be necessary to bring this contest to a successful issue, and establish this company as one of the fixed institutions of the age.

Resolved, That the report of our committee, appointed to visit Auburn, has been eminently satisfactory, proving the affairs of the company to be in a more prosperous condition, after the severe struggle through which we have passed, than we had even dared to hope.

We also copy from the Chicago *Republican* of 6th inst., proceedings of a meeting of stockholders representing nearly a million of dollars of the stock:

Resolved, That we will promptly pay the present call of ten per cent., and all other calls our Executive Board and Trustees may deem necessary in order to insure a lasting and triumphant success.

Resolved, That so long as the Merchants' Union maintains only a fair and just remunerative tariff, treats the business community courteously and honorably, and conducts its affairs with the prudence, skill and economy heretofore exhibited, we will not only give it our entire business on all lines over which it runs, but will use our influence with our numerous friends and customers who are not stockholders to induce them to aid us by their patronage.

Resolved, That the establishment by the Merchants' Union Express Company of a new fast freight line—The People's Dispatch—is deemed by us an eminently wise measure, and we pledge ourselves to sustain it both with our patronage and influence, feeling every assurance that it will not only achieve a deserved success, but give the fullest satisfaction to the business public. It is not generally understood by the public that the Merchants' Dispatch is owned by the American Express Company, and the Great Western Dispatch by the United States Express Company, and that every dollar paid to either of their fast freight lines goes directly to the support of these Express Companies, and is so much taken from the support of our own stock. Every stockholder in the Merchants' Union Express Company should bear this in mind.

Annual Exhibition of the American Institute.

The Managers announce that the Grand Autumnal Exhibition will be held from the 12th of September to the 26th of October, 1867, inclusive, from 9 A. M. to 10 P. M., in the spacious armory of the Twenty-second regiment, on Fourteenth street, near the Sixth avenue, New York. Inventors, artists, manufacturers, proprietors of labor-saving machinery, and those engaged in agricultural and horticultural pursuits, are invited to send their best specimens of work and ingenuity to compete for prizes to be awarded.

Though the armory halls are the largest in the city, covering not less than forty thousand square feet, the managers state that they are compelled to discriminate in their allotments in favor of those who make early application for space, and more especially those who offer novelties of acknowledged utility which have not been exhibited at former fairs. The Institute has adopted the following classification of articles offered for exhibition; each of the seven departments—embracing seven groups—being made the special care of a sub-committee consisting of three managers:

I. Department of Fine Arts and Education.
II. Department of the Dwelling.
III. Department of Dress and Handicraft.
IV. Department of Chemistry and Mineralogy.
V. Department of Engines and Machinery.
VI. Department of Intercommunication.
VII. Department of Agriculture and Horticulture.

In order to confer the greatest benefit on successful exhibitors, the Institute has directed that hereafter the most prominent feature of the award shall be a testimonal or statement of the advantages and good qualities of the prize articles, given in such terms that it may be used by the successful competitor as evidence of its value.

The exhibition rooms will be open for the reception of goods daily from the 4th to the 11th of September next. Only those articles produced in the United States will be allowed to be entered for competition, though other articles will be received for exhibition.

On the evening of the 26th of October, the closing address will be delivered and other interesting ceremonies take place, after which the names of the successful competitors will be announced.

Great Russian Railway.

The annual meeting of this enterprise has just been held at St. Petersburg. At this meeting, Mr. Baring and General Kerbedz were re-elected directors for five years. The report presented to the meeting showed that the receipts for 1866 amounted to 10,717,687 roubles, of which 6,166,374 roubles were earned on the Warsaw line and the Prussian branch, and 4,551,263 roubles on the line from Moscow to Nijni. The total receipts in 1865 were 10,252,587 roubles, so that the revenue of the company increased in 1866 to the extent of 465,050 roubles. The receipts of the current year have presented a further progress, showing an augmentation over the corresponding period of 1866 of 10 per cent. on the Warsaw line, and 5

per cent. on the Nijni line. Notwithstanding the importance of the receipts, however, the company has again failed to pay a dividend, as the working expenses absorb from 70 to 75 per cent. of the revenue acquired. The shareholders enjoy, however, a guarantee of 5 per cent. from the Russian Government—a guarantee which has been duly provided for.

Cincinnati, Hamilton and Dayton R. R.

The income and expenses of this company for the years ending March 31, 1866 and 1867, were as follows:

Income:	1866.	1867.
From passengers	$545,666 09	$457,665 26
" freight	748,678 38	737,001 15

		$767,625 28
Applied as follows:		
Two dividends of five per cent	$297,328 00	
Discount on bonds sold	65,720 00	
		363,048 00
Leaving to credit of surplus account, March 31, 1867		$404,577 28

The gross receipts for fifteen years ending March 31, 1867, have been as follows:

1853	$321,793 17	1861	$615,071 07
1854	463,021 45	1862	646,205 67
1855	483,629 48	1863	877,408 86
1856	471,885 70	1864	1,083,328 47
1857	518,333 95	1865	1,241,856 71
1858	487,421 27	1866	1,361,566 47
1859	489,437 92	1867	1,301,536 67
1860	561,681 52		

The gross earnings of the past show a decrease from those of the preceding year of $60,029 80, and the net earnings a decrease of $98,394 75. The operating expenses show an increase of $18,317 15, and the earnings less operating expenses a decrease of $78,346 95. The entire expenditures, including interest, taxes, etc., were, $1,080,988 25—an increase over the previous year of $38,364 95. The balance of income after deducting all expenditures, was $220,548 42, a decrease of $115,181 24. The gross earnings of the road per mile were, $21,692 28, against $22,692 79 in 1865–'6—a decrease of $1,000 51. The per centage of operating expenses was 65.12. The report says:

The falling off in receipts has been less than anticipated during the year, and much less in proportion than on many of our leading roads. Two successive failures of crops, the general stagnation of business, and the strong competition of water routes, resulting in extreme low through rates have had an unfavorable effect upon the freight earnings, but not to as great an extent as expected.

The local passenger earnings on this, as well as on the Dayton and Michigan Road, show a very considerable decrease, consequent doubtless upon a general dullness of trade and the prevalence of cholera during the months of August, September and October last. The same may be said of many of our Western roads, where the local passenger traffic has fallen off from thirty to forty per cent.

The unusual expenses of transportation are still kept up by the high price of labor and supplies, and there seems at present but little prospect of an improvement in this respect. A constant effort has been made during the past year to reduce the number of men engaged in operating the road, maintaining the track and superintending the business of the company. Quite a reduction in the number has been made, and the pay rolls of March show only an average of five and one-half men per mile on the roads operated by this company, including all engaged from the President to the Brakeman. This, we believe to be much be low the average on roads similarly situated, and doing an equal amount of business. The average price paid per month, embracing all the mechanics in the shops, those running trains, repairing track and rebuilding bridges, as well as the general officers and agents of the companies, is $57.66.

The prospect for a profitable summer's business is not very bright, but it is hoped that good crops will bring up the average of the year to equal the one just past.

For net profit, at the present time, our company must mainly rely on its local business. Through freights are now carried at a price below the actual cost of transportation, on some of our leading roads between the East and West. This arises from a scarcity of freight, and from an unwise and ruinous competition, originating in a measure, from the employment of two sets of agencies by leading roads, to obtain through business.

The road and its equipment has been kept up during the past year in good condition, and has been operated with the usual freedom from accident to persons and property. The expenditures, consequent on the damage done our road by the floods of 1866, have added much to the cost of operating expenses.

The business in connection with the Atlantic and Great Western Railway, continues to increase; and although the expenditure was very large to accommodate the new connection, still it already pays the transportation expenses and a fair interest on the investment. From this important connection we confidently look for a large increase of business. The A. & G. W. Railway has recently passed into the hands of a receiver, but this will not interrupt the regular and successful working of the same; on the contrary, the company will be the better able to expend the necessary amount to keep the road in first class order, and to transact a larger amount of business to the satisfaction of the public.

The Cincinnati and Indianapolis Junction Road, which connects with our road at Hamilton, will be completed to Indianapolis during the present year. A company of enterprising and wealthy gentlemen of our city have taken a contract for the finishing of the road, and they will advance the requisite amount of money. This road is now one of the important feeders of our line, and will become much more so when extended to Indianapolis, and to a connection with the railroads centering there. It is anticipated that the increase of business from this source, and from the Cincinnati, Richmond and Chicago road, will make the extension of our double track to Hamilton, the point of connection, a matter of necessity within the next two years. Those who have undertaken to extend the Junction Road to Indianapolis, are mostly large stockholders in the Cincinnati, Hamilton and Dayton Company, and we cannot but wish them great success in their enterprise.

The Board of Directors have recently concluded an important contract with the Cincinnati, Dayton and Eastern (short line) and the Sandusky Dayton and Cincinnati Companies, which is herewith submitted to your consideration and approval. By an examination of the contract you will see that the annual sum to be paid to the Cincinnati, Hamilton and Dayton Company for the use of its narrow gauge track between Dayton and Cincinnati, will be equal to the interest on half the cost of the same, including our valuable depot grounds in Cincinnati, Hamilton and Dayton; the depots and grounds in Cincinnati not to be used by the Cincinnati, Dayton and Eastern Company, except temporarily, when the floods in the Ohio River interrupt the business of other roads terminating on the low grounds of our city. In addition to the annual rental of $130,000 per annum, the Cincinnati, Dayton and Eastern Company are to pay a proportion of all repairs to tracks and bridges, according to the number of cars and locomotives run on and over the same. The Cincinnati, Dayton and Eastern are to do no local freight business on the line of the Cincinnati, Hamilton and Dayton, nor any passenger business, with the exception of that received at Hamilton and Middletown, on two trains, where they stop for the purpose of taking wood and water.

This contract has received the unanimous approval of the several Boards of Directors, and is regarded as important to both contracting parties. The Cincinnati, Hamilton and Dayton Company will receive a satisfactory price for the facilities which they have to spare, and the Cincinnati, Dayton and Eastern Company will obtain an independent entrance into Cincinnati, for the annual interest on one-half it would cost them to build a road from Dayton to Cincinnati. It also puts at rest the question of a rival line to the Cincinnati, Hamilton and Dayton Road between its two terminal points, which would be highly injurious to the interests of both corporations. The Cincinnati, Dayton and Eastern are to have the use of the track of the Cincinnati, Hamilton and Dayton to a point a few hundred feet east of Mill Creek, the western border of our city.

The construction account of the Cincinnati, Hamilton and Dayton Road, including both the narrow and broad gauge tracks, stands on the books as follows, viz:

Equipment, real estate and depots		$5,265,501 71
Amount advanced to D. & M. road for permanent improvements and equipment		323,117 96
Amount of bonds held in Junction Road, and other assets		149,333 93
		$5,737,953 60
Amount of stock issued	$3,260,800	
Amount of bonds issued	1,759,000	
		5,019,800 00
Leaving a balance of		$718,153 60

The real estate and depots in Cincinnati, Hamilton and Dayton, are stated in the above at cost. It would require at this time a million of dollars more to provide the same amount, equally well situated for business.

The bills payable of the company, created by the expenditures for equipment, extending side tracks and for permanent improvements on the Dayton and Michigan Road, now amount to $529,724 93. To pay off this floating debt, and to enable the company to continue the payment of cash dividends from October next, the Board of

Directors have authorized and directed the issue of additional mortgage bonds, payable in ten years, with a sinking fund of twenty-five thousand dollars per annum. The bonds will bear eight per cent. interest, payable semi-annually in New York, and will not be sold for less than par. These bonds, it is believed, will command ready sale in Cincinnati. It is proposed, however, to give to all Stockholders East and West, an opportunity of taking their *pro rata* proportion. The mortgage will provide for an issue of one million dollars, though no more will be disposed of at the present time than is sufficient to pay off the debt incurred. The remainder will be held until such time as it may be necessary to extend our double track to Hamilton.

The earnings of the Dayton and Michigan as well as those on the Cincinnati, Richmond and Chicago, have been seriously affected by the failure of crops. Those of the D. and M. have also been interfered with by the opening of the Atlantic and Great Western Railway which has received from, and delivered to the Cincinnati, Hamilton and Dayton Road, at Dayton, a large amount of through freights, heretofore transported by way of Toledo; this was unavoidable in the ordinary course of business, as shippers avail themselves of the route which makes the quickest time, and subjects the freights to the fewest handlings. The local freight traffic of the D. and M. road however, shows an increase equal to the falling off in through traffic.

The rapid development of the country, especially that on the northern portion of the Dayton and Michigan Road, more than meets our expectations. Between Lima and Toledo mills have been built in large numbers during the past year or two, for sawing of lumber, for which there is great demand both in Cincinnati and the East; at almost every point where mills are erected, small villages are springing up, giving promise of future business of great importance to the road. The loss of timber immediately on the line of the road will subject the company to a higher charge for fuel; but this loss will be returned four fold in the increase of the product of the land in grain, live stock and manufactures.

It is the policy of the company to give special attention to the increase of local business on the line, believing that in a very few years it will give to the stockholders a rich return. Thus far the Cincinnati, Hamilton and Dayton Company are in advance to the Dayton and Michigan, for permanent improvements on the line; but the period is not distant when this will be returned, and the policy of leasing the road fully demonstrated.

The General Assembly of Ohio, at its recent session, passed an enactment of general interest to all stockholders and managers of Railroad Companies in the State, providing for the appointment of a Railroad Commissioner, with general powers, mainly directed to the collection of such authentic knowledge as will serve as a basis for future legislation, looking to the protection of the public, including the class which now owns railroad property, as well as that which deals with railroad companies. Under this law, the first appointment to the office has been conferred upon Gen'l Geo. B. Wright, in whose well directed efforts to promote the important public interests with which he is charged, it will be the pleasure, as it is made the duty of the directors and officers of this company to co-operate.

There have been placed in the track during the year, 367 tons of iron, 30,823 cross ties, 47,950 lbs. spike, and 22,414 lbs. wrought iron chairs. The equipment has been increased by the addition of 2 new locomotives, 8 passenger, 8 baggage, 80 box, 14 platform and 11 stock cars. The equipment now consists of 34 locomotives, 30 passenger, 2 mail, 13 baggage and express, 1 paymaster's, 242 box freight, 30 stock, 110 platform, 46 lime and coal, 9 caboose, 24 hand and 8 truck cars.

The receipts from operations of the Dayton and Michigan Railroad during the year were $853,863 57; from sale of tug and real estate, $6,260 36—total, $859,623 93. The expenditures were: operating expenses, taxes, insurance, etc., $639,249 93; interest and discount on bonds, $264,065 83; construction, equipment, etc., $35,818 48; Toledo Depot improvements, $16,762 14; Trustee of sinking fund, $30,000; Buffalo and Lake Erie steamboat stock, $25,000—total, $1,010,896 38; excess of expenditures over receipts, $151,272 45; to which add balance from previous year, $171,845 51—making a total of $323,117 96, due C., H. and D. R. R. Lessee.

The receipts from operation of the Cincinnati, Richmond and Chicago Railroad for the eleven months ending March 31, 1867, were $189,523 20. The expenditures were: operating expenses, rents to other companies, mileage of cars, $158,377 33; interest on bonds, $24,175 08; taxes, State and National, $5,525 10; construction, $991 20—total, $189,068 71—balance due C., R. & C. R. R. as lessors, $454 49.

President.—S. S. L'HOMMEDIEU.

Directors.—John W. Ellis, John Young, Geo. H. Hill, George T. Stedman, William Goodman, Lowell Fletcher and William Beckett.

Vice President.—JOHN W. HARTWELL.

Secretary and Treasurer.—FREDERICK H. SHORT.

Gen'l Superintendent.—DANIEL MCLAREN.

Ass't Superintendent.—LEWIS WILLIAMS.

☞ A company, which has undertaken the construction of a line from Orel to Witebsk, is issuing a capital of 4,500,000*l.* in shares. It is also authorized to create obligations to the amount of 1,500,000*l.*, on which the Russian Government guarantees an interest of 5 per cent. per annum, and 1.12 per cent. per annum for redemption in eighty-five years.

Grain Trade of Buffalo.

The following will show the imports of flour and grain into Buffalo from the West by Lake and Grand Trunk Railway for the month of June, and since Jan. 1, 1867, as compared with previous years:

FOR THE MONTH OF JUNE.

	Flour, bbls.	Grain, bush.	Grain, includ'g Flour, bush.
1867	76,382	2,884,810	3,256,729
1866	144,180	10,198,645	10,910,445
1865	240,336	5,763,955	6,075,975
1864	302,757	7,594,272	9,108,057
1863	463,595	10,253,224	12,601,109
1862	415,443	6,188,724	8,265,879
1861	285,853	5,383,665	6,812,320
1860	123,026	2,794,711	3,409,811

FROM JANUARY 1, TO JULY 1.

	Flour, bbls.	Grain, bush.	Grain, includ'g Flour, bush.
1867	186,514	6,088,936	7,021,506
1866	340,442	16,554,893	18,247,103
1865	628,684	10,495,060	13,643,480
1864	811,560	13,950,163	18,007,963
1863	1,191,557	18,384,055	24,351,837
1862	1,037,347	13,908,908	20,095,063
1861	598,491	11,598,164	14,590,610
1860	387,056	6,543,256	8,175,238

The canal exports from opening to July 1, compare as follows:

	1865.	1866.	1867.
Flour, bbls	86,776	12,787	324
Wheat, bush	2,554,942	1,448,576	185,632
Corn, bush	2,781,074	6,962,048	2,577,173
Oats, bush	2,910,788	2,877,999	885,573
Barley, bush	168,141	46,045	25,600
Rye, bush	104,778	209,309	54,490
Total grain, bu.	8,519,723	11,534,977	3,728,468

The following will show the receipts of tolls at Buffalo from the opening of the canal (May 1,) to July 1, from 1860 to 1866 inclusive, and from May 6 to July 1, in 1867:

1867	$306,738 45	1863	$954,067 37
1866	566,629 61	1862	835,596 93
1865	452,032 73	1861	485,331 06
1864	704,327 69	1860	286,924 51

Canadian Railways.

The following statement, derived from official sources, will show the length and cost of the Canadian Railways:

	Miles.	Cost.
Great Western	345	$23,855,881
Grand Trunk	1,377	80,704,095
London and Port Stanley	24½	1,032,850
Welland	25½	1,622,853
Northern	97	5,457,789
Port Hope, Lindsay and Beaverton	43	1,593,536
Cobourg and Peterboro'	27	400,000
Port Hope and Peterboro'	14	900,000
Brockville and Ottawa	86½	2,602,024
Prescott and Ottawa	54	3,008,994
Carillon and Grenville	13	96,077
Stanstead, Shefford and Chambly	44	1,216,000
St. Lawrence and Industrie	12	54,100
European and North American	108	4,747,713
New Brunswick & Canada	88	2,750,000
Windsor and Halifax	93	4,319,507
Total	2,437½	$133,360,409

☞ The Hudson *Gazette* says the Athens and Schenectady Railroad was sold on the 28th ult., to the Central Railroad Company, and adds that the purchase was equally divided between the Drew and Vanderbilt interests.

Commerce of New York.

The foreign imports at New York for the month of June are officially stated as follows:

	1866.	1867.
Entered for consumpt'n.	$10,682,723	$8,947,379
Do. for warehousing	10,957,050	10,478,305
Free goods	1,002,330	1,048,040
Specie and bullion	94,549	499,184
Total entered at port...	$22,736,652	$20,967,908
Withdrawn fr. wareh'use	8,967,481	6,910,287

The foreign imports at New York for the six months from January 1st, were:

	1866.	1867.
Entered for consumpt'n.	$88,759,762	$64,972,615
Do. for warehousing	66,426,467	64,071,291
Free goods	7,036,616	5,975,691
Specie and bullion	1,180,186	1,556,696
Total entered at port..	$163,403,031	$136,576,293
Withdrawn fr. wareh'se	49,993,854	59,487,891

The foreign imports at New York for the fiscal year ending June 30th, were:

	1865-'66.	1866-'67.
Entered for consumpt'n.	$179,101,519	$140,013,482
Do. for warehousing...	112,356,494	117,877,762
Free goods	12,423,741	11,940,668
Specie and bullion	2,251,644	9,954,539
Total entered at port..	$306,133,398	$279,786,446
Withdrawn fr. wareh'se	88,891,875	109,735,319

The following is a classification of imports for the year ending June 30th:

	1865-'66.	1866-'67.
Dry goods.....	$137,055,834	$103,407,278
General merchandise..	166,825,920	166,424,629
Specie and bullion	2,251,644	9,954,539
Total imports.....	$306,133,398	$279,786,446

The following statement will show the revenue from Customs at New York for the month of June, the previous five months, and for the fiscal year ending June 30th:

	1866.	1867.
In June	$9,559,898 38	$7,725,135 60
Previous 5 months.	57,988,291 40	51,629,553 30
Total in 6 months.	$67,548,189 78	$59,354,688 90
Total fiscal year.	$132,625,518 65	119,886,260 72

All of the above figures represent gold. The imports are reckoned only at their foreign cost in gold, neither freight nor duty being added.

The exports from New York to foreign ports in the month of June, were:

	1866.	1867.
Domestic produce	$9,601,089	$14,346,769
Foreign free goods.....	55,074	43,214
Do. dutiable.....	606,255	718,137
Specie and bullion	15,890,956	6,724,272
Total exports.....	$26,153,374	$21,827,392
Do. exclusive of specie.	10,262,418	15,103,120

The exports from New York to foreign ports for six months from January 1, were:

	1866.	1867.
Domestic produce.....	$104,254,136	$91,147,858
Foreign free goods	458,794	287,238
Do. dutiable	3,025,987	4,211,544
Specie and bullion.....	45,782,430	24,595,662
Total exports	$153,521,347	$120,242,302
Do. exclusive of specie	107,738,917	95,646,640

The exports from New York to foreign ports for the fiscal year ending June 30th, were:

	1865-'66.	1866-'67.
Domestic produce.....	$210,352,823	$173,549,691
Foreign free goods....	763,633	534,927
Do. dutiable	4,323,375	6,152,659
Specie and bullion....	57,870,354	41,366,932
Total exports	$273,309,185	$221,604,209
Do. exclusive of specie	215,438,831	180,237,277

The shipments of specie are given at their tale or counted value, but all the other items are computed at their market value in paper money.

Imports of Dry Goods.

The imports of foreign dry goods at New York for the month of June, were:

ENTERED FOR CONSUMPTION.

	1866.	1867.
Manufactures of wool.....	$1,640,136	$698,480
" cotton...	640,670	447,607
" silk	644,556	608,553
" flax	646,473	396,313
Miscellaneous dry goods..	301,738	323,617
Total entered for consump.	$3,873,573	$2,374,570

WITHDRAWN FROM WAREHOUSE.

Miscellane'us dry goods	1,014,407	1,924,017
Total ent. for warehouse	$36,483,430	$40,976,025
Add ent. for consump..	100,572,404	62,431,253
Tot. entered at the port	$137,055,834	$103,407,278

The progress of the trade from month to month, during the three last fiscal years, is exhibited in the annexed statement:

	1865.	1866.	1867.
July ...	$6,762,750	$7,226,283	$10,727,463
August .	7,529,800	13,462,212	14,870,338
Sept....	4,147,449	11,198,257	9,175,675
October.	2,996,100	12,187,332	8,485,550
Nov....	2,235,107	12,687,947	7,259,236
Dec....	1,558,567	10,578,991	5,989,731
Jan....	2,350,635	15,769,091	11,928,872
Feb....	3,723,690	16,701,578	9,786,615
March..	3,324,599	14,833,273	10,227,579
April...	3,869,706	7,336,564	5,274,455
May ...	3,913,468	7,299,112	5,436,451
June ...	5,442,068	6,775,244	4,245,313
	$49,853,939	$137,055,834	$103,407,278

The following statement will show the value, landed here, of each class of goods during the fiscal years ending June 30, 1866 and 1867:

	1865-6.	1866-7.
Manufactures of wool...	$53,174,627	$39,988,642
" cotton.	25,118,979	18,415,997
" silk ...	29,460,932	19,532,125
" flax ...	21,368,383	16,701,783
Miscellaneous dry goods	7,932,913	8,768,731
Total imports.....	$137,055,834	$103,407,278

The imports of dry goods at New York for each year since 1850 have been as follows:

	Value.
1850-1	$64,613,747
1851-2	58,221,062
1852-3	79,192,513
1853-4	92,389,627
1854-5	62,918,443
1855-6	85 898,690
1856-7	92,669,088
1857-8	67,317,736
1858-9	93,549,083
1859-60	107,843,205
1860-1	83,310,345
1861-2	38,155,720
1862-3	61,963,037
1863-4	83,284,966
1864-5	49,853,939
1865-6	137,055,834
1866-7	108,407,278

Dayton and Michigan Railroad.

The income and expenses of this company, for the fiscal years ending March 31, 1866 and 1867, have been as follows:

Income:	1866.	1867.
From passengers	$409,739 74	$307,095 85
" freight	495,663 43	497,345 74
" mails and express	44,322 87	47,583 98
" rents, etc.	1,631 42	1,338 00
	$951,357 46	$853,363 57
Expenses, viz:

Miscellaneous expenses	20,062 08	12,925 08
	$611,423 25	$599,406 48
Net earnings	$339,934 21	$253,957 09
Applied as follows:		
Interest on bonds	$260,887 88	
General interest and exchange	269 73	
Taxes, State	30,717 48	
" National	13,143 03	
Insurance	315 00	
		305,333 12
Making an excess of expenses over income of		$51,376 03

The receipts during the past year compared with those of the year previous, show a decrease of $07,993 89; with a decrease in operating expenses and renewals, interest, taxes and insurance, of $53,688 30—making the net decrease $44,305 59.

The amount due lessee, as per last report, was		$171,845 51
Which has been increased,		
For construction	$24,136 49	
For fencing	5,590 24	
For equipment	4,590 00	
For right of way	501 75	
For Buffalo and Cleveland steamboat stock	25,000 00	
For Toledo improvement	16,762 14	
For sinking fund	30,000 00	
		106,580 62
Advanced on account of expenses during the year		50,952 19
Total		$329,378 32
Less from sale of tug	$3,860 36	
" " real estate	2,400 00	
		6,260 36
Leaving a balance due Lessees, March 31, 1867, of		$323,117 96
Add interest on bonds accrued since lease and uncalled for		5,843 87
Total		$328,961 83

The capital stock (new) has been increased since the last report, $15,104 12, by the exchange of old stock and accrued interest, leaving $99,857 01 of the latter still out.

The bonded debt has been decreased $69,030, by the sale of bonds held in trust for that purpose, and the operation of the sinking fund.

The first mortgage bonds, amounting to $283,000, fall due on the 1st day of July, 1867, to meet which the Trustees hold a like amount of second mortgage bonds, which will then become the first mortgage, with the additional security of the interest guaranteed by the C., H. & D. R. R. Lessees.

The receipts of the road for the past six years have been as follows:

Year ending March 31, 1862	$400,168 37
" " 31, 1863	663,705 55

Tenacity of Steel Rails.

At the Chalk Farm Station of the London and North Western Railway a Bessemer steel rail is now to be seen still in use, and in good order, which has outlasted twenty-five iron rails successively placed next to it on the same line. Judging by this example, the steel rails are at least twenty-five times as durable as iron ones. Steel rails are very tough, as some experiments made within the last few days at the works of Messrs. John Brown & Co., and Messrs. Cammell & Co., of Sheffield, conclusively illustrate. These experiments were made chiefly for the satisfaction of the Hon. W. J. McAlpine, formerly engineer of the State of New York, and much connected with railways in America, who contemplates the more extended introduction of steel rails into that country. The result was to show the great toughness and powers of endurance of the steel rails. In one of the experiments a ram of a ton weight was suffered to fall upon a rail of 68 lbs. to the yard, supported on iron blocks 3 ft. apart in the clear, from a height of 20 ft., and the only effect was to bend the rail. The rail was then turned upside down and the blow was repeated, when the rail was bent straight, but without any cracking being visible. Finally, the rail was exposed to the test of a ton ram falling through 30 ft., when the rail was very much bent and twisted, but not a crack was visible. By the mode of manufacture now adopted perfect uniformity in the composition of every rail is insured.—*London Railway News.*

Cincinnati, Richmond and Chicago R. R.

The income of this company for the eleven months ending March 31, 1867, was as follows:

From passengers		$80,563 00
" freight		100,003 64
" mails and express		8,956 56
		$189,523 20
Expenses, viz:		
Operating road, renewal of bridges, &c	$137,582 79	
Rents to other companies	16,500 00	
Mileage of cars	4,294 54	
Interest on bonds	26,133 33	
Taxes—State	2,817 25	
" National	2,707 85	
		190,035 76
Excess of expenses, taxes and interest on bonds over income		$512 56

The assets and liabilities of the company are as follows:

Assets.

Construction	$807,083 29
Equipment	116,157 91
Real estate	700 00
C., H. & D. R. R. lessees	454 49
Profit and loss	512 56
	$924,908 25

Liabilities.

Mortgage bonds, due July 1, 1895	560,000 00
Interest on bonds unclaimed	1,958 25
	$924,908 25

President.—S. S. L'Hommedieu.

Directors.—John W. Ellis, John Young, Geo. H. Hill, E. W. McGuire, William Goodman, Lowell Fletcher and William Beckett.

Vice President.—John W. Hartwell.

Secretary and Treasurer.—Frederick Short.

Gen'l Superintendent.—Daniel McLaren.

Ass't Superintendent.—Lewis Williams.

Tide-Water Receipts.

The quantity of flour, wheat, corn and barley, left at tide water from the commencement of navigation to 30th June, inclusive, during the years 1866 and 1867, was as follows:

	Flour, bbls.	Wheat, bu.	Corn, bu.	Barley, bu.
1866	57,700	617,500	4,200,000	50,800
1867	14,500	128,500	1,449,200	28,800
Dec.	43,800	489,000	2,750,800	22,000

By reducing the wheat to flour, the quantity of the latter left at tide-water this year, compared with the corresponding period last year, shows a decrease of 141,000 bbls. flour.

The following comparative table shows the quantity of some of the principal articles of produce left at tide-water from the commencement of navigation to and including the 30th of June, in the years indicated:

Canal opened—	1865. May 1.	1866. May 1.	1867. May 1.
Flour, bbls	189,200	57,500	14,500
Wheat, bushels	1,465,300	617,500	128,500
Corn, bushels	1,700,200	4,200,000	1,449,200
Barley, bushels	150,700	50,800	28,800
Oats, bushels	2,671,600	1,917,700	606,500
Rye, bushels	90,500	125,800	88,500
Malt, bushels	167,700	86,300	47,000
Beef, bbls	6,690	100	.....
Pork, bbls	13,750	7	309
Bacon, lbs	1,190,900	.....	34,400
Butter, lbs	40,000	29,100	29,700
Lard, lbs	1,423,200	54,700	47,600
Cheese, lbs	199,400	78,600	28,600
Wool, lbs	88,500	61,500	19,300

American Railroad Journal.

Saturday, July 13, 1867.

Stock Exchange and Money Market.

Money has been quite freely offered all through the week, especially on call, both by the banks, and by private lenders. But the demand has not been equal to the absorption of the available supply, despite the increasing activity at the Stock and Produce Exchanges. And the tendency of rates has been in favor of borrowers. The ruling figures have been, for temporary accommodation, 4 per cent. to the great dealers in the public funds, and 5@6 per cent. to the Stock firms. The latter have been the main customers. Lenders, finding extreme difficulty in placing their balances advantageously, have been making unusually large investments in the public funds. Even the city banks have been obliged to seek employment for much of their available resources, through the same channel. This movement has stimulated business in the National stocks, which have been decidedly brisk, and buoyant in price. The heavy July interest and dividend disbursements have added materially to the floating supply of capital; and have tended to stimulate speculation in the Stock Exchange. The domestic exchanges have been generally in favor of this centre, and currency has been flowing hither, in considerable amounts. General business has been rather more active, and there has been an increase to a moderate extent, at bank and through private houses, of applications for discounts which have been pretty readily responded to in the instance of strictly prime short date commercial paper, on the basis of 6@6½ per cent. per annum; though the several failures in the dry goods line, during the week, have tended to make lenders more chary of accommodation, in a permanent form. Though the receipts of the Government have been quite liberal; unusually so indeed in the way of excises; its disbursements have largely exceeded its income from all sources, especially through the local office, which has cut down its balances, very energetically. The city banks have been gaining in strength, uniformly, through the week. They report an increase of $5,311,055 in their deposits, $3,084,175 in their specie, and $1,021,717 in their legal tender reserve, during the week, against an increase of $3,813,283 in their loans, and $126,837 in their circulation. Government is preparing for the payment of the half year's interest, due July 15, on the third series of the Seven-thirty notes, and it gives notice to holders of the notes, to send in their claims promptly. This disbursement will add further to the cash resources of the city banks, which are large holders of the notes. The specie reserve of the banks is now $10,853,171, against $9,865,266 same time last year. The city bank deposits are now $191,524,312, against $205,799,611 week ending July 7, 1866. The legal tender reserve amounts to $71,196,472, against $79,541,638 same time last year. The circulation now stands at $33,669,397, against $27,296,580 same time last year. The loans are now $246,361,237, against $257,534,833 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $82,346,998 a day, against a daily average of $82,324,059 the preceding week, and $73,740,134 the week ending with June 22. The current week's exchanges average $92,507,000 a day.

National Bank notes to only a very limited amount were issued last week, making the total issue to 1,671 banks thus far, $303,045,726, against $282,555,440 at the close of the fiscal ending year, June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $4,379,847, leaving, with the existing 1,650 banks, (having an aggregate capital of $422,913,861,) an actual circulation at this date, of $298,665,879. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $340,607,500; and for the public deposits, $39,008,450—making a total of $379,615,950. The Treasury Department last week redeemed and destroyed $382,900 of worn and mutilated fractional currency, and issued none of the new. This latter circumstance was caused by the fact that an examination of the vaults of the National Treasury is now in progress by a committee appointed by

Secretary McCulloch for that purpose; and it was thought inexpedient at present to have any money delivered from the Currency Bureau. This is the first examination of the Treasury vaults since the Spring of 1861; before that it had been the custom to have an examination once in every six months.

The Philadelphia Bank movement the past week shows a decrease in loans, of $118,690; an increase of $96,764 in specie; a decrease in legal tenders of $82,386; an increase of $460,609 in deposits; and a decrease of $1,110 in circulation. The Bank Clearings show an increase of $2,378,816, and the balances, an increase of $144,727.

The U. S. Sub-Treasury receipts, week ending with July 6, were $13,055,392, including $1,610,006 from customs duties; payments, $15,022,070; balance at the close of the week, $130,492,492, against $132,459,170, at the close of the preceding week, showing a decrease of $1,966,678. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $8,885,877 including $260,964 from customs, and payments, $10,440,302; on Tuesday, receipts, $1,412,019; payments, $13,197,214. The balance at the close of business on Tuesday stood at $119,122,871, against $130,248,565 a week previous.

The total amount of gold certificates issued and redeemed by the U. S. Sub-Treasury, together with the outstanding balance on the 8th May, and at subsequent weekly intervals, is thus stated:

	Issued.	Redeemed.	Outstanding
20s ...	$333,900	$206,600	$127,300
100s ...	5,321,000	3,758,400	1,562,600
500s ...	1,164,500	541,000	623,500
1,000s ...	26,065,000	21,859,000	4,206,000
5,000s ...	159,675,000	140,130,000	19,545,000
10,000s ...	5,000,000	5,000,000	.....
Total 18th.	$197,559,400	$171,495,000	$26,064,400
Total 27th.	198,688,260	173,398,000	25,290,260
Total 1st..	200,092,100	174,475,000	25,617,100
Total 22d.	205,743,720	178,185,000	27,558,720
Total 29th.	207,613,980	179,540,000	28,073,980
Total 6th..	209,639,360	180,156,000	29,483,360

Government revenues have been on a much more extensive scale, since our last, especially in the form of excises, which open the new fiscal year quite encouragingly. The excises, last week, yielded $8,351,822, against $2,500,000, the preceding week; customs at the port of New York $1,610,006, and at the outports, about $550,000 (in coin) more, making the grand total income for the week equal about $11,322,000 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with July 30, 1867, were $265,853,195. The receipts thus far in the new fiscal year, which began on the 1st inst., have been $8,351,822.

The Gold Market has been moderately active. The speculative demand has been fair. The customs inquiry has been an average one for the season. The export call has been pretty brisk. But the outflow of coin from the Treasury, chiefly, of course, in liquidation of interest claims of the public creditors, has been in excess of the wants of the market, in the absence of any disturbing element; and the premium has not been maintained as high as was indicated by the extreme figures of last week. Early on last Saturday, an exaggerated report of that day's shipments was put in circulation, but it did not help the inflation scheme perceptibly, as it was soon authoritatively contradicted. The California steamer added nearly a million dollars to the supply, in season for the Saturday export movement. On Wednesday of the current week, the outflow of specie from this port was $1,441,788. The range of the price through the week was from 138¾@139⅜; and the closing quotation on Wednesday was 138⅝. The total imports of specie from Europe, and other foreign ports since Jan. 1, 1867, have been $1,573,013. The customs demand for Gold last week, averaged $322,000 a day; thus far, this week, it has been equal to $260,964 a day, or equal to a weekly aggregate of $1,565,784. The arrivals of specie from Europe, Havana and other foreign ports, during the past week were $18,024, and from California, $817,270. The total customs revenue of the Government, in coin, at this port, thus far in the current calendar year commencing with Jan. 1, 1867, has been $61,979,511, against $70,372,572 same time in the preceding fiscal year. The total receipts of California gold at this port since Jan. 1, 1867, have been $14,093,428, against $19,111,308 same time last year, showing a decrease this year, of $5,017,880. The exports of specie from this port, last week, were $1,534,861. The total outflow of specie from the port, since Jan. 1, 1867, has been $26,553,723, against $47,123,868 same time in the preceding year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $5,669,000, making the total coin interest disbursements through the Government office, since Jan. 1, 1867, $34,300,329, against $26,910,448 for the preceding fiscal year. The specie exports from San Francisco, from Jan. 1, to May 29, reached $14,863,783, against $15,035,553 same time last year, showing a decrease, in 1867, of $171,770.

Foreign Exchange has been in fair supply and demand, through the week, on a comparatively firm market. Some foreign orders for Government securities have been executed, and have added to the available offerings of prime bills, with seriously depressing the prices. Bankers' 60 day bills on London closed steadily on Wednesday at 109⅞@110⅛, and on Paris to 5.16¼@5.12½; sight bills on London to 110½@110⅝; and on Paris to 5.12½@5.10. The offerings of produce bills have been fair this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $3,075,579, making the total value of exports since Jan. 1, 1867, $100,853,268, against $109,179,109 same time in the preceding year.

Government securities have been in unusually active investment demand, and prices have advanced materially. The most decided improvement has been in the old Five-twenties of 1865, which have been in request for export and on speculative account, on a reduced supply. The later issues of the Five-Twenties, as also the first, or maturing August series of the Seven-Thirties have also been actively sought after at much firmer rates. The U. S. Assistant Treasurer at this point gives notice to the holders of the August Seven-Thirties that "this issue may now be exchanged at this office for Five-Twenty Bonds bearing date July 1, 1867, irredeemable for five years, and carrying six per cent. interest in gold. Interest on the 7-30s will be paid to day of presentation, and interest on the bonds will be charged from July 1st at six per cent. in currency. Interest on the 7-30s will cease August 15, and if not presented for exchange on or prior to that date, the holders will be deemed to have waived the privilege of conversion." U. S. sixes of 1881 closed here on Wednesday at 110¼@110½ ex July coupon; U.S. Five-twenties of 1862, 111⅝@112; U. S. Five-twenties of 1864 at 109⅜@109½; U. S. Five-twenties of 1865 at 109⅝@109¾; U. S. Five-twenties of 1865, consolidated, 108⅜@108½, ex July coupon; U. S. Five-twenties of 1867, 108⅜@108½; U. S. Ten-forties at 102⅜@102⅝, and U. S. Seven-thirties at 107⅞@108⅜. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

July, 1864.....	119¼	May, 1865	116½
August, 1864....	118⅞	August, 1865....	115½
October, 1864....	117⅞	September, 1865..	115
December, 1864..	117⅛	October, 1865....	114½

In railway and miscellaneous securities, business has been decidedly brisk at generally buoyant, though irregular prices. The fluctuations have been frequent, and sharp, but the drift of the speculative movement has been unmistakably toward higher values.

In general business, a further increase of activity has been noted, with rather more firmness, and buoyancy, in prices. The demand for breadstuffs has been quite active, and holders have had any exciting advantage. Cotton has been a leading exception having been dull and depressed, especially toward the close. Middling grades left off here on Wednesday heavily at 26@28 cents per lb. as extremes. The stock of cotton now here is estimated at about 81,000 bales. The receipts at the port this week, have averaged about 1,000 bales a day. The receipts since the commencement of the current cotton year, Sept. 1, have been 610,332 bales, against exports of 444,110 bales. The receipts at all the shipping ports from September 1 to latest mail dates have been 1,816,000 bales, against 1,965,001 bales same time last year; exports, 1,469,163 bales, against 1,470,100 bales same time last year; estimated stock at latest dates, 195,000 bales, against 308,000 bales same time last year. Foreign merchandise has been in rather more demand, and the leading articles have been held with more confidence. Dry Goods have been slightly disturbed by the failure in the interest reported during the week, but, on the whole, have held their ground well. The total imports of foreign dry goods, last week, were $1,146,464, and the total amount marketed $945,128. The value of foreign merchandise imported last week, was $2,825,329—making the grand total specie value of last week's imports of dry goods and merchandise, $3,971,793, and since Jan. 1, 1867, $132,536,848, against $158,657,512 same time in the preceding fiscal year. The ocean freight market has been rather more active, but, in most instances, at easier rates with 529 vessels of all classes in port. For Liverpool we quote flour at 1s.@1s. 3d. per bbl.; grain at 3½c.@4d. per bushel; cotton at $\frac{3}{16}$@¼d. per lb.; and heavy goods at 10s.@20s. per ton, all by sailing vessel.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	June 26.	July 3.	July 10.
Consols	94	94½	94¾
U.S. 5-20's of 1862	73	72¾	73
U.S. 5-20's of 1865	71	70½	71
Erie	40¾	43½	44¼
Ill. Central	79¾	79	80¼

The New York exports, exclusive of specie, for the week ending July 9, and since the beginning of the year, compare as follows:

	1866.	1867.
For the week	$2,094,882	$3,075,597
Prev. reported	107,084,227	97,777,689
Since January 1	$109,179,109	$106,853,286

The New York imports for the week compare as follows:

	1866.	1867.
Dry goods	$1,413,181	$1,146,464
Gen. merchandise	1,789,317	2,825,329
Total for the week	$3,202,498	$3,971,793
Previously reported	155,455,014	128,565,055
Since January 1	$158,657,512	$132,536,848

The balance in the Sub-Treasury on Wednesday was $117,421,605 51.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Plastic Slate Roofing.

We invite attention to the Advertisement of the Plastic Slate Roofing Joint Stock Co., in another column. Plastic Slate is made of very finely pulverized slate rock, mixed to a paste with raw coal-tar, and spread with a trowel. It solidifies by solar heat, and becomes real slate again without any change in its dimensions. It is not combustible at any time—is a bad conductor, and requires intense heat from other bodies to raise it to a red heat. It is being used in nearly every State of the Union for all kinds of buildings.

☞ Proposals for the construction of a railroad from Hackensack Junction, on the Northern Railroad, through the Village of Hackensack, to a point on the lands of John S. Lozier, at Newbridge, N. J., will be received at the office of C. H. Voorhies, No. 1 Exchange Place, Jersey City, until the 27th inst.

☞ The Belfast and Moosehead Lake Railroad Company was organized at Belfast, Me., on the 3d inst. The charter was accepted, and Mr. Alden, Hon. Thomas Marshall, Col. A. W. Johnson, Axel Hayford and other prominent citizens were chosen Directors. Measures were taken for the immediate construction of the road.

☞ The Allegheny Valley Railroad is now completed to Brady's Bend, 25 miles above Kittanning. An excursion train from Pittsburg passed over the additional section from Mahoning to Brady's Bend on the 5th inst.

Railroad Earnings.—Weekly.

The earnings of the Michigan Southern and Northern Indiana Road for the 1st week in July, 1867, were $63,928 00
Corresponding week of 1866 ..... 84,969 00

Decrease $21,041 00

The earnings of the Chicago and Northwestern Railroad for 1st week in July, 1867 .. $192,924 00
Corresponding week previous year .. 190,762 00

Increase $2,162 00

The earnings of the Detroit and Milwaukee Railroad for the week ending July 4th, 1867, were $37,608 00
Corresponding week of 1866 ..... 35,558 00

Increase $2,050 00

The earnings of the Virginia and Tennessee Railroad for the fourth week of June, were $12,088, an increase of $2,138 on the same week last year. Total for the fiscal year commencing 1st of July, $716 970, an increase of $147,723 on same time of 1866.

Journal of Railroad Law.

DUTY OF RAILROAD COMPANIES TO BUILD AND MAINTAIN FENCES.—TO WHAT COMPANIES THE GENERAL RAILROAD LAW APPLIES.

The case of Staats *vs.* Hudson River Railroad Co., just decided by the Court of Appeals of this State, involves the question of the liability of the company under the General Railroad Law of 1850 and whether the provisions of that statute applies to companies chartered before its passage by the Legislature. The opinion of the court gives all the facts of the case. It was written by

SMITH, J.—The 44th section of the act of 1850 expressly imposes upon all railroad corporations to which it applies, the duty of erecting and maintaining fences on the sides of their road, with openings or gates or bars therein, for the use of the proprietors of the adjoining lands. But it is a question whether that section is applicable to the defendants, who were an existing corporation at the time of the passage of the act of 1850, they having been chartered by a special act in 1846. The 49th section of the act of 1850 subjects all railroad corporations within this State, existing at the time of the passage of said act, to all the duties, liabilities and provisions contained in certain specified sections of said act, including the 44th section, *not inconsistent* with the provisions of their charter. The duty created by the 44th section of the act of 1850, therefore, attaches to the defendants, unless it is inconsistent with some provision of their charter. The defendants claim that it is inconsistent with the provisions of the 24th section of their charter, which is in these words: "The said corporation, before running any cars upon the said road, shall erect and thereafter maintain upon the sides thereof, except where the road shall intersect some public highway, a fence, of such height and strength as is by law required, as a division-fence between the owners of adjoining lands; and shall make and keep in repair, wherever the same may be necessary upon the line of the said railroad, suitable guards to prevent cattle from running upon the same; but this section shall not prevent persons owning or occupying lands adjoining the said road from erecting, at proper and convenient places, where they may have occasion for crossing the said road for farming and other necessary purposes, suitable gates in the line of said fence, to facilitate such crossing, and to be kept in repair by the person using the same."

The argument on the part of the defendants is, that this section subjects the landowners to the duty of erecting and maintaining gates, while the act of 1850 imposes such duty upon the railroad company; and thus the two provisions are inconsistent with each other, and, consequently, the latter does not apply to the defendants.

It is to be observed, however, that the act of 1846 does not impose upon the adjoining owner or occupant an absolute duty to erect and maintain gates. It *permits* him to erect them; and, in case he avails himself of the permission, it makes it incumbent on him to repair them. If he does not choose to erect a gate, he is under no obligation to do so, and, of course, is under no duty to repair. But the duty of the railroad corporation to erect and maintain *fences* on the sides of their road is absolute; and the adjoining landowner may insist upon its performance. If all the landowners on the line of the defendants' road had seen fit to waive the permission to construct gates given to them by the statute, as they might have done, the defendants would have been bound, by the terms of their charter, to erect and maintain a fence on each side of their road throughout its entire length, except where it intersected public highways, or was inaccessible to cattle. Practically, the case would then have been the same as if the charter had not given permission to the landowners to erect gates. What new duty was imposed upon the defendants by the 44th section of the act of 1850? Simply, that the fences, which they were previously required to erect and keep up, should be constructed with gates or bars therein, when necessary to the landowners, instead of being immovable throughout. The new obligation is merely a modification of the former one—a specification of the mode, so to speak, in which the prior obligation is required to be performed. The fence required, whether with gates or without them, is but an ordinary erection for the purpose of restraining cattle from getting upon the track of the railroad; and a provision prescribing either mode of construction can hardly be regarded as inconsistent with a statute creating an obligation to erect the fence and maintain it.

We are referred to the cases of Visscher *vs.* The Hudson River Railroad Company (15 Barb., 37,) and Clarkson *vs.* The same (12 N. Y., 304), which hold that the provisions of the general railroad act, in respect to the mode of acquiring title to land for a roadway, are inconsistent with the provisions of the defendants' charter upon the same subject, and, therefore, do not apply to the defendants. An examination of those decisions shows that they proceeded upon very substantial grounds, which do not exist in the present case. The defendants' charter, as amended in 1848 (Laws of 1848, p. 39, ch. 30), and the general act, prescribed essentially different and incongruous modes of proceeding to acquire title to land, each complete in itself. Under the charter, a notice to the party was to be served or published ten days; the general law required four weeks' publication. The charter authorized proceedings in the Superior Court of the city of New York, or in the Supreme Court in any county of the State, for the appointment of five commissioners or appraisers, to be selected by the court, from the State at large. By the general law, the Supreme Court, in the district in which the land was situated, had sole jurisdiction; each party nominated six commissioners, from whom the court selected two on each side, and appointed the fifth; and the commissioners were all required to live in the county in which the land was situated. Under the charter, the roadway might be of any width required; by the general act, it was limited to ninety feet. The charter provided that, on filing the report of the commissioners, the court, on proof of payment or deposit of the money, should make a rule reciting the proceedings, which, on being recorded, should operate as a deed to the company. Under the general law, notice was to be given of an application to confirm the report, an appeal was authorized, and twenty days were allowed for appealing. In reference to those discordant provisions, Justice Parker said, in Visscher's case: "The two modes of assessing damages and obtaining title are incompatible and incongruous. The requirements of the general act are not additional to those of the charter. They cannot be ingrafted upon the charter. In Clarkson's case, Dean, J. delivering the opinion of the court, said: "For these sections to apply to the defendants' manner of acquiring title, they must be consistent with the provisions of the defendants' charter. That is not that they must be identical, but, that although they may differ in requiring something in addition to what was to be done before, they must not, in their requisition, take away any of the rights to which the defendants were entitled under the charter." These extracts show the course of reasoning adopted in those cases. Tested by it, the provisions of the general act, upon the point now under discussion, are not inconsistent with the defendants' charter. They do not deprive the company of any right; they impose no new duty; they simply regulate the performance of a duty which was imposed upon the defendants by their charter. If these views are correct, the 44th section of the act of 1850 applies to the defendants, and makes it their duty to keep the gate in repair. If it be assumed, however, that that section does not apply. Let us see how the case stands under the eight section of the act of 1854. That section is in these words: Every railroad corporation, whose line of road is open for use, shall, within three months after the passage of this act, and every railroad company formed or to be formed, but whose lines are not now open for use shall, before the lines of such railroads are opened, erect and thereafter maintain fences on the sides of their roads, of the height and strength of a division fence as required by law, with openings or gates or bars therein, at the farm-crossings of such railroad, for the use of the proprietors of the lands adjoining such railroads, and shall also construct, where the same has not already been done, and hereafter maintain, cattle-guards at all road-crossings, suitable and sufficient to prevent cattle, horses, sheep and hogs from getting on to such railroad. And so long as such fences and cattle-guards shall not be made, and when not in good repair, such railroad corporation and its agents shall be liable for damages which shall be done by the agents or engines of any such corporation to any cattle, horses, sheep or hogs thereon; and when such fences and guards shall have been

duly made, and shall be kept in good repair, such railroad corporation shall not be liable for any such damages, unless negligently or wilfully done. A sufficient post and line fence of requisite height shall be deemed a lawful fence, within the provisions of this section; but no railroad corporation shall be required to fence the sides of its roads, except where such fence is necessary to prevent horses, cattle, sheep and hogs from getting on to the track of the railroad from the lands adjoining the same. The defendants are undoubtedly within the operation of this section, unless, as is claimed by them, it applies only to cases where fences and gates had not been constructed at the time that act was adopted. That claim is not warranted by language of the section, and in my judgment does not accord with its meaning. In describing the corporations to which the section relates, its framers used the comprehensive words, "every railroad corporation;" and they specified as well those corporations whose lines were then open for use as those whose lines were not then open. In the case of Corwin *vs.* The New York and Erie Railroad Co. 13 N. Y. 53, Denio, J., speaking of section 44th of the act of 1850, expressed the opinion that it is not to be regarded as merely a regulation respecting division fences, between the land of the railroad corporations and those of adjoining property, but that it is rather to be considered as providing a safeguard for the protection of the lives of persons traveling by railroad and of the property of in animals, which citizens in the vicinity of those roads may own. This remark of the learned judge is justly applicable, also, to the section we are called upon to construct, and the fact that the section was intended, in a great measure, as a police regulation for the safety of the traveling public, strengthens the conclusion that it was designed to have the general scope indicated by its language, and to prescribe a uniform rule for the government of every railroad company in the State.

It provides for two distinct acts, the erecting of fences and gates and the maintaining them; and although the former provision was unnecessary in cases where suitable fences and gates had already been built, yet the latter provision was useful in those cases as well as where the fences and gates were thereafter to be constructed. Each provision is to be taken distributively, and to be applied to the cases in which it can have effect, *reddendo, singula singulis.* Several other sections of the same act clearly apply to all the railroad corporation in the State, whether then existing or thereafter to be formed, and whether created by special charter or organized under the general law (7, 10, 14, 17). No question can arise as to the power of the legislature thus to amend the defendants' charter, as it contains an express reservation of the legislative power to alter or repeal it, and besides, the 22d section of the charter subjects the corporation to the general restrictions and liabilities prescribed by the third title of the eighteenth chapter of the first part of the Revised Statutes, the eight section of which provides, that the charter of every corporation, that shall thereafter be granted by the legislature, shall be subject to alteration, suspension and repeal, in the discretion of the legislature. I am of opinion that the defendants were charged with the duty of keeping the gate in repair, and, therefore, that the judgment appealed from should be reversed, and a new trial ordered.

(From "Wordswith's Railway Directory.")

Savannah and Charleston Railroad.

The Charleston and Savannah Railroad was sold under mortgage debt of $1,250,000 in Nov., 1866, and was purchased by individuals, subject to a State guaranteed mortgage of $500,000, which is now the entire debt of the road.

Its length is 102 miles, and the charter for its present name is dated January 1, 1867. 50 miles of the road out of Charleston, was uninjured during the war, and is to-day in first rate running order, having been supplied with new cross ties and other timbers for most of the way. The next 30 miles are being rebuilt from the resources of the company, and the work is rapidly progressing. This arriving point will open a through connection with Savannah *via* the river from Purysburg, and the remaining 22 miles will be put under work of repair immediately, so that by 1st Nov., or soon after, the trains will run through from Charleston to Savannah.

The rolling stock of the road, consisting of 12 first class locomotives, and a proportionate number of freight and platform cars, were not injured during the war, except from the unusual wear and exposure.

The time between Charleston and Savannah, when the road was operating was 5 hours, and the fare $5. The mails, passengers and freight paid equal to 7 per cent. on the entire debt of the road and 10 per cent. dividend on its stock.

With the return of prosperity which is now beaming upon the land to farmers, merchants and laborers, this road under its present able management will soon regain the reputation accorded by its friends in its earlier days. It helps make up the chain of the seaboard route forming what is called the "Great Annamissic Route," the shortest line to Savannah, Brunswick, Fernandina and Cedar Keys. It is now in the hands of six stockholders, J. Reed Boylston, J. H. Taylor, W. S. Hastie, Alex. Isaacs, F. S. Willis, and under the especial management of its builder and efficient Superintendent, Col. John S. Ryan.

JUNE 28TH, 1867. G.

Steel vs. Iron Rails.

The advantage, in an economical point of view alone, of the steel over the iron rail is fast being made manifest, and the total disappearance of the latter appears to be a mere question of time. Whilst there are complaints from almost every iron district in the kingdom, that very few orders for rails are being sent in, yet the makers of those of steel—particularly Bessemer—were scarcely ever busier. On nearly all large railways, more especially on those where the traffic is heavy, the steel rails are admitted to effect a very great saving, and are being fast put down on some of the largest lines. Amongst others, the London and North Western have recently put some down, and other companies are doing the same. At one establishment alone, the South Yorkshire Works, at Penistone, the firm known as that of Cammell & Co., Limited, about 300 tons of Bessemer rails are being turned out, there being some very large orders on hand for the Great Indian Peninsular Railway, which has now about 850 miles open, whilst the entire length of the line will be upwards of 1,300 miles. For America also a large quantity is being made, as it is understood that the Grand Trunk of Canada line is to be laid with steel rails, which Mr. Watkin, M. P., the chairman of the company, asserts will effect a very great saving, seeing that they have some 1,377 miles in work. Russia is now about our best customer for iron rails, for which country they may be suitable, seeing that the lines are long and the traffic limited. One great bar to the general introduction of the Bessemer rail is the rather large royalty to the patentee by the makers; whilst in Prussia, where a very large quantity of Bessemer is being turned out, no royalty whatever is paid, patent rights not being reserved in that country. The advantage thus gained is materially to check exportations of steel to the North of Europe.—*London Railway News.*

Journal Box Metal.

We invite attention to the Advertisement of Messrs. J. R. BAKER & Co., in another column, and also to the following testimonial which we have selected from a large number presented to us for our inspection:

NEW YORK, MARCH 12TH, 1867.

This will certify I am using the New Jersey National Metal Companies' Anti-Friction Journal Box Metal, cast in solid boxes for a pair of crank pin boxes, in the place of brass ones. This Journal has given us much trouble with heating and cutting with brass, I applied your National Metal on the rough Journal some six months ago, and I am very happy to say, in your favor that we have no more trouble with it. It runs perfectly cool, with one-third less than the brass ones did, this Journal being small and having heavy hard work to do, for the power of the engine, and making 65 turns per minute, I consider this place a good test for the merit of your National Metal, and I can honestly say your Anti-Friction Metal is the best of any I have ever used for Journal boxes.

Yours Respectfully,
JAMES S. SIMPSON,
Foreman of Machine Shop.
JOHN ROACH & SON,
Etna Iron Works, New York.

We the undersigned fully agree with the above statement, in regard to the working test of the merit of your metal, in our line of shafting.

Respectfully Yours,
GCILD & GARRISON,
Pump Machine Works, Brooklyn, E. D.

This Metal is adapted to Railroad Car Boxes, Steamships, Rolling Mills, and all other kinds of Machinery Journal Boxes where Brass or Babbitt's Metal has formerly been used in Journal bearings.

Nashua and Lowell Railroad.

The directors of this company have voted to issue twelve hundred shares of new stock on the first day of August next, and that an assessment of one hundred dollars per share be paid thereon on that day; that holders of stock of record on the first day of July next be authorized to take the said shares at par, in the proportion of one new share for every five shares then held by them; that a dividend of twenty per cent. be declared payable on the first day of August next, to stockholders of record on the first day of July next.

Lehigh Coal and Navigation Co.

A meeting of the stockholders of this company was held in Philadelphia on the 2d inst., for the purpose of voting upon the agreements for the merger of the Nanticoke and the Lehigh and Delaware Water Gap Railroad Companies into the Lehigh Coal and Navigation Company. The agreements having been read, the meeting proceeded to take a stock vote on the same, the result of which was that all the votes, numbering 24,144, were cast in favor of each of the agreements, the meeting thus deciding unanimously in favor of both.

Wharton's Patent Safety Railway Switch.

More than seven years ago we first noticed William Wharton's ingenious, simple, economic, now amply tested and abundantly approved *Switch*, in these columns. Mr. Wharton being young, patient, confident, was content to bide the consequences of trial, feeling that every fair test of his invention would prove its efficiency and its adaptation to a palpable and serious railroad want.

Nor has Mr. Wharton been mistaken; for, as he felt and his friends believed would be the case from the start, his Switch is now a conceded success, since it is the only switch that renders both rails of the main track immovable, and assures safe transit over the main track at the switch, without risk.

Wharton's Switch does not break the *continuity* of the rails in the track, and hence its *economy* in saving the rail from the battering to which a shifting track rail at the ordinary switch is exposed.

At Reading, where Mr. Wharton's Switch was attached to steel rails, it outwore twelve sets of iron rails in the parallel up track for empty cars, a conclusive testimony of its economy and durability.

Railroad men are sometimes averse to an improvement, however obvious its merits, until satisfied that, whilst it assures greater safety *it also costs less money.* And this latter consideration is potential, because anything that diminishes expenses increases profits; Wharton's Switch, therefore, not only commends itself to the operating department, but also to the treasury, whence dividends are disbursed.—*U. S. R. R. & Mining Reg.*

Interest and Dividends.

The Central Railroad Company of New Jersey have declared a quarterly dividend of 2½ per cent., payable, free of tax on the 20th inst.

The Terre Haute and Indianapolis Railroad Company have declared a dividend of six per cent., payable, free of U. S. tax, at the Farmers' Loan and Trust Co., 26 Exchange Place, N. Y., on the 10th inst.

The Delaware Railroad Company has declared a dividend of three per cent., payable at Dover, 1st of July.

The Mount Carbon Railroad Company a semi-annual dividend of 3 per cent., clear of tax, payable on demand.

The Chesnut and Walnut Streets Passenger Railway Company a dividend of $3 per share, clear of taxes, payable on demand.

The Thirteenth and Fifteenth Streets Passenger Railway Co., a dividend of 50 cents per share, clear of tax, payable on the 13th inst.

The Frankford and Southwark Philadelphia City Passenger Railway Co., a dividend of 3 per cent., clear of taxes, payable July 17.

The Naugatuck Railroad Company has declared a dividend of five per cent., free of government tax, payable August 15.

☞ The Boston, Hartford and Erie Railroad is reported to have arranged with the Erie Railway and the Pennsylvania Coal Company to indorse its bonds for $7,000,000. This sum, with the three millions granted by the State of Massachusetts, will suffice to complete the unfinished links between Willimatic and Mechanicsville, and between Waterbury and Fishkill.

☞ A new railroad is to be built through Dutchess County, New York, to connect Fishkill on the Hudson with the Harlem road in Columbia County. The amount of subscription required from Dutchess County, $500,000, has been made up, and that portion of the road will immediately be put under contract.

Illinois Central Railroad.

The statement of this Company for the month ending June 30, 1867, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	11,148.46 for	$105,831 45
Acres Int. Fund Lands sold	360.00 for	5,795 00
Acres Free Lands sold	4,733.18 for	62,171 68
Total sales during month of June, 1867	16,241.64 for	$173,798 13
To which add Town Lot Sales		880 00
Total of all	16,241.64 for	$174,678 13
Cash collected in June		$211,175 08

TRAFFIC DEPARTMENT.

Receipts from Freight		$330,928 00
do. Passengers		125,329 54
do. Mails		6,358 83
do. Rent of Road		4,000 00
do. Other Sources		30,000 00
Total Receipts in June, 1867		$496,615 87
Total Receipts in June, 1866		$560,024 63

Bessemer Rails in France.

The Paris, Lyons and Mediterranean has given out an important order for Bessemer steel rails, a contract for 20,000 tons having been let to the Terrenoire Mines and Iron Works Company at £12 12s. per ton, taken at the works. Some little time since the Western of France ordered 2,000 tons from the Imphy St. Seurin Company at £14 18s. per ton delivered at Batignolles; and the Northern of France also ordered 3,000 tons from the same concern at £14 8s. per ton, delivered at La Chapelle.—*Herapath.*

People's Passenger Railway.

The People's Passenger Railway was so far completed on Saturday, that the cars made two trips in the evening. They started from the front of the Wyoming House, at 7½ o'clock, and reached the present terminus (Market street,) in 25 minutes, a distance of nearly two and a half miles. The cars were filled to their utmost capacity, and on reaching Providence, several hundred persons had assembled to witness their arrival. The cars are large, easy and pleasant, and the trip was a most delightful one.—*Scranton (Pa.) Register, July 4.*

Norfolk and Gt. Western Railroad.

Books of subscription to the capital stock of this road are to be opened at Norfolk, Va., on the 20th inst. Colonel B. M. Jones has been appointed the Chief Engineer and General Agent. It is claimed that this road will give Norfolk exclusively the trade of the border counties of Virginia and North Carolina, commencing with Greenesville and Warren, and ending at the Tennessee Railroad.

Southern Central Railroad.

Hon. Donald Robertson, of Queenstown, C. W., has contracted to build the Southern Central Railroad from Owego to Fair Haven, and to finish it complete and ready for the cars within eighteen months. The road will be constructed of the best material, with the heaviest rail—sixty pounds to the yard—and is to be, in every respect, a first class road. The work is to begin at once.

☞ A convention of the friends of the proposed road from Toledo to Columbus, met at Toledo on the 10th inst. Resolutions were adopted providing for an immediate survey of the route, and for the appointment of delegates to a meeting to be held in that city on the 18th instant, to effect a permanent organization.

☞ The Albany and Susquehanna Railroad was formally opened to Bainbridge in Chenango County, on the 10th inst. Bainbridge is ten miles beyond Unadilla, which for some months has been the terminus, and 104 miles from Albany.

☞ A railroad from Utica to Hamilton, on what is known as the canal route, is to be built, work commencing immediately.

FOR SALE.

16 FLAT CARS—Broad Tread Wheels—Compromise—Just completed at Buffalo, N. Y.

These Cars are built in the most approved style, of the best White Oak Lumber.

Platforms 30 feet long, 8½ wide, Iron Trucks, Capacity 15 Tons, Warranted.

KASSON & CO.,
62 Broadway,
26tf **New York.**

FOR SALE.

3 PASSENGER CARS—4 8½ or 4-10 Gauge—Rebuilt at Buffalo—first-class finish—Patent Trucks—will seat 56 @ 58 Passengers.

To be had separately or together at a Bargain.

KASSON & CO.,
62 Broadway,
26tf **New York.**

FOR SALE
3 LOCOMOTIVES,
4-8 1-2 GAUGE,

All thoroughly REBUILT by one of the best makers in the country, and ready for immediate use.

1—Cylinders 14x22, Link Motion, 4-56 in. Drivers connected, Copper Flues, Weight about 24 tons; 8 wheeled Tender, 1800 gallons.

This Engine has always worked admirably; Steams freely with dry or green wood, works and wears perfectly smooth; Well springed and brassed all around. Proportions every way suited to power. A good and stylish model, all in excellent order.

2—Cylinders 15x20, Link Motion, 4-56 in. Drivers connected, Copper Flues, weight about 23 tons, 8 wheeled tender, 1,800 gallons.

Is a smart smooth working Engine, suitable for any work; has a good record throughout.

3—Cylinders 15x20 Hook Motion, 4-66 in. Drivers connected, Copper Flues, weight about 24 tons; Tender, 8 wheeled.

Every way perfectly sound, well brassed and springed up. All in fine working condition.

These Engines will be sold VERY CHEAP to close a transaction, and are GREAT BARGAINS to any company wanting this sized Engine.

KASSON & CO.,
62 Broadway, New York.

OFFICE OF THE ILLINOIS CENTRAL R. R. Co.,
NEW YORK, June 21, 1867.

AT A MEETING OF THE BOARD OF DIRECTORS of this Company, held this day, it was

Resolved, That a DIVIDEND of FIVE PER CENT. in cash, free of Government tax, be paid on the 1st of August next to the holders of the full paid shares registered on the 20th of July inst., and that the transfer books be closed on the said 20th day of July, and opened on the 5th day of August.

6t28 THOMAS E. WALKER, Treasurer.

M. T. DAVIDSON & CO.,

Manufacturers and Dealers in

Engineers' and Machinists' Tools and Supplies.

Principal Agents for the sale of the Fox Lathes, Chucks, Slide Rests, finished Shafting, Pullies and Hangers with self-oiling boxes, American Steam Gage Company's Steam and Vacuum Gages, Clocks, Revolution Counters, etc., Richard's Indicators, Morse's Patent Twist Drills. A full assortment of the above constantly on hand at Manufacturers' rates.

3m25 **84 John Street, New York.**

ASTONISHING!

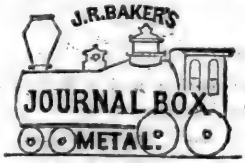
PAINTS for Cars, Bridges, Roofs and Houses, at ONE-THIRD the cost of lead; 100 lbs. will paint as much as 250 lbs. of lead, and wear better. Extract from a testimonial received from the U. S. Mint, "have used the PECORA CO.'S BROWN PAINT where it is subject to the fumes of ACID and STEAM, and find it SUPERIOR to all others in protecting wood and metal." For joints it is superior to red lead. The floors and joints of bridges should all be painted with it as they are laid.

PECORA PAINT CO.,
150 N. 4th St., Philadelphia.

MEAD RUBBER COMPANY,

12 Vesey Street, New York.

MANUFACTURERS OF



INDIA RUBBER CAR SPRINGS AND STEAM PACKING.

Our Works being now under the management of a competent Superintendent, we are prepared to offer Springs of various qualities and prices to suit. Our A No. 1 Spring made of fine Para Rubber, and the Compound used by the Patentee, the late Fowler M. Ray, will be found to be cheaper than others made, from superior stock and offered at lower prices.

Sample setts forwarded on application. All Springs fully warranted.

NEW JERSEY

NATIONAL METAL CO.,

Sole Manufacturers of

J. R. BAKER'S

JOURNAL BOX & LINING METALS.

For all kinds of Machinery, Journal Boxes where the use of Anti-Friction Metal for Bearings is desired.

Important to Railroad Companies, Steamboat and Steamship Proprietors, Engineers, Mill-Men, Machinists and all persons putting up new works.

The merits of this National Metal has achieved for it such success that during the past year the proprietors have enlarged their facilities for its manufacture. They are now able to supply all demands, and would commend it to the attention of the public with confidence, that one trial will convince the most skeptical of its worth.

☞ Prices set at a low figure.

No. 1 Journal Box, cast in shape, 30, 35 and 40 cts. per pound.

Lining Metals—No. 1, 30 cents per pound. No. 2, 25 cts.; No. 3, 20 cts.

New Jersey National Metal Works,

J. R. BAKER & CO.,

179 Pavonia Avenue, Jersey City, N. J.

J. TAYLOR, Superintendent.

C. B. CROSSMANN,

40 Cortlandt street, N. Y., SUPPLY HOUSE.

JAMES CLAYTON'S Patent Steam Pump and Steam Engine Combined. These Pumps contain every desirable quality in a Steam Pump, they are made of the best materials and in the best manner, and are the most reliable and cheapest Steam Pumps in the market and are especially suitable for railroad stations, &c. Please send for Circular.

JAMES CLAYTON,

3m26 **102 Front Street, Brooklyn, N. Y.**

Douglass Manufacturing Co.,

Exclusive Manufacturers of

COOK'S PATENT

BORING IMPLEMENTS;

Also, a complete assortment of

MECHANICS' TOOLS.

Framing Chisels, Socket Firmer Chisels and Gouges, Socket Paring Chisels, Drawing Knives, Screwdrivers, Augers and Bits, Bung Borers, Boring Machines, Gimlets, Firmer Chisels and Gouges, Hollow Augers, Corkscrews, etc.

Warehouse, 70 Beekman Street, N. Y.

CHALLENGE!!

I will TEST my India Rubber Car Springs of any size, at any required pressure, with those of the New England Car Spring Co.'s, or any others, at the Convention of Car Masters to be held at Altoona, Pa., Sept. 18th, 1867.

Each Party to be at the expense of their own Testing Machinery, &c.

The Springs to be manufactured of the same material, weights and compound as now sold by both parties.

The above will set at rest the Unkind Reports of (the would be) Rubber Monopolizing Parties, that no spring can be manufactured of India Rubber equal to their own.

C. V. MEAD,
Hamilton Square Rubber Works.

P. O. Address, Trenton, N. J.

CAUTION.—Only Springs Stamped "C. V. MEAD," and fully warranted, are of his manufacture.

NOTICE TO THE CONSUMERS OF THE

GENUINE SWEDISH DANNEMORA IRON. (L)

I beg to announce that I have this day entered into a Contract with Messrs. W. JESSOP & SONS, of Sheffield, for the whole Annual Make of the above Iron, which, in future, will be stamped

(L) LEUFSTA W. JESSOP & SONS.

And to which I request the special attention of the Trade.

Leufsta, in Sweden, 29th April, 1867.

CARL EMANUEL DE GEER, Proprietor.

WM. JESSOP & SONS, in referring to the above notice, beg to inform dealers in, and consumers of, Iron and Steel, that they are prepared to receive orders for this IRON, and for BLISTER and EXTRA CAST STEEL, made from the Iron, at their Establishments, Nos. 91 and 93 JOHN ST., NEW YORK, and Nos. 133 and 135 FEDERAL ST., BOSTON.

VALUABLE SCIENTIFIC REPRINT.—The undersigned have the satisfaction to announce that on the 1st of July next they will begin the publication of an American reprint of

THE CHEMICAL NEWS

AND JOURNAL OF PHYSICAL SCIENCE,

DEVOTED TO

CHEMISTRY, PHARMACY, MINERALOGY, METALLURGY, MINING, ELECTRICITY,

PHOTOGRAPHY, PATENTS, REVIEWS, ABSTRACTS, REPORTS, ETC., ETC.

THE MOST POPULAR AND USEFUL ISSUE OF THE FOREIGN SCIENTIFIC PRESS.

This valuable Journal is devoted to Scientific, Analytical and Technical CHEMISTRY, PHARMACY, MINERALOGY, METALLURGY, MINING, ELECTRICITY, PHOTOGRAPHY, PATENTS, REVIEWS, and includes ABSTRACTS of all important intelligence from the cotemporaneous Scientific Press, with REPORTS of the proceedings of Scientific Bodies. Its foremost rank as the leading representative of these interests is undisputed.

While its importance to CHEMISTS, DRUGGISTS, APOTHECARIES, MANUFACTURERS, PHOTOGRAPHERS, ASSAYERS, and all other kindred scientific pursuits, is universally acknowledged, the high price of the original Journal has necessarily limited its circulation in America. The subscription to the London issue is TWELVE DOLLARS A YEAR, but the price of the American reprint, which will be printed in exact *fac simile* of the original, will be TWENTY-FIVE CENTS A MONTH. No interested class can now afford to be without this indispensable REPERTORY OF PRACTICAL SCIENCE. While the Reprint, in form, size, type and engravings, will be a literal copy of the original, a change will be made in the TIME of publication and it will be published in MONTHLY instead of WEEKLY, numbers. This desirable change is more convenient, and allows the yearly numbers to be included in one compact quarto volume of SIX HUNDRED AND FIFTY PAGES.

Our Mr. TOWNSEND has republished "BRAITHWAITE'S RETROSPECT OF MEDICINE AND SURGERY" for nearly a quarter of a century, until it has reached an unprecedented circulation, and he feels confident "THE CHEMICAL NEWS AND JOURNAL OF PHYSICAL SCIENCE" will supply a pressing want, and become equally as popular with the scientific world, and take its permanent place with the standard periodical literature of the country.

THE UNION PACIFIC RAILROAD CO.

Are now constructing a Railroad from

OMAHA, NEBRASKA,

westward towards the Pacific Ocean, making with its connections an unbroken line

ACROSS THE CONTINENT.

The Company now offer a limited amount of their

FIRST MORTGAGE BONDS

having thirty years to run, and bearing annual interest payable on the first day of January and July, in the City of New York, at the rate of

SIX PER CENT. IN GOLD,

AT

Ninety Cents on the Dollar.

This road was completed from Omaha 305 miles west on the 1st of January, 1867, and is fully equipped, and trains are regularly running over it. The Company has now on hand sufficient iron, ties, etc., to finish the remaining portion to the eastern base of the Rocky Mountains, 213 miles, which is under contract to be done September 1st of this year, and it is expected that the entire road will be in running order from Omaha to its western connection with the Central Pacific, now being rapidly built eastward from Sacramento, Cal., during 1870.

Means of the Company.

Estimating the distance to be built by the Union Pacific to be 1,565 miles, the United States Government issues its Six per cent. Thirty-year Bonds to the Company as the road is finished at the average rate of about $28,250 per mile amounting to $44,306,000.

The Company is also permitted to issue its own First Mortgage Bonds to an equal amount, and at the same time, which BY SPECIAL ACT OF CONGRESS ARE MADE A FIRST MORTGAGE ON THE ENTIRE LINE, the bonds of the United States *being subordinate to them.*

The Government makes a donation of 12,800 acres of land to the mile, amounting to 20,032,000 acres, estimated to be worth $30,000,000, making the total resources, exclusive of the capital, $118,416,000; but the full value of the lands cannot now be realized.

The authorized Capital Stock of the Company is one hundred million dollars, of which five millions have already been paid in, and of which it is not supposed that more than twenty-five millions at most will be required.

The cost of the road is estimated by competent engineers to be about one hundred million dollars, exclusive of equipment.

Prospects for Business.

The railroad connection between Omaha and the East is now complete, and the earnings of the Union Pacific on the sections already finished for the month of May were $261,783. These sectional earnings as the road progresses will much more than pay the interest on the Company's bonds, and the through business over the only line of railroad between the Atlantic and Pacific must be immense.

Value and Security of the Bonds.

The Company respectfully submit, that the above statement of facts fully demonstrates the security of their Bonds, and as additional proof they would suggest that the Bonds now offered are less than ten million dollars on 517 miles of road, on which over twenty million dollars have already been expended;—on 359 miles of this road the cars are now running, and the remaining 187 miles are nearly completed.

At the present rate of premium on gold these bonds pay an annual interest on the present cost of

Nine Per Cent.,

and it is believed that on the completion of the road, like the Government Bonds, they will go above par. The Company intend to sell but a limited amount at the present low rate and retain the right to advance the price at their option.

Subscriptions will be received in New York by the CONTINENTAL NATIONAL BANK, No. 7 Nassau St., CLARK, DODGE & Co., BANKERS, 51 Wall St., JOHN J. CISCO & SON, BANKERS, No. 33 Wall St., and by BANKS AND BANKERS generally throughout the United States, of whom maps and descriptive pamphlets may be obtained. They will also be sent by mail from the Company's Office, No. 20 Nassau Street, New York, on application. Subscribers will select their own Agents in whom they have confidence, who alone will be responsible to them for the safe delivery of the bonds.

JOHN J. CISCO, *Treasurer,*
NEW YORK.

CHAPPELL MANUFACTURING COMPANY,

MANUFACTURERS OF

CHAPPELL'S PATENT STEAM VALVELESS PUMP OR

BILGE EJECTOR.

These Pumps are used for Steamships, Steamboats, Railroad Water Stations, and raising or discharging water, wherever steam power is employed. In case of fire, they are invaluable. As Bilge Ejectors they have no equal. They are simple, effective and cannot choke, never failing in any emergency. Can be seen in operation at the factory. Reference given on application.

J. M. ALLEN, Sec. and Treas.

—o—

PLASTIC SLATE

FOR

Roofing & Other Purposes.

The process of reconstructing Slate Stone from a disintegrated state was

PATENTED FEBRUARY 21ST, 1865.

It is a combination of

Pulverized Slate and Viscous Matter,

(the latter possessing qualities of geological and chemical affinity for the former,) and is a development of one of the simple but unalterable tendencies of nature.

As a Roofing Material it Stands Unrivalled.

A mastic—it adapts itself to every shape and slope. Non-combustible, impervious, non-expansive, and undecaying.

Frost does not Crack nor Heat Dissolve it.

The only roofing material ever discovered that will resist the action of the elements as long as the structure it protects. Being susceptible of little, if any wear, from exposure, and

Perfectly Fire-Proof,

It is unequalled as a coating for Railroad and Farm Buildings, Fences, Bridges, bottoms of Vessels, Vaults, etc.

New York, Saturday, July 20, 1867.

THE SAMPSON CAR WHEEL.

It is Tested by the New York Central Railroad Company, and found to be a decided success.

On the 12th inst., an excursion took place over the New York Central Railroad, that part of it running from Troy to Schenectady, for the purpose of testing the merits of a new and most important invention in the matter of car wheels, by Mr. Elnathan Sampson, of Lansingburgh, Rensselaer County, New York, and of which Mr. Sampson, Hon. Marcus P. Norton and Edwin Chamberlin, Esq., of Troy, are the owners. The new and improved wheels were attached to two cars, one a passenger and one a baggage car, both of which were filled by a large number of prominent railroad and other gentlemen interested in important inventions. Among these our reporter noticed Hon. John L. Flagg, Mayor of Troy; Hon. Uri Gilbert, ex-Mayor of Troy, and of the famed railroad car building firm at Troy, New York. Hon. Samuel Cheever, Waterford, N. Y.; Hon. George S. Deffendorf, Baltimore, Md.; Hon. Marcus P. Norton, Troy, N. Y.; Maj-Gen. Joseph B. Carr, Troy, N. Y.; Wm. Kemp, President Board of Education, Troy, N. Y.; Hon. Samuel Gleason, County Treasurer; Rev. J. N. Parker, Troy, N. Y.; Wm. D. Davis, Troy, N. Y.; Col. LeGrand Benedict, Asst. Adj. Gen. Troy, N. Y.; I. M. Gregory, Esq., Troy, N. Y.; J. G. Runkle, Esq., Troy, N. Y.; Hon. Thomas Symonds, Troy, N. Y.; James Morrison, Jr., Troy, N. Y.; Austin A. Yates, Schenectady *Star*, N. Y.; G. Y. Van Debogat, Esq., Schenectady, N. Y.; Capt. L. H. Tupper, Troy, N. Y., and formerly Superintendent of Rensselaer and Saratoga Railroad; Willis Humiston, Esq., Troy, N. Y.; His Honor, Mayor of Schenectady; the Rev. Laurens P. Hickock, D. D., LLD., President Union College; Willard O. Carpenter, Esq., Editor of the Waterford *Sentinel*; Charles D. Kellum, Esq.; J. F. File, Esq.; M. Burgess of the Rensselaer Institute, Dr. John Knowlson; Thomas Hurley, Esq., of the Troy *Whig*; Henry Stanley Esq.; Mr. R. H. Hyde; Samuel Ingalls, Esq.; William H. Young, Esq., the Book Publisher; Jonas S. Heartt, Esq., of the firm of Jonas S. Heartt & Co., manufacturers of railroad car wheels, and who have obtained license to manufacture this wheel; S. L. Wood, Master Mechanic N. Y. Central R. R.; Foster Church, Master Mechanic Troy and Boston R. R. Co.; B. Smith, Esq., of the New York Central R. R., and a large number of others. This invention which is destined to wholly revolutionize for the better the rotary power and character of railway rolling stock and incidental machinery, consists in the conical and lateral tread, combined with the flange of the wheel, the design of which is in passing the curve of the track the outer wheel shall pass over the outer rail in the same time that the inner wheel passes over the inner rail obviating any sliding of the outer wheel, thereby preventing the twisting of the axle, straining of the journal bearings and boxes of the axle, straining of the wheel and the usual wearing and tearing of the rail. In short this invention absolutely relieves all friction not incident to an air line track. Cars containing or moving upon this wheel will pass all curves in the road with as much ease and with the same friction as upon an air line track, so that no more power is required to move heavy freight or passenger trains upon and over railway curves than upon a straight or air line track. This being the case, there must of course be a great economy in fuel and oil, no less than in the general wear and tear of the locomotive engine and entire running gear or machinery. Prominent railway and practical men upon the excursion carefully estimated that quite or nearly one-third of the power was saved in moving heavy trains over or upon curves. Hence it is manifest that the railroad rails will wear a greater length of time (especially those which form the curve) than has hitherto been the case with the ordinary wheel now in use. Upon actual trial it is found that this wheel will adjust the truck of cars to the condition of the track at the time and over which it is passing.

Another great point of public interest in the invention is that by the use of the improved wheel there is far less liability of the cars being thrown from the track. Indeed there is great additional security against the cars being thrown from the track while passing rail joints, curves, or over any irregularities in the rails of the track. Then again there is much less lateral motion to the cars in passing over any portion of the track than by the ordinary wheel now in use. In the new wheel the lateral motion against the rail is scarcely perceptible, and is calculated to draw one-third more around a curve. The tread of the wheel is so constructed as to increase its diameter, thus adapting itself to the curves over which it passes. The late excursion train on its return trip ran a distance of twenty-two miles in twenty-seven minutes and thirty seconds, as gaged by L. H. Tupper, of Troy, and formerly Superintendent of the Rensselaer and Saratoga Railroad, and did not once touch the guiding flange in the whole distance of forty-six miles going and coming; and it is well known that the branch connection of the New York Central Railroad running between Troy and Schenectady is the most crooked piece of road to be found anywhere in the United States.

In every point the test trials of this wheel have been most eminently successful, and have elicited the highest encomiums of railroad men, who freely acknowledge that the improvement is a most substantial, practical, and useful one. It is admitted that this wheel overcomes two hitherto most important disiderata in the locomotion of trains—namely, immense saving of wear and tear

to gearing and machinery and track rails, as well as developing far greater security to life and limb, in virtue of the cone keeping the tread of the wheel more securely to the track. The invention is, we understand, to be immediately adopted by several leading railway corporations, and as the public become more and more familiar with its great usefulness, we cannot doubt it will find universal public acceptance and practical use.

Ogdensburgh & Lake Champlain Railroad.

The earnings of this road for the fiscal year ending March 31, 1867, were:

From freight		$680,075 48

Do. of 4 per cent. on preferred stock	14,968 80	
		201,077 30
Balance on hand March 31, 1867		$173,067 73

The gross earnings for the year ending March 31, 1866, were $803,797 95; and the expenses, $625,842 11—leaving the net earnings $177,955 84. The earnings of the past year, therefore, shows an increase of $68,186 75; with a decrease in expenses of $25,557 22—making the increase in net earnings, $93,743 97. The report says:

A comparison with the business of previous years, shows a still more marked and decided improvement.

During the past year, there have been placed on the track 60,000 ties. Eleven and a half miles of new iron has been laid, and twenty-two miles of iron has been taken up and repaired in the blacksmith shops.

A new bridge has been built at Madrid, and extensive repairs have been made to other bridges on the line of the road; and in addition to these large outlays may be added sums paid for personal injuries, and damage of engines and cars, amounting to about ten thousand dollars, as the result of the collision at Rouse's Point in January last.

The rates for through traffic the past year have been higher than usual; and from the small amount of grain awaiting shipment at the West, and the present low rates for carrying, it may be expected that this item of earnings for the next few months (or until the next crop comes in) will be less than last year; but as an offset to this, we shall have a large increase of local traffic; this branch of our business is rapidly increasing; all along the line of the road new stations are being located, steam saw mills, iron foundries and manufactories are being erected, and the time is not far distant when our local business, alone, will furnish dividends to the stockholders.

From one of these new stations, which has given us no business whatever, we shall receive now from ten to twelve carloads per day, and our rolling stock the coming season will be taxed to its utmost capacity to do all of this business which will probably offer.

In reference to our future earnings it must be borne in mind that while the war and an inflated currency have added from fifty to one hundred per cent. to the prices of labor and material, the same causes have produced no such effect on the rates for railroad traffic, either passenger or freight, and while the resources of the road are developing, and its earnings increasing year by year, it is fair to expect that the time is coming when the expenses will be materially lessened, by a reduction in prices, both of labor and stock; and it is to this reduction of running expenses, with the steady increase of local traffic, in connection with a large and profitable business to interior points in New England, that we look for a regular and legitimate increase of our net earnings; for this we have no competition, and fair rates can always be maintained; while for the through business we have as competitors five powerful lines of railway, and the rates at which they are now carrying this freight is at an absolute loss.

The directors have adopted a policy to refuse all business that does not pay a profit—the only policy that will bring dividends to the stockholders, and enable them at the same time to keep the road and equipment in good condition.

Since the first of April, 1866, the directors have issued, of the preferred stock, 6,412 shares, amounting to $641,200; of this sum, there has been issued in exchange for first mortgage bonds, $237,800; and the balance, $403,400, has been appropriated to pay the expenses incurred in obtaining possession of the road, for new engines and cars, the new depot at Malone, and on the new elevator, now in process of erection at Ogdensburgh.

The facilities for receiving and storing grain from the West, at Ogdensburgh, have hitherto been entirely inadequate to the necessities of our business, and the directors in August last voted to erect an elevator capable of storing from five to six hundred thousand bushels of grain; the cost, about one hundred and fifty thousand dollars, to be taken from proceeds of the preferred stock.

Our present capacity for storing grain is about two hundred and fifty thousand bushels, which is raised by a floating elevator; the new elevator will store more than double this quantity of grain; and discharge three times the number of cargoes, daily.

The detention of vessels arriving at Ogdensburgh, on account of our inability to discharge them, has been a serious drawback upon our business; hereafter there will be no complaint from that source, and the port of Ogdensburgh will present as good attractions to shippers, as Buffalo, Oswego, or any of the Lake ports.

The new elevator will, therefore, be a profitable source of income in itself, and at the same time add materially to the business of the road, especially by the additional storage room afforded for freight, which consignees are glad to avail themselves of, thereby adding to the hitherto small earnings of the winter months.

The track is in good condition, and will require only the average renewal of rails the coming year.

The stockholders will expect some allusion to be made to the suit that has been instituted by certain parties claiming to be "The Northern Railroad Company"—a so-called corporation which has no legal existence. It is sufficient to say that the directors attach no importance whatever to this suit; our title to the road, franchise, and all the property appertaining to it, is clear, and beyond all question, and all apprehensions on this subject may be dismissed from the minds of every stockholder.

Great care and vigilance is exercised in keeping the bridges in a safe condition; four or five small bridges will have to be rebuilt, involving an expense of two thousand dollars; and the bridge at Rouse's Point will require an expenditure in the course of the next year of about four thousand dollars.

The bridge over Salmon River, at the village of Malone, is in an excellent state of preservation, and will require but trifling repairs; but it is nevertheless a source of great anxiety to the board from its contiguity to stables and other wooden buildings, rendering it very liable to destruction by fire—an occurrence which would interrupt our business from twenty to thirty days. The span of this bridge is 163 feet; and in case of its destruction, no temporary structure could be thrown across the river.

The directors have had surveys made and find that by an expenditure of three or four thousand dollars, two additional piers can be built, which would make its rebuilding comparatively easy, and an interruption to our business of not more than twenty-four hours the result of its destruction.

$237,800 of the 1st mortgage bonds have been exchanged for preferred stock, leaving $1,257,100 outstanding, which mature in July, 1869.

Of the 2d mortgage bonds, $2,979,500 have been converted into common stock, leaving outstanding $97,500.

The equipment of the road consists of 29 locomotives, 16 passenger, 8 baggage, and 480 freight cars.

TRIAL BALANCE, MARCH 31, 1867.

Cost of road		$4,571,900 00

South Carolina Railroad.

The earnings and expense account of the South Carolina Railroad Company for the year ending December 31, 1866, gives the following results:

Income from passengers		$413,372 53
" from freight		877,416 79
" from mails		20,349 20
" from other sources		1,000 00
Total		$1,312,738 52
Salaries & contingencies	$15,919 28	
Transportation	387,866 73	
Machinery	152,271 48	
Roadway	123,399 46	
		679,456 95
Earnings less operating cost		$633,281 57
Interest—sterling	$126,006 81	
" —domestic	98,674 65	
	$224,681 46	
Damages	$16,818 56	
Stock killed	1,560 50	
Sundries	2,389 39	
	20,768 45	
		245,449 91
Balance to credit		$387,831 66

The rolling stock at the commencement and close of the year compare as follows:

	Dec. 31, 1865.	Condemned.	Added.	Dec. 31, 1866.
Locomotives	44	7	10	47
Passenger and mail cars	28	4	10	34
Freight cars	252	14	102	343

The distances run by engines with trains, was 304,122 miles; the number of passengers carried was 109,711.

As a matter of interest rather than importance, we give the following table, showing the course of business on the road for 1860-'66, a period covering the war, and the year before and after:

	Passengers Carried.	Gross Earnings. Passenger.	Freight.	Other.	Total.	Dividends.
1860	164,200	$461,084	$968,673	$69,879	$1,499,636	7
1861	209,750	514,751	589,552	57.421	1,161,724	6
1862	351,095	986,758	807,833	45,623	1,840,214	8
1863	442,305	1,525,544	1,355,571	108,887	2,990.002	12
1864	416,850	2,445,062	3,578,806	73,265	6,097,123	16
1865	93,528	465,559	1,128,806	6,617	1,600,982	--
1866	109,711	413,972	877,417	21,349	1,312,738	--

The dividends were paid on $5,819,275 capital. It will be seen that the receipts of the road in 1866, were in the aggregate about an eighth less than in 1860. The real business transacted, however, was scarcely a third of its ordinary amount before the war. The following table giving the receipts of produce by the road at Charleston illustrates the latter assertion:

	Cotton. bales.	Flour. barrels.	Grain. bush.	Naval. stores, bbls.	Mdze. bales.	Live stock.
1860	314,619	23,216	36,179	54,439	12,853	15,213
1861	120,673	32,840	75,488	9,161	5,459	12,257
1862	24,884	49,710	259,328	1,149	1,606	8,475
1863	48,145	28,508	374,725	214	1,175	8,458
1864	10,315	26,965	287,204	----	1,244	6,201
1865	35,536	----	7,424	1,293	2,523	381
1866	94,097	2,495	20,293	10,923	5,150	4,103

The year 1865 was broken in February by Sherman's march through the State, nor was business resumed until June 19, when the road was given up by the military authorities.

With regard to the damages from military operations we said all that is necessary in our notice of the company's report for 1865. This will be found in the JOURNAL of April 21, p. 370. The total damage was estimated at $1,629,114 64. The amounts paid on restoration account were—in 1865, $335,781 18, and in 1866, $368,537 17, or a total of $704,318 35.

The total financial results of the operations of the company, as shown in the income account for 1866, were as follows:

Income from road		$1,312,738 52
Increase in balance of indebtedness		188,559 25
Total income		$1,501,297 77
Current expenses		$924,906 86
Restoration of property		368,537 17
Locomotives	$101,004 55	
Cars	71,530 21	
Tools	12,275 54	
		184,810 30
Materials	33,983 69	
Engines and cars condemned, ⅔ worthless	35,706 68	
	$69,690 37	
Less materials recovered	46,646 93	
		23,043 44
Total disbursements		$1,501,297 77

The property account of the company at the close of the years 1865 and 1866, compares as follows:

	1865.	1866.
Capital stock	$5,819,275 00	$5,819,275 00
Bonds—sterling	2,000,000 00	2,286,111 42
" —domestic	1,071,000 00	1,248,687 50
Certificates, notes, &c	1,791 00	19,571 00
Bills payable	44,822 30	269,273 96
Coupons—sterling	362,166 97	78,729 03
" —domestic	133,632 50	79,917 50
Pay rolls	1,399 70	17,148 84
Transient creditors	167,484 95	170,559 38
Net income from June 19, 1865	196,985 00	549,109 98
Total	$9,798,557 42	$10,538,383 61
Against which are charged the following, viz:		
Road, track, structures, &c	$6,450,388 91	$6,462,664 45
Lands	428,879 43	428,879 43
Cars	149,100 00	220,630 21
Locomotives	317,308 63	418,313 18
Machinery and tools	197,418 10	154,268 32
Supply of materials, &c	69,882 17	103,865 86
Commissary stores	1,425 73	1,397 77
Invoices to arrive	21,088 25	17,619 06
Restoration of property	335,781 18	704 318 35
Loss of property	1,316,018 84	1,316,018 84
Bonds and bills receivable	28,240 93	25,687 48
Cash	104,393 72	124,199 48
Agents	12,530 26	99,041 53
Open accounts	20,344 35	20,344 35
Stocks of other companies	279 062 50	279,062 50
Transient debtors	66,694 42	141,723 60
Post Office Dept.		20,349 20
Total	$9,798,557 42	$10,538,383 61

The funding of the matured debt and past due coupons has been arranged satisfactorily, and most of the liabilities of the company on these accounts have been converted into new bonds.

The sterling bond account reads as follows:

Bonds payable in London, Jan. 1, '66	£374,500 00
Four years interest on £234,000 to July 1, 1866	46,800 00
Four years and a half on £140,500 to July 1, 1866	31,612 10
Total London debt ($2,012,944 46)	£452,912 10
Bonds payable in Charleston, Jan. 1, 1866	£51,000 00
Interest to July 1, 1866	10,462 12
Total Charleston debt ($273,166 96)	£61,462 12
Total foreign and domestic ($2,286,-111 42)	£514,374 22

The interest on the renewed debt is to be at the same rate as it was upon the original debt, viz., 5 per cent. per annum, payable semi-annually (January and July,) in London and Charleston as above indicated. Payments on account of the principal of the debt are to be made semi-annually, commencing January 1, 1871, in the manner following—2 per cent. semi-annually for five years, and 4 per cent. semi-annually for ten years. At this rate the sterling debt will be entirely extinguished by July 1, 1885.

The domestic funded debt as it stood on the 31st December, 1865 and 1866, compares as follows:

	1865.	1866.
Past due bonds and interest	$234,000	$133,687
6 per cent. bonds due Jan., '68	101,000	101,000
" " " Oct., '68	86,000	86,000
7 per ct. bonds due April, '69	100,000	124,500
" " " " '70	100,000	110,500
" " " " '71	100,000	114,000
" " " " '72	100,000	114,000
6 per cent. bonds due Jan., '73	125,000	125,000
" " " " '74	125,000	159,500
7 per cent. bonds due April 1888-'91	.....	180,500
Total domestic funded debt	$1,071,000	$1,248,687

President.—W. J. MAGRATH.

Directors.—James Rose, Alfred Huger, C. M. Furman, W. C. Dukes, T. B. Clarkson, Henry Gourdin, G. A. Trenholm, W. J. Magrath, J. S. Preston, L. J. Patterson, B. H. Rice, C. T. Mitchell, A. Simonds, W. M. Shannon, John Hanckel.

Gen'l Superintendent.—H. T. PEAKE.

Auditor.—J. R. EMERY.

Erection of Steel Works.

The citizens of Schuylkill County, Penna., have under consideration the erection of steel works in that county, and a meeting in furtherance of the project was held in Schuylkill Haven on the 9th inst. It was stated that "$160,000 had already been subscribed, and that as soon as the required amount, $250,000, was subscribed, a meeting would be called, the company organized, a site selected, and the erection of the works commenced; that the Bessemer process of manufacturing steel was no longer an experiment, but a success, and those persons who early invested in the project would be liberally remunerated; that it had been proven by practical experiment, that by melting iron in a cupola depreciated its value; and by melting in a reverberatory furnace enhanced its value."

The *Miners' Journal* says there seems to be no doubt that all the money required for these works will be subscribed; and that "as steel must inevitably, take the place of iron rails, and the demand will rapidly increase for them, on the score of durability and economy, those who earliest enter the field of this new industrial branch of business, will realize the richest returns for their judicious investments."

Milford Branch Railroad.

The Milford correspondent of the Worcester *Spy* says: "The Branch Railroad will in a few days be commenced, the Hartford and Erie corporation having made a generous and acceptable offer to run the branch, giving the town and other stockholders ample and satisfactory terms. In a few months Milford will be connected with one of the best thoroughfares in the country—connecting us with Providence, New York and the great West."

New York Central Railroad.—The Athens Route.

The directors of the New York Central Railroad Company, at their late session, resolved to issue stock of the company to the holders of the stock of the Athens and Schenectady line, so as to absorb that line in the Central. This will add two millions to the capital stock of the Central Co.

The transaction was effected under an act passed by the last legislature of this State; which act is a literal transcript of the law passed in 1855 (chap. 303 of laws of that year), under which the Buffalo and Niagara Railroad Company was incorporated into the Central.

It provides, in general terms, that a railroad corporation, the lessee of another railroad corporation, may issue new stock of its own in exchange for the stock of the leased road; and such transfer shall make the directors of the one road ex-officio directors of the other; and the whole property, direction and franchise shall pass with the transfer of stock.

The bill was introduced in order to serve the necessities of the Rensselaer and Saratoga Railroad Company which sought to consolidate one of the leased branches. As first reported, the Central Company and the Erie, and one or two other roads were excluded by name from the benefits of the act; but the clause against the Central was stricken out before its passage.

We believe the Governor hesitated to sign it for a while, lest the Central should by the indirect effect of its provisions, raise its fare above the limited two cents per mile. The Central will undoubtedly have a right to charge three cents a mile on this Athens branch, but not elsewhere on its route.

The State Line Railroad Company has taken advantage of the same act to effect a consolidation with the roads through Erie, Penn., and northern Ohio.

One effect of the consolidation of the Athens route will be to identify its late stockholders with the general interests of the Central. They can have no longer any special interests in the Cut-off. If that branch is found to be productive to the general revenues of the road they will preserve it; if not, they will cut it off. Commodore Vanderbilt, who is an owner in the Athens line to the extent of half a million of dollars, is reported to favor the taking up of the rails and the abandonment of the route.

Central Pacific Railroad Exploring Expedition.

The San Francisco *Mining Press* notices the arrival there of the scientific corps composing the Central Railroad Exploring Expedition, set on foot by the order of Congress, and placed under the general direction of the Secretary of War. The party consists of the following gentlemen: Chief, Clarence R. King; Topographical Assistants, James Gardner, H. Custar, Frederick A. Clarke; Geological Assistants, James D. Hague, Arnold Hague, Samuel F. Emmons; Botanist, W. W. Bailey; Zoologist, Robert Ridgway; Photographer, T. H. O'Sullivan. Mr. King is a graduate of the Sheffield (Yale College) Scientific School, and is well known on the coast as having formerly been connected with the California State Geological Survey.

The party is composed of young and energetic men; but such as are well up in their respective departments, and their outfit is full in material and excellent in character. The military authorities on the coast are instructed to extend every needed assistance to the party and the enterprise. An escort of twenty or thirty cavalry will be detailed as a protection from hostile Indians in the desert regions to which they are going. The enterprise is one not altogether devoid of danger, and must be accompanied with the most incessant toil and exposure.

The section to be surveyed is the belt of country along which the Central Pacific Railroad will be constructed, from Virginia City to Denver—about 900 miles; the object being to ascertain its mineral and other resources. An accurate map of the country, embracing a strip of seventy-five or one hundred miles wide, will be prepared. Careful search will be made for coal, the discovery of which along the line of that road will be worth much more to the country than gold or silver. Water will also be looked after in the desert places. The agricultural character will be pretty thoroughly studied, and the flora and fuana of the country will come in for a reasonable share of attention. Three years are to be occupied in the survey, which will doubtless be extended to fully six, or until the steam horse courses, with uninterrupted track, from the Pacific to the Atlantic.

Morris and Essex Railroad.

The annual meeting of the stockholders of this company was held at Hoboken, N. J., on the 19th of June. The meeting was organized by the appointment of Hon. Jacob Vanatta as chairman, and the following gentlemen as Vice Presidents, viz: Rev. H. W. Hunt, Hon. P. Smith, and H. G. Darcy, Esq. Mr. Wm. Vanderpool was appointed Secretary. The minutes of the last annual meeting were read and approved, after which the Secretary proceeded to read the Annual Report of the Directors to the stockholders for the past year, as follows:

The Board of Directors beg leave to report, that during the past year, the main track of the Phillipsburg Branch has been completed, and is now in use at the permanent grade throughout its entire length, with a sufficient amount of siding to carry on the present operations of the company. A good deal of progress has also been made in taking off the slopes at the various excavations, and reducing the excavations themselves and making embankment preparatory to a second track.

Substantial passenger and freight depot buildings have been constructed at Phillipsburg. The engine house has been enlarged so as to be able to accommodate fourteen engines at a time, and other needed terminal arrangements have also been made at that point.

The connection with the Lehigh Valley Railroad by their bridge at Phillipsburg has been completed, and it is expected that similar connections will be made with other Pennsylvania roads which may issue from the Lehigh Valley.

Passenger and freight buildings have also been erected at Stewartsville, and the grading for an extensive siding at that place is nearly finished.

At Washington, a commodious passenger depot building has been erected at the intersection of the road with the Delaware, Lackawanna and Western Railroad, which is used in common by the two companies. The companies have also erected a freight depot in common, and a connecting road is being constructed at their joint expense, which will establish a complete connection with that railroad. The two roads, however, having different gauges, an additional rail will be necessary to enable the cars of the one to run on the track of the other. It is presumed that the necessities of the two companies will, not long hence, require this to be done.

On the old line of road between Hackettstown and Hoboken, many improvements have been made, or are still in progress—required by the anticipated and already commencing accession of traffic from coal, iron, iron ore and other business.

At Stanhope, a reduction is being made in the grade and curves of the road: and at Milburn, a similar improvement in the line is also being effected. The latter is almost ready for use.

The double track has been extended during the year from Roseville to Madison—a distance of sixteen miles. This improvement was imperatively demanded by the exigencies of the increasing business. A large amount of siding has also been added to other portions of the line.

At Chatham, a considerable tract of land has been procured for the purpose of arranging and dividing the coal trains, preparatory to the passage of the Summit, and the distribution of the coal to the various points of destination at Orange, Newark and Hoboken, or other places; and also as a depot for changing engines and supplying them with fuel and water. This arrangement will facilitate the business of the company, and save a large outlay for depot and siding room, which it would otherwise have required at Newark and Hoboken, where land is much more expensive, and movements of engines and long trains are much more inconvenient and difficult.

At Hoboken, the coal trestles with the approaches thereto have been completed and are now in use, and appear to answer most satisfactorily the purposes intended. Persons of practical knowledge, competent to give an intelligent opinion, pronounce the facilities afforded at Hoboken, for the delivery and shipment of coal, equal if not superior to anything of the kind in the vicinity of New York. Ships of the largest capacity can be loaded by *chutes* with coal from the same car which receives it at the mine in Pennsylvania.

The freight pier has been extended to its full length into the Hudson River, furnishing most ample and convenient accommodations for the delivery of heavy freight. Very large additions have also been made to the siding and track room at the Hoboken terminus.

That part of the Denville and Bloomfield Branch Railroad between Denville and Boonton, a distance of 4.75 miles, is being constructed.

The grading is ready for the superstructure, the iron is on the ground, and the road will be opened for business during the summer. It will accommodate an important section of country, and must add considerably to the revenues of the company.

The equipment of the road has also been largely increased by the purchase of sixteen new locomotives, eleven of which have cylinders eighteen by twenty-four inches, one of less power, and four tank engines used as pushers. These engines are all constructed for the use of anthracite coal, which is the cheapest and most convenient fuel.

The equipment of the road has also been increased by the addition of 12 first class passenger cars, 2 mail and baggage cars, and 214 freight cars.

In addition to these permanent improvements, the repairs of the road and equipments have been maintained in such manner that the entire property of the company may be regarded as in first rate condition.

The outlay of capital, which has been rendered necessary by the very extensive improvements that have thus been made, has of course been large.

In pursuance of the suggestions contained in the last annual report, a second mortgage for three millions of dollars was executed on the eighteenth day of July last, providing for the security of the one million and a half of convertible bonds then issued, or of such of them as should not be converted into stock, and of such additional bonds thereafter to be issued as would make the whole amount, to be secured by the mortgage, three millions of dollars. This mortgage was executed to Jacob D. Vermilye and Dudley B. Fuller, as Trustees.

The first million and a half, which had been issued, at the date of the last annual report, and which were made convertible on or before the first day of August, 1868, according to the circular appended to the said report, have all been disposed of.

The other million and a half, convertible during the same period, have been prepared, and are offered to the stockholders on the same terms as the first series. These can be procured upon application to the Treasurer of the company, within a reasonable time.

The company have yet on hand half a million of the first mortgage bonds, which, with a like amount under the second mortgage, the Directors desire to retain in the treasury to meet future wants of the company and any contingencies that may hereafter arise.

It is believed that the disposal of one million of the existing securities in hand will pay off all floating debt, and finish up the works and improvements now in progress.

In addition to the resources supplied by the first and second mortgage bonds, the Directors have availed themselves of the current earnings of the company, instead of dividing them amongst the stockholders, and have issued stock dividends instead. This has greatly relieved the treasury, and has enabled the directors to dispose of their securities to better advantage. By means of the arrangements thus detailed, the financial affairs of the company have been kept in an easy condition, free from any stringency or embarrassment.

A further supplement to the charter of the company was granted by the Legislature at its last session. By this supplement, the company is authorized to increase its capital stock to any amount, not exceeding in the whole ten millions of dollars. This supplement further authorizes the company to widen its road and change the line of the same, not departing at any point more than three miles from the present location; with liberty to retain or abandon the old line as may be deemed expedient. The act also removes all ambiguity with regard to the taxation to which the company is subject, confirming its original contract with the State to pay one-half of one per cent. on the cost of the road, in lieu of all other taxation.

These legislative provisions are equitable and just as well as valuable, both as regards the additional privileges granted, and as furnishing to the company security for the enjoyment of its previous franchises.

The entire line of the Morris and Essex Railroad, with its various branches and connections, constitutes a work of great magnitude and importance. It is clearly destined to be one of the great thoroughfares of communication between New York City and the West. It is also of vast importance to the internal improvements and local wealth of the State. To construct this great work and to stock it with the requisite equipment, has cost a large outlay of money. But the directors believe that they may confidently assert, that the money entrusted to their care has been judiciously and economically expended. The increase of prices in recent years, it is true, has much enhanced the amount. But even with this disadvantage, the cost of the work will be less than that of similar works which may be considered as competing for a portion of the business. Some of the stockholders may be disappointed, and perhaps feel disheartened, because the earnings have not kept full pace with the capital invested.

We beg leave to remind those who entertain these views, that it is really a new work which has been under construction, since the commencement of the Phillipsburg Branch; of a character entirely different from anything which was previously exhibited by the road of this company; requiring not only the construction of that branch, but almost an entire reconstruction of the old road, to adapt it to the new class of business, the transportation of coal, iron, iron ores and other products, which it was intended to introduce. Double track became necessary where it would not have been requisite before, grades had to be reduced, sidings extended, extra equipment and new accommodations of every kind provided; wharves at the Hudson, exchange accommodations at Chatham, room everywhere. And this great work, it must be remembered, has hardly begun to be put into operation. It cannot be expected, that the earnings should yet at all indicate the amount of traffic which the new Morris and Essex is to bear on its rails.

The Board feel no hesitation in expressing their confident belief, that the day is not distant when the stockholders will meet with adequate returns for the large investments which have been, and which are yet to be made.

A new work, especially one of such extensive character as this, requires time for development, and some degree of patience in those who are interested in its success. But, situated as this line is, between two such immense sources of traffic, as the metropolis of the Union at one terminus, and the outlet of vast productive regions at the other, and when to this is added its large and growing local traffic, a favorable result is sure to arrive.

When this road was a merely local one, terminating at Hackettstown, constructed for local purposes only, it represented a capital of about three millions of dollars, and regularly paid a fair interest on the capital so invested. But the extended arrangements that have had to be made, in order to make the line a great through line, as well as to provide for increased local traffic, has put the whole work on an entirely new footing, and has opened a new era to the operations and hopes of the company.

The receipts from passengers, freight, mails, rent, etc,, during the year ending December 31, 1866, were $1,020,077 84; and the expenses for repairs, maintenance of way, motive power and contingencies, $715,208 12—leaving a balance of $304,869 72. During the year two semi-annual dividends were paid—one in cash, and one in cash and certificates of indebtedness, payable in stock or otherwise—amounting to $245,000.

The equipment of the road, June 1, 1867, was as follows: 50 locomotives, 57 passenger, 2 baggage, 7 baggage and mail, 77 box freight, 16 stock, 149 platform, 38 gondola, 41 iron and ore, 11 caboose, 400 coal, 4 stock, 1 derrick, 1 wrecking, 1 locomotive truck, and 92 construction cars. Miles run by trains during the year 1866, 427,904. Number of passengers carried, 1,066,179, exclusive of commuters and those who ride free. The mileage of trains during the year ending May 31, 1867, was as follows: Passenger, 288,177; freight, 98,789; switching, 67,455; gravel, 34,337; coal, 90,126; construction, 5,380; fuel, 7,243—total, 591,507. Total cost per mile run, 39.46 cents.

The tonnage of freight during the first five months of 1867, (January to May inclusive,) was 155,712, against 48,498 tons during the corresponding period of the preceding year—an increase of 107,214 tons. The tonnage of coal during the first five months of 1867, was 71,589; of iron, 8,026; of iron ore, 14,938; of lumber, 5,405.

The receipts during the first five months of 1866 and 1867, were as follows:

	1866.	1867.
Passengers	$193,051 94	$217,366 56
Freight and sundries	175,553 12	254,637 39
Totals	$368,605 06	$472,003 95

The total miles of track laid June 1, 1867, was 134.11—of which 84.09 was single track, 25.72 double track, and 24.30 turnouts and sidings.

Since June 1, 1866, there have been received 3,803 tons of iron rails, and 25 tons of steel rails. Of the iron rails, 1,573 tons were used for double track, and 1,705 tons for repairs and sidings, etc., leaving on hand for Boonton Branch and Main Line, 525 tons. The steel rails were used on Newark grade.

The following statement will show the financial condition of the company on the 1st day of January, 1867:

Capital stock	$3,500,000	00
Funded debt	5,516,950	00
Floating debt	124,822	15

President.—Theodore F. Randolph.

Directors.—Beach Vanderpool, Robert Hamilton, Edwin A. Stevens, Asa Packer, Theodore F. Randolph, Edward H. Wright, Aaron Robertson, Joseph P. Bradley, J. Couper Lord. Charles A. Lighthipe, George Opdyke, William W. Shippen, and Francis S. Lathrop.

Treasurer.—William H. Connett.

Gen'l Superintendent.—A. P. Berthoud.

Taunton Branch Railroad.

The annual meeting of this company was held in Boston on the 8th inst. The report of the Treasurer E. Pickering, Esq., for the year ending ending May 31, 1867, was presented, from which we learn that the total earnings of the year were $123,398, against $125,757 for the previous year. The expenses of the year were $93,243 against $96,509 for the previous year, and the net earnings of the year were $30,154 against $29,248 for the year preceding. The dividends declared during the year amounted to $21,052. Dividend per share, $8. The property of the corporation is valued at $294,488. A letter was read from William A. Crocker, President of the road, declining a re-election, and a vote of thanks was passed for Mr. Crocker's services in connection with the company since its first organization. The following gentlemen were then elected directors of the road for the coming year: W. Lovering, W. A. Crocker, N. H. Emmons, J. M. Beebe, T. B. Wales.

Pottsville Passenger Railway.

The project of building a passenger railway between Pottsville and St. Clair, *via* Palo Alto and Port Carbon, which was agitated about a year since, and which had progressed so far that a route had been surveyed, is again under consideration. The road will be about five miles in length, and it is thought can be built and equipped for $125,000 or less. A meeting in regard to this matter was held in Pottsville on the 9th inst., and a committee appointed to obtain subscriptions to the capital stock. The charter gives the company the privilege of using steam, of carrying freight as well as passengers, and of going six miles with their road in any direction from Pottsville. It is proposed to use dummy engines.

☞ The internal revenue collections in New York city, exclusive of income tax, for the fiscal year ending June 30, 1867, were $31,351,533, against $37,849,054 for the year ending June 30, 1866—a decrease of $6,497,521.

☞ The bridge of the Troy and Greenfield Railroad over Green river, which was begun in November, is completed. It is 273 feet in length and 80 feet above the water.

American Railroad Journal.

Saturday, July 20, 1867.

Stock Exchange and Money Market.

Money continues in very good supply, and call loans are easily negotiated by responsible parties at 4 per cent. on the public funds, and 5 per cent. on other prime stock collaterals. At these rates, the current offerings are largely in excess of the wants of the leading street houses, who alone are in favor with lenders. Balances are accumulating at bank and through private channels, through the inability of the owners to place them advantageously. The public securities have been less sought after, as an investment medium; but are again coming into favor, for this purpose, as we write. The discount houses are doing very little, save in strictly prime short-date commercial paper, of which the available offerings are light, and on which the rates are 6@6½ per cent. per annum. Government disbursements are on a reduced scale, especially through the local office. The public creditors do not seem to be in any hurry to collect their matured claims. Holders of the July, 1864, Compound Interest Notes have not all presented their boards for redemption, though the notes matured and ceased to bear interest on the 15th inst. The banks own a good many of them, and as they are a legal tender, and the banks are not able to employ all their other balances profitably, they seem inclined to allow the matured notes to remain in their vaults. The city banks, in their last week return, made a very strong exhibit, having during the past week, gained $6,347,751 in the deposit line, $1,862,233 in specie reserve, $1,279,751 in the legal tender hoard. They added $1,551,772 to their loans, and contracted their circulation $15,528. The specie reserve of the banks is now $12,715,404, against $12,451,684 same time last year. The city bank deposits are now $197,872,063, against $207,190,943 week ending July 14, 1866. The legal tender reserve amounts to $72,495,708, against $75,541,977 same time last year. The circulation now stands at $33,653,869, against $27,804,172 same time last year. The loans are now $247,913,069, against $259,133,434 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $86,893,264 a day, against a daily average of $82,346,998 the preceding week, and $82,324,059 the week ending with June 29. The current week's exchanges average $94,727,379 a day.

National Bank notes to the amount of $160,550 were issued last week, making the total issue to 1,671 banks thus far, $303,206,276, against $282,555,440 at the close of the fiscal ending year, June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $4,425,962, leaving, with the existing 1,650 banks, (having an aggregate capital of $422,913,861,) an actual circulation at this date, of $298,770,314. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $340,618,500; and for the public deposits $38,878,450—making a total of $379,496,950. The Treasury Department last week redeemed and destroyed $349,000 of worn and mutilated fractional currency, and issued $465,955.

The Philadelphia Bank movement the past week shows an increase in loans, of $382,280; a decrease of $42,552 in specie; an increase in legal tenders of $212,239; an increase of $807,770 in deposits; and an increase of $1,569 in circulation. The Bank Clearings show an increase of $2,762,694, and the balances, an increase of $160,603.

Government revenues were less prolific in the excise line, last week, but were up to a full average in the form of customs. The excises, last week, yielded $4,875,294, against $8,351,822, the preceding week; customs at the port of New York $2,078,271, and at the outports, about $670,000 (in coin) more, making the grand total income for the week equal about $8,723,000 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with July 30, 1867, were $265,853,195. The receipts thus far in the new fiscal year, which began on the 1st inst., have been $16,000,000.

The U. S. Sub-Treasury receipts, week ending with July 13, were $28,533,967, including $2,078,-

271 from customs duties; payments, $28,444,856; balance at the close of the week, $130,581,603, against $130,492,492, at the close of the preceding week, showing an increase of $89,111. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $7,877,165 including $235,559 from customs, and payments, $9,073,462; on Tuesday, receipts, $2,332,021 including $446,258 from customs, payments, $1,094,716. The balance at the close of business on Tuesday stood at $130,632,-610, against $119,112,871 a week previous.

Gold has been in much more active speculative demand, and has advanced to 140⅝. The buoyancy was most marked on Tuesday of the current week, when the message of President Johnson, on the reconstruction theme, was used by the *bulls* as an element of inflation. The customs and export demand was moderate. Wednesday's business was less spirited, and the closing figures were 139⅞@140. Wednesday's exports of specie from this port amounted to $737,100; and from Boston to $192,-000. The total imports of specie from Europe, and other foreign ports since Jan. 1, 1867, have been $1,595,937. The customs demand for Gold last week, averaged $346,378 a day; thus far, this week, it has been equal to $340,908 a day, or equal to a weekly aggregate of $2,045,448. The arrivals of specie from Europe, Havana and other foreign ports, during the past week were $22,924, and from California, $700,112. The total customs revenue of the Government, in coin, at this port, thus far in the current calendar year commencing with Jan. 1, 1867, has been $64,118,511, against $72,858,498 same time in the preceding fiscal year. The total receipts of California gold at this port since Jan. 1, 1867, have been $14,793,540, against $20,541,141 same time last year, showing a decrease this year, of $5,747,601. The exports of specie from this port, last week, were $4,659,935. The total outflow of specie from the port, since Jan. 1, 1867, has been $31,213,658, against $49,-363,138 same time in the preceding year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $2,693,000, making the total coin interest disbursements through the Government office, since Jan. 1, 1867, $35,993,329, against $28,177,448 for the preceding fiscal year. The specie exports from San Francisco, from Jan. 1, to May 29, reached $14,863,783, against $15,035,553 same time last year, showing a decrease, in 1867, of $171,770.

An improved inquiry prevailed, early in the week, for prime bills on London, and rates stiffened a little. Toward the close, the market was less firm, under a diminished call, and an increasing supply. Bankers' 60 day bills on London closed steadily on Wednesday at 110@110¼, and on Paris to 5.16¼@5.12½; sight bills on London to 110⅜@110⅝; and on Paris to 5.12½@5.10. The offerings of produce bills have been more liberal this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $3,325,599, making the total value of exports since Jan. 1, 1867, $104,178,867, against $113,255,966 same time in the preceding year.

Government securities have been less freely inquired for, and have been depressed in price. The worst sales were made on Wednesday forenoon, under a pressure to realize. During the afternoon of that day, the demand revived again, and prices exhibited an upward tendency. The compound interest notes of July, 1864, having matured, have ceased to be a quotable investment. We, therefore, drop them from our list. U. S. sixes of 1881 closed here on Wednesday at 109⅞@110⅛; U. S. Five-twenties of 1862, 111⅝@111⅞; U. S. Five-twenties of 1864 at 108¾@109; U. S. Five-twenties of 1865 at 109⅛@109¼; U. S. Five-twenties of 1865, consolidated, 108@108⅛; U. S. Five-twenties of 1867, 107⅞@108; U. S. Ten-forties at 101⅞@102, and U. S. Seven-thirties at 107⅜@107⅝. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

August, 1864	119	August, 1865	115½
October, 1864	117⅞	September, 1865	115
December, 1864	117⅛	October, 1865	114½
May, 1865	116½		

Railway and miscellaneous stocks have been quite active, but variable in price; most of the earlier dealings of the week having been at reduced rates. Wednesday's business was on a more buoyant basis, and the temper of the market was decidedly *bullish*.

Produce and merchandise have been more freely offered, and have been in less request. Breadstuffs and provisions have favored buyers, especially toward the close. Cotton has been quiet, but steady, with a comparatively light offering of desirable grades. Middling grades left off here on Wednesday tamely at 26@27½ cents per lb. as extremes. The stock of cotton now here is estimated at about 78,000 bales. The receipts at the port this week, have averaged about 1,600 bales a day. The receipts since the commencement of the current cotton year, Sept. 1, have been 618,000 bales, against exports of 449,586 bales. The receipts at all the shipping ports from September 1, to latest mail dates have been 1,835,-000 bales, against 1,974,700 bales same time last year; exports, 1,498,000 bales, against 1,476,012 bales same time last year; estimated stock at latest dates, 167,000 bales, against 299,700 bales same time last year. At the Live Stock Market, this week, beeves have been in fair supply and moderate demand at from 14@17½; veal calves, 7½@12; sheep, 5@6½; lambs, 8½@10½, and swine 7½@8 cents per lb., all live weight. The week's receipts include 4,702 beeves, 1,809 calves, 21,236 sheep and lambs, and 17,119 swine. Foreign goods have been less active, and dry goods have been depressed. The total imports of foreign dry goods, last week, were $1,699,056, and the total amount marketed $1,077,055. The value of foreign merchandise imported last week, was $3,-713,520—making the grand total specie value of last week's imports of dry goods and merchandise, $5,412,576, and since Jan. 1, 1867, $137,949,424, against $165,157,867 same time in the preceding fiscal year. The ocean freight market has been comparatively quiet at drooping rates with 558 vessels of all classes in port. For Liverpool we quote flour at 1s.@1s. 3d. per bbl.; grain at 3½c.@4d. per bushel; cotton at $\frac{3}{16}$@¼d. per lb.; and heavy goods at 10s.@20s. per ton, all by sailing vessel.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	July 3.	July 10.	July 17.
Consols	94⅛	94¾	94¾
U. S. 5-20's of 1862	72¾	73	72⅝
U. S. 5-20's of 1865	70½	71	70⅜
Erie	43½	44¼	46¾
Ill. Central	79	80¼	76¾

The New York exports, exclusive of specie, for the week ending July 16, and since the beginning of the year, compare as follows:

	1866.	1867.
For the week	$4,076,857	$3,325,599
Prev. reported	109,179,109	100,853,268
Since January 1	$113,255,966	$104,178,867

The New York imports for the week compare as follows:

	1866.	1867.
Dry goods	$2,740,608	$1,699,056
Gen. merchandise	3,759,747	3,713,520
Total for the week	$6,500,355	$5,412,576
Previously reported	158,657,512	132,536,848
Since January 1	$165,157,867	$137,949,424

The balance in the Sub-Treasury on Wednesday was $130,998,670 93.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Improved Railroad Car Wheel.

We invite attention to the Advertisement, in another column, of "THE ELNATHAN SAMPSON IMPROVED RAILROAD CAR WHEEL," and also to the article on our first page, prepared on the occasion of the recent trial trip between Troy and Schenectady under the auspices of the New York Central Railroad Company. The improvement consists in so constructing the tread of the wheels as to enable the same to pass any curve in the track without undue strain upon the wheel, axle, truck frame, or rail. And a most excellent portion of the road was selected for the trial of its qualities in this respect; for, to use the words of the facetious reporter of one of the Troy journals, it "is a piece of the crookedest road to be found anywhere in the United States." It is claimed that by the use of this wheel there is less liability of the train being thrown from the track while passing rail joints, curves, or over any irregularities in the rails. There is also less lateral motion perceptible in the cars over these wheels, than those of the ordinary make. The opinion of the excursionists, among whom were a number of prominent railroad men, was unanimous that the invention was a perfect success. The manufacturers of this wheel are Messrs. JONAS S. HEARTT & Co., of Troy, N. Y.

To Railroad Contractors.

The Milford and Woonsocket R. R. Co., will receive proposals at their office in Milford, Worcester Co., Mass., until the 30th inst., for the grading and masonry of about 3¾ miles of road, in sections of 1 mile, 1¼ mile, and 1½ mile—the work to be completed by December 1, 1867. Also for the grading and masonry, furnishing and laying of the superstructures, and fencing the whole road, for a gross sum, and the supplying of all material, and labor, necessary to put the road in complete running order. The grading to be completed by January 1, and the whole to be completed by May 1, 1868. Address Geo. F. Draper, President, or Wm. F. Ellis, Engineer, Milford, Mass.

Lower California Company.

The Lower California Company has organized under a New York charter, electing Wm. G. Fargo, President; Wm. R. Travers, Treasurer, and George Wickes, Secretary. Commodore Garrison, August Belmont, General B. F. Butler, Leonard W. Jerome, Caleb Cushing, John A. Griswold and Richard Schell are the other Directors. General John A. Logan has accepted the position of Governor of the company and Superintendent of colonization, and will soon proceed to the Peninsula of Lower California.

Coal Tonnage of the Seven Competing Lines.

The *U. S. R. R. & Mining Register* gives the following statement of the number of tons of coal carried to market by the seven competing anthracite lines during the season of 1867, to July 6, (the Reading to July 11,) in comparison with the season, to corresponding date, in 1866:

	1867.	1866.
Phila. and Reading R. R.	1,887,294	2,143,897
Schuylkill Canal	453,735	629,565
Lehigh Valley R. R.	999,260	938,522
Lehigh Canal	325,804	379,928
Del., Lack. and W. R.R.	843,132	728,333
Del. and Hudson Canal	533,842	548,364
Pennsylvania Coal Co	387,433	108,767
Total tons	5,430,500	5,477,376

In 1865, the quantity carried to corresponding date, was 4,527,742 tons; and in 1864, 3,808,996 tons.

Central Pacific Railroad.

The Central Pacific Railroad of California, with 94 miles in operation, gives the following exhibit of earnings and expenses for the first six months of the current year, in gold:

	Gross Earnings.	Operating Expenses.	Net Earnings.
January	$38,149 22	$21,564 79	$16,604 43
February	51,831 38	23,867 79	27,963 59
March	60,029 14	20,115 16	39,913 98
April	81,156 31	21,242 76	59,913 55
May	95,828 59	23,184 44	72,644 15
June	122,018 56	21,963 20	100,055 36
Totals	$449,033 20	$131,938 14	$317,095 06

Belfast and Moosehead Lake Railroad.

Hon. Thomas Marshall, of Belfast, Me., has been elected president of the Belfast and Moosehead Lake Railroad Company. This company is making good progress in obtaining subscriptions, and the Belfast *Journal* says an offer has already been made to contract for building the railroad to Newport in Penobscot Co., a distance of 33 miles. The contractors offer to make a first class road, with sidings, fences, grading, rails, masonry, bridges, and everything complete except rolling stock, station houses and right of way, for one million dollars. The contractors will take $250,000 in preferred stock. They stipulate that the line shall be located by Col. Wildes, or some other competent engineer. The offer comes from a responsible source, and can be closed at once, if desired.

☞ John D. Hutchinson, Esq., of Troy, N. Y., has been awarded by the State contracting board the contract for building thirteen new iron bridges on the line of the Erie Canal. The entire work amounts to upwards of $60,000. Mr. H. is also building an iron bridge over the Hoosick River in the town of Petersburg, in this State.

☞ At the recent annual meeting of the Milwaukee and St. Paul Railroad Company, it was unanimously voted to proceed at once with the construction of the Ripon division of the road from Omro to Neenah and Menasha, *via* Winneconne. It is expected to be completed to Winneconne this fall, and to Neenah during the coming year. B. H. Edgerton, Esq., is Chief Engineer of the company.

☞ The city of Bath, Maine, has been selected as the Western terminus of the Knox and Lincoln Railroad.

Railroad Earnings.--Weekly.

The earnings of the Chicago and Alton Railroad for the first week in July, 1867, were $74,160 00
Corresponding period previous year.. 76,211 00

Decrease..... $2,051 00

The earnings of the Chicago and Great Eastern Railway for 1st week in July, were... $22,094 50
Same period last year..... 20,419 13

Increase in 1867..... $1,675 37

The earnings of the Atlantic and Great Western Railroad for the first week in July, 1867, were..... $85,209 00
Corresponding week previous year... 96,110 00

Decrease..... $10,901 00

The earnings of the Marietta and Cincinnati Railroad the 1st week in July, 1867... $23,603 00
Corresponding week previous year..... 21,394 00

Increase $2,209 00

The earnings of the Chicago and Rock Island Railroad for the 1st week in July, 1867, were..... $69,500 00
Corresponding week of previous year.. 61,710 00

Increase..... $7,790 00

The earnings of the Michigan Central Railroad for the 1st week in July, 1867, were.. $60,761 00
Corresponding week of previous year.. 73,659 00

Decrease $12,898 00

The earnings of the Western Union Railroad for the 1st week in July, 1867. ..... $13,121 00
Corresponding week previous year..... 20,874 00

Decrease $7,753 00

The earnings of the Detroit and Milwaukee Railroad for the week ending July 11th, 1867, were $35,057 00
Corresponding week of 1866..... 31,143 00

Increase..... $3,914 00

The earnings of the Chicago and Northwestern Railroad for 2d week in July, 1867 ... $192,191 00
Corresponding week previous year .. 191,859 00

Increase..... $332 00

The earnings of the Michigan Southern and Northern Indiana Road for the 2d week in July, 1867, were..... $65,929 00
Corresponding week of 1866 ..... 85,474 00

Decrease $19,545 00

Journal of Railroad Law.

COMPANY NOT LIABLE FOR INJURIES CAUSED BY THE ACT OF AN UNKNOWN PERSON IN OBSTRUCTING THE TRACK.

The facts in the case of Deye *vs.* N. Y. Central Railroad were these: A train was running at a high rate of speed on a descending grade, but over a section of the road straight for several miles, the road well constructed and in good order, with engine and cars also in good condition, when at a point a few miles west of Syracuse, and at about midnight the train ran off the track, and the car in which the plaintiff was riding as a passenger was turned over and he was seriously injured. Two other trains had passed over the same point within two hours previous to the accident, one of them about thirty minutes before, when the track and rails where all in order. But, in the short intervening time, some evil and malicious person had drawn out spikes and pushed some of he rails from their bed, and by this means the engine and part of the cars were turned off the track. There were three passenger and a baggage car in the train. They stopped immediately, according to the testimony of the plaintiff, who is himself a railroad engineer. He was riding in the middle car, which was turned over on its side, but the car next in rear was entirely off the track. The witnesses were in conflict as to the speed of the train at the time of the accident—the engineer who was in charge swearing that he was positive he was not going much, if any, over thirty miles an hour; while, on the part of the plaintiff, evidence was tending to show that the rate was as high as fifty miles per hour.

CAMPBELL, J.—The facts that the cars were stopped so soon, almost immediately; that the couplings were not broken, that, with a small train of only four cars, the last car was not thrown entirely from the track, would tend to show that there was not at the time a high rate of speed. But as the plaintiff was non-suited, we must, perhaps take his evidence, and concede that the cars were running at a rate, say fifty miles an hour. The train, it was said, was a few minutes behind time; the road was in good order, the grade a little descending, and the line in front straight for several miles. A rate of fifty miles an hour is not common, but by no means unusual or extraordinary, on well constructed roads. There was a possibility of accident, as there is a possibility attending the movement of every train, whether the rate be twenty or fifty miles an hour. But there was no probability that such accident, or any accident would occur. As the train was turned from the track, by the ends of the rails moved from their bed, and ran down a bank. no Court or jury would be warranted in saying that the accident would not have occurred had the train been running at the rate of twenty instead of fifty miles an hour. I do not see under the circumstances, how negligence could be imputed to the defendant in consequence of the speed of the train, whether or not the accident would have otherwise occurred would be a matter of vague speculation. But was the defendant warned? would a very careful and prudent person have been led to fear and take precautions other than the defendant did, to guard against anticipated danger.

Wibert, who was assistant track master, and who had charge of a division of the road, of about twenty-nine miles in length, was examined in behalf of the plaintiff. On his division the accident took place. He testified that Miller, the track master, on the whole line from Syracuse to Rochester, had told him to be on his guard; but he could not tell whether it was before or after the accident, but he thought it was before. Two or three days before the accident Wibert also had a controversy with his laborers on the road, and he ordered them out of doors, one of them he took by the collar and shoved out, and they said they would have satisfaction. But against what Miller advised Wibert to be on his guard, and what kind of satisfaction the laborers intended to take, does not appear.

Whether he was to be on his guard to prevent injury to the road, or to protect himself against personal injury, we are not informed. The plaintiff on his own behalf, swore that Harrison, the engineer on the train the night of the accident, told him afterwards that threats had been thrown out against the road six weeks previous to such accident. This was positively denied by Harrison. It also appeared that some six weeks before the accident, a tie or ties had been put on the track, and Wibert, also that Chittenden the assistant superintendent, or Miller, the track master, which, he did not know, had told him there had been shortly before the accident, some obstructions placed upon the road not far from where the Oswego road came in, and not far from where the accident occurred. The information probable came from Miller, who had previously been examined as a witness, and who testified that he had heard that ties had been thrown on the track. Chittenden, the superintendent, testified that when danger was suspected from evil-disposed persons, watches were placed, that he was in daily consultation with the principal trackmaster; that he had heard nothing to put him on his guard, and had no reason to suspect anybody; that afterwards, and in consequence of the accident, he appointed special policemen to watch the road in that vicinity. It must be conceded, I think, that there was a question of fact growing out of conflicting testimony, as to the knowledge possessed by some of the subordinate officers of threats made against the road. But the evidence, to say the least of it, on this point was very unsatisfactory; and it is very evident that no such information had come to the person whose duty it was to take the necessary precautions and to appoint the special police watch, namely, Mr. Chittenden, the assistant superintendent, having in immediate charge this section of the defendants road. But conceding that, so far as the question affects the case of negligence, the superintendent was bound to know all his subordinates knew, or in other words, that their neglect was his neglect, and his neglect that of the defendants. What was required to be done under the circumstances? Wibert to whom the threats were made by the laborers, had under his immediate charge twenty-nine miles of the road. Under the circumstances of this case, suppose that a watch had been placed at the point where this accident occurred, and no accident had occurred there, but one had occurred of the same character at or near Wibert's place of residence, and near where the controversy arose between him and the laborers, it might then have well been argued that there was neglect. If the plaintiff is right in his theory of the liability of the defendant. But it may be seen, that, if not physically impossible, it was practically so to guard against such an accident as occurred in this case. The threats were vague, no place of attack was mentioned. It was not indicated what kind of injury would be done; whether bridges would be destroyed, burned or blown up, whether obstructions would be placed on the rails, or rails removed. In this case the place selected was an embankment, where bushes were growing thick alongside the road, a place of ready concealment. The night was dark, and rain was falling. If obstructions were to be placed on the road, it might be the work of a moment, on the very instant almost that the train reached the spot. If rails were to be removed, the spikes could be drawn from time to time and preparation made so that in a few minutes, perhaps seconds, the rails could be removed as the train approached. It cannot

be said that it would be impossible to guard in such cases against the motives and crimes of wicked men; but unless the very point where the injury was contemplated was known in advance, it would require for entire protection a very large number of recruits from the recent grand armies of the Union. On the whole case, I do not think there is good ground or any ground, for saying that this plaintiff suffered injury by reason of negligence of the defendant. I think the nonsuit was properly granted, and the judgment should be affirmed.

Liability of Telegraph Companies.

An important decision relating to Telegraph Companies has just been rendered in the Supreme Court of Michigan, in the case of the Western Union Telegraph Company *vs.* Carew, an appeal from the Wayne County Circuit Court. Carew telegraphed to Baltimore for forty cases of oysters. In the transmission an error occurred whereby he received four cases instead of forty. The message was written on one of the telegraph blanks, with the usual printed heading containing the conditions on which messages are taken for transmission. The Circuit Court held that the telegraph company were liable for the damage suffered by Carew, treating the company as common carriers, and Carew as not bound by the conditions, unless his attention was particularly called to them. The Supreme Court reverses this decision, holding that the telegraph company are not common carriers, and that they have a right to establish any reasonable rules governing their liability in the impartial transmission of messages by them; that where, by the heading of a message, plainly printed in conspicuous letters, it is stated to be sent on the annexed conditions, the sender, by signing the message, adopts the conditions, and is bound by them, whether he reads them or not. It is his own negligence if he fails to notice them.

Virginia and Ohio Railroad.

A convention to devise means for the construction of the Chesapeake and Ohio Railroad to the Ohio river, met at White Sulphur Springs, Va., on the 10th inst., and continued in session two days. Ohio, Kentucky, nine counties of Virginia and eleven counties of West Virginia were represented by 200 delegates. Gov. Pierpont presided. Several capitalists were present from New York and Philadelphia. The following resolutions were adopted:

Resolved, That this convention earnestly recommends that at least five millions of dollars be raised by a subscription of stock to enable the Virginia Central Railroad Company to fulfill the contract entered into conditionally with the commissioners of Virginia and West Virginia on the 24th of May, 1867. That at least two million five hundred thousand dollars be raised in Virginia, and two million five hundred thousand dollars in West Virginia.

Resolved, That the Legislature of Virginia and West Virginia be petioned by the Chesapeake and Ohio Railroad Company (in view of the influence its work will exert favorably to the increase of the revenue of the States) to pass acts exempting from taxation the entire property of the Chesapeake and Ohio Railroad Company and such lands as it may acquire in payment for subscription of stock during the period of ten years after the completion of the road to the Ohio river.

Resolved, That it be recommended to each county to pledge itself to settle all claims for land-damages in the construction of the road within the boundary of such county.

Resolved, That it be recommended to the counties of West Virginia to subscribe for not less than the following amounts of 8 per cent. preferred stock of the Chesapeake and Ohio Railroad Company, (if required by the counties,) convertible into preferred stock, the bonds to be received by the company at a discount of not more than ten per cent.: Mason county, $500,000; Putnam, $250,000; Jackson, $100,000; Roane, $50,000; Clay, $50,000; Kanawha, $500,000; Fayette, $115,000; Monroe, $200,000; Greenbrier, $250,000; Mercer, $50,000; Raleigh, $50,000; Wyoming, $25,000; Logan, $25,000; Wayne, $50,000; Cabell, $100,000; Lincoln, $25,000; Boone, $50,000; Nicholas, $50,000; Webster, $10,000; Pocahontas, $50,000.

Resolved, That it be recommended to Virginia to make her subscriptions in the same manner and upon the terms provided for in the resolution relating to subscriptions by counties in West Virginia.

Interest and Dividends.

The Delaware and Hudson Canal Company have declared a half yearly dividend of 8 per cent., free of tax, payable August 1.

The Second and Third street Passenger Railway Company have declared a dividend of five per cent., payable, free of tax, July 19.

The Girard College Passenger Railway Company, a dividend of $1 per share, payable on demand, clear of tax.

The West Philadelphia Passenger Railway Company, a semi-annual dividend of 5 per cent., free of tax, payable on the 19th instant.

The Baltimore City Passenger Railway Co., a dividend of three per cent., free of U. S. tax, payable August 1.

The Winnisimmet Horse Railroad Company have declared a semi-annual dividend of 2 per cent., payable 15th July.

Pittsburg, Ft. Wayne & Chicago Railway.

The earnings of this road for the month of June, 1867, were $506,585 88; against $633,666 52 for the corresponding month of the previous year—showing a decrease of $127,080 64. The earnings and expenses from January 1, to June 30, 1866 and 1867, have been as follows:

	1866.	1867.
Earnings	$3,619,114 89	$3,398,307 98
Expenses	2,657,220 34	2,467,382 50
Net earnings	$961,894 55	$930,925 48

This shows a decrease in gross earnings of $220,806 91; in expenses of $189,837 84; and in net earnings of $30,969 07.

☞ At a meeting of the Board of Directors of the Pennsylvania Canal Company, held on the 2d inst., General Isaac J. Wister was unanimously elected President. General Wister was also elected on the same day President of the West Branch and Susquehanna Canal Company, and as he was already President of the Union Canal Company, it will be seen that these several canal lines will be controlled by the same general policy.

☞ The directors of the Utica, Chenango and Susquehanna Valley Railroad Company have awarded the contract for building the road from Waterville to Sherburne, to John A. Folts & Son, of Herkimer, and Hon. George Graham, of Oriskany. It is understood that the road is to be ready for the cars as far as Hubbardsville (ten miles from Waterville,) by the first day of January next, and to Sherburne by one year from next September.

Monongahela Valley Railroad.

A meeting of the friends of this road, in favor of the route from Pittsburg to Monongahela City *via* the Saw Mill Run, was held in Pittsburgh on the 10th inst. Pittsburg, Birmingham, Lower St. Clair, Baldwin and Snowden townships, also Washington Co., were fully represented. Dr. Van Voorhees, chairman of the corporators, was present, and addressed the meeting at some length. He referred to the interest manifested among persons residing along the proposed route in the enterprise, and said the only thing necessary to bring the road to a successful completion, was a united effort. He had been over the route, and was much eucouraged with the prospects.

On motion, a committee of ten was appointed, with Dr. Oldshue of Pittsburg, as chairman, to solicit subscriptions, conditioned on the road being constructed on the shortest route; and with power to employ a corps of competent engineers to make a survey of the route from Pittsburg to Monongahela City, *via* Saw Mill Run, as they may select.

The Hoosac Tunnel.

The progress on all parts of the Hoosac Tunnel was good during the month of June. At the east end, by machine drills, 102 feet of head, 17 feet wide by 8 feet high, was excavated in 23 working days in very hard rock. This amount is eleven feet more than ever before made any full month of 27 working days, and more than 40 feet above the average for the past year, and done, too, at a great reduction in amount of labor and cost of material. The returns from the work for July up to this date, show a still greater progress, and had the work continued in the hands of the state a few months longer under the present administration of its affairs, it it believed that the progress would have largely advanced from its present limit, while the expenses would have decreased still more. Messrs. Dull & Gowan, well known as the successful Chicago tunnel contractors, are soon expected to have the east end, and central shaft, by contract, and as the dollars all lay behind cubic yards of rock removed from the tunnel, we shall probably see this great enterprise moving rapidly on to completion.—*North Adams Transcript.*

☞ A meeting of the directors of the Wilmington and Birdsboro' Railroad Co. was held at Coatesville, Chester Co., Pa., on the 10th inst. With the exception of that portion in Wilmington, and its immediate vicinity, the greater part of the road has been definitely located. No contracts for construction will be made until the whole road is located. The next meeting will be held on the 7th of August. J. Dutton Steel, Esq., is Chief Engineer.

☞ The consolidation of the Indianapolis and Columbus, the Union and Logansport, and the Logansport, Peoria and Burlington Railroads is announced. The roads so consolidated are to be known as the Columbus and Indianapolis Central railway. They contain three hundred and sixty-three miles of road, and under the new arrangement, will afford unbroken communication from Columbus to Indianapolis, and from Columbus to the Iowa line.

☞ Work upon the Tomah and St. Croix Railroad has been commenced, and the contractors have advertised for 500 men immediately, intending to push on the work as rapidly as possible. They say they will have the cars running to Black River Falls within a year.

St. Petersburgh and Moscow Railway.

A cable telegram, dated London, July 15th, says the Russian Government has sold the St. Petersburgh and Moscow Railway to Messrs. Baring Brothers and Hotinguer. In anticipation of this sale, the London *Mining Journal*, of June 15th said:

It is the intention of the Russian Government to sell the St. Petersburg and Moscow Railway. The capital expended upon the line, including the amount paid for rolling stock, is about £12,000,000, but the return realized upon this outlay has been at the rate of nearly 8 per cent. per annum; and as the traffic is expected to increase upon the completion of other lines now in progress, it is believed that the sale of the undertaking will produce £16,000,000 to the Russian treasury. During the last six years the assistance afforded by the Russian Government to the construction of railways in the territories under its control has been about £18,000,000.

Iowa Railroads.

The city of Burlington, Iowa, is alive to railroad enterprises. It is thought the Burlington and Cedar Rapids Railroad will be finished by fall. Men are at work from Burlington to Carthage, and expect to have the line open by the close of navigation.

Another enterprise is on foot, to connect Burlington with Macomb, Illinois, by rail, and thence, *via* Rushville, Beardstown and Whitehall, Illinois, to St. Louis.

The road from Nebraska City, on the Missouri River, to Farmington, on the Des Moines River, in Iowa, and thence to Fort Madison and Burlington, to cross the Burlington bridge, to be completed by the end of the year, is also moving silently onward.

These projected roads, together with the B. & M., completed 150 miles westward, and the Chicago, Burlington and Quincy, and the Burlington and Quincy, and the Burlington, Peoria, Logansport, Fort Wayne and Toledo road, will make Burlington a considerable railroad centre.—*Burlington Hawkeye.*

☞ The track of the Troy and Greenfield Railroad will be laid to Shelburne Falls in two months and to Charlemont village by the first of the year, but the road will not be opened for business to the Falls until the middle of November. A small freight engine for gravel and work trains crossed Green river bridge for the first time on Monday. In a few days it will be run regularly over six miles of road extending from Greenfield.

☞ The Bath *Times* says that T. Haskins De Puy, the engineer selected to make an examination and estimates for a railroad bridge across the river at that place, has completed the work and has reported that a bridge, with stone piers and wooden superstructure, can be completed for $275,000.

☞ Efforts are being made to effect the consolidation of the Warren and Franklin Railroad with the Philadelphia and Erie Railroad. The stock of the former company, at par value, is $1,300,000; the company has also bonds outstanding to the amount of $1,400,000.

☞ S. H. Scranton, of Madison, has been re-elected President and Superintendent of the Shore Line Railroad; S. B. Chittenden, of New York, Vice-President; and Wm. J. Bartlett, of New York, Secretary and Treasurer. The earnings last year were $10,000 in advance of any previous year; the receipts being $294,678, and the expenditures $234,814.

Rutland and Burlington Railroad.

The Boston *Journal* says that the new corporation established in Vermont to operate the Rutland and Burlington Railroad was organized at Rutland on the 9th inst. John B. Page, E. A. Birchard, Peter Butler, George M. Barnard, George B. Chase, James H. Williams, and John Howe were elected Directors. John B. Page was subsequently elected President, and Joel M. Haven, Treasurer. An arrangement has been made with some of the largest holders of the first mortgage bonds, by which all the holders of such bonds are entitled to preferred stock for the principal and interest of their debts. The preferred stock is to pay 7 per cent., free of the Government tax, from August, 1867, and the interest of the preferred dividends must be paid in full before the common stock can receive any dividends. If this arrangement shall be carried out, the preferred stockholders will control the corporation.

Missouri State Debt.

Missouri has resumed payment of the interest on her debt. A return to solvency will, we hope, give new strength to all Missouri enterprises, new impetus to capital, and hasten recuperation in every department of business. We are glad to know, therefore, that through the indefatigable exertions of Gen. Gray and Gov. Fletcher, and with the important aid of Secretary Stanton, another large instalment of the claim against the General Goverment has been passed and will soon be paid. It amounts, we believe, to $1,600,000, which, with the $600,000 already paid, covers more than one-third of the whole claim, and that portion of it about which dispute and difficulty were most anticipated.—*St. Louis Democrat, June 29.*

☞ A meeting of those friendly to the Dutchess and Columbia, and Boston, Hartford and Erie Railroads was held at Fishkill on the 9th inst., and all but $50,000 of the Dutchess and Columbia Railroad stock was announced as having been subscribed.

☞ The wheat crop of California for 1866, it is ascertained, amounted to twelve millions of bushels. Two hundred and fifty thousand tons of wheat have been exported during the past harvest year, valued at $9,600,000.

☞ The survey of the Williamsburg and North Adams Railroad has been begun by a corps of engineer at both ends, and will be pushed rapidly forward.

☞ The sum of $132,000 has been subscribed in Buffalo towards the construction of the Buffalo and Washington Railroad. But $68,000 more is required.

CIVIL ENGINEER,
No. 219 South 4th St., Philadelphia,
Where Plans and Estimates of Work will be promptly attended to
Barometrical reconnoissance for Railway lines, Location and Construction of Railroads, and all duties required on Public Works in any State of the Union performed with fidelity.

THE ELNATHAN SAMPSON

NEW AND IMPROVED

RAILROAD CAR WHEEL.

PATENTED, MAY 7, 1867.

This Car Wheel contains a lateral and conical Tread combined with the guiding flang, and being so constructed as to move the truck and cars over and past any curve in the Railway track with as much ease and freedom as though the entire Road were constructed upon an air line. The cone tread will take the track rail, against which the wheel seems to be pressed, while passing any curve, and the diameter increasing, of course the circumference increases, and therefore the greater distance over the outer rail will be gained without any sliding of the wheels upon the track or undue strain upon the car axle, journal boxes or bearings, truck frame, car wheels, or other parts of the running gear of the cars or of locomotive engine. The hitherto great amount of friction caused by the use of the usual or old car wheels upon long trains of passenger, or heavy freight trains is avoided or prevented, of course there will therefore be a great saving in the use of oil. There is much less wear of the track rail, and the lateral thrusts of cars against the track rails being done away with by the new wheel, there is much less liability to displacement of the rails, or of the loosening of the spike by which the rails are fastened.

This wheel will cost no more to manufacture than the old wheel, while it is certain that a much better and more reliable chill of the tread portion of the wheel is had than by the old way of casting wheels. This wheel can be put upon the old axles and trucks of Railroad Cars—there being nothing required to be new save the wheel.

Rights to Manufacture this Car Wheel can be had upon the most liberal terms of the owners of the Patent, ELNATHAN SAMPSON, EDWIN CHAMBERLIN and MARCUS P. NORTON, of the City of Troy, N. Y.

Several Licenses have already been granted for the manufacture of this Car Wheel.

The owners of this Patent have appointed, as a matter of convenience, EDWIN CHAMBERLIN, Troy, N. Y., Corresponding Secretary, to whom all communications for information should be addressed, which will receive prompt attention.

MEAD RUBBER COMPANY,

12 Vesey Street, New York.

MANUFACTURERS OF

INDIA RUBBER CAR SPRINGS AND STEAM PACKING.

Our Works being now under the management of a competent Superintendent, we are prepared to offer Springs of various qualities and prices to suit. Our A No. 1 Spring made of fine Para Rubber, and the Compound used by the Patentee, the late Fowler M. Ray, will be found to be cheaper than others made, from inferior stock and offered at lower prices.

Sample setts forwarded on application. All Springs fully warranted.

FOR SALE.

16 FLAT CARS—Broad Tread Wheels—Compromise—Just completed at Buffalo, N. Y.

These Cars are built in the most approved style, of the best White Oak Lumber.

Platforms 30 feet long, 8½ wide, Iron Trucks, Capacity 15 Tons, Warranted.

KASSON & CO.,
62 Broadway,
26tf **New York.**

FOR SALE.

3 PASSENGER CARS—4 8½ or 4-10 Gauge—Rebuilt at Buffalo—first-class finish—Patent Trucks—will seat 56 @ 58 Passengers.

To be had separately or together at a Bargain.

KASSON & CO.,
62 Broadway,
26tf **New York.**

NOTICE TO THE CONSUMERS OF THE

GENUINE SWEDISH DANNEMORA IRON. (L)

I beg to announce that I have this day entered into a Contract with Messrs. W. JESSOP & SONS, of Sheffield, for the whole Annual Make of the above Iron, which, in future, will be stamped

(L) **LEUFSTA W. JESSOP & SONS.**

And to which I request the special attention of the Trade. Leufsta, in Sweden, 29th April, 1867.

CARL EMANUEL DE GEER, Proprietor.

WM. JESSOP & SONS, in referring to the above notice, beg to inform dealers in, and consumers of, Iron and Steel, that they are prepared to receive orders for this IRON, and for BLISTER and EXTRA CAST STEEL, made from the Iron, at their Establishments, Nos. 91 and 93 JOHN ST., NEW YORK, and Nos. 133 and 135 FEDERAL ST., BOSTON.

JAMES CLAYTON'S Patent Steam Pump and Steam Engine Combined. These Pumps contain every desirable quality in a Steam Pump, they are made of the best materials and in the best manner, and are the most reliable and cheapest Steam Pumps in the market and are especially suitable for railroad stations, &c. Please send for Circular.

JAMES CLAYTON,
3m26 **103 Front Street, Brooklyn, N. Y.**

CHALLENGE!!

I will TEST my India Rubber Car Springs of any size, at any required pressure, with those of the New England Car Spring Co.'s, or any others, at the Convention of Car Masters to be held at Altoona, Pa., Sept. 18th, 1867.

Each Party to be at the expense of their own Testing Machinery, &c.

The Springs to be manufactured of the same material, weights and compound as now sold by both parties.

The above will set at rest the Unkind Reports of (the would be) Rubber Monopolizing Parties, that no spring can be manufactured of India Rubber equal to their own.

C. V. MEAD,
Hamilton Square Rubber Works.
P. O. Address, Trenton, N. J.

CAUTION.—Only Springs Stamped "C. V. MEAD," and fully warranted, are of his manufacture.

OFFICE OF THE ILLINOIS CENTRAL R. R. Co.,
NEW YORK, June 21, 1867.

AT A MEETING OF THE BOARD OF DIRECTORS of this Company, held this day, it was

Resolved, That a DIVIDEND of FIVE PER CENT. in cash, free of Government tax, be paid on the 1st of August next to the holders of the full paid shares registered on the 20th of July inst., and that the transfer books be closed on the said 20th day of July, and opened on the 5th day of August.

6t26 THOMAS E. WALKER, Treasurer.

FOR SALE

3 LOCOMOTIVES, 4-8 1-2 GAUGE,

All thoroughly REBUILT by one of the best makers in the country, and ready for immediate use.

1—Cylinders 14x22, Link Motion, 4-56 in. Drivers connected, Copper Flues, Weight about 24 tons; 8 wheels Tender, 1800 gallons.

This Engine has always worked admirably; Steams freely with dry or green wood, works and wears perfectly smooth; Well springed and brassed all around. Proportions every way suited to power. A good and stylish model, all in excellent order.

2—Cylinders 15x20, Link Motion, 4-56 in. Drivers connected, Copper Flues, weight about 23 tons, 8 wheeled Cinder, 1,800 gallons.

Is a smart smooth working Engine, suitable for any work; has a good record throughout.

1—Cylinders 15x20 Hook Motion, 4-66 in. Drivers connected, Copper Flues, weight about 24 tons; Tender, 8 wheeled.

Every way perfectly sound, well brassed and springed up. All in fine working condition.

These Engines will be sold VERY CHEAP to close a transaction, and are GREAT BARGAINS to any company wanting this sized Engine.

KASSON & CO.,
62 Broadway, New York,

CHAPPELL MANUFACTURING COMPANY,

MANUFACTURERS OF

CHAPPELL'S PATENT STEAM VALVELESS PUMP OR

BILGE EJECTOR.

These Pumps are used for Steamships, Steamboats, Railroad Water Stations, and raising or discharging water, wherever steam power is employed. In case of fire, they are invaluable. As Bilge Ejectors they have no equal. They are simple, effective and cannot choke, never failing in any emergency. Can be seen in operation at the factory. Reference given on application.

PLASTIC SLATE ROOFING

JOINT STOCK COMPANY.

OFFICE 157 (Room 19) BROADWAY,

NEW YORK.

W. C. POTTER, Vice Pres't. J. M. ALLEN, Sec. and Treas. LICENSES GRANTED.

PLASTIC SLATE

FOR

Roofing & Other Purposes.

The process of reconstructing Slate Stone from a disintegrated state was

PATENTED FEBRUARY 21ST, 1865.

It is a combination of

Pulverized Slate and Viscous Matter,

(the latter possessing qualities of geological and chemical affinity for the former,) and is a development of one of the simple but unalterable tendencies of nature.

As a Roofing Material it Stands Unrivalled.

A mastic—it adapts itself to every shape and slope. Non-combustible, impervious, non-expansive, and undecaying.

Frost does not Crack nor Heat Dissolve it.

The only roofing material ever discovered that will resist the action of the elements as long as the structure it protects. Being susceptible of little, if any wear, from exposure, and

Perfectly Fire-Proof,

It is unequalled as a coating for Railroad and Farm Buildings, Fences, Bridges, bottoms of Vessels, Vaults, etc.

ELECTRICITY, ETC., ETC.

THE MOST POPULAR AND USEFUL ISSUE OF THE FOREIGN SCIENTIFIC PRESS.

This valuable Journal is devoted to Scientific, Analytical and Technical CHEMISTRY, PHARMACY, MINERALOGY, METALLURGY, MINING, ELECTRICITY, PHOTOGRAPHY, PATENTS, REVIEWS, and includes ABSTRACTS of all important intelligence from the cotemporaneous Scientific Press, with REPORTS of the proceedings of Scientific Bodies. Its foremost rank as the leading representative of these interests is undisputed.

While its importance to CHEMISTS, DRUGGISTS, APOTHECARIES, MANUFACTURERS, PHOTOGRAPHERS, ASSAYERS, and all other kindred scientific pursuits, is universally acknowledged, the high price of the original Journal has necessarily limited its circulation in America. The subscription to the London issue is TWELVE DOLLARS A YEAR, but the price of the American reprint, which will be printed in EXACT *fac simile* of the original, will be TWENTY-FIVE CENTS A MONTH. No interested class can now afford to be without this indispensable REPERTORY OF PRACTICAL SCIENCE. While the Reprint, in form, size, type and engravings, will be a literal copy of the original, a change will be made in the TIME of publication and it will be published in MONTHLY instead of WEEKLY, numbers. This desirable change is more convenient, and allows the yearly numbers to be included in one compact quarto volume of SIX HUNDRED AND FIFTY PAGES.

Our Mr. TOWNSEND has republished "BRAITHWAITE'S RETROSPECT OF MEDICINE AND SURGERY" for nearly a quarter of a century, until it has reached an unprecedented circulation, and he feels confident "THE CHEMICAL NEWS AND JOURNAL OF PHYSICAL SCIENCE" will supply a pressing want, and become equally as popular with the scientific world, and take its permanent place with the standard periodical literature of the country.

Pacific Mail Steamship Company's

THROUGH LINE TO

California and China.

CARRYING U. S. MAIL.

VIA PANAMA RAILROAD.

STEAMERS LEAVE PIER 42 NORTH RIVER, foot of Canal Street, at 12 o'clock noon, as follows:

July 1st—OCEAN QUEEN, Capt. H. P. Connor, to connect with GOLDEN CITY, Capt. Lapidge.

July 11th—HENRY CHAUNCEY, Capt. A. G. Gray, to connect with MONTANA, Capt. Sutton.

July 20th—ARIZONA, Capt. Maury, to connect with SACRAMENTO, Capt. Caverly.

100 lbs. baggage allowed free to each adult passenger. Medicines and attendance free.

All departures touch at Acapulco. Those of 1st and 20th connect at Panama with steamers for South Pacific ports; 1st and 11th for Central American ports; those of 1st touch at Manzanilla.

Departure of 11th of each month connects with the new steam line from Panama to Australia and New Zealand.

Steamer of August 10 will connect closely with steamer Great Republic from San Francisco, September 3, for Yokohama and Hong Kong, at Yokohama, with steamer Costa Rica, for Nagasaki and Shanghae.

For passage tickets and all further information, apply at the office on the wharf foot of Canal Street, North River, New York.

THE ATLANTIC BRIDGE WORKS,

Office, No. 157 Broadway, New York.

POST, McCALLUM & CO.,

BRIDGE AND ROOF BUILDERS,

Are prepared to build in any part of America, their superior plan of **Railroad** and **Highway Bridges,** either wholly of **iron,** or of **iron** and **wood** combined, and of any desired span.

These Bridges possess **greater strength** and **stiffness** in proportion to the quantity of material, than can be obtained by any other plan in use, and therefore are the most economical.

Roofs of any length and width erected on this plan, combining great strength with lightness and economy of construction.

UNION CAR WHEEL COMPANY.

New York Office, 117 Broadway.

WORKS AT JERSEY CITY & HARLEM

H. C. LUCE, Pres't. H. W. MOORE, Sup't.

Malleableized Car Wheels and Locomotive Tires,

Annealed by MOORE'S PROCESS, of which this Co. is Sole Proprietor.

By a process similar to the process of making malleable iron, all our wheels and tires are annealed so as to permit an extraordinarily deep chill in combination with a plate, hub and spokes so soft as to be capable of drawing out at a forge.

So far, not one wheel has broken in the plate, and almost no failures of any kind, making this the safest wheel in use.

These wheels are in use on over 40 roads, including the Central of New Jersey, the Erie, the Morris and Essex, the Sterling Mountain, the Naugatuck, the Pittsburg, Fort Wayne and Chicago, Cleveland and Erie, Cleveland and Toledo, Chicago, Rock Island and Pacific, Delaware, Lackawanna and Western, Lehigh Valley, Pennsylvania Central, Boston, Lowell and N. Cape Cod, Boston and Providence, Boston and Maine, South Carolina, Mobile and Ohio, &c; and has thus far given perfect satisfaction. Irons used—the best Charcoal Irons—principally from the Salisbury regions.

ALL WHEELS REPLACED THAT FAIL IN LESS THAN ONE YEAR.

WATER & SEWERAGE PIPES,

KNIGHT-BAILEY PATENTS.

The Water Pipes are made of Wrought Iron, lined and coated with Hydraulic Cement, with Socket Joints, and connections for service pipes already inserted. Entirely free from oxidation they are absolutely indestructible. They can be laid and guaranteed for much less than cast iron Pipes.

The Sewerage Pipes are made of Hydraulic Cement. They stand the most severe tests of acids, increase in strength with age, are perfect in interior finish, and cheaper than any other pipes made.

We will contract for the water supply and drainage of cities and villages.

The New Post Office Building.

As we are not aware that any decision has yet been made by the Commissioners appointed to examine and determine upon the plans submitted for the new Post Office and District and Circuit Court Rooms to be erected at the lower end of the City Hall Park, in this city, we shall venture some remarks which were suggested to us when, about a month since, we examined the plans then on exhibition at No. 156 Broadway, and which our engagement since have not permitted us to publish.

We discovered, during that examination, that the style of architecture selected by most of the exhibitors, was of that rich and gorgeous style which originated, or was brought into France in the 16th century, for the erection of the Royal Palaces, etc., and among them those of the Louvre and Tuilleries.

Not having had the advantage of a personal inspection of these palaces, we are obliged to rely solely upon the numerous descriptions we have read, and those we have had recounted to us by eye-witnesses, together with the illustrations we have seen of the same. These have inspired in us not only the warmest desire to see these wonders, but also the conviction that we possess a pretty good idea of the same, and from our data and recollections we will proceed to give a description which, although incomplete, may interest some of our readers, and will show what an undertaking it will be for us, if our commissioners take the notion to make a Louvre of our Post Office.

Francis the 1st upon designs of Peter Lescot began in 1528 the actual palace of the old Louvre upon the site of the castle built in 1200, of the same name. Henry II and Henry III carried on the work, but Henry IV gave to it a great impulse, and also pushed with much vigor the construction of the Tuilleries begun in 1563 by Mary de Medici, and to that of the galleries intended to connect this palace to the Louvre.

In 1803 Napoleon I, engaged Percier and Fontaine to continue the works with the old Louvre which were not finished until 1812.

Louis XIV finished the palace of the Tuilleries begun upon the designs of Philibert De Lorme. The palace extends from the River Seine to the Rue Rivoli a distance of 1,000 feet, and is made of nine pavillions, of which the main ones are the pavillions of Flore near to the river, that of Horloge in the centre, and the one Marsan joining to the Rue Rivoli.

Napoleon III decided the construction of the new Louvre, and its connection with the Tuilleries by Galeries, of which the southern one is more than 1,500 feet long. The designs of Visconti were accepted, and the first stone was laid in 1852, the works were pushed forward and finished in 1857.

The old Louvre forms nearly a square 576×538 feet. John Goujon sculptured the magnificent caryatids of the western front. The front and colonnade facing the old monastery of St. Germain l'Auxerrois is the glory and masterpiece of Perrault. It consists of 28 coupled columns of the Corynthian style. And the front on the river is the work of Gabriel.

Two large wings beginning at the Louvre and connecting with the main building, making a square angle on the Place Caroussel adorned with porticos covered with statues and sculptured frontals and a transversal edifice, ended by two pavillions, which divides in two parts each of the two yards surrounded by these buildings, constitute what is called the new Louvre.

The old Louvre, the new Louvre and the Tuilleries making now an immense suit of palaces, and perhaps the most remarkable and the richest block of ornamental architecture existing in Europe, cover and surround with their constructions an area of nearly sixty acres, and justly stands as one of the most attractive curiosities for the strangers visiting Paris.

The exterior of these palaces consists not in the mere assemblage of straight walls with regular and symmetrical gates, windows, cornices and mouldings, but it represents the harmonious and splendid blending of the richest architectural, sculptural and ornamental conceptions, which the greatest artists in those arts, who have lived in France during the space of nearly 350 years could conceive and produce.

To convey to the mind an idea of this, it will be necessary to state, that among the numerous pavillions which decorate these palaces, there are not two alike, being constructed at different times and by different architects; among the most prominent of these are: the pavillions of Horloge, Marsan, Flore, Henry IV, Daru, Central, Lesdignieres, Bibliotheque, Turgot, Sully, Rohan, Richelieu, Denon, Mollien, Colbert, &c., &c., each one as already stated, built with its own peculiarities and originalities, each one bearing the stamp of its epoch, and the scutcheon of its sovereign.

Were we to describe all the masterpieces of sculpture which decorate these palaces, we should go far beyond the limits allowed to our article; we will, however, in order to give an idea of it, exhibit some gleanings among them.

Upon the entablature of the pavillion Rohan, stand the full size statues of Generals Hoche, Massena, Desaix, Kleber, Lannes, Marceaux, Soult and Ney.

The front views of the Louvre, facing the inner yards are made of different orders of architecture, surmounted with caryatids, entablatures, frontals, balconies, railings, statues and groups, representing allegories in mythology, and national attributes.

The buildings surrounding the central yard on the ground floor, are preceded by a portico made of arched arcades of the Corynthian style, and with its frieze richly decorated. A little behind the cornice on the surbase of the columns are located eighty colossal statues, representing illustrious Frenchmen in the arts, sciences, literature and politics. And above them on the entablature of the attic, are represented on pedestals, sixty-three fine allegorical groups, showing the attributes of commerce, agriculture, arts and sciences.

Among the architects who have designed and built the Louvre and Tuilleries, we find the names of Peter Lescot, Claude Perrault, Philibert De Lorme, Puban, D'Orbay, Ducereeau, Levau, Dupeyrac, Metezeau, Lemercier, Fontaine, Percier, Visconti, Lefuel, &c., &c. And among the sculptors who have contributed to illustrate these edifices with their works, we find the names of Duban, Barthelemi Prieur, Cavelier, Lemot, Cartelier P. Sarazin, Fr's l'Henreux, P. Ponce, Chaudet, Rolland, Jean Goujon, Couston Jr., Lesueur, Ramey the father, Guillaume, Bosto, Duret, Pollet, Barye, Gruyere, Robt. Brian, Jacquat, Villain, Jouffroy, Lequesne, Simart, Othen, &c., &c. Such names bear their signification.

We have made thus far allusion but to the external appearances and features of these monuments, and we shall not attempt to describe their interior, every particular of which being finished in such a sumptuous style and with such richness of decoration in painting, moulding, sculpturing, carving, gilding, marble and glass, that it is entirely beyond our competency to do it justice. It would appear that all the resources of science and skill have been put in requisition for the conception and the execution of the internal arrangements and their ornamentation, making the whole structure the largest, the finest, and the most remarkable piece of fine arts in Europe. The River Seine and the quays of the Tuilleries parallel to each other are the southern boundaries of these palaces; to the west are the garden of the Tuilleries and the Champs Elysees, the renowned Rue Rivoli is their northern boundary, and the Place St. Germain l'Auxerrois stands to the east, making in its whole the frame worthy of the picture, and *vice versa*.

From what we have said it is easy to guess that we entertain the most illimited admiration for the fine arts allied with taste, harmony and judgment, and we shall always give our cheerful support to any improvement made in that direction in our city. We are happy to state that some of our prominent citizens have already set the example by erecting elegant and tasteful constructions. But, before adapting the style alluded to for the post office, we have to be reminded that this edifice shall be a National one; and if we furthermore consider the size of the ground allotted to it, one and a half acre, its triangular shape, the narrow surroundings of the spot, the object of the edifice which do not call for the rich internal ornamentation which belongs to the style; if we consider the short space of time during which this construction must be completed, and also the present financial condition of the nation, and that our Secretary cannot dispose at his will of the National Treasury, as did the Kings and Emperors of France, who constructed the Louvre and the Tuilleries, which was to them a necessary condition to bring to completion such costly structures. This considered, we should look upon as nonsense all attempts to make our post office an imitation! Indeed, to say nothing else, what Louvre can be built on that small triangular corner of the City Park, in area the 1-40th part of the original, but a microscopic one, ridiculous to ourselves and to the strangers visiting the city. It would be just as well to undertake to bring the Niagara Falls into Central Park.

All that we want for our post office and court rooms is plenty of space for the public and public servants, plenty of air, light, ventilation, heat in winter, the access to and throughout easy, and all other accommodations, among which we will name, a shed for the mail carts, which has been forgotten by most of the architects.

We have no objection to see that edifice monumental without pretention, and bearing the stamp of its modest object. Before all, we wish not to have our patience put to too long a stand to see its completion, nor the National Treasury subjected to a too hard drain. If we wish some day to imitate the Renaissanse style of architecture, let us wait until we have plenty of money and time to spare, and then let us erect a National edifice that we shall be proud to behold and to exhibit to strangers.

Michigan Central Railroad.

The earnings and expenses of this road for the years ending May 31, 1866 and 1867 have been as follows:

Earnings:	1866.	1867.
From passengers	$2,061,335 05	$1,824,225 75
" freight	2,208,591 82	2,285,521 69
" miscellaneous	176,563 64	215,743 07
	$4,446,490 51	$4,325,490 51
Expenses, viz:		
Repairs of road	$625,056 84	$723,842 58
" buildings	229,212 91	178,423 31
" locomotives	256,225 26	304,799 90
" cars	299,900 79	305,672 03
Locomotive service	114,529 88	120,315 34
Train "	91,101 94	106,647 27
Station "	479,027 13	489,407 96
Fuel	300,111 71	328,781 55
Oil and waste	67,962 66	55,106 38
Stationery	39,781 37	29,025 08
Telegraph	24,961 76	22,938 90
Local taxes	97,059 60	99,710 43
Miscellaneous	183,444 07	62,106 48
	$2,808,375 92	$2,826,777 21
Net earnings	$1,638,114 59	$1,498,713 30

Compared with the previous year the gross earnings of 1866–'67 show a decrease of $121,000; with an increase in expenses of $18,401 29—making the decrease in net earnings $139,401 29.

The decrease in the earnings of the past from those of the previous year is equal to 2.72 per cent. The increase in expenses (less taxes) 0.73 per cent.

The earnings from passengers show a decrease of $237,109 30, or 11.50 per cent. from those of last year. The earnings from freight show an increase of $76,929 87, or 3.48 per cent. over those of last year. The increase in earnings from miscellaneous sources, was $39,179 43, or 22.19 per cent.

The expenses of operating the road (not including taxes) were $2,721,686 78; or 63 per cent. of the gross earnings. In 1866 they were 61; in 1865, 55.8; in 1864, 47.6; in 1863, 40.4; in 1862, 45.1; in 1861, 51; in 1860, 53.7. The superintendent, in his report, says:

The falling off in the passenger earnings has been among all classes of traffic, through and local, in both directions, with the exception of emigrants, which shows an increase of $14,055 29. This decrease in the passenger earnings, as compared with the previous year, is not peculiar to this road, as it will be noticed by referring to the reports of other East and West lines like results are shown, ours comparing quite favorably with the average.

The freight earnings, as compared with last year, are as follows:

Decrease in local East	$70,102 97
Increase in local West	39,911 93
Increase in through East	106,124 02
Increase in through West	996 89
Total increase in freight earnings	76,929 87

The increased tonnage of freight moved shows 8½ per cent.

Increased earnings upon freight shows but 3½ per cent., which is accounted for from the fact of through rates having ruled lower than during the previous year.

The freight earnings of the last five months of the year, as compared with the previous year, shows a gain of $70,892 61. This gain is mainly attributed to the opening of the through freight line *via* Great Western Railway, consequent upon their completion of the laying down of the third rail, which went into use at the commencement of the new year, thus enabling the narrow gauge cars to go directly through without breaking bulk at Detroit. The laying down of the third rail by the Great Western Railway makes a uniform gauge of track from all points upon the Atlantic seaboard to the remotest points at the West, even to California, upon the completion of the lines to that State.

The organization of the "Blue Freight Line" was completed upon the opening of the third rail for use, and at the present time the "Blue Line" cars, of uniform construction, owned by the different companies participating in its working, are loaded in New York, Boston, and other Eastern cities, and consigned, without breaking bulk, *direct* to Chicago, St. Louis, Cairo, and all the principal points at the West, and return freights are taken in like manner to Eastern cities. Good reasons exist for anticipating very satisfactory results from this new feature in the working of the increasing through business.

The Blue Line in one respect is quite unlike, in its organization, the many other freight express lines; namely, that of enriching individuals at the cost of the companies they represent, as no person is pecuniarily interested in its success. Each company on whose line it works being a partner as a company, and the cost of maintenance of a General Office for the proper keeping of accounts is more than compensated for in the mere saving of clerical labor at points of transhipment, to say nothing of the large expense saved in handling, and damage to packages under the old system.

Stockholders in all the roads interested in the Blue Line have an interest in its support, and its success, as a line, upon the principles of its organization, cannot be doubted.

The iron steamer, constructed by the Great Western Railway for carrying cars across the river, has worked with perfect success from the start, and has the capacity for handling sixteen ordinary sized freight cars at a time. The new freight depot, at Detroit, and general offices attached, are fully completed and in use. The dock, ferry-slip, and tracks fitted for use of cars of both gauges are completed, and property transported by the Great Western Railway, in its own cars, going to local points upon our line, is handled by the Michigan Central at Detroit, under an arrangement made upon the completion of the third rail.

The extension of the Jackson, Lansing and Saginaw Road to Owosso, during the year, has had a beneficial effect upon our business. This line now taps the Milwaukee Road at an impor-

tant point about seventy miles east of Grand Rapids, bringing, *via* the Lansing Road, to us, large consignments of lumber, staves, stock, plaster and produce, and then crossing northward towards the Saginaw Valley, to which point we hope it will be opened this fall, thus making the shortest and most direct rail connection with Chicago. This will, we believe, during the fall and winter, be a most important feeder to our line in passenger and freight business.

No material changes have been found necessary for the accommodation of passengers, and the same number of trains, both for passengers and freight, are being run as have been in operation the past four years, the number of freight trains varying, of course, to suit the business requirements. An important feature, however, worthy of notice, is that with the use of the uniform gauge through Canada, one passenger train each way is now running between Chicago and Suspension Bridge daily, the ferry-boat having the capacity for handling promptly and with perfect safety a full passenger train. The Great Western Railway Company is changing some of its passenger and baggage cars from broad to narrow gauge tracks with a view to the interchange of passenger cars, as well as freight, to enable all trains, if thought advisable, to run without change between Chicago and Niagara Falls, or even to Albany, New York and Boston.

During the past few weeks a Palace Hotel car has run once a week between Chicago and Albany, and it is not improbable that a daily line may be established at no distant period, that will enable a passenger to go from Chicago to the Atlantic seaboard without being compelled to leave the cars.

Another new feature has been developed since the opening of the through freight line direct for the East, that of placing a line of refrigerator cars on the route between Chicago and the Eastern cities, for transporting fresh meats and other perishable articles with perfect safety in warm weather; and it is believed that a large traffic of this kind will be the result, at remunerative rates, as soon as the line becomes well known, as the merits of such a mode of conveyance cannot but be appreciated.

The contract for working the passenger trains of the Louisville, New Albany and Chicago Railway between Michigan City and Lafayette has been cancelled, and a new joint arrangement has been made, embracing the Northern division of the Louisville, New Albany and Chicago, the Lafayette and Indianapolis, the Indianapolis and Cincinnati and the Jeffersonville Roads, for doing a business of all kinds between Chicago, Lafayette, Indianapolis, Cincinnati, Jeffersonville and Louisville, each road furnishing its *pro rata* of cars of all kinds needed for the efficient working of the line as a through route between Chicago, Cincinnati and Louisville. The contract is one that is believed will work to the mutual advantage of all.

The prospect for abundant crops upon our line, as well as upon tributary lines, was never more flattering than at present, and we may look forward with much confidence for a successful fall and winter business.

Large expenditures have been made upon the tracks by putting down about seventy-five miles of re-rolled and repaired rails, and the purchase of ties for about ninety miles of road (about four times the ordinary yearly supply,) a large per centage of which are yet to go in. When the new ties are all in place the track will be much improved, although at the present time it is in good general condition as a whole. The difficulty of procuring a sufficient quantity of ties during the war worked somewhat to our disadvantage, but with a liberal supply the coming winter, our wants in that way will be light for some years, and much improvement in expenses of maintaining the track is hoped for even in the next twelve months.

The total number of tons of freight moved has been 578,177. Average number of tons carried per train per mile, 119.35. Average distance freight is carried, 159.04 miles. Freight earnings per ton per mile, 2.49 cents. Tons carried one mile eastward, 58,072,430; do., westward, 33,877,988—total tons carried one mile, 91,950,418. Proportion of tonnage carried eastward, 63.16 per cent.; do., westward, 36.84 per cent. Tons carried one mile per mile of road, 323,769. Earnings of freight trains per mile, $2.97.

The total number of passengers carried was 823,474, of which 687,273 were local, 117,483 through, and 18,717 emigrant. Of the local passengers 338,884 went east, and 348,389 west; of the through passengers 54,245 went east, and 63,237 west. Average number of passengers per train per mile, 85.02. Average number of miles travelled by each passenger, 82.48. Passenger earnings per passenger per mile 2.69 cents. Passengers carried one mile, 67,924,766. Passengers carried one mile per mile of road, 239,172. Earnings of passenger trains per mile run, $2.28.

Income Account.

Total		$4,794,507 50

Construction account has been increased $614,391 21 during the past year.

The bonded debt has been decreased by the conversion of $194,500 of convertible bonds into stock, and the capital stock has been increased by that amount, and also by the issue of $893,300 of new stock.

The funded debt now amounts to $7,268,988 89; capital stock, $8,070,666—total, $15,339,654 89.

The equipment of the road consists of 97 locomotives, 60 first-class passenger, 5 first-class sleeping, 18 first-class military, 12 baggage and mail, 30 accommodation, 398 stock, 768 merchandise, 226 platform, 125 hand and 160 rubble cars.

The number of miles run by locomotives with passenger trains, was 798,857; with freight trains, 770,455; with working trains, 143,599; switching trains, 189,187—total miles run, 1,902,098.

Auditor.—William Boott.

The "Blue Line."

A circular from the office of the "Blue Line," gives the half-yearly statement of the earnings and general business as follows:

Freight moved East, 40,050 tons, 1,879 lbs.; net earnings	$701,064 81
Freight moved West, 26,281 tons, 514 lbs.; net earnings	491,688 44
Total, 66,332 tons, 393 lbs.; amount	$1,192,753 25
Total number of miles run	8 800,856
Total number of tons moved one mile	62,534,422
Freight earnings per ton per mile	1 92
Per centage of freight East	61.46
" " West	38.54

The expense of operating the Central Office, furnishing books, stationery, receipts, bills of lading, &c., for all terminal and transfer points, (allowing what we have on hand to be equal to the cost of the first appropriation,) is 1 28 100 per cent. of the earnings.

The division of earnings are as follows:

Boston and Worcester, and Western, and others east of Albany	$106,925 29
Hudson River R. R	80,828 11
New York Central R. R	383,930 05
Great Western Railway	289,317 39
Michigan Central R. R	305,616 47
Chicago, Burlington and Quincy R.R.	4,129 89
Chicago and Alton R. R	20,300 01
Illinois Central R. R	1,706 04
Total	$1,192,753 25

The line opened January 1, 1867. So great was the difference between the East and West bound freight for January, that a comparison of earnings for the entire month will show that the cars made nearly two miles run for one mile of earnings, the earnings East, being $237,400 55, against $27,299 82 on West bound.

March showed an excess of earnings on West bound freight. The month of April, however, brought a much greater difference, showing the earnings on West bound to be $145,981 58, against $58,106 30 on East bound. The West bound, for the last four months of the half-year, has continued to exceed the East bound earnings.

The number of regular "Blue Cars," now in the line are 402.

There is every prospect that the business of the approaching fall and winter will require from 1,500 to 2,000 cars to accommodate the traffic. No time should be lost in providing this additional stock, either from the ordinary stock, or by extending the number of regular "Blue Cars."

The third rail over the G. W. R. and the iron ferry boat have proved a perfect success; so that, in entering upon the second half-year, no experiments have to be tried or doubts solved. The troubles, trials and difficulties that attend the openings of all new undertakings of such magnitude have been overcome, and with the continued hearty co-operation of the general officers and employees of the line, its future success is fully guaranteed.

St. Louis Horse Railroads.

The following is a statement of the gross earnings of the several street railroads in St. Louis for the year 1866, taken from the United States Assessor's books:

Citizens (Franklin avenue)	$118,343
Missouri (Olive street)	116,088
People's (Fourth street) 11 months	100,574
St. Louis (Fifth street)	238,178
Tower Grove (Third street)	2,495
Union (Locust street	71,191
Bellefontaine, 2 months	4,441

Virginia and Tennessee Railroad.

The Virginia and Tennessee Railroad is one of the most important railroads of the country south of the Potomac, and from its geographical position constitutes a large section of the continuous line between Norfolk on the Atlantic Seaboard and Memphis on the Mississippi, now to all intents and purposes a consolidated through line of transportation. The report of the company owning the road closes with June, 1866, and its antiquity would exclude any notice of it on the pages of the JOURNAL, were it not for the importance of its contents and the desire we naturally have to put on record the doings it publishes. Indeed it is seldom possible to procure southern reports until somewhat aged, nor is it probable that we shall hear again from this company for at least another six months. The annual meeting is not held before the middle of October, and it takes some time to set the type for the voluminous report usually issued by the officials.

This road extends from Lynchburg to the Tennessee line 204½ miles, and has a branch to the Salt Works in Washington County of 9 miles. The operations of the road for 1865–'66, were not commenced in full till late in July, 1865, and virtually the year's earnings were the product of eleven months. The following compares the operations and results of the years ending June 30, 1860 and 1866:

	1859–'60.	1865–'66.
Miles in operation	213½	213½
Tonnage per mile of road	318½	217
Passengers " "	512	286
Receipts " "	$3,468 00	$2,604 32
Expenses " "	1,838 00	2,164 82
Net gain " "	1,630 00	439 50
Rate per cent. of expenses	53	83
Miles run by trains	480,093	278,839
Average receipts per mile, cts.	1.69	1.99
" expenses " "	0.89	1.59¾
" net gain " "	0.80	0.39¼

The operating account for 1865–'66, shows the following results:

Passenger earnings	$254,372 55
Freight "	283,730 20
Express "	48,858 92
U. S. mail "	15,374 99
Telegraph "	2,677 10
Sundries	1,508 31
Total earnings	$556,022 07
Conducting transportat'n. $258,004 80	
Maintenance of way 361,116 41	
" of machin'y 143,306 69	
General expenses 25,401 87	
Total expenses $787,829 77	
Of which were extraordinary 325,689 56	
	462,190 21
Earnings less ordinary expenses.	$93,831 86

The number of passengers carried one mile, was 4,232,339, and the number of tons moved one mile, 4,263,934.

The business of the road since its first opening in January 1852, is thus given:

	Miles of road.	Passengers. Number.	Passengers. Mileage.	Freight. Tons.	Freight. Mileage.
1852..	32	.....	.....	3,999	.....
1853..	58	29,208	.....	19,241	.....
1854..	85	54,435	.....	25,316	.....
1855..	130	64,003	2,627,000	27,511	2,125,894
1856..	162	67,851	2,886,850	32,875	2,680,206
1857..	213½	45,510	2,314,662	32,453	3,133,719
1858..	213½	72,194	4,461,589	51,800	.....
1859..	213½	98,554	9,259,016	59,154	7,133,719
1860..	213½	110,489	10,392,309	68,062	7,193,499
1861..	213½	129,789	15,377,836	60,590	6,550,577
1862..	213½	197,106	25,253,789	67,339	8,263,421
1863..	213½	311,974	27,662,857	144,921	9,378,888
1864..	213½	300,864	26,780,823	135,860	7,801,870
1865..	213½	125,762	19,534,677	63,662	8,796,028
1866..	213½	58,344	4,232,339	46,247	4,263,934

The receipts and expenses for the same years were as follows:

Year end'g June 30.	Receipts.—Frt. Trains.	Pass. Trains.	Total.	Expenses of operating.
14½ years	$6,350,991 26	$6,962,442 46	$13,313,433 72	$8,475,870 89
1852(6 mos)	$9,196 57	$14,304 86	$23,500 48	$15,663 14
1853.....	63,147 65	46,031 96	109,179 61	66,531 26
1854.....	96,758 87	67,188 55	163,947 42	100,792 19
1855.....	149,915 62	106,004 63	255,920 25	129,590 85
1856.....	188,349 15	133,699 45	322,048 60	156,972 50
1857.....	190,176 10	108,302 28	298,478 38	160,127 86

1859.....	323,990 24	349,008 06	672,998 30	394,135 44
1860.....	336,942 67	402,883 84	739,826 51	391,529 89
1861.....	284,592 48	504,152 14	788,744 62	399,414 66
1862.....	403,599 83	647,761 48	1,051,361 31	462,429 81
1863.....	719,557 76	1,062,134 80	1,781,692 54	722,486 22
1864.....	1,236,622 67	1,553,095 87	2,789,618 54	1,777,551 32
1865.....	1,844,480 18	1,447,477 21	3,291,907 37	2,990,504 76
1866.....	238,780 20	321,291 87	556,022 07	462,190 21

Mail, express, extra baggage and other earnings are included in passenger train receipts, of which they generally amount to one-eighth the total.

Regarding the financial and material condition of the company, the President in his report says —"comparing the present condition of your road with that of 1860, you will find as follows:

Your funded debt June 30, 1860	$3,175,000 00
" " June 30, 1866	2,201,660 00
Decrease	$973,340 00
Floating debt less cash resources, June 30, 1860, was	$331,428 71
Floating debt less cash resources, June 30, 1866, was	349,121 55
Increase	$17,693 89

Since 1860 your financial condition has improved nearly $1,000,000. Your road bed is in as good condition, your machinery and rolling stock are about equal, and with the exception of the depot houses and a few remaining bridges, your whole road is in as good condition as in 1860. Your business is daily improving, and the earnings of the last month (Sept., 1866,) were greater than those for any month previous to the war. Your business is growing rapidly; the earnings for the present year will probably be $850,000, and allowing 55 per cent. for running expenses, you will have $382,500 net revenue with which to pay interest, and have a balance of $200,000 for other purposes."

The following is an abstract from the general balance sheet:

Capital stock, by State.	$1,800,000 00	
Capital stock, by individuals	1,141,790 70	
		2,941,790 70
Preferred stock ($500,000) by State		555,500 00
6 p. c. bonds, int. Jan. and July:

A general history of this company will be found in the JOURNAL of August 17, 1861.

President.—R. L. OWEN.

Directors.—R. L. Owen, John R. McDaniel, and David Graham.

Treasurer.—M. C. JAMES.

Gen'l Sup't.—J. W. GOODWIN.

Interest and Dividends.

The Delaware and Raritan Canal, and Camden and Amboy Railroad and Transportation Companies have declared a dividend of five per cent., on the full stock, and in like proportion on the part paid stock, free of United States tax, payable August 1, at their offices in New York and Philadelphia.

The New Jersey R. R. and Transp. Co. have declared a semi-annual dividend of five per cent., on the full stock, and $2 per share on the scrip stock, payable, free of U. S. tax, on the 1st of August.

The Philadelphia and Trenton R. R. Co. have declared a semi-annual dividend of five per cent., payable August 1, clear of tax.

The Cleveland, Columbus and Cincinnati R. R. Co. have declared a dividend of four per cent., payable, free of U. S. tax, August 1, at the office of the U. S. Trust Co., N. Y.

The Hazleton R. R. Co. have declared a dividend of $1.50 per share, (three per cent.,) payable, free of U. S. tax, at their office in Philadelphia, on the 5th of August.

The Connecticut and Passumpsic Rivers Railroad Co. have declared a semi-annual dividend of three per cent., payable July 22.

The Buffalo and Erie R. R. Co. have declared a dividend of five per cent., payable, free of U. S. tax, on the 1st of August, at the office of the Farmers' Loan and Trust Co., N. Y.

The directors of the Ogdensburg and Lake Champlain Railroad Company have voted to pass the August dividend.

Delaware, Lackawanna and Western R.R.

This road is 113 miles in length, extending from Great Bend to the Delaware River. The length of double track is 30 miles; and of sidings, (including tracks to and at mines,) 40 miles. The weight of rail per yard is 65 lbs. The company have 85 locomotives, 27 passenger, 5 baggage, mail and express, 252 house, 445 flat and 5,038 coal cars.

The receipts from operations of this road for the fiscal years ending October 31, 1865 and 1866, have been as follows:

	1865.	1866.
From passengers	$235,380 71	$244,170 57

President.—A. Stone, Jr.

Directors.—A. Stone, Jr., S. Witt, H. B. Payne, T. M. Kelley, W. Collins, J. H. Wade, G. B. Ely, H. E. Parsons, James Miles, J. W. Wetmore, W. Gibson, E. M. Gilbert and C. P. Wood.

Secretary and Treasurer.—George B. Ely.

Superintendent.—H. Nottingham.

Grain Trade of San Francisco.

The receipts and shipments of flour and grain at San Francisco, of California product, during the year ending June 30, 1867, were:

	Receipts.	Exports.
Wheat, 100 lb. sacks	5,214,196	3,643,505
Barley "	767,937	166,212
Oats "	326,119	88,414
Flour, bbls	301,449	485,493

The following is a comparative statement of the receipts and exports at the close of each harvest year, June 30, from 1861 to 1867:

Receipts.

	Wheat, 100 lb. Sacks.	Barley, 100 lb. Sacks.	Oats, 100 lb. Sacks.	Flour. Bbls.
1861	2,164,320	671,414	305,218	122,809
1862	1,451,465	612,014	343,808	111,269
1863	1,890,777	435 945	172,896	149,825
1864	1,843,820	623,266	304,564	99,298
1865	509,163	415,944	255,839	61,670
1866	2 138,442	984,208	323,528	167,316
1867	5,214,196	767,937	326,119	301,449

Exports.

	Wheat, 100 lb. Sacks.	Barley, 100 lb. Sacks.	Oats, 100 lb. Sacks.	Flour. Bbls.
1861	1,528,226	316,795	102,541	179,652
1862	775,573	132,805	149,822	82,601
1863	1,159,748	30,424	39,511	141,488
1864	284,941	42,292	85,951	158,225
1865	29,818	3,104	3,511	52,424
1866	1,044,826	338,106	115,818	249,857
1867	3,643,505	166,212	88,414	485,493

New Orleans, Opelousas and Gt. Western Railway.

In accordance with resolutions of the Board of Directors, dated respectively March 1st and June 6th, 1867, the Treasurer is now prepared to issue the second mortgage bonds of the company for the coupons past due on the first mortgage bonds. We hope that our capitalists will promptly come forward, and by taking these bonds, render a necessary assistance to one of our greatest public interests, as we believe that this road is destined to be the stepping stone to the future prosperity of New Orleans, and that it is the duty of all to foster and assist it by every legitimate means.—*N. O. Com.*

Von Jeinsen's Patent Self-Detaching Car Coupling.

We give below the results of a series of experiments which were made with this Coupling at Elizabethport, N. J., on the 12th inst., under the auspices of the Central Railroad Company of New Jersey. The following is an illustrated description of this invention:

Fig. 1 is a side-view of the coupling, as it appears when ready for use; Fig. 2 shows the coupling detached, and one of the cars off the track; Fig. 3 is a longitudinal section of half the coupling, showing the construction of the interior parts. A A represents parts of two adjoining cars, coupled together by the shackle-bar B. This shackle-bar is made in the ordinary form or shape, and it catches over the coupling pins, C, C, which are pivoted to turn on the rod, D. This rod slides back and forth in suitable guides, E, E, secured to the under surface of the platform of the car, and to its outer end is attached the head, F, which may take the place of a buffer.

The guides, E, E, are provided each with two rigid bearings, *p*, *p*, and with one movable bearing, *q*, through which the rod, D, slides freely. The movable bearing, *q*, is fitted into a segmental slot, *r*, so as to allow the bearing, together the rod, D, and coupling pins, C, C, to traverse a short distance in a horizontal plane, or in a plane parallel to the surface of the guides, E, E. The bearing, *q*, is provided with a slot or recess at *a*, *a*, to receive the rib or shoulder, *b*, *b*, which projects from the coupling-pin, so as to prevent the same from turning on the rod until the same arc is drawn out far enough to bring the end of the rib, *b*, *b*, clear of the recess, *a*, *a*. The position of the rod,

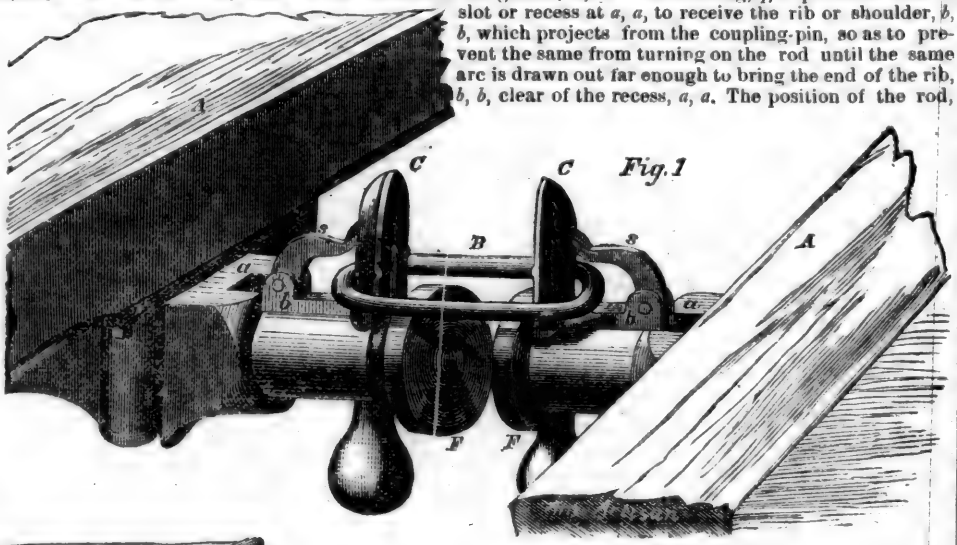

Fig. 1

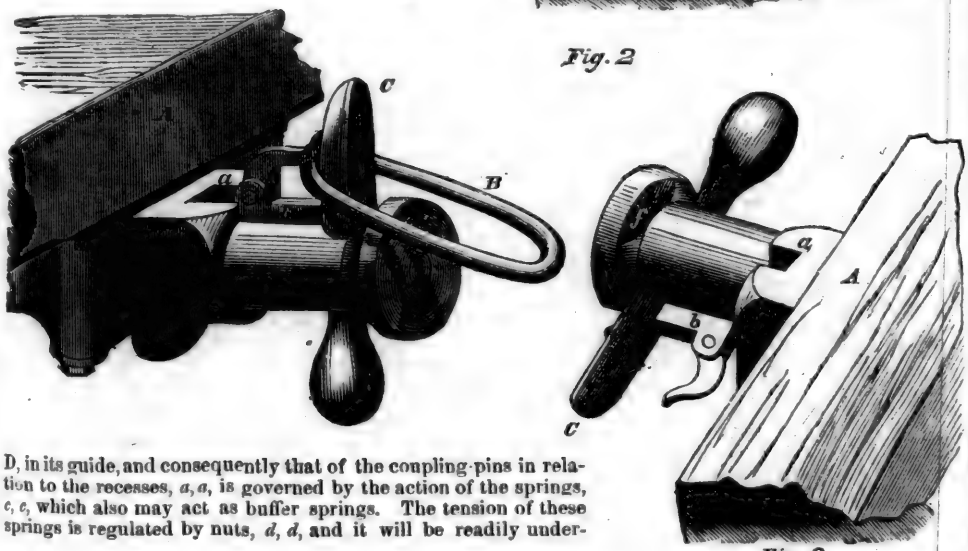

Fig. 2

D, in its guide, and consequently that of the coupling-pins in relation to the recesses, *a*, *a*, is governed by the action of the springs, *c*, *c*, which also may act as buffer springs. The tension of these springs is regulated by nuts, *d*, *d*, and it will be readily understood that by screwing up and unscrewing the nuts *d*, *d*, the power which retains the shoulders of the coupling-pin in the recess, *a*, *a*, is increased, and *vice versa*; and by these means the power required to lift the coupling-pins over and release the shackle-bar can be regulated at pleasure. As long as both cars remain on the track, the coupling-pins are retained in an upright position either by the recesses, *a*, *a*, or by the strain of the shackle-bar itself and the cars are not liable to become uncoupled by any slight casualty. By giving to the bearing, *q*, a traverse motion, the cars are free to move on a curve without getting uncoupled. But if one of the cars runs off from the track, the coupling-pins, C, C, are exposed to a lateral strain, whereby one or the other, or both, become disengaged from the recesses *a*, *a*, so as to turn on the rod, D, and consequently the shackle-bar is released and the cars are uncoupled. The shackle-bar is retained on the coupling-pins by guards, *s*, hinged to the hubs of said pins, the tail ends of the spring-catches, which secure these guards, being retained by recesses, *f*, in the head of the rod, D. The edges of the recess are rounded off or cam-shaped, and if one of the coupling-pins turns on its rod the tail end of the spring-catch slides up on the rounded edge of the recess, so that the spring-catch is made to release the point of the guard, allowing the same to open and to set the shackle-bar free. The guard is intended to be made heavy enough and of such a shape that it will reassume its original position as the coupling-pin is righted up, and thereby the point of the guard will be brought in position to be caught by the spring-catch when the tail of the spring-catch drops back into the recess, *f*.

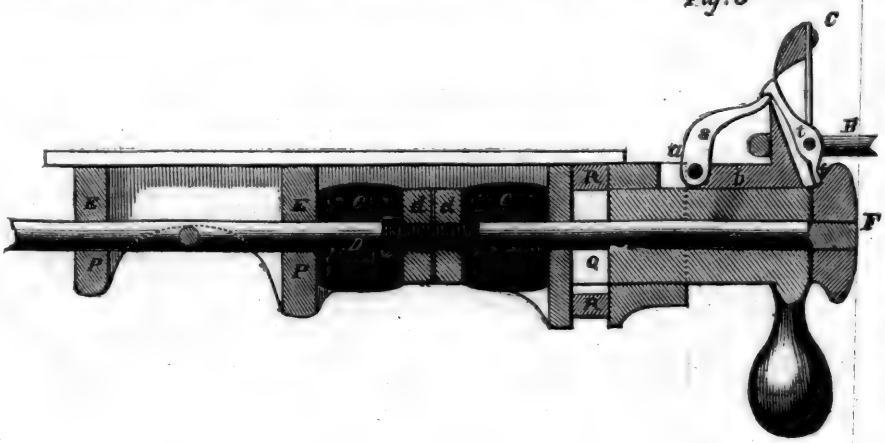

Fig. 3

This coupling was patented by Ernst Von Jeinsen, on the 19th of February, 1867, and in the recent experiments with it on the Central Railroad of New Jersey, at Elizabeth, a train of coal-wagons, two or three of which were coupled with the contrivance described, was made to run at a high speed, and an obstruction on the rails was placed in such a manner that it would throw one of the wagons having the patent coupling off the track. This was done by having an inner wooden lagging put on the inside of the wheels of the wagon with the patent coupling, which when it struck the obstruction threw the wagon off the track. When the wagon had run off some few feet, in which it had assumed an angle with the forward and rear cars, it was thrown out altogther from the train and the rear cars moved on without any impediment. This test was severely made three different times, and in each case the wagon was uncoupled and unconnected from the train, and this while the latter was at high speed. The same result is anticipated if the locomotive and tender should meet with an obstruction; the engine would be thrown from the track, when the patent coupling would immediately act, and prevent the cars from following it. The advantages of such a coupling are self-evident in the preservation of life and property and in the prevention of those accidents which are too often disastrous to travelers and railroad companies. The present method of coupling cars is attended with danger and many deaths have occurred among the employees on railroads occasioned by their being crushed between the cars when in the act of coupling. The arrangement here described allows the brakesman or employee to couple or uncouple cars while standing on the platform, where he is in no danger.

Any further information respecting this coupling can be obtained from Messrs. Frank & Gans, No. 14 Wall Street, New York Cit

American Railroad Journal.

Saturday, July 27, 1867.

Stock Exchange and Money Market.

A steady accumulation of money has been reported from day to day at this point, through the continuance of the domestic exchanges in favor of the metropolis, the activity of the Government in making disbursements, and the want of regular employment for capital, because of the comparative inactivity in general business. The main demand for accommodation has been from the dealers at the Stock Boards, where speculation has been quite active. To such borrowers, money has been freely offered at 5, and to some extent as low as 4 per cent., on railway and miscellaneous stock collaterals. The Government houses were not required to pay over 4 per cent., and for some days past, the leading borrowers, in this line, have been getting aid as liberally as they were in want of it at 3@3½ per cent., chiefly through private channels, the banks being unwilling to yield a point, even to court custom. Discounts have been quite dull. Choice to prime short date paper has been scarce and in request at 6@6½ per cent. per annum, as the ruling figures. Other grades have not been inquired for, to any considerable extent, though some business has been transacted in good to fair names, at from 7@8½ per cent. per annum. The banks are not partial to business paper at present, and their current-discount work is unusually light. They find their best customers among the stock houses, to whom they are more than ordinarily liberal of accommodation. Government has an unusually large cash reserve available to meet its maturing obligations. The department has decided to pay off in "current funds" the matured or maturing compound interest notes. This movement will increase the supply of money available in the open market for speculative purposes, and will serve to protect the market from any abrupt change, because of any probable call for currency from the interior, to be employed in forwarding the harvest products to market. It is not at all improbable that Government will also pay off in currency any of the August Seven-thirties that may be outstanding on the 15th proximo, as on these the department will regard the privilege of conversion as having been waived by the holders. The city banks, last week, gained $1,568,889 in their deposits, and $945,598 in their legal tender reserve, while they lost $1,517,704 of specie. Their loans were extended $1,667,246, and the circulation was reduced $78,921. The specie reserve of the banks is now $11,197,710, against $10,880,147 same time last year. The city bank deposits are now $199,435,952, against $213,049,079 week ending July 21, 1866. The legal tender reserve amounts to $73,441,301, against $80,524,992 same time last year. The circulation now stands at $33,574,948, against $27,579,020 same time last year. The loans are now $249,580,255, against $255,965,018 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $81,971,825 a day, against a daily average of $86,893,264 the preceding week, and $82,346,998 the week ending with July 6. The current week's exchanges average $79,437,647 a day.

National Bank notes to the amount of $46,350 were issued last week, making the total issue to 1,671 banks thus far, $303,252,626, against $282,555,440 at the close of the fiscal ending year, June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $4,465,062, leaving, with the existing 1,650 banks, (having an aggregate capital of $422,913,861,) an actual circulation at this date, of $298,787,564. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $340,631,500; and for the public deposits, $38,897,950—making a total of $379,529,450. The Treasury Department last week redeemed and destroyed $385,400 of worn and mutilated fractional currency, and issued $475,090.

The U. S. Sub-Treasury receipts, week ending with July 20, were $17,060,498, including $1,901,280 from customs duties; payments, $17,330,480; balance at the close of the week, $130,311,621, against $130,581,603, at the close of the preceding week, showing a decrease of $269,982. The

business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $8,811,010 including $468,648 from customs, and payments, $7,812,546; on Tuesday, receipts, $1,757,895 including $599,130 from customs, payments, $839,990. The balance at the close of business on Tuesday stood at $132,227,990, against $130,632,610 a week previous.

The Philadelphia Bank movement the past week shows an increase in loans, of $348,017; an increase of $22,345 in specie; an increase in legal tenders of $373,946; an increase of $285,192 in deposits; and a decrease of $4,119 in circulation. The Bank Clearings show a decrease of $1,795,914, and the balances, an increase of $75,228.

Government revenues were on a moderate scale, through the past week. In the line of customs, the income is increasing this week quite encouraging, being at the port of New York alone, over half a million in coin a day. The excises, last week, yielded $3,230,376, against $4,875,294, the preceding week; customs at the port of New York $1,901,280, and at the outports, about $630,000 (in coin) more, making the grand total income for the week equal about $6,774,168 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with July 30, 1867, were $265,853,195. The receipts thus far in the new fiscal year, which began on the 1st inst., have been $19,500,000.

The Government deposits in the National Banks in the Atlantic cities, on July 1, were reduced to the following sums:

New York City and State	$5,005,090
Philadelphia	1,644,962
Boston	2,218,219
Total	$6,863,271

Or less than 2 per cent. of the aggregate gross deposits and country bank balances reported by the foregoing banks—$367,491,988.

Gold has been decidedly more abundant in the open market, since our last, and the price has been less firm. The demand has been moderate on speculative account, though fair for custom house and export purposes. It is believed in the street that Government has been selling gold to some extent, probably to the amount of the daily income from customs. This circumstance has tended to dampen the ardor of the operators for a rise, many of whom are pretty heavily laden with speculative ventures, which, despite the ease in money, cost seriously to protect. The price has receded from 140⅜@139⅜, and closes heavily. The *Scotia* from this port on Wednesday, for Liverpool took out $1,765,151 in specie. The total imports of specie from Europe, and other foreign ports since Jan. 1, 1867, have been $1,597,057. The customs demand for Gold last week, averaged $316,879 a day; thus far, this week, it has been equal to $533,919 a day, or equal to a weekly aggregate of $3,203,514. The arrivals of specie from Europe, Havana and other foreign ports, during the past week were $1,120, and from California, $1,162,330. The total customs revenue of the Government, in coin, at this port, thus far in the current calendar year commencing with Jan. 1, 1867, has been $66,055,811, against $75,338,732 same time in the preceding fiscal year. The total receipts of California gold at this port since Jan. 1, 1867, have been $15,955,870, against $22,605,203 same time last year, showing a decrease this year, of $6,649,333. The exports of specie from this port, last week, were $2,460,433. The total outflow of specie from the port, since Jan. 1, 1867, has been $33,086,053, against $49,799,151 same time in the preceding year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $1,709,000, making the total coin interest disbursements through the Government office, since Jan. 1, 1867, $37,702,329, against $28,501,548 for the preceding fiscal year. The specie exports from San Francisco, from Jan. 1, to June 29, reached $19,533,889, against $20,961,963 same time last year, showing a decrease, in 1867, of $1,429,581.

Business in foreign exchange has been moderately active, and strictly prime drafts, which have not been abundant, have been firm in price. After the closing of the freight mails on Wednesday, the market was very dull, and there was less buoyancy in rates. Bankers' 60 day bills on London closed steadily on Wednesday at 109⅞@110¼, and on Paris to 5.17½@5.12½; sight bills on London to 110¼@110⅝; and on Paris to 5.12½@5.10. The offerings of produce bills have been fair this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $3,892,324, making the total value of exports since Jan. 1, 1867, $108,071,191, against $116,123,753 same time in the preceding year.

Government securities have been in more demand at former prices, since our last. The inquiry has been mainly for home investment purposes. Banks and bankers were extensive buyers, through the early part of the week. Toward the close, the market became tamer, though quotations were very well supported. The Treasury agents are redeeming all of the matured compound interest notes that are presented for the purpose at the local office. They are also giving new 5-20 bonds for the August Seven-Thirties at par and an equitable adjustment of interest, to the full extent of the moderate applications for such an exchange. U. S. sixes of 1881 closed here on Wednesday at 110¼@110½ U. S. Five-twenties of 1862, 111½@111¾; U. S. Five-twenties of 1864 at 109⅜@109⅝; U. S. Five-twenties of 1865 at 109⅜@109⅝; U. S. Five-twenties of 1865, consolidated, 108½@108⅝; U. S. Five-twenties of 1867, 108½@108⅝; U. S. Ten-forties at 102¼@102⅜, and U. S. Seven-thirties at 107¾@108¼. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

August, 1864	119	August, 1865	115⅝
October, 1864	117⅞	September, 1865	115⅛
December, 1864	117⅛	October, 1865	114⅝
May, 1865	116⅜		

Railway and miscellaneous share property has been unusually brisk and buoyant, since our last. The speculative demand has been quite animated carrying prices to a much higher range than that current a week ago. The extraordinary facilities afforded, by a very liberally supplied and cheap money market, for protecting speculative ventures, give the operators for a further rise unusual advantages. The *bull* interest is unquestionably the predominating one in the street at present.

Produce and merchandise movements have been on a more extensive scale, during the week. Breadstuffs have been in better supply and demand at easier prices, closing irregularly. Provisions have been quite buoyant in the line of hog products, which have been in lively speculative request. Cotton has been firmer and more sought after. Middling grades left off here on Wednesday buoyantly at 27@28½ cents per lb. as extremes. The stock of cotton now here is estimated at about 70,000 bales. The receipts at the port this week, have averaged about 1,200 bales a day. The receipts since the commencement of the current cotton year, Sept. 1, have been 621,700 bales, against exports of 459,447 bales. The receipts at all the shipping ports from September 1, to latest mail dates have been 1,841,500 bales, against 1,981,745 bales same time last year; exports, 1,513,000 bales, against 1,487,323 bales same time last year; estimated stock at latest dates, 165,000 bales, against 284,368 bales same time last year. In foreign merchandise, transactions have been more liberal, and in the line of dry goods and groceries, prices show more steadiness. The total imports of foreign dry goods, last week, were $1,320,641, and the total amount marketed $996,338. The value of foreign merchandise imported last week, was $1,908,815—making the grand total specie value of last week's imports of dry goods and merchandise, $3,229,456, and since Jan. 1, 1867, $141,178,880, against $171,411,861 same time in the preceding fiscal year. The ocean freight market has been rather dull, owing to the advanced claims of shipowners. On Wednesday the market was decidedly brisker, with 543 vessels of all classes in port. For Liverpool we quote flour at 1s. 6d.@1s. 9d. per bbl.; grain at 3½c.@4d. per bushel; cotton at ⅛@¼d. per lb.; and heavy goods at 12s. 6d. @20s. per ton, all by sailing vessel.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	July 10.	July 17.	July 24.
Consols	94¾	94⅜	94¼
U. S. 5-20's of 1862	73	72⅝	72¾
U. S. 5-20's of 1865	71	70¾	71
Erie	44¼	46¾	46¾
Ill. Central	80¼	76¾	76¾

The New York exports, exclusive of specie, for the week ending July 23, and since the beginning of the year, compare as follows:

	1866.	1867.
For the week	$2,867,787	$3,892,324
Prev. reported	113,255,966	104,178,867
Since January 1	$116,123,753	$108,071,191

The New York imports for the week compare as follows:

	1866.	1867.
Dry goods	$2,378,815	$1,320,641
Gen. merchandise	3,875,179	1,908,815
Total for the week	$6,253,994	$3,229,456
Previously reported	165,157,867	137,949,424
Since January 1	$171,411,861	$141,178,880

The balance in the Sub-Treasury on Wednesday was $131,114,601 90.

Self-Detaching Car Coupling.

We give elsewhere an illustrated description of this invention, the great merits of which are evident. We do not hesitate to recommend the same to railroad companies, being convinced that by the use of Mr. Von Jeinsen's Coupling, not only the safety of the travelling public will be greatly enhanced, but also that all companies will find it to diminish to a great extent their expenditures for repairing and rebuilding broken cars. The many casualties to brakemen in coupling cars under the present system will henceforth become unknown on our roads. Thus the benefits of this invention will be felt in all quarters, and we earnestly hope that our railroad corporations will adopt the same without delay.

Lynchburg and Danville Railroad.

At a meeting of the directors of this company, held at Lynchburg, Va., on the 11th inst., it was ordered that the Chief Engineer be directed to proceed at once to locate the road on the route adopted, near Pittsylvania Court House, and that he advertise for sealed proposals for the construction of twenty-five miles of the road, (from Lynchburg to Staunton River,) including Staunton River Bridge, near the Pocket Ford. Said proposals to be opened and examined on the first day of November, 1867. And that he prepare, as soon as practicable, before the first of November, plans, profiles and specifications of the work for the inspection and information of all persons concerned.

In obedience to the above order, on and after the 15th day of October next, plans, profiles and specifications of the work will be open for inspection at the office of the Chief Engineer, W. W. Blackford, Esq., Lynchburg, Va., to whom sealed proposals may be addressed.

Lebanon Springs Railroad.

T. W. Park, Esq., of Bennington, Vt., who has undertaken the construction of this work from Bennington, Vt., to Chatham Four Corners, N. Y., is prepared to sub-let the work in such quantities as parties offering may desire. The road is fifty-six miles long, in a well settled and healthy country, and presents a variety of work. Heavy earth excavations and embankments, rock cutting, and light side work for wheelbarrows or scrapers. The greater portion is of a very desirable character. The road must be constructed rapidly, and contracts will be let at prices that will pay, and payments made promptly.

☞ The proposition by the Flint and Pere Marquette Railroad Company, to take the construction of the Bay City and East Saginaw Railroad for a majority of all the stock of the road, has been accepted. It is now expected to complete the road by November.

☞ Our new National and State Securities Tables, published on page 708 of this week's issue, will attract attention.

Railroad Earnings.--Weekly.

The earnings of the Michigan Central Railroad for the 2d week in July, 1867, were.. $64,853 39
Corresponding week of previous year.. 72,081 01

Decrease $7,227 62

The earnings of the Chicago and Rock Island Railroad for the 2d week in July, 1867, were..... $64,800 00
Corresponding week of previous year.. 69,842 00

Decrease..... $5,042 00

The earnings of the Chicago and Alton Railroad for the second week in July, 1867, were $91,947 00
Corresponding period previous year.. 82,281 00

Increase..... $9,666 00

The earnings of the Detroit and Milwaukee Railroad for the week ending July 18th, 1867, were $31,543 00
Corresponding week of 1866..... 27,720 00

Increase..... $3,723 00

The earnings of the Atlantic and Great Western Railroad for the second week in July, 1867, were..... $95,888 00
Corresponding week previous year... 101,886 00

Decrease..... $5,998 00

The earnings of the Michigan Southern and Northern Indiana Road for the 3d week in July, 1867, were..... $64,321 00
Corresponding week of 1866 ..... 70,546 00

Decrease..... $6,225 00

The earnings of the Marietta and Cincinnati Railroad the 2d week in July, 1867...$21,563 00
Corresponding week previous year.... 21,044 00

Increase $519 00

The earnings of the Western Union Railroad for the 2d week in July, 1867. .....$14,438 20
Corresponding week previous year.... 21,177 25

Decrease $6,739 05

The earnings of the Chicago and Northwestern Railroad for 3d week in July, 1867 ...$209,465 00
Corresponding week previous year .. 181,181 00

Increase $28,284 00

The earnings of the Virginia and Tennessee Railroad for the first week of July, were $14,109, an increase of $2,665 on the same week in 1866. The increase for the second week of July is $3,571, and for the two first weeks of the fiscal year an increase of $6,235 on same time last year.

Journal of Railroad Law.

LIABILITY OF COMMON CARRIER CONTINUES TO DELIVERY.

In the case of Fenner *vs.* Buffalo and State Line Railroad Company lately decided by the Supreme Court at Rochester, the facts were these, goods destined for S., a place beyond Dunkirk, but directed to F. at Dunkirk, were transported by the defendant, upon its railroad, from Buffalo to Dunkirk. On the day of their arrival at the latter place, the goods were called for by the carrier who was to carry them from Dunkirk to S. The defendant, owing to other engagements of its agent, was not ready to make the delivery when called for; and it was mutually agreed, for the convenience of both parties, that the goods should remain in the defendant's warehouse, where they were, until the next morning. During the night, the warehouse took fire, by accident, and the goods were consumed. The court held that the liability of the defendant as a common carrier continued, until the property should be actually delivered to the next carrier.

The case was decided upon an appeal from a judgment entered upon the report of a referee. The action was brought against the defendant as a common carrier, to recover the value of goods which it had undertaken to transport from Buffalo upon its railroad, and deliver at Dunkirk, and which goods, as the plaintiff claimed, were, by the negligence and carelessness of the defendant, destroyed by fire, while in the defendant's care and custody, at Dunkirk. Upon the the trial it was proved that on the 15th day of May, 1861, at the city of New York, the plaintiff delivered certain household furniture, bedding and clothing, of the value of five hundred and forty-seven dollars and eighty-three cents, to a common carrier at the city of New York, marked as follows: "E. P. Fenner, N. Y." That said goods were delivered by such carrier, at the city of Buffalo, to the defendant, marked as aforesaid, and were by said defendant carried on its railroad from Buffalo to Dunkirk. That said goods were in fact in course of transportation to Sinclairville, Chautauqua County, New York, but that the defendant had no notice thereof, until they were called for by the carrier Austin, as hereinafter set forth. That they arrived at Dunkirk during the afternoon of the 24th of May, and were unloaded by the defendant from the cars, and properly stored within its freight house at that place, ready for delivery, The freight house was a substantial wooden building, as secure as wooden freight houses usually are. That during the latter part of the same afternoon one Alfred Austin, who was a teamster engaged in the business of carrying goods by steam between Dunkirk aforesaid and Sinclairville, Chautauqua County, and who was authorized by the plaintiff to obtain said goods, called at the office of the defendant, at Dunkirk, with his team, and asked for said goods, and having ascertained that they had arrived, paid the freight thereon being the sum of thirteen dollars and fifty-one cents, and signed a receipt therefor. That he then went to Richard Hays, the employee of the defendant, whose business it was to attend to the delivery of such goods, and found him engaged in the delivery of goods to other parties. That it was then nearly six o'clock, the hour at which said freight house was ordinarily closed; and the said Austin having occasion to be in Dunkirk the next morning for other goods, it was then and there arranged between him and Hays that Austin should not wait for the plaintiff's goods that night, but should call therefor in the morning. That thereupon said Austin went away. That during the ensuing night the freight house, in which said goods were stored, was accidentally destroyed by fire, which caught from an adjacent building, and said goods wholly consumed. That in preservation of said goods, from the time the same were stored as aforesaid, the defendant used ordinary care and diligence. Upon motion of the plaintiff's counsel, the complaint was amended, inserting after "Dunkirk aforesaid" the words "to be further conveyed from there to Sinclairville, their ultimate destination." And thereupon, the proofs being closed, the counsel for the defendant asked the referee to decide that the plaintiff was not entitled to recover in this action. The referee refused so to decide, and the defendant's counsel excepted. The referee found the above facts substantially, and as a conclusion of law, he found and decided that the defendant was liable as a common carrier, for the damages sustained by her in the loss of said goods, and that the plaintiff was entitled to judgment for $561 34, the value of said goods, including said freight moneys together with costs, and ordered judgment for the plaintiff, for that amount, from which judgment the defendant appealed.

By the court, JOHNSON, J. The decision in Gould *vs.* Chapin and others, (20 N. Y. Rep. 259) is entirely decisive of this case. In that case the court of appeals overruled the decision of this court, and held the carrier liable until the goods had been actually delivered to the next carrier. The goods in that case had been held for a number of days for the next carrier, who had been repeatedly requested to come and take them, by the defendant. This case, upon the facts, is by no means so strong for the carrier as that. Here the goods were called for on the day of there arrival at Dunkirk, by the carrier, who was to transport them from that place to the place of their destination, and the freight and charges paid. The defendant owing to other engagements of its agent, was not ready to make the delivery when called for; and it was mutually agreed, for the convenience of both, as I understand the case, that the goods should remain and be delivered the next morning, as it was then nearly time for closing the storehouse in the evening. In such a case the liability of the carrier clearly continues, within all the cases in this state. The judgment must be affirmed.

Cobourg and Marmora Railroad.

The new railroad built by the Marmora Iron Mining Co., to connect their works at Marmora with Cobourg, was opened on the 11th inst. The new or northern section of the railroad is 9 miles in length, extending from the mines to a point on the Trent River, at the Narrows. The southern section is the old Cobourg and Peterboro' Railroad, is 14 miles in length, and reaches Rice Lake at Harwood. It has been put in repair and stocked by the proprietors of the mines at their own expense. The connection between the new and old roads is made by boat from the Narrows on the Trent River to Rice Lake at Harwood, a distance of 27 miles, the whole distance from Cobourg to the mines being 50 miles. Some 15,000 tons of ore were awaiting the completion of this road, for shipment to Cobourg.

Albany and Susquehanna Railroad.

As previousiy noted by us, the section of this road extending from Sidney to Bainbridge, in Chenango Co., a distance of about five miles, was formally opened on the 10th inst. After the repast, which had been prepared for the occasion by the citizens of Bainbridge, had been partaken of by the excursionists, J. H. Ramsey, Esq., President of the company, made the following brief address. He said:

The distance from Albany to Bainbridge, by the line of the railroad, is 108 miles, there being 32 miles yet to complete it to Binghamton. The road to this point passes through portions of Albany, Schenectady, Schoharie, Otsego, Dela-

ware and Chenango Counties, of which Schoharie, Otsego and Chenango, had no railroad before the construction of the Albany and Susquehanna. There is considerable of the grading and masonry already done between this and Binghamton, and the tunnel of 2,200 feet in length nearly completed, and it is expected the road will be extended twelve miles further during the coming fall to Ninevah, and the balance to Binghamton ready for the rails next Spring or Summer.

The total cost of the road and equipments to the present time, is $5,312,419 67, of which $424,561 12 has been expended on the work between this and Binghamton. The right of way with ample depot grounds, have been obtained for the entire line and paid for.

The road was opened to Schoharie in September, 1863; Cobleskill, January, 1865; Oneonta, August, 1865; Unadilla, March, 1866; and to Sidney, Ociober, 1866.

Total earnings for the year ending September 30th, 1864 ..... $97,861 07
September 30th, 1865 ..... 175,729 13
September 30th, 1866 ..... 385,198 86

For the months:	1865–'66.		1866–'67.
October	$36,019 06		$50,024 38
November	35,706 54		47,750 04
December	25,698 29		33,029 04
January	24,184 61		27,529 39
February	20,817 53		28,895 88
March	24,989 25		34,699 66
April	32,408 89		43,111 97
May	33,706 77		39,143 79
June	33,321 77	est.	40,000 00

The operating expenses have been about fifty-three per cent. of the earnings.

It is not necessary for me to go into a history of the enterprise and the difficulties which had to be encountered. They are familiar to you all. The people along the line, in their individual and town subscriptions, I venture to state, have contributed more liberally than along the line of any other road in proportion to the length, being about two million of dollars, which, with the million loan of Albany, the State aid of half a million, with the other means of the company, have thus far enabled them to prosecute the work. It is believed with the balance of State aid and the means that can be obtained from the bonds of the company, this road can be completed.

I congratulate the citizens of Bainbridge upon the completion of the road to this beautiful village, and trust soon it will be completed to Binghamton, when they will not only have the local benefits of the road, but the advantages of being upon a great through-line section—the east and the west to the Pacific.

Portland, White Mountains and Ogdensburg Railroad.

A correspondent of the Boston *Journal*, writing from Augusta, Me., under date of July 20th, says:

The visit of so many prominent and influential gentlemen from New York, Vermont and New Hampshire to Portland, as the past few days have witnessed, with a view of increasing the facilities of transportion by rail from the West to the "natural seaport," by the establishment of what is popularly known as the Portland, White Mountains and Ogdensburg Railroad, has awakened a deep and wide spread interest in the proposed enterprise. The new line of communication shortens the distance afforded by the existing route, and opens a more direct avenue. The proposed route, after leaving Portland passes up the valley of the Saco river through the Notch of the White Mountains to Littleton, N. H., thence across the New Hampshire line into Vermont to Montpelier, from which place the distance to Portland is lessened seventy-five miles; from thence to Ogdensburg, N. Y., and from thence to some point on the eastern shore of Lake Ontario, and from thence to Oswego. The preliminary surveys have been made, and the practicability of the route has been satisfactorily demonstrated.

The construction of the new route opens one continuous chain from Ogdensburg to Portland, without a link wanting. During the past year the business men of Portland have suffered materially from loss occasioned by the vexatious delay of freight from the West by the Grand Trunk road. The new enterprise promises relief, and it is intended that such means will be provided as will meet whatever demands may be made.

Railroads of the World.

In the following statement compiled from the latest accessible data, (chiefly as of Jan. 1, 1867,) we give the length of railroad in operation in the several counties of the world:

North America:	
United States	37,209
Canada	2,149
New Brunswick	201
Nova Scotia	115
Mexico	91
West India Islands:	
Cuba	409
Jamaica	14
South America:	
Columbia	48
Venezuela	32
Peru	83
Chili	392
Argentine Confederation	352
Paraguay	46
Brazil	479
British Guayana	60
Europe:	
United Kingdom	13,289
France	9,027
Spain	3,312
Portugal	467
Belgium	1,622
Holland and Luxemburg	868
Denmark	296
Sweden	1,071
Norway	44
Russia	2,927
Prussia	5,861
North Germany	1,107
South Germany	2,540
Austria	3,892
Turkey	171
Switzerland	902
Italy (Kingdom)	3,231
Roman States	109
Asia:	
Turkey in Asia	143
British India	3,604
Java	102
Ceylon	37
Africa:	
Egypt	402
Algeria	28
Cape Colony	85
Natal	2
Australasia:	
Victoria	384
New South Wales	158
South Australia	76
Queensland	59
New Zealand	17
Recapitulation:	
North America	39,765
West India Islands	423
South America	1,492
Europe	50,736
Asia	3,886
Africa	517
Australasia	694
Total miles of railroad in the world	97,513

To this mileage a third may be added for second track, sidings, turnouts, &c., and about 3,000 miles for city passenger railroads. It is impossible to estimate the length of mining and other industrial roads in use. The above summary embraces only such railroads as are operated by steam and locomotive power, and used for the public transportation of passengers and freight.

Forty years ago there was not a single mile of railroad in the wide world. Now there exists in equivalent single track a length sufficient to thrice girdle the earth at the equator. Four-fifths of this length have been constructed in the last 25 years.

National Railroad Convention.

A convention of the Presidents, Chief Engineers, and General Superintendents of the different railroad companies in the United States was held at Altoona, Penn., on the 18th inst. The convention was an adjourned meeting of the one that assembled at the St. Nicholas Hotel, New York, on the 8th of May, 1867, and the officers are as follows: J. Edgar Thomson, President; J. H. Sturgeon, Vice President; Bently D. Hasel, Secretary; T. J. Carter, L. J. Fleming, T. L. Jewett, executive committee.

The committee on railroad bureau held a prolonged session, during which a constitution and by-laws for the Government of the General Railroad Association was discussed and adopted; after which the convention adjourned until the first Thursday in October, at New York.

To Railroad Contractors.

Proposals will be received until the 27th inst., for the grading, bridging, tracklaying, ballasting and entire construction of the Union Railroad in mile sections or for the whole road, for single or double track, as may be required. Bids must be made by the cubic yard for the excavation, masonry, solid and loose rock and embankment. The iron must be of the best quality of American rails 60 lbs. to the yard. The road commences on the line of the Western Maryland Railroad near Owing's Mills, terminating at Tidewater, Canton, having a branch of a mile and a-half into the northwestern part of the city, in all about 17 miles. Specific bids will also be received for the entire road. Address Horace L. Brooke, Esq., President, 53 Exchange Place, Baltimore, Md.

☞ The Albany *Journal* says that the Western Railroad Corporation has just imported a quantity of iron from Wales, for track purposes, and two miles of it will be laid on the Pittsfield and North Adams road. The second track of the Western road is now completed from Washington to Becket, and trains will probably be run over this section within a fortnight. Several months however, will be required to blast away the rocks so that the remaining gap between Becket and Russell can be laid. When this is done, an unbroken line of double track will extend from Boston to Albany.

☞ A visit, by invitation, was recently made by a party of gentlemen, to the new turnpike road and railway up Mt. Washington. The party started from the White Mountain House, and proceeded in carriages four miles up the new turnpike to its junction with the old Brabrook road, near the foot of Mt. Washington. Thence it is two miles to the foot of the Railway, and three from there to the summit.

☞ The bill chartering the Portland, White Mountains and Ogdensburg Railroad has passed the New Hampshire House of Representatives.

☞ At a town meeting held in Winthrop, Mass., on the 22d inst., it was voted to loan the credit of the town to the amount of $25,000 in aid of a horse railroad to connect with Boston. The proposed line is from Point Shirley to the northerly end of the Metropolitan Railroad in East Boston, a distance of five and a half miles.

THE ELNATHAN SAMPSON

NEW AND IMPROVED

RAILROAD CAR WHEEL.

PATENTED, MAY 7, 1867.

This Car Wheel contains a lateral and conical Tread combined with the guiding flang, and being so constructed as to move the truck and cars over and past any curve in the Railway track with as much ease and freedom as though the entire Road were constructed upon an air line. The cone tread will take the track rail, against which the wheel seems to be pressed, while passing any curve, and the diameter increasing, of course the circumference increases, and therefore the greater distance over the outer rail will be gained without any sliding of the wheels upon the track or undue strain upon the car axle, journal boxes or bearings, truck frame, car wheels, or other parts of the running gear of the cars or of locomotive engine. The hitherto great amount of friction caused by the use of the usual or old car wheels upon long trains of passenger, or heavy freight trains is avoided or prevented, of course there will therefore be a great saving in the use of oil. There is much less wear of the track rail, and the lateral thrusts of cars against the track rails being done away with by the new wheel, there is much less liability to displacement of the rails, or of the loosening of the spike by which the rails are fastened.

This wheel will cost no more to manufacture than the old wheel, while it is certain that a much better and more reliable chill of the tread portion of the wheel is had than by the old way of casting wheels. This wheel can be put upon the old axles and trucks of Railroad Cars—there being nothing required to be new save the wheel.

Rights to Manufacture this Car Wheel can be had upon the most liberal terms of the owners of the Patent, ELNATHAN SAMPSON, EDWIN CHAMBERLIN and MARCUS P. NORTON, of the City of Troy, N. Y.

Several Licenses have already been granted for the manufacture of this Car Wheel.

The owners of this Patent have appointed, as a matter of convenience, EDWIN CHAMBERLIN, Troy, N. Y., Corresponding Secretary, to whom all communications for information should be addressed, which will receive prompt attention.

MEAD RUBBER COMPANY,

12 Vesey Street, New York.

MANUFACTURERS OF

INDIA RUBBER CAR SPRINGS AND STEAM PACKING.

Our Works being now under the management of a competent Superintendent, we are prepared to offer Springs of various qualities and prices to suit. Our A No. 1 Spring made of fine Para Rubber, and the Compound used by the Patentee, the late Fowler M. Ray, will be found to be cheaper than others made, from inferior stock and offered at lower prices.

Sample setts forwarded on application. All Springs fully warranted.

FOR SALE.

16 FLAT CARS—Broad Tread Wheels—Compromise—Just completed at Buffalo, N. Y.

These Cars are built in the most approved style, of the best White Oak Lumber.

Platforms 30 feet long, 8½ wide, Iron Trucks, Capacity 15 Tons, Warranted.

NEW YORK AND TROY

Steamboat Company,

FOR Albany and Troy, and all points north and east, EVERY EVENING, (Saturdays excepted,) at 6 o'clock, from Pier No. 44 North River, foot of Spring st.

N. B.—This is the cheapest, pleasantest and most direct route for Saratoga and Lake George, and, via railroads and steamers for Whitehall, Rutland, Burlington, North Adams, Cambridge, St. Albans, Ogdensburgh, Montreal, and all intermediate stations. Tickets sold, baggage checked, and state-rooms engaged at the principal hotels and offices on the wharf.

FOR SALE

3 LOCOMOTIVES, 4-81-2 GAUGE,

All thoroughly REBUILT by one of the best makers in the country, and ready for immediate use.

1—Cylinders 14x22, Link Motion, 4-56 in. Drivers connected, Copper Flues, Weight about 24 tons; 8 wheels Tender, 1800 gallons.

This Engine has always worked admirably; Steams freely with dry or green wood, works and wears perfectly smooth; Well springed and brassed all around. Proportions every way suited to power. A good and stylish model, all in excellent order.

2—Cylinders 15x20, Link Motion, 4-66 in. Drivers connected, Copper Flues, weight about 23 tons, 8 wheeled tender, 1,800 gallons.

Is a smart smooth working Engine, suitable for any work; has a good record throughout.

3—Cylinders 15x20 Hook Motion, 4-66 in. Drivers connected, Copper Flues, weight about 24 tons; Tender, 8 wheeled.

Every way perfectly sound, well brassed and springed up. All in fine working condition.

These Engines will be sold VERY CHEAP to close a transaction, and are GREAT BARGAINS to any company wanting this sized Engine.

KASSON & CO.,
62 Broadway, New York.

CHAPPELL MANUFACTURING COMPANY,

MANUFACTURERS OF

CHAPPELL'S PATENT STEAM VALVELESS PUMP OR

BILGE EJECTOR.

These Pumps are used for Steamships, Steamboats, Railroad Water Stations, and raising or discharging water, wherever steam power is employed. In case of fire, they are invaluable. As Bilge Ejectors they have no equal. They are simple, effective and cannot choke, never failing in any emergency. Can be seen in operation at the factory. Reference given on application.

Sole Manufacturers of

J. R. BAKER'S

JOURNAL BOX & LINING METALS.

For all kinds of Machinery, Journal Boxes where the use of Anti-Friction Metal for Bearings is desired.

Important to Railroad Companies, Steamboat and Steamship Proprietors, Engineers, Mill-Men, Machinists and all persons putting up new works.

The merits of this National Metal has achieved for it such success that during the past year the proprietors have enlarged their facilities for its manufacture. They are now able to supply all demands, and would commend it to the attention of the public with confidence, that one trial will convince the most skeptical of its worth.

☞ Prices set at a low figure.

No. 1 Journal Box, cast in shape, 30, 35 and 40 cts. per pound.

Lining Metals—No. 1, 30 cents per pound. No. 2, 25 cts.; No. 3, 20 cts.

PLASTIC SLATE

FOR

Roofing & Other Purposes.

The process of reconstructing Slate Stone from a disintegrated state was

PATENTED FEBRUARY 21st, 1865.

It is a combination of

Pulverized Slate and Viscous Matter,

(the latter possessing qualities of geological and chemical affinity for the former,) and is a development of one of the simple but unalterable tendencies of nature.

As a Roofing Material it Stands Unrivalled.

A mastic—it adapts itself to every shape and slope. Non-combustible, impervious, non-expansive, and undecaying.

Frost does not Crack nor Heat Dissolve it.

The only roofing material ever discovered that will resist the action of the elements as long as the structure it protects. Being susceptible of little, if any wear, from exposure, and

Perfectly Fire-Proof,

It is unequalled as a coating for Railroad and Farm Buildings, Fences, Bridges, bottoms of Vessels, Vaults, etc.

National Railroad Convention.

The following is a copy of the Constitution of the "National Railway Association of the United States," which was adopted at the Convention of the Presidents, General Superintendents and Chief Engineers of the different Railroad Companies in the United States, held at the Logan House, in Altoona, Penn., on the 18th ult.

CONSTITUTION OF THE NATIONAL RAILWAY ASSOCIATION OF THE UNITED STATES.

WHEREAS, An association of the railway companies of the United States, thus securing a periodical conference of their officers, and their harmonious co-operation for obtaining useful information at the common expense for the common benefit may be made beneficial to those companies, and better enable them to serve the public; now, therefore, such of the said companies as shall subscribe hereto, hereby agree to become members of such an association, to be called "The National Railway Association," and adopt the following constitution:

Article 1. The said companies shall be represented in a National Railway Convention, which shall first meet on the first Thursday in October, 1867, in the city of New York, and annually thereafter on the first Thursday in August, at New York, or such other time and place as the said convention shall from time to time agree upon. Each company may be represented by not exceeding three delegates, who should, if practicable, but not necessarily, be officers of the company?

Each delegate shall produce credentials signed by some proper officer of his company. Each member of the Association shall have, for any number of miles owned or operated by it over twenty and not exceeding one hundred and fifty, one vote; over one hundred and fifty not exceeding two hundred and fifty, two votes; over two hundred and fifty and not exceeding three hundred and fifty, three votes; over three hundred and fifty and not exceeding four hundred and fifty, four votes; over four hundred and fifty, four votes. A majority of delegates of any company will cast its vote. The same person may represent and vote in behalf of more than one company. Special meetings of the Convention may be called by the Executive Committee, but shall transact only the business mentioned in the call. Leased roads may be represented by the lessee, or by the leaser, with consent of the lessee.

Article 2. The officers of the Association shall be a president, five vice-presidents, a secretary and treasurer, all elected; and their salaries fixed by the Convention at its annual meeting. The President, the first Vice-President, and the Secretary shall compose the Executive Committee. No two of the Vice-Presidents shall represent companies in the same State. The Executive Committee shall meet quarterly, at such time and place as the Convention may from time to time direct, under the authority and direction of the Convention, and shall employ such agents and experts, and use such means of obtaining information, and make such experiments, and collect such plans, reports, &c., as the means at their disposal permit, and as will be of the most practical benefit to the constituted companies, they will report annually to the Congress the results of their deliberations, as well as all other matters in their charge. The Secretary will have charge of a central office, where the archives and effects of the Association will be kept. Such reports, plans, &c., as they may have shall always be open for the information of the companies composing the Association. The Executive Committee shall appoint one of its members as Auditor, and all moneys received or paid on account of the Association shall be on certificates signed by him. An Auditing Committee of the Executive Committee shall examine and report on the accounts quarterly, and an Auditing Committee of the Convention annually. The Executive Committee may fill vacancy of any office, or in their own body, until the next meeting of the Convention. In case of failure of the Convention to elect at their annual meeting, officers shall hold over.

Article 3. The money necessary to pay the salaries and other expenses of the Association shall be raised as follows: One half of the amount by an assessment of the mileage of railways, without regard to single or double tracks, represented by the several companies forming the Association, not to exceed one dollar per mile per annum; the other half by an assessment *pro rata* on the gross receipts during the previous fiscal year for traffic on said railway, but not including other receipts of the companies, such as for land sales, rents, steamboat earnings, storage, drayage and the like.

Article 4. The object of the Association is the improvement of railway construction, maintainance, management; and no action shall be taken to isolate the railway interest, or place it in antagonism with other interests; and no political, sectional, or other proposition shall be admitted or countenanced, tending to impair the harmony of the Association or its good understanding with any portion of the public; and no interference shall be allowed with the controversies that may arise between the companies represented.

Article 5. The Convention may elect by ballot, railway, canal or mechanical engineers, retired railway officers and men of mechanical science, to be associated members of the Convention, having no vote, and liable for no dues, but invited to take part in the deliberations.

Article 6. Any company may retire from the Association on one year's notice, and payment of all dues.

Article 7. No indebtedness shall at any time be incurred exceeding the amount then unappropriated in the treasury.

Article 8. Any alteration or amendment of this constitution may be recommended by a majority of the votes of all the members of the Association at an annual meeting, and adopted, without change, by a like majority at the next annual meeting, or at a special meeting called for the purpose, with three months' notice. The corporation, whose names are hereunto subscribed, hereby agree to become members of the National Railway Association under the foregoing constitution, and promise to make the contributions provided for therein, and they hereby vest the moneys so to be contributed, and all the property and effects of the Association in the President thereof, for the time being, to be held by him in his own name, but in trust, nevertheless, for the uses and purposes of the said Association. No subscription hereto shall be made, till subscriptions representing at least ten thousand miles of railway, shall be made.

Sandusky, Mansfield & Newark Railroad.

The earnings and expenses of this road for the years ending December 31, 1865 and 1866, have been as follows:

Earnings:	1865.	1866.
From passengers	$207,540 79	$187,242 19
" freight	188,203 15	207,202 36
" mails, express, etc,	26,172 88	26,009 00
	$421,916 82	$420,453 55
Expenses:		
Repairs of engines	$34,040 92	$24,769 74
" cars	36,312 85	26,827 78
" track	83,484 45	88,887 51
Train expenses	46,411 89	46,329 43
Station "	29,158 97	39,269 75
Shop "	5,992 90	5,705 44
Fuel	34,555 11	34,529 45
Oil and waste	6,522 86	6,941 21
Salaries, etc	29,114 56	20,392 82
	$305,594 51	$293,653 13
Less extraordinary expenditures	49,810 98	42,200 00
	$255,783 53	$251,453 13
Net earnings	$166,133 29	$169,000 42

Compared with 1865, the gross earnings of 1866 show a decrease of $1,463 27; with a decrease in operating expense of $4,330 40—making the increase in net earnings $2,867 13. The entire expenditures show a decrease of $11,941 38. The report says:

About the 20th of September last, commenced the great freshets that inundated the south part of our line. The floods continued for nearly three weeks, carrying away one of our principal bridges twice, and materially damaging it the third time.

Other damages to the road bed, embankments and track, also occurred. Our Superintendent estimates the damage to the company, including that caused by the interruption to our business, at not less than $40,000. Our gross earnings, no doubt would have exceeded those of last year by more than $10,000, had it not been that these interruptions prevented. The above item of $13,000 was expended in increasing the width of the water-way, in embankments, and in part for bridging. Our expenses for December were increased to nearly the amount of the earnings for the month, instead of leaving a net of some $10,000.

In addition to the above items of extraordinary expenditure charged and included in the statement of monthly expenses there appears on our books, charges for money paid for taxes, for short grain account, for money paid on settlement of the Huron Branch suit and the purchase of the stock of the plaintiff to the amount of $47,000, and for old Attorneys fees, which it was supposed had been mostly settled, amounting altogether to $41,845 13.

Of the $84,955 29 balance of net, the sum of $53,918 56 was applied to pay coupons on the funded bonds during the year. $17,500 has been remitted to pay the balance of coupons falling due January 1st, 1867, leaving $13,536 73 to be applied to ticket balances, taxes and the repair of damages.

Of the gross earnings, sixty per cent. was applied to operative expenses. The per cent. of taxes on the gross is 6.70.

The miles run by the passenger trains were 143,497; that of the freight 97,288. The per centage of net earnings on the gross freight earnings, was 41.33. That on passenger was 38.68.

The passenger earnings for the year fell off $20,298 60. That of the freight has increased $18,999 21.

The freight earnings have been equal to $1,336 90 on each freight car employed in the transportation department and the net amount on each was $552 40.

We could have given employment to fifty or more cars the most of the time during the past season, in addition to those now possessed by the company. But for our deficiency in freight cars, and the interruption from floods, we should have largely increased our freight earnings for the year.

Our road, originally built with a view to transporting grain to the lake, and provided with store houses and elevators to accommodate that business, has derived no benefit in its earnings from that source, and the past season has afforded additional evidence of the necessity of the change of gauge and the wisdom of that measure. It has entailed upon us a heavy outlay in rebuilding locomotives and in providing other equipment equal to our increasing wants, and these are still pressing upon us; yet the road is gradually emerging from the difficulties with which it was beset, and the prospects for its future business and income is increasing.

It will be observed that while our actual running expenses have been kept within reasonable limits, the taxes, and other expenses that could not be avoided, have been so large that less than one-half of our net earnings over running expenses, could be applied to pay interest. The bonded debt of the company, originally $1,290,000 has been increased by the accumulation of interest, until it now amounts to about $2,100,000, and there is little prospect that the net earnings between this and the first of July will be sufficient to pay the interest then to fall due.

It was at the earnest request of some of our largest bondholders, that the management refrained from making any outlay in building freight cars the past season, and it was expected that a part of the net earnings might be reserved towards paying the next July interest. Such would have been the case to a limited extent but for the damage by the freshets.

We are still without freight cars adequate to do our business, and though we do not anticipate so large an expenditure for extraordinary expenses for the year 1867, as for last year, unless the cars are built, we must nevertheless meet such calls upon the company, as taxes and the necessary expenditure to keep our road bed in good condition, and these last will be larger this year than in 1866.

We have added $26,000 in value to our locomotives and passenger cars during the past year.

Were a full equipment to be supplied from other sources than the earnings of the road, and the running expenses could be kept within the limits of the past year, it would still require some ten per cent. upon the gross earnings to pay taxes and other expenses, and the residue, thirty per cent. would only yield $135,000 to apply towards paying interest, even if the earnings were increased to $450,000.

The majority of the stock is controlled by the bondholders, and whatever net earnings accrue are appropriated to pay interest on the bonds. There being a deficiency of net earnings to pay all the interest, it will remain for the bondholders themselves to say how the net earnings shall be applied in the future, to make it equitable to all the holders of bonds.

The receipts into the Treasury from all sources during the year, including $8,970 23 from previous year, were $533,846 81; and the disbursements were:

Paid ticket, freight and mileage balances to other roads	$75,895 91
Foreign agencies	3,278 06
Taxes, U. S. State and county	27,116 61
Short grain (old account)	5,981 80
Coupon interest here and in N. Y.	66,230 14
Huron Branch suit	7,234 27
Expenses, Att'y fees and bills payable	335,073 29
Balance in Treasury Dec. 31, 1866	13,536 73
Total, as above	$533,846 81

There were 4,460 new cross ties, 900 tons repaired T rails, 18 tons wrought iron chairs and 12 tons spikes used in improving and maintaining the track during the year; 7,160 rails were mended in the company's shops, at a cost of 75 cents per rail. There will be required to keep the track in good running order the coming year, about 35,000 ties, 15,000 chairs, 400 tons new T rail and 18 tons T rail spike; 285 feet of new Howe Truss, and 380 feet of Stringer Bridging should be built during the year. At least 30 box grain and 30 coal and 10 platform cars should be added to the equipment.

The company have 9 locomotives on the road. The cars owned by the company January 1, 1866, are as follows: 9 passenger, 3 mail and express, 3 baggage, 107 box, 3 caboose, 20 stock, 25 coal, 17 platform, 22 hand and 20 ditching cars. Of the above 1 passenger, 1 baggage, 3 stock, 3 box and 10 coal cars have been built during the past year. Nine hand and 3 ditching cars have been added to the track equipment.

The number of passengers carried during the year, was 182,612, of which 5,005 were through, and 177,607 were way. Miles run by locomotive, 240,785.

Condensed Balance Sheet, Dec. 31st, 1866.	
Capital stock	$900,235 70
First mortgage bonds	1,290,000 00

President.—C. L. Boalt.

Directors.—Hon. C. L. Boalt, John Gardiner, Hon. E. B. Sadler, H. P. Warden, Geo. B. Wright, Samuel M. Robinson, L. J. Tracy, James Lyon, and J. Buckingham.

Superintendent.—Jas. H. Steward.

Treasurer.—L. P. Wheelock.

Secretary.—J. Buckingham.

Washington County Railroad.

This important work, in which our people have so deep an interest, is rapidly approaching completion. Already at the Weverton end of the road has the laying of the track been commenced, and the completion of the road by the middle of September to Keedysville at least has been pledged to the commissioners of the Antietam National Cemetery, who are making extensive arrangements for the ceremony of dedication on the 17th of that month, it being the anniversary of the battle. Workmen are now busily engaged in grading the track adjacent to the town and the grounds intended for the depot in this place. The grading and bridges once completed, the laying of the track will be the work of but a few weeks at most.—*Hagerstown Free Press.*

Baltimore and Potomac Railroad.

The Washington *Star* says that a change has been made in the route heretofore surveyed for the Baltimore and Potomac railroad, which is more of an air-line, and is located in some places four miles west of the old route, and the distance by it to Baltimore will be about 36 miles. It runs along the bank of Stony Creek—a branch flowing into the Patapsco, running about three miles east of Elkridge Landing, thence down the

stream on which Pumphrey's Mill is situated, crossing the Annapolis railroad between Sappington's and Phelps' instead of near Millersville, passing near Conway's store, and along Collington branch to within a mile of that place, thence to the headwaters of Beaver Dam creek, passing down that creek and approaching the city on the east side of the Eastern Branch. It is said that the depot will be established on H street, near Delaware avenue, but this is not certain. It is almost certain, however, that a site for a station has been selected between Washington and Bladensburg.

Connecticut and Passumpsic Rivers R. R.

The receipts and expenses of this road for the years ending May 31, 1866 and 1867 have been as follows:

Receipts:	1866.	1867.
From passengers	$174,501 44	$175,952 27
" freight	290,742 28	301,533 76
" mails	10,600 00	10,600 00
" express	3,500 00	4,200 00
" rents	1,251 62	1,419 83
	$480,577 34	$493,705 86
Expenses, viz:		
Maintenance of road	$76,690 70	$88,724 48
Motive power	110,327 93	79,791 52
Fuel	32,921 26	38,498 01
Oil and waste	5,627 80	6,497 68
Passenger department	13,061 73	14,823 43
Freight "	22,038 09	24,737 02
Loss and damage	3,928 93	2,974 11
Repairs of buildings	8,726 97	5,622 98
Insurance	2,279 82	1,605 17
Tools and machinery		27,395 38
Miscellaneous expenses	28,980 86	18,383 52
	$304,584 09	$309,053 30
Net balance	$175,993 25	$184,652 56

The gross earnings of 1867 show an increase over those in 1866, of $13,128 52; with an increase in expenses of $4,469 21—making the increase in net earning, $8,659 31. The report says:

It will be recollected that the stockholders at the annual meeting in July last voted to create 4,000 shares of preferred stock and offer the same to the stockholders at $75 per share, for the purpose of completing the road to Canada line, &c.; and that afterwards it was ascertained that the statutes of Vermont forbid the issuing of any stock at less than the par value; consequently, a special meeting was called at White River Junction, Vt., on the 7th of November, 1866, to devise other means for completing the road, &c. At that meeting the stockholders voted to raise $200,000 by the issue of notes of the corporation for that amount, payable in ten years from the 1st day of December, 1866, with coupons attached bearing seven per cent. interest free from government tax, which was accordingly done.

It will be seen, on reference to the Treasurer's trial balance, that the bonded debt of the company has been reduced the past year $31,900, leaving now outstanding, $573,800.

Two dividends of three per cent. each have been declared during the year, amounting to $115,080—including government tax ($5,754)—also $64,000 paid for interest on bonds and to Trustees of Sinking Fund, and $2,672 70 for interest on notes.

It affords the directors much pleasure to be able to inform the stockholders that the road is now completed to Canada line, and that the business received from the northern portion justifies the corporation in making the extra exertions necessary to complete the enterprise as originally intended. We now have a road 110 miles long, well equipped and in good repair, running through a country whose local business, judging from the past three years, must make the stock remunerative.

Efforts are now being made to raise money to build the Massawippi Railroad, some thirty miles long, from the northern terminus of our road to some point on the Grand Trunk near Lenoxville. That connection would add materially to our business, by reaching the valleys of the Saint Francis and Massawippi Rivers, celebrated for their rich gold, silver and copper mines, timbered lands and agricultural products, making a good connection with Montreal, Quebec, and the projected road to Halifax.

On the extension to the Canada Line, 517 tons rails, 14,000 sleepers have been laid; depot, engine house, car house and wood shed built, and trains commenced running May 1st.

The track, road-bed and rolling stock are in excellent condition, additional equipment being increased in value $52,160.

Timber and woodlands to the amount of $4,000 have been purchased during the year.

There have been added to the equipment during the year one freight locomotive, 6 box, 16 rack cattle, 3 hand and 2 wood cars. Two locomotives, 2 passenger 10 box and 3 platform cars have been thoroughly repaired. Two locomotives, 3 platform, 5 box and 3 hand cars have been rebuilt, and new buildings erected at Lynden, Bradford and Wells River. In repairs of track, 448 tons new and re-rolled iron, 5,941 repaired rails, and 43,161 sleepers have been laid.

The equipment of the road consists of: 11 locomotives, 10 passenger, 6 baggage, mail and express, 123 box, 55 rack, 13 coal, 80 platform, 10 gravel, 28 hand, 12 wood and 1 drovers' saloon car, valued at $257,125. Value of materials on hand $100,639 68.

Miles run by locomotives with passenger trains, 78,492; with freight trains, 71,432; with other trains, 21,566—total miles run, 171,490.

Passengers carried, 109,364; do., carried one mile, 3,486,989. Tons of freight carried 75,856; do., carried one mile, 3,823,306.

Vermont and Massachusetts Railroad.

The gross earnings of this road for the six months ending June 1, 1867, were... $213,405 59
Corresponding six months, 1866..... 195,141 88

Gross grain in six months, 1867. $18,263 71

The gross earnings of the first and last six months of 1866 compare as follows:

Gross earnings for six months to Dec. 1, 1866 ..... $249,823 39
Same for six months to June 1, 1866. 195,141 88

Gross increase second six months of 1866 ..... $45,681 51

The directors have decided to defer the subject of a dividend to the end of the year, using the net earnings of the first six months for expenditures and improvements, in order to keep ahead of the demands of constantly increasing business, and in anticipating ordinary expenses of the coming six months of the year. During the first six months of the year to June 1, 1867, one new engine has been purchased and another built in the shop, and all paid for as running expenses, and a very large amount of new and re rolled iron has been put down. The iron and locomotive account last year was believed to be above the average required to keep up the road. The comparison stands as follows:

Locomotive account for whole year 1866, repairs, &c $15,819 17
Renewals of iron for whole year 1866. 27,575 33
$43,394 50

Locomotive account, repairs, &c., for six months to June 1, 1867 ..... $33,472 78
Renewals of iron for same six months. 55,090 40

Whole amount for six months to June 1, 1867 ..... $88,563 18
Whole amount for year 1866 ..... 43,394 50

Excess in six months of 1867 over whole year 1866 ..... $45,168 68

Petroleum as a Fuel for Locomotives.

The use of petroleum as fuel for locomotives has already been the subject of considerable remarks. The Titusville *Herald* thus describes the fourth of a series of experiments made at the shops of the Warren and Franklin Railroad at Irvineton:

The apparatus used was Spencer's burner. It is described as consisting of a pan covering the bottom of the fire-box in the locomotive, and taking the place of grates. On the pan are placed heaters or gas-generators, six in number, consisting of inclined plates of cast iron, supported at an angle of forty-five degrees; opposite to each heater is an injector conveying the oil to the heater, where it is instantly converted into gases, oxygen being only furnished to the gases in their nascent state for combustion. The oil is contained in a tank on the tender, from which it is conveyed by feed pipes to the injectors, each pair of injectors being controled by a throttle by means of which the fire is regulated as readily as the light of a lamp. The locomotive used weighed thirty-one tons, and was of one hundred and fifty horse power. No cars were attached. Under eighty-five pounds of steam the locomotive passed over four miles of track in less than eleven minutes. All in the party agree that oil may supersede wood and coal in railroad use.

☞ Ground has been broken on the Lebanon Springs Railroad, and by June of next year it will be completed. The Troy and Bennington road from Hoosick Junction to the Vermont line, on which no trains have been run for several months has been permanently abandoned.

Des Moines Valley Railroad.

While at Des Moines a few days since we were informed by Colonel Otley, Chief Engineer of the Des Moines Valley Railroad, that he had sent to Chicago for tents, etc., preparatory to making a survey of the road from Des Moines to Minnesota. It is proposed to run one line from the capital up through Greene county to Fort Dodge, and another on the east side of the river through Boonesboro. The people of Boonesboro have offered the company $100,000 to take the road through that place, and they can well afford to do it, as it would be the making of Boonesboro—the Valley Road and Northwestern Road crossing there. When completed to St. Paul, the Des Moines Valley Railroad will be one of the most important roads in the West. It will cross all the other roads in the State, and bring an excellent market to the very doors of the people all along the line. —*Pella, Iowa, Blade.*

Schuylkill and Susquehanna Railroad.

This road is 54 miles in length, extending from Auburn to Rockville. Length of sidings 7 miles. Weight of rail per yard 45, 60 and 64 lbs. Number of engine houses and shops, 4. The company have 7 locomotives, 3 baggage, mail and express cars, 42 freight, and 22 coal cars, all rated as 8-wheel. Number of iron bridges 2, wooden bridges 6, and stone bridges 2. Number of stations on main road, 3. Wood and water stations, 10. The track is laid on graded surface, partly ballasted with broken stone. Number of through passengers on main road, 485; do., all classes, carried in cars, 68,433. Total amount of tonnage, 298,069. Weight of passenger engines, 21 tons; do., freight engines, 41 tons.

The receipts from operations of this road for the fiscal years ending October 31, 1865 and 1866, have been as follows:

	1865.	1866.
From passengers	$23,282 63	$27,865 12

Treasurer.—S. Bradford, Philadelphia.

Gen'l Sup't.—G. A. Nicolls, Reading, Pa.

Superintendent.—U. R. Tracy, Pinegrove.

Scinde, Punjaub and Delhi (India) Railway.

The annual meeting of this company was held in London on the 25th of June. The report of the directors states that during the half year ending 31st December, 1866, the traffic, notwithstanding the serious interruption caused by the unusually heavy rains which fell in the month of August last, contrasted favorably with that of the corresponding period of the previous year. The total traffic receipts on the line from 13th May, 1861, to 31st December, 1866, amounted for passengers, &c., to 74,594*l.*, and for goods to 386,651*l.*, total, 461,245*l.* The working expenses amounted to 402,357*l.*, or 87.23 per cent. of the receipts, leaving the net revenue for the five years and a half 58,888*l.*, or 12.77 per cent. of the gross receipts. The traffic returns for the year 1866, amounted to 100,348*l.*, against 82,818*l.* in the year 1865, showing an increase of 17,530*l.* The working expenditure amounted to 83,268*l.*, or 82.98 per cent., against 78,425*l.*, or 94.70 per cent., in the same half year of 1865, showing an increase of 4,843*l.* The result was regarded as satisfactory, when it was considered that the traffic was almost entirely suspended from 5th August to 13th September last, nearly six weeks. During the half year ending 31st December last, the gross receipts amounted to 46,470*l.*, and for the same half of 1865, to 43,456*l.*, showing an increase of 3,014*l.*, the weekly average being 1,787*l.*, against 1,671*l.* in the same half of 1865. The traffic receipts for the past half year averaged 16*l.* 7s. 11d. per mile per week, and the receipts per train mile were 8s. 6½d., the number of train miles run having been 108,566. Since the commencement of the present year a great improvement had taken place in the traffic. The receipts for the quarter ending 31st March, amounted to 34,184*l.*, or an average of 2,629*l.* per week. The total goods arriving in and forwarded from Kurrachee by the railway during the past half year amounted to 64,998 tons, the down traffic being 38,113 tons and the up traffic 26,885 tons. The number of passengers carried was 70,171, against 52,613 in the corresponding half of 1865. The working expenses amounted to 40,127*l.*, against 39,462*l.* in the corresponding half of the preceding year; the net revenue amounted to 6,343*l.*, against 3,994*l.* in the corresponding half of 1865. The capital account showed that 1,810,087*l.* had been expended. The company's steam flotilla on the Indus during the past half year maintained its accustomed regularity; there had been thirty-four voyages in all made by the vessels of the flotilla. The total receipts of the steam flotilla for the past four years and eight months amounted to 36,398*l.* for passengers, and to 289,280*l.* for goods, &c.; total, 325,678*l.* The working expenses amounted to 239,218*l.*, or 73.45 per cent. of the receipts, leaving the net revenue 86,460*l.*, or 26.55 per cent. on the gross receipts. The net revenue was subject to a deduction of 17 per cent. per annum on the estimated cost of the working fleet for insurance and depreciation. The expenditure of the steam flotilla on capital account amounted to 568,016*l.*

Punjaub.—The directors state that the receipts on this railway for the half year ending December 31 last, amounted to 41,433*l.* or 3,828*l.* in excess of the amount realised in the same half of the previous year. The average weekly receipts were 1,594*l.*, being 6*l.* 5s. 11d. per mile. The gross receipts per train mile were 4s. 1d., and the trains ran in the half year 202,521 miles. The aggregate traffic receipts from 10th April, 1862, to 31st December, 1866, amounted on an average length of railway open of 118 miles, to 92,374*l.* for passengers and to 98,236*l.* for goods; together 190,610*l.* The gross receipts during the year 1866, amounted to 31,443*l.* for passengers, and to 62,654*l.* for goods; together 94,097*l.* It was evident that until the great trunk line from Kotree to Mooltan, along the valley of the Indus, was completed, the advantages afforded by the railway, as compared with the means of transit afforded by river, must be greatly restricted. The total expenditure on capital account amounted to 2,362,043l., and the amount received for interest on paid-up capital was 524,808*l.*

Delhi (Umritsur to Delhi.)—The directors announce that the first section of the railway from Ghazeeabad, the point of junction with the East Indian, opposite Delhi, to Meerut, a distance of about 28 miles, was opened for public traffic on 18th April. The country traversed by this section was in a high state of cultivation, and formed one of the richest and most populous districts in India. The Meerut section was being worked by two trains each way daily; the passage of the trains between Ghazeeabad Junction and the station within the city of Delhi, a distance of 11 miles, was performed by the engines of the East Indian. The progress of the works generally throughout the line continued satisfactory. The Meerut and Moozuffurnuggur and the Moozuffurnuggur and Seharunpore sections, the former 31 miles and the latter 37 miles in length, are not in so forward a state as might have been anticipated; but, on the other hand, the progress made with the section from Seharunpore to Umballa was very satisfactory—so much so that it was expected that the line from Delhi as far as Umballa, a distance of 162 miles, would be ready for traffic about this time next year. At the Umritsur extremity of the railway the works had been pushed forward as rapidly as the arrival of materials would permit. By the end of January the permanent way had been laid for about 12½ miles, and it was believed that the section from Umritsur to the Beas, 27 miles in length, would be ready for traffic in July. The traffic upon this section would not become greatly developed until the completion of the large bridges along the line, and the establishment of through communication with Delhi; but there were numerous large villages along the banks of the River Beas, from which a considerable traffic might be expected to come to the railway in native boats. The contractors, Messrs. Brassey, Wythes and Henfrey, were prosecuting the works of the several large bridges with commendable energy. The financial statement shows that from the commencement 1,669,199*l.* had been expended in India to 30th September, and in England to 31st Decem-

ber, leaving a small balance of 3,000*l*. The total amount received for interest was 206,622*l*.

Lackawanna and Bloomsburg Railroad.

This road is 80 miles in length, extending from Scranton to Northumberland. It has no double track, but has a third rail of 21 miles. Length of sidings 13½ miles. Guage of road, both 6 feet and 4 feet 8½ inches. The weight of rail per yard is 56 to 70 lbs. Length of Branch roads owned by the company 1, viz.: Pittston Branch, 2 miles. Number of engine houses and shops, 9. The company have 21 locomotives, 6 first-class passenger cars, 3 baggage, mail and express, 75 freight and 1,200 coal cars. Number of stone bridges, 3. Number of stations on main road 28. Number of road and water stations on main road. The track is laid on gravel foundation and cross-ties. Number of through passengers, 4,127; do., all classes, 263,018. Total amount of tonnage for the year 646,929.

The receipts from operations of this road for the fiscal years ending October 31, 1865 and 1866, have been as follows:

	1865.	1866.

Norfolk and Great Western Railroad.

The inhabitants of the counties through which this projected road will pass are beginning to take a very active interest in its success. They have been lavished in their contributions of land, and are gradually becoming convinced of the propriety of the reduction of their large landed estates into smaller and more compact farms. The projected railroad is the great topic of discussion, many believing that without its agency the untold resources of these Virginia counties can never be developed, or that importance and value given to many species of property which are now worthless without it. A meeting of the citizens of Mecklenburg County was recently held at Boydton, at which the following resolutions were adopted:

Whereas, A charter has been granted by the Legislature of Virginia to construct a railroad, *via* Danville, to Bristol, with the privilege of receiving subscriptions, payable in land, to the extent of two million acres; and whereas, there were in 1860 in the border counties of Virginia and North Carolina, between tide water and Bristol, more than four million acres of unimproved land; and whereas, we believe there can be neither pleasure nor profit in cultivating farms upon an extensive scale; and whereas, we deem it highly important to subdivide these large estates into small farms with the view of attracting emigration; therefore,

1. *Resolved*, That we cordially approve of the scheme of the Norfolk and Great Western Railroad, and believe the true interest of the country requires that it should be constructed as speedily as possible, and that we pledge ourselves to aid in its construction to the full extent of our ability.

2. *Resolved*, That we fully approve of the plan of raising means for the construction of the road by receiving subscriptions payable in land, and believe if the landed proprietors, on the land of the road, would subscribe enough to construct it, the portion returned would be more valuable to them than the whole without the road.

3. *Resolved*, That so soon as the company shall receive a subscription sufficient to justify it in doing so, the lands should be cut up into small farms and offered for sale upon reasonable terms, so as to induce as large an emigration as possible.

☞ The passenger and freight trains of the Baltimore and Ohio and Marietta and Cincinnati Railroads now cross the Ohio River between Parkersburg and Belfre. A steamer is used to tow the barge on which the trains run from the tracks of these roads.

☞ Henry H. Baxter, Esq., of Rutland, Vt., has been elected President of the New York Central Railroad Company, Vice Henry Keep, Esq., resigned.

La Crosse and Winona Railroad.

The contract for the construction of this road has been let to Messrs. Daniel L. Wells & Co., of Milwaukee—the road to be ready for the cars by the 15th of December next. In anticipation of this event, the Milwaukee *Wisconsin*, of recent date, said:

We learn from competent and reliable authority that the managers and owners of the Winona and St. Peter Railway have decided to commence the construction of the link between Winona and La Crosse at once.

This is an important work and much needed by Minnesota. Milwaukee is very much interested, also, in its early completion. Whether completed as a part of the Milwaukee and St. Paul Railway, or a part of the Winona and St. Peter, our interest in its success is the same, and its importance to the general public is not diminished.

If all or even a part can be completed by the close of river navigation the travelling and shipping public will feel under many obligations to the managers. Whether this can be accomplished under the arrangements made for construction we are not informed, but presume it will be attempted.

The crop of Minnesota bids fair to be very large, and it is important that as much of it be moved this winter as possible. The Prairie du Chien and St. Paul companies will be able to move as much as 250,000 bushels of grain a day. This will give an outlet for all that can be brought to the river even by increased facilities of shipment from Minnesota.

Commerce of the United States.

The imports into the United States, according to the Report of the Director of the Bureau of Statistics, for the first five months of the year, (January to May inclusive,) were $170,643,241; and the exports during the same time were $204,548,662—equivalent in gold at 136, to $150,403,428. To which add gold and silver $23,267,050, and foreign merchandise, $10,421,896—making the total exports reduced to gold value, $148,092,974. From which it will be seen that the exports, reduced to gold value, exceed the imports by $13,444,133.

The value of foreign commodities remaining in warehouse, April 30, 1867, was $36,828,127; warehoused during May, $16,425,822—total, $53,253,849. Of this there was withdrawn for consumption, $12,590,000; do., for exportation, $1,260,679; do., transportation, $983,266—total, $14,833,945, leaving in warehouse, May 31, 1867, $38,420,004, an amount greater by $1,591,877 than at the close of the preceding month; and from the stagnation of trade in June, the amount was probably still greater at the close of that month.

☞ The Sturgis (Mich.) *Journal* says that twenty miles of the Grand Rapids and Indiana Railroad, north of Grand Rapids, is let, to be completed by the 1st of November. The rails for this twenty miles are purchased, and will be laid down before next January, so as to comply with the law. That portion of the road between Fort Wayne and the southern line of the State is let to be completed next season.

☞ An extra force of laborers has lately been put at work upon the Western Maryland road, and the work is going on finely. It is thought that the road will be in such condition as to allow the passage of cars over it as far as Ridgely, Caroline, in about fifteen days.

American Railroad Journal.

Saturday, August 3, 1867.

Stock Exchange and Money Market.

There has been rather more movement in call loans, since our last. The lively speculation at the Stock and Gold Boards has afforded employment for increased amounts of capital. The supply, however, has more than kept pace with the demand for temporary accommodation, and lenders have had no little difficulty in placing their balances with responsible borrowers at even the low rates now current, namely 3@4 per cent. on the public funds, and 4@5 per cent. on railway and other prime stock collaterals. There has been some inquiry for currency from the interior, but it has been, thus far, of a restricted nature, and will doubtless so continue for three or four weeks more, when an active call may be anticipated for means to move the harvest products to market. The warlike rumors from Europe, and the reports of trouble among a few country banks, were the cause of some uneasiness, during the week; but confidence has again been fully restored, and an easy market is now fairly assured for some time to come. Government has been making disbursements to the public creditors, in excess of its current revenues, and has consequently reduced its cash reserve, especially in the local office. It announces through the Sub-Treasury here that the Department is prepared to liquidate or fund promptly all maturing claims. The discount market continues quiet, from the scarcity of prime short-date commercial paper, which alone meets with favor, chiefly among private lenders, at 6@6½ per cent. per annum, as the ruling figures in all new negotiations. The city banks, in their last weekly returns showed an increase of $1,172,934 in deposits, $1,164,539 in legal tender reserve, $1,663,575 in loans, and $21,911, in circulation, with a reduction of $2,459,606 in the specie reserve, as compared with the previous weekly averages. The specie reserve of the banks is now $8,738,094, against $9,701,540 same time last year. The city bank deposits are now $200,608,886, against $214,582,926 week ending July 28, 1866. The legal tender reserve amounts to $74,605,840, against $84,705,814 same time last year. The circulation now stands at $33,596,859, against $27,244,981 same time last year. The loans are now $251,243,830, against $256,612,071 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $80,182,871 a day, against a daily average of $81,971,825 the preceding week, and $86,893,264 the week ending with July 13. The current week's exchanges average $85,931,195 a day.

National Bank notes to the amount of $76,250 were issued last week, making the total issue to 1,671 banks thus far, $303,328,876, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $4,522,462, leaving, with the existing 1,650 banks, (having an aggregate capital of $422,913,861,) an actual circulation at this date, of $298,706,414. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $340,631,500; and for the public deposits, $38,797,950—making a total of $379,429,450. The Treasury Department last week redeemed and destroyed $263,494 of worn and mutilated fractional currency, and issued $314,376 of new.

The U. S. Sub-Treasury receipts, week ending with July 27, were $21,689,378, including $2,576,314 from customs duties; payments, $21,804,904; balance at the close of the week, $130,196,095, against $130,311,621, at the close of the preceding week, showing a decrease of $115,526. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $6,459,173 including $253,496 from customs, and payments, $6,780,467; on Tuesday, receipts, $2,567,092 including $568,000 from customs, payments, $716,095. The balance at the close of business on Tuesday stood at $131,725,798, against $132,227,990 a week previous.

The Philadelphia Bank movement the past week shows a decrease in loans, of $36,091; a decrease of $8,626 in specie; an increase in legal tenders of $253,252; a decrease of $830,-

769 in deposits; and a decrease of $3,892 in circulation. The Bank Clearings show a decrease of $11,840,585, and the balances, a decrease of $343,107.

Government revenues have been comparatively liberal through the week. The excise promise well, also, for the current week, their average yield over a million a day thus far. The excises, last week, yielded about $4,000,000, against $3,230,376, the preceding week; customs at the port of New York $2,576,314, and at the outports, about $820,000 (in coin) more, making the grand total income for the week equal about $8,922,000 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with July 30, 1867, were $265,853,195. The receipts thus far in the new fiscal year, which began on the 1st inst., have been about $24,000,000.

The gold speculation was buoyant, during the forepart of the week, under the decidedly warlike rumors from Europe. Higher figures were reached than for some time past, and more extensive transactions reported. During the past few days, the advices from the old world have been of a more pacific tenor, and the financial accounts more encouraging. Hence, the speculative as well as the export demand has fallen off, and with more liberal offerings, partly it is said, from the Government board, the price has been depressed. The custom inquiry keeps up to about $400,000 a day. The range of the price during the week, was 139⅝@140¾, and the closing figures on Wednesday 139⅞. The total imports of specie from Europe, and other foreign ports since Jan. 1, 1867, have been $1,606,975. The customs demand for Gold last week, averaged $429,385 a day; thus far, this week, it has been equal to $400,750 a day, or equal to a weekly aggregate of $2,404,500. The arrivals of specie from Europe, Havana and other foreign ports, during the past week were $17,926, and from California, none. The total customs revenue of the Government, in coin, at this port, thus far in the current calendar year commencing with Jan. 1, 1867, has been $68,721,811, against $78,250,277 same time in the preceding fiscal year. The total receipts of California gold at this port since Jan. 1, 1867, have been $15,955,870, against $22,605,203 same time last year, showing a decrease this year, of $6,649,333. The exports of specie from this port, last week, were $3,491,960. The total outflow of specie from the port, since Jan. 1, 1867, has been $37,266,051, against $51,294,597 same time in the preceding year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $969,000, making the total coin interest disbursements through the Government office, since Jan. 1, 1867, $38,671,329, against $29,493,779 for the preceding fiscal year. The specie exports from San Francisco, from Jan. 1, to June 29, reached $19,533,389, against $20,961,963 same time last year, showing a decrease, in 1867, of $1,429,581.

Foreign exchange has been in very moderate supply, and prime sterling bills have been in request at comparatively firm prices. Bankers' 60 day bills on London closed steadily on Wednesday at 110@110¼, and on Paris to 5.18¾@5.12½; sight bills on London to 110⅜@110⅝; and on Paris to 5.11¼@5.10. The offerings of produce bills have been less extensive this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $2,848,536, making the total value of exports since Jan. 1, 1867, $110,919,727, against $119,467,423 same time in the preceding year.

Government securities have been less active, during most of the week. The home investment demand has been moderate. The foreign inquiry has been restricted by the variable advices from Europe. Speculative purchases have been checked by the more alluring indications of profit at the Stock Boards, on the railway and miscellaneous share list. Yet, the available supplies of the public funds have been quite moderate. And as money has continued remarkably easy up to the close of the month, prices have been very well maintained, closing rather buoyantly, on a reviving call from investment buyers. U. S. sixes of 1881 closed here on Wednesday at 110⅛@110⅜; U. S. Five-twenties of 1862, 111½@111⅝; U. S. Five-twenties of 1864 at 109⅜@109½; U. S. Five-twenties of 1865 at 109½@109⅝; U. S. Five-twenties of 1865, consolidated, 108¼@108⅜; U. S. Five-twenties of 1867, 108¼@108⅜; U. S. Ten-forties at 102⅛@102⅜, and U. S. Seven-thirties at 107⅝@107⅞. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

August, 1864	119⅛	August, 1865	115⅞
October, 1864	118⅜	September, 1865	115⅜
December, 1864	117⅜	October, 1865	114⅞
May, 1865	116⅞		

Speculation in the railway and miscellaneous share list has been decidedly brisk, since our last, at higher and generally buoyant, though somewhat irregular prices. The unusually cheap monetary accommodation available to operators has helped to foster the speculative demand, especially for all the more substantial properties.

A fairly active market has been reported for produce and merchandise, since our last. In the line of breadstuffs buyers have the advantage. Provisions and petroleum have held their own well. Cotton has been decidedly firmer, and middling grades left off here on Wednesday buoyantly at 27½@29½, chiefly 28@28½ cents per lb. as extremes. The stock of cotton now here is estimated at about 68,500 bales. The receipts at the port this week, have averaged about 1,500 bales a day. The receipts since the commencement of the current cotton year, Sept. 1, have been 628,000 bales, against exports of 461,891 bales. The receipts at all the shipping ports from September 1, to latest mail dates have been 1,847,000 bales, against 1,996,801 bales same time last year; exports, 1,525,000 bales, against 1,494,307 bales same time last year; estimated stock at latest dates, 140,000 bales, against 288,200 bales same time last year. At the auction sale of Scranton coal on Wednesday, 75,000 tons were disposed of at easier prices, ranging from $4@$4.60 per ton of 2,240 lbs., delivered at Elizabethport, N. J. Foreign merchandise, has been held rather more firmly, and has been in better request. The total imports of foreign dry goods, last week, were $2,130,751, and the total amount marketed $1,806,998. The value of foreign merchandise imported last week, was $2,090,101—making the grand total specie value of last week's imports of dry goods and merchandise, $5,220,852, and since Jan. 1, 1867, $146,399,732, against $177,241,148 same time in the preceding fiscal year. The ocean freight market has been rather more active, but at easier rates, with 547 vessels of all classes in port. For Liverpool we quote flour at 1s. 9d. per bbl.; grain at 3½c. per bushel; cotton at 3/16@¼d. per lb.; and heavy goods at 12s. 6d.@20s. per ton, all by sailing vessel.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	July 17.	July 24.	July 31.
Consols	94¾	94¼	94 3/16
U. S. 5-20's of 1862	73	72⅝	72 13/16
U.S. 5-20's of 1865	70¾	71	71
Erie	46¼	46¾	49
Ill. Central	76¾	76¾	77

The New York exports, exclusive of specie, for the week ending July 30, and since the beginning of the year, compare as follows:

	1866.	1867.
For the week	$3,343,670	$2,848,536
Prev. reported	116,123,753	108,071,191
Since January 1	$119,467,423	$110,919,727

The New York imports for the week compare as follows:

	1866.	1867.
Dry goods	$2,869,310	$2,130,751
Gen. merchandise	2,959,977	3,090,101
Total for the week	$5,829.287	$5,220,852
Previously reported	171,411,861	141,178,880
Since January 1	$177,241,148	$146,399,732

The balance in the Sub-Treasury on Wednesday was $126,315,067.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

The Moseley Iron Bridge and Roof Co.

We invite the attention of our readers to the advertisement of this company, which appears in our present issue.

General Mosely, the engineer and manager in this company, after many years of study and of practical experience in the art of bridge building, has at last attained a combination of strength with lightness of material in his Wrought Iron Arch Girder Bridge, which, it is claimed, no other form of structure can rival. This bridge has been before the public but a few months, yet as an evidence of its appreciation, we are informed that the company already have under contract some twenty-five of these bridges, including Two Turntable Bridges for the Newark and New York Railroad; their orders extend from Maine to Texas. We were shown a model of this bridge at their office, weighing 20 lbs., which had been tested with a burden of nearly 4,000 lbs., and which Mr. M. assured us would as readily sustain 6,000 or 8,000 lbs. The company also manufacture iron houses for depots, machine shops, &c. One of the latter, we note, has just been completed for the Houston and Texas Central Railroad, of which the *Telegraph* says, "it is a massive structure, and will surpass any work of the kind in the State, and will be fully equal to any similar building in the Southern States."

A specimen of their iron buildings may be seen at the foot of Warren street, Jersey City, near the Canal; this building was erected last Spring for Messrs. J. R. Thompson & Co., and is 180 by 80 feet, 18 feet posts.

Their Corrugated Iron covers some of our finest pier sheds on the North River.

Dorchester and Delaware Railroad.

This road, the construction of which has been undertaken by the Philadelphia, Wilmington and Baltimore Railroad Company is about 30 miles in length, extending from Seaford, Del., to Cambridge, Md. We learn that the contract has already been taken by Mr. Geo. A. Parker, of Philadelphia. He proposes to build the road, including sidings, water tanks, wells, turn-table, three station houses, one at Cambridge, one at New Market, and the other at Federalsburg, and complete the whole by the 1st of next June, for $300,000, which is about $11,000 per mile; $250,000 to be paid in money, and the remainder in bonds of the company at par.

New Railroad Chair.

L. M. Woodcock, of Auburn, N. Y., has just patented a railroad chair, which is constructed upon a different principle from others, by being double or a main chair, with an auxiliary chair, wedging in the former, holding the rails with a vice like grasp, preventing their spreading and worming up, and obviating that disagreable clanking noise made by passing over uneven rails.

If this chair will accomplish all that is claimed for it, we can see nothing to prevent a speed of 40 or 50 miles an hour with safety.

Union (Md.) Railroad.

The contract for the construction of this road has been awarded to John Clark, of Holmesburg, Philadelphia Co., Penn., for $40,000 per mile, including bridges, iron and track complete. Work was commenced on the 29th ult., at two or three points, the ordinance of the mayor and city council endorsing the bonds requiring the work to be put under contract and commenced on or before the 1st of August.

☞ The Western Maryland Railroad Company has put the grading of the road from Union Bridge to Mchanicstown under contract. There are workmen employed on the various sections between the points above mentioned, and Captain Gitt, civil engineer, is engaged in making a survey of the route west of Mechanicstown. The track will be laid during the present year to Mechanicstown.

☞ The *Frederick* (Md.) *Examiner* says that the Frederick and Pennsylvania Line Railroad enterprize has not fallen through; that another effort will be made soon to increase the subscription to its stock, which at present reaches twenty odd thousand dollars.

☞ The contractors of the St. Paul and Chicago Railway have been notified to commence the work on that part of the line between St. Paul and Winona. It is to be completed in one year.

☞ It is stated that the contract for the extension of the Utica and Black River Railroad from Lyon's Falls to Lowville, in Lewis Co., N. Y., has been let, the work to be completed by August 1, 1868.

Railroad Earnings.--Weekly.

The earnings of the Michigan Central Railroad for the 3d week in July, 1867, were.. $62,251 58
Corresponding week of previous year.. 67,806 39

Decrease $5,554 81

The earnings of the Chicago and Rock Island Railroad for the 3d week in July, 1867, were..... $73,000 00
Corresponding week of previous year.. 77,309 00

Decrease..... $4,309 00

The earnings of the Detroit and Milwaukee Railroad for the week ending July 25th, 1867, were $30,520 00
Corresponding week of 1866..... 27,995 00

Increase..... $2,525 00

The earnings of the Western Union Railroad for the 3d week in July, 1867. .....$12,682 70
Corresponding week previous year..... 20,984 46

Decrease $8,301 76

The earnings of the Marietta and Cincinnati Railroad the 3d week in July, 1867...$24,210 00
Corresponding week previous year..... 22,577 00

Increase $1,633 00

The earnings of the Virginia and Tennessee Railroad for the third week of July, were $16,712, an increase of $5,268 on the same week last year. Total for the fiscal year commencing 1st of July, $45,837, an increase of $11,504 on same time in 1866.

What Negligence of Plaintiff Precludes a Recovery.

In the case of Short *vs.* Knapp, lately decided by the Court of Common Pleas of this city, the rule that one injured by the negligence of another must himself be free from negligence is discussed, and its application determined in reference to injuries sustained by insufficient guard on a ferry boat. Though the defendants in this case are not a railroad company, the principles adduced are equally applicable to common carriers of every kind.

The facts in this case will appear from the opinion of the Court which was written by

Brady, J.—The plaintiffs' horses with carriages attached, were led by one of the plaintiffs, who was acting as the driver of the team, on board of the defendants' ferry boat, at the foot of Twenty-third street and the East River. There was no light upon the ferry gate or upon the boat. It was about half past five in the morning, and very dark. The deck of the boat was slippery, although the driver who led the horses as stated did not notice that fact when he so led them on board. There were some persons in the coach, one of whom called to the driver, who went to the door of the coach to see what he wanted. While talking to him the whistle of the boat blew, and the horses started. The driver told them to stop and they did so—they were not frightened. The whistle blew again and the boat moving caused the horses to start again. The driver hurried to them to stop them, and did all that he could do, but could not stop them because the deck was slippery, when they started they turned round and went overboard, and one of them was drowned. There was a chain at the end of the boat, which sagged at the centre, and was not more than twelve inches high at that point, which was not sufficiently elevated to stop the horses, but did stop the carriage. The driver at the time the horses started, was talking to his passengers, having one foot on the step of the carriage and one foot inside, and was apparently guilty of negligence in thus leaving his horses; but he testified that in consequence of the movement made by the horses, and the slippery condition of the deck of the ferry boat, it would have been impossible for him to have stopped the horses, whether he had been at their head or on his box; a fact to which others accustomed to manage horses also testified to and corroborated his evidence on that subject. Several witnesses also testified in reference to the chain, its arrangement sagging in the centre, and its insufficiency for the purpose for which it was intended. The evidence given in behalf of the defendant, made a conflict upon the various elements of the plaintiffs' case; as to the elevation of the chain, the ability of a person to stop the horses if standing at their head, the position of the driver when the horses started, and the condition of the deck. Under the circumstances disclosed, the plaintiffs' right to recover depended on the absence of any negligence on their part which contributed to the injury sustained. The jury were so instructed. If the driver had been upon his box or standing at the head of his horses there could be no doubt about the right of the plaintiffs to recover, inasmuch as the horses were shown to be gentle and reliable, obedient to command, and not inclined to run away, and there was proof establishing the facts that the guards used by the defendants on the boat were not sufficient for the purpose intended that there was no place to tie the horses and no proof that any person was employed on board of the boat, who was charged with care or custody of these or any other horses. Assuming this conclusion to be correct in principle, it follows that if the driver on his box or at the head of his horses could not have arrested them, his absence from both places designated was not *per se* evidence of negligence contributing to the injury suffered. The facts and circumstances were considered and passed upon, and if the jury thought the plaintiffs guilty of negligence, they could not recover. For these reasons the justice did not err in refusing to dismiss the complaint. It does not follow because the plaintiffs may have been guilty of negligence that they cannot recover. The negligence must in some degree contribute to the injury, and unless it does, it cannot affect the right of indemnity. (Haley *vs.* Earle, 50 N.Y., 208.) Although the liability of a common carrier of animals is not in all respects the same as that of a carrier of inanimate property, and although he is not an insurer against injuries arising from the nature and propensities of animals, yet if diligence and care can prevent them he is bound to the exercise of such diligence and care. (Clark *vs.* The Rochester and Syracuse R. R. Co., 14 N. Y., [4 Kern.,] 570.) It is the duty of ferry companies to have all suitable and requisite accommodations for the entering upon the safe transportation while on board, and the departure from the boat of all horses and vehicles passing over such ferry. They are also required "to be provided with all proper and suitable guards and barriers on the boat for security of the property thus carried, and to prevent damage from such casualties as it would naturally be exposed to though there was ordinary care on the part of the traveller." (Per Dewey, J., in White *vs.* The Winnissimmet Co., 7 Cush., 157.) Accepting this statement of the duties devolving upon ferry companies as a concise and ample exposition of them in reference to the subject under consideration, and more particularly since the case from which it is extracted was cited by the defendants' counsel, it is established by the verdict of the jury that the defendants' boat had not suitable guards and barriers to prevent damages from such casualties as the plaintiffs' property would naturally be exposed to. It is true that the plaintiff did not recover in the case just referred to, but it was for the reason that he had contributed to his injuries by his own negligence. The opposite finding on conflicting evidence sustains the judgment in this case, the jury having been instructed by the justice not only in relation to the plaintiff's negligence, but also that the defendants were not liable unless the damages sustained by the plaintiffs were occasioned by the defendants' negligence; upon an examination of the case in reference to the propriety of the verdict we cannot say that was not just. It appears clearly that the plaintiffs' horses were frightened by the act of the defendants servant who blew the whistle, and that defendants were therefore, in fact, the original impelling cause of the accident; whether the use of the whistle did not impose additional caution on behalf of the defendants, is a question upon which we are not called upon to express an opinion; but if such use of it is necessary in conducting the business of the ferry in the navigation of its boats, it would seem from the events which this case has proven, to call upon the defendants to employ ampler means for the security of passengers and animals than those adopted. We cannot interfere with this judgment. The evidence admitted under the defendants' objection bore directly upon the question of negligence, and was pertinent and proper, and the jury properly instructed upon the legal rules by which their deliberations were to be governed. The judgment should be affirmed.

Daly, F. J.—I agree with Judge Brady that this judgment should be affirmed. It was a question of fact, under the evidence, whether the driver did or did not enter and seat himself in the coach. Even if he had done so it is doubtful whether that act contributed to or co-operated in producing the accident, as several experienced witnesses testified that if he had been on the box or at the horses' head, it would have been impossible for him to have prevented it. The judge therefore, could not under this evidence instruct the jury that such an act constituted in law, an act which contributed to the injury.

Kent County Md. Railroad.

We learn that it is the intention of the directors to place this road under contract very soon, and that another instalment of the stock has been called for, payable on the 15th of August. The following route for the road has been adopted: Townsend to Massey's Cross roads—thence by Kennedyville to Duyer's—thence to Chestertown, and from thence to a point at Sparks', near Belleair, and they have appointed a committee who shall employ a competent engineer to examine the different points on the bay shore and report fully to the next meeting of the board.

English Railway Law.

In the matter of the San Francisco, Bahia and Pernambuco Railway Company, heard in banco in the Queen's Bench, London, the question raised was one of great importance as to the liablities of companies in cases of forged transfers of shares, to replace the rightful owners upon their registers. The case, as reported in the London Railway *News*, arose in this way: There was a Prussian lady who had been employed in England some years as a governess, and at the time in question was engaged in that capacity in the family of the Earl of Antrim. In March, last year, she went abroad, and before going deposited certain securities, representing her whole property, with one Oldham, a broker in London, with authority to receive dividends thereon. These securities consisted chiefly of shares in the San Francisco, Bahia and Pernambuco Railway Comway Company. No sooner had she gone abroad than Oldham sold her securities, including the shares in question, and forged transfers of them in her name. The forged transfers were of course presented to the company for registry, and they, in accordance with their usual practice, sent a letter to her, informing her of the supposed transfer; but as she had left the country, and had also left instructions to send letters to her broker, it is needless to say that she never got the letter, and she swore that she never had notice of the matter until September, when she was at Dresden. She at once returned to England, and communicated with the company, who, however, held her responsible for the fraud of her agent, and refused to reinstate her. In the meantime the shares had been resold. She then commenced an action against them; and they applied to this Court to settle the register under the 35th section of the Joint Stock Companies act of 1862, which enacts that if the name of any person shall without sufficient cause be entered or omitted on the register of any company, the person aggrieved, or the company, may by motion in one of the superior Courts apply for an order to settle the register, and the Court, if satisfied of the justice of the case, may order the register to be rectified. In support of the application, the company stated that they had sent the lady notice of the transfer, and she, on the other hand, denied that she had received it, and swore that the transfers were forgeries. There was a precisely similar case as regarded another company. After discussion, the Lord Chief Justice said the question ought to be decided as a special case which could be carried to a court of error. Upon the present application there could be no doubt that the lady was entitled to have her name replaced on the register as the real owner of the shares, leaving the question as between the company and the purchasers to be determined on another proceeding. All that they held was that the lady was entitled to have her name replaced upon the register as the real owner of these shares.

☞ The Harrisonburg (Va.) *Register* says that there is no doubt of the speedy completion of the Manassas Gap Railroad to Harrisonburg. The iron necessary for the track has been procured, and money sufficient for the purpose is at the command of the directors. It is expected that it will be commenced at once, and pushed forward with energy.

New Orleans and Ohio Railroad.

A New Orleans journal says that a contract has been concluded by this company with experienced and highly respectable parties, of ample means, for the construction of a railroad from the town of Mayfield, Graves County, Ky., direct to Jackson, Tenn. The new association are to build the road from Mayfield to Jackson, equip and have the same running within two years from this date, and finish the New Orleans and Ohio Railroad to the river from the present depot; and in consideration of doing all as above stated, the new association are to have the right to run their trains over that part of the road from Paducah to Mayfield for twenty years. The distance from Paducah to Jackson is 105 miles. At Jackson the connection is made with the Central road of Mississippi, and passengers and freight will pass between New Orleans and Paducah without change of cars. It will be a direct route, and in connection with the contemplated railroad from Vincennes to Paducah this route will be the grand trunk line between the Northwestern and Western States and the city of New Orleans. It will be the shortest route to Chicago or Cincinnati and to the East.

Bridge over the Ohio at Louisville.

The Louisville *Democrat* says that the contractors have about forty men employed in getting ready for the heavy mason work on the abutments of the bridge. The beds of two of the piers have been excavated, one or two derricks put up and a railroad track for the handling of rock has been laid. A steamboat load of derricks and machinery of all kinds has been brought round from Johnsonville, on the Tennessee, where the present contractors have been building a bridge. We understand that the work is to be pushed forward energetically towards completion. The track from the Nashville road is being laid down to the river, for the purpose of bringing the stone for the abutments, piers, &c. It is already quarried and awaiting shipment, at a point on the Lebanon branch of the Louisville and Nashville railroad.

Monongahela Valley Railroad.

A meeting of the friends of this proposed road was held in Pittsburg on the 27th ult. A resolution was adopted authorizing the appointment of a corps of engineers to survey the Saw Mill Valley route, and the work will be commenced immediately. A resolution was also adopted providing for the holding of a general meeting of the friends of the enterprise at Library, Allegheny county, on the 10th inst. The interest manifested in this enterprise by persons residing along the line of the proposed routes is most encouraging, and those who are taking a lead in the matter express themselves as confident of bringing the movement to a successful conclusion.

☞ The report of a survey a railroad between Nashville and Knoxville has just been published in detail. The projected line is 190 miles long, and runs on a natural route along the Western slope of the Cumberland Mountains. The estimate of the total cost of construction is $6,240,844, which is $36,744 per mile. The deepest grade is 90 feet.

☞ Trains have commenced running regularly over the Lehigh and Susquehanna Railroad between Mauch Chunk and Providence.

Railways in Buenos Ayers.

A survey by the government engineers has just been concluded of the route of a railway from Cordoba to Salta, a distance of seven hundred miles. It is for the same company (English) which has one hundred and thirty miles of a railway from Rossario toward Cordoba. The report represents the proposed line as nearly level, requiring no heavy work of any kind. It penetrates deposits of pure salt in exhaustless quantities, and affords an outlet for copper mines that rival in richness those of Lake Superior. It is the intention of this company to extend their road as rapidly as possible. They have the most liberal concessions from government, including free admission of all materials, freedom from taxes, and a strip of six miles in width of land the whole route. William Wheelwright, Esq., the originator of this great railroad enterprise, a native of Newburyport, Massachusetts, has just been appointed United States consul at Rossario.

Iowa Central Railroad.

The Vinton (Iowa) *Eagle* says that work is being pushed with great energy on the lower division of this road, running from Oskaloosa to the State line, 61 miles. It is all under contract and all being worked; 25 miles of the grading now being completed, and the whole 61 miles will be finished by September 1st. The engineer corps has completed the survey in Powesheik county, and are now making estimates of the different lines run, and as soon as these are completed the road will be located through Benton county, thus completing the location of the whole line from Cedar Falls to the State line, 151 miles. Near one-third of the line is now graded, and the remainder will be put under contract as fast as money can be furnished. About 100 miles will be completed by fall, leaving the balance to be completed the coming year. The grading through Black Hawk will receive the finishing touches after havest.

Kansas Pacific Railroad.

The Atchison *Champion* says that the long-vexed question of the central branch of the Union Pacific road is at last settled, at least so far as the first hundred miles is concerned, and settled, too, as it ought to be. The road will follow the original line selected by the chief of engineers four years ago, and will cross the Big Blue river at Ewing, thence follow a nearly due west course up the valley of Game Fork to the summit, between the Big Blue and Republican rivers, to the hundred mile post, which falls within a beautiful section of land granted to the road by act of Congress.

☞ The Indianapolis *Journal* says that Col. S. C. Wilson has succeeded in letting the contract for the completion of the Indianapolis, Crawfordsville and Danville Railroad to the latter city in Illinois. The contract is let to wealthy and responsible railroad men of the East, and a survey of the route will be made in a few weeks, and work will commence in August or September.

☞ It is proposed to construct a railroad from Natchez, Miss., to some point on the N. O. and Jackson Railroad. A convention is to be held at Natchez on the 20th inst. to determine the exact route. If built directly east, the distance would be about fifty miles.

Lake Ontario Shore Railroad.

The Board of Trade of Oswego some weeks ago appointed a committee to examine the subject of a Lake Shore Road between Oswego and Niagara river, and to report to the board the result of such investigation. As a connecting link in the communication between the great west and the cities of New York, Boston and Portland upon the Atlantic seaboard, this question has become one much importance. The project heretofore has encountered an objection in the lack of suitable railroad connection from Oswego eastward to tide-water. This is now removed. By a contract recently perfected between the Oswego and Syracuse, the Syracuse and Binghamton, and the New York and Erie roads, the former is to make its gauge, by a third rail, the same as the other two; and the New York and Erie is to transport through freight from Bimghamton to New York on terms which have been satisfactorily arranged. The work under this contract is now in active progress. On the 15th July a report was presented by a committee of the board of trade, expressing confidence that the proposed line will form part of a route from Detroit to New York city, for both freight and travel, at least equal to any other, and so far as all Northern New York and New England are concerned, a route with which no other can successfully compete. The committee, therefore, recommend that a company should be organized at once for the prosecution of the work. No effort should be spared to promote better facilities for a communication between New York and the great west.—*Journal of Commerce.*

A Railway Novelty.

A Russian engineer exhibits at the Paris Exposition a railway invention which attracts considerable curiosity. The object is to save the power gained in a descent, now lost in the friction of the brakes, with wear and tear, and use it in an ascent. To do this the engineer has attached to the locomotive two very heavy fly wheels. Going down hill they act as a brake, and the force they gather will carry the train up an equal rise, less the friction. Here a model train loaded with water runs down a sharp incline, the water runs off, and the force of the fly-wheel carries the train back to the place of starting. In this way a short railway, taking coal down an incline, from the pit-mouth for example, could be worked without any power but that gained by each descent of the train.

Interest and Dividends.

The New York Central R. R. Co. have declared a semi-annual dividend of three per cent., payable, free from tax, on the 20th inst., at the Albany City Bank, and at the office of Duncan, Sherman & Co., N. Y.

The Northern Central Railway Co. have declared a quarterly dividend of two per cent., clear of National and State taxes, payable on the 22d inst., at Philadelphia and Baltimore.

The Morris Canal and Banking Co., has declared a dividend of five per cent. on its preferred stock, payable in Philadelphia and Jersey City, on the 6th inst.

☞ The survey of the Cedar Rapids and Burlington Railroad is nearly completed from the latter city to Wapello, in Louisa County. The *Hawk Eye* states that the route will be at once located and the contract let.

☞ The railroad bridge of the Nashville and Northwestern Railroad Co., at Johnsonville, across the Tennessee River, is finished, and only five miles of the track laying is now required to complete the road.

New York and Flushing Railroad.

This road having recently passed into the hands of Mr. Oliver Charlick, it is said that several much-needed improvements are about to be made. Much of the rolling stock has already been renewed, and several of the locomotives are to be replaced by machines of greater power and speed; the entire track, from Hunter's Point to the terminus of the road at Flushing, is to be relaid, and the trestle work along the route to be rebuilt. Beside the present trestle work, 1,000 feet additional are to be constructed. Included in the purchase is about 1,200 feet of water front on Newtown Creek, about 500 feet of water front on the East River, and about thirty acres of the Calvary Cemetery property.

☞ It is stated that a number of gentlemen representing the wealth and influence of Westchester County, having obtained a charter from the last Legislature of this State, are about to construct a railroad from Harlem River to Byram River at Portchester. Preparations of an active character are now being made to carry out the plan. A route has already been surveyed, and it is expected that operations will be commenced on the road at an early day.

☞ The force along the line of the Port Huron and Lake Michigan Railroad is being largely increased, and the grading is to be pushed forward with the greatest despatch possible, and it is now the design to have the cars run to Lapeer and probably to Flint before January next. Mr. John Palmer, the chief engineer, has charge of the work.

CIVIL AND MINING ENGINEERING at the Rensselaer Polytechnic Institute, Troy, N. Y. Instruction very thorough. Graduates obtain most desirable positions Reopens Sept. 11th. For the Annual Register, containing full information, apply to

PLASTIC SLATE ROOFING
JOINT STOCK COMPANY.
OFFICE 157 (Room 19) BROADWAY,
NEW YORK.

W. C. POTTER, Vice Pres't.
J. M. ALLEN, Sec. and Treas. LICENSES GRANTED.

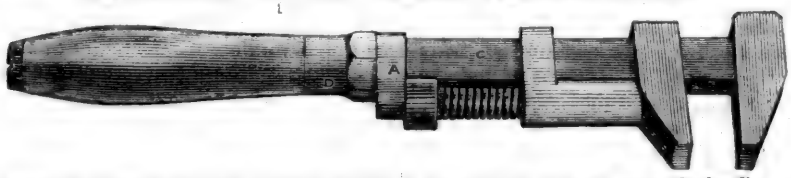
PLASTIC SLATE
FOR
Roofing & Other Purposes.

The process of reconstructing Slate Stone from a disintegrated state was
PATENTED FEBRUARY 21st, 1865.
It is a combination of
Pulverized Slate and Viscous Matter,
(the latter possessing qualities of geological and chemical affinity for the former,) and is a development of one of the simple but unalterable tendencies of nature.
As a Roofing Material it Stands Unrivalled.
A mastic—it adapts itself to every shape and slope. Non-combustible, impervious, non-expansive, and undecaying.
Frost does not Crack nor Heat Dissolve it.
The only roofing material ever discovered that will resist the action of the elements as long as the structure it protects. Being susceptible of little, if any wear, from exposure, and
Perfectly Fire-Proof,
It is unequalled as a coating for Railroad and Farm Buildings, Fences, Bridges, bottoms of Vessels, Vaults, etc.

MEAD RUBBER COMPANY,

12 Vesey Street, New York.

MANUFACTURERS OF



INDIA RUBBER CAR SPRINGS AND STEAM PACKING.

Our Works being now under the management of a competent Superintendent, we are prepared to offer Springs of various qualities and prices to suit. Our A No. 1 Spring made of fine Para Rubber, and the Compound used by the Patentee, the late Fowler M. Ray, will be found to be cheaper than others made, from inferior stock and offered at lower prices.

Sample setts forwarded on application. All Springs fully warranted.

COLLINS & CO.'S NEW PATENT SCREW WRENCH.

THE STRONGEST AND MOST DURABLE WRENCH IN MARKET.

All Consumers have noticed that their wrenches first fail by reason of the forcing back of the handle, and by the springing of the bar. Our improvement remedies both these defects, the bars being finished wider than any other wrench in market, and the handle cannot be displaced, as all strain on it is prevented by the screw thimble, D, (see cut.) Already adopted as *the best* by the principal railroads and machine shops, and for sale by Hardware dealers generally. Address

COLLINS & CO., 212 Water Street, New York.

Star Metal Company,

SOLE MANUFACTURERS

OF THE

"STAR METAL" Railway Journal Bearing.

OFFICE,

55 Liberty Street,

NEW YORK.

FOUNDRIES,

Plymouth St., Brooklyn,

21 South Canal St., Chicago,

Point St. Charles, Montreal.

FOR SALE 3 LOCOMOTIVES, 4-81-2 GAUGE,

All thoroughly REBUILT by one of the best makers in the country, and ready for immediate use.

1—Cylinders 14x22, Link Motion, 4-56 in. Drivers connected, Copper Flues, Weight about 24 tons; 8 wheeled Tender, 1800 gallons.

This Engine has always worked admirably; Steams freely with dry or green wood, works and wears perfectly smooth; Well springed and brassed all around. Proportions every way suited to power. A good and stylish model, all in excellent order.

2—Cylinders 15x20, Link Motion, 4-56 in. Drivers connected, Copper Flues, weight about 23 tons, 8 wheeled tender, 1,800 gallons.

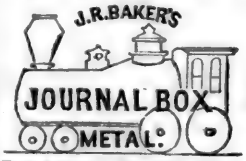
Is a smart smooth working Engine, suitable for any work; has a good record throughout.

3—Cylinders 15x20 Hook Motion, 4-66 in. Drivers connected, Copper Flues, weight about 24 tons; Tender, 8 wheeled.

Every way perfectly sound, well brassed and springed up. All in fine working condition.

These Engines will be sold VERY CHEAP to close a transaction, and are GREAT BARGAINS to any company wanting this sized Engine.

KASSON & CO.,



62 Broadway, New York

JAMES CLAYTON'S Patent Steam Pump and Steam Engine Combined. These Pumps contain every desirable quality in a Steam Pump, they are made of the best materials and in the best manner, and are the most reliable and cheapest Steam Pumps in the market and are especially suitable for railroad stations, &c. Please send for Circular.

NEW YORK, June 21, 1867.

AT A MEETING OF THE BOARD OF DIRECTORS of this Company, held this day, it was

Resolved, That a DIVIDEND of FIVE PER CENT. in cash, free of Government tax, be paid on the 1st of August next to the holders of the full paid shares registered on the 20th of July inst., and that the transfer books be closed on the said 20th day of July, and opened on the 5th day of August.

6t26 THOMAS E. WALKER, Treasurer.

RICHARD B. OSBORNE, CIVIL ENGINEER,

No. 219 South 4th St., Philadelphia,

Where Plans and Estimates of Work will be promptly attended to

Barometrical reconnoissance for Railway lines, Location and Construction of Railroads, and all duties required on Public Works in any State of the Union performed with fidelity.

THE UNION PACIFIC RAILROAD CO.

Are now constructing a Railroad from

OMAHA, NEBRASKA,

westward towards the Pacific Ocean, making with its connections an unbroken line

ACROSS THE CONTINENT.

The Company now offer a limited amount of their

FIRST MORTGAGE BONDS

having thirty years to run, and bearing annual interest payable on the first day of January and July, in the City of New York, at the rate of

SIX PER CENT. IN GOLD,

AT

Ninety Cents on the Dollar.

This road was completed from Omaha 305 miles west on the 1st of January, 1867, and is fully equipped, and trains are regularly running over it. The Company has now on hand sufficient iron, ties, etc., to finish the remaining portion to the eastern base of the Rocky Mountains, 212 miles, which is under contract to be done September 1st of this year, and it is expected that the entire road will be in running order from Omaha to its western connection with the Central Pacific, now being rapidly built eastward from Sacramento, Cal., during 1870.

Means of the Company.

Estimating the distance to be built by the Union Pacific to be 1,565 miles, the United States Government issues it Six per cent. Thirty-year Bonds to the Company as the road is finished at the average rate of about $28,350 per mile amounting to $44,308,000.

The Company is also permitted to issue its own First Mortgage Bonds to an equal amount, and at the same time, which BY SPECIAL ACT OF CONGRESS ARE MADE A FIRST MORTGAGE ON THE ENTIRE LINE, the bonds of the United States *being subordinate to them.*

The Government makes a donation of 12,800 acres of land to the mile, amounting to 20,032,000 acres, estimated to be worth $30,000,000, making the total resources, exclusive of he capital, $118,416,000; but the full value of the lands cannot now be realized.

The authorized Capital Stock of the Company is one hundred million dollars of which five millions have already been paid in, and of which it is not supposed that more than twenty-five millions at most will be required.

The cost of the road is estimated by competent engineers to be about one hundred million dollars, exclusive of equipment.

Prospects for Business.

The railroad connection between Omaha and the East is now complete, and the earnings of the Union Pacific on the sections already finished for the month of May were $361,782. These sectional earnings as the road progresses will much more than pay the interest on the Company's bonds, and the through business over the only line of railroad between the Atlantic and Pacific must be immense.

Value and Security of the Bonds.

The Company respectfully submit, that the above statement of facts fully demonstrates the security of their Bonds, and as additional proof they would suggest that the Bonds now offered are less than ten million dollars on 517 miles of road, on which over twenty million dollars have already been expended;—on 330 miles of this road the cars are now running, and the remaining 187 miles are nearly completed.

At the present rate of premium on gold these bonds pay an annual interest on the present cost of

Nine Per Cent.,

and it is believed that on the completion of the road, like the Government Bonds, they will go above par. The Company intend to sell but a limited amount at the present low rate and retain the right to advance the price at their option.

Subscriptions will be received in New York by the CONTINENTAL NATIONAL BANK, No. 7 Nassau St., CLARK, DODGE & Co., BANKERS, 51 Wall St., JOHN J. CISCO & SON, BANKERS, No. 33 Wall St., and by BANKS AND BANKERS generally throughout the United States, of whom maps and descriptive pamphlets may be obtained. They will also be sent by mail from the Company's Office, No. 20 Nassau Street, New York, on application. Subscribers will select their own Agents in whom they have confidence, who alone will be responsible to them for the safe delivery of the bonds.

JOHN J. CISCO, *Treasurer,*

NEW YORK.

THE ELNATHAN SAMPSON

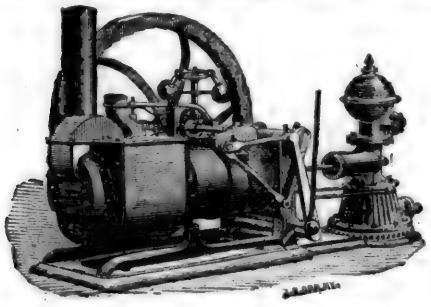
NEW AND IMPROVED

RAILROAD CAR WHEEL.

PATENTED, MAY 7, 1867.

This Car Wheel contains a lateral and conical Tread combined with the guiding flang, and being so constructed as to move the truck and cars over and past any curve in the Railway track with as much ease and freedom as though the entire Road were constructed upon an air line. The cone tread will take the track rail, against which the wheel seems to be pressed, while passing any curve, and the diameter increasing, of course the circumference increases, and therefore the greater distance over the outer rail will be gained without any sliding of the wheels upon the track or undue strain upon the car axle, journal boxes or bearings, truck frame, car wheels, or other parts of the running gear of the cars or of locomotive engine. The hitherto great amount of friction caused by the use of the usual or old car wheels upon long trains of passenger, or heavy freight trains is avoided or prevented, of course there will therefore be a great saving in the use of oil. There is much less wear of the track rail, and the lateral thrusts of cars against the track rails being done away with by the new wheel, there is much less liability to displacement of the rails, or of the loosening of the spike by which the rails are fastened.

This wheel will cost no more to manufacture than the old wheel, while it is certain that a much better and more reliable chill of the tread portion of the wheel is had than by the old way of casting wheels. This wheel can be put upon the old axles and trucks of Railroad Cars—there being nothing required to be new save the wheel.



Rights to Manufacture this Car Wheel can be had upon the most liberal terms of the owners of the Patent, ELNATHAN SAMPSON, EDWIN CHAMBERLIN and MARCUS P. NORTON, of the City of Troy, N. Y.

Several Licenses have already been granted for the manufacture of this Car Wheel.

The owners of this Patent have appointed, as a matter of convenience, EDWIN CHAMBERLIN, Troy, N. Y., Corresponding Secretary, to whom all communications for information should be addressed, which will receive prompt attention.

ERICSSON

Caloric Pumping Engines.

FOR economy, durability, and efficiency unequalled. Have been in use on the Erie, Central, Hudson River, Harlem and other roads for eight years. Recommended by all Superintendents in the highest terms.

Hazleton & Black Creek Region	180,671	239,067
Buck Mountain Mines	38,044	24,486
Wyoming Region	86,197	126,576
Mahanoy Region	18,096	73,604
Sundry operations	7,016	13,406
Total (tons of 2,240 lbs.)	888,874	1,066,303

—showing a gain in 1866, of 177,518 tons over the shipments in 1865, equal to 20 per cent. on the business of that year.

The first shipment of coal was made in 1865, on the 3d April, and in 1866, on the 2d March. Navigation closed in the years respectively, on the 9th and 1st December—the seasons having been of nearly equal duration. In the first named year obstructions to business occurred on account of a strike of the miners and laborers, lasting from Jan. 1, ten weeks, and the Delaware Division Canal was impassable for nearly two months, (July 16, to September 9.) In 1866 several serious interruptions occurred. Half of May was lost by a strike among the miners, and nearly half of July by a similar strike among the coal passers at and above Mauch Chunk; and navigation was suspended a few days in September by an accident to the canal bank at Freemansburg.

The coal going down the canal distributed itself as follows:

	1865.	1866.
Consumed on the line	82,235	68,555
Passed into the Morris Canal	217,813	205,351
" " Del. Div. Canal.	588,736	792,397
Total (tons of 2,240 lbs.)	888,784	1,066,303

The coal that went into the Delaware Division Canal was disposed of as follows:

	1865.	1866.
Consumed on the line of the canal	28,930	44,329
Passed into the Del. and Raritan Feeder	399,067	526,245
Passed through canal to Bristol.	160,739	221,823
Total (tons of 2,240 lbs.)	538,736	792,397

Of the coal that entered the feeder of the Delaware and Raritan Canal in 1865, 41,191 tons passed out at Bordentown, this having been the only way for boats to reach Philadelphia, during the suspension of navigation on the Delaware Division Canal below the outlet lock. No such interruption having taken place in 1866 accounts for the increased business on this canal in that year.

The production of coal from the company's mines for the two years 1865 and 1866, compares as follows:

Mined on Company's account:	1865.	1866.
Panther Creek, Summit and Old Tunnel Mines	408,172	408,243
Mined under leases from Co.:		
Room Run Mines	79,753	86,132
Tamaqua "	19,535	.....
Greenwood "	6,022	32,969
Old Heaps at Slope No. 2	3,543	1,475
Total (tons of 2,240 lbs.)	517,025	528,819

Both years were signalized by strikes among the miners and coal passers—in 1865, from Jan. 1, to March 10, and in 1866, during half of May and July. But for these the yield in the years respectively, would have been considerably in excess of all previous seasons.

The total business on the Lehigh Canal in 1866, is shown in the following statement:

Articles.		Ascend'g.	Descend'g.	Total.
Coal	tons.	3,466	1,066,919	1,070,385
Grain	"	1,332	.....	1,332

Inc. 1866 over 1865		59,011	184,857	243,868

—the increase being nearly 20 per cent. over the business of 1865.

The business of the Lehigh and Susquehanna Railroad has had a very prosperous year. The amount of coal transported over the road from the foot of the planes (Wilkesbarre) to White Haven, was 328,393 tons, against 251,966 tons in 1865. Between Penn Haven and Coal Port (as it is proposed to call the site of the new pockets at the head of the navigation,) there were transported 405,705 tons, against 202,895 tons in 1865. This part of the road, however, was not in operation during the Spring months of 1865. The whole tonnage of the Lehigh and Susquehanna Railroad going both ways, was 642,307 tons in 1866, against 357,781 tons in 1865, an increase of over 79 per cent. The details are as follows:

Articles.		Going North.	Going South.	Total.
Coal	tons.	25,568	591,927	617,495
Hay and straw	"	9	.....	9
Lumber	"	5,366	15,758	21,124

Other stone, plas-				

ter, &c.	"	500	.....	500
Iron	"	2,184	381	2,565
Merchandize	"	178	197	375
Total 1866		34,040	608,267	642,307
Total 1865		90,234	267,547	357,781
Increase 1866		....	340,720	284,526
Decrease 1866		56,194	.....	.....

The coal carried north was transported from the foot of the planes to the Wyoming Canal. Of the coal carried south 328,374 (in 1865, 81,184) tons were from the Wyoming Region, and 263,553 (in 1865, 121,712) tons from the Hazleton Railroad. The number of passengers carried over the road in 1865 and 1866, compares as follows:

	Through.	Way.	Total.
1866	29,721	9,803	39,524
1865	23,882	2,451	26,333
Increase 1866	5,839	7,352	13,191

The Board expressed the hope in their last annual report that we should have a road of our own in operation, this year, between White Haven and Penn Haven, so as to give us an uninterrupted railroad communication under our own control, between the Wyoming Valley and the head of navigation on the Lehigh. This hope has been realized. The link of road in question, 16 miles in length, was so far finished that an engine and train of cars passed over it on the last day of 1866, and it is now in active operation; but during the whole of last year, our only connection between White Haven and Penn Haven was over the Lehigh Valley Railroad.

The profits of the business of 1866, though not so large as those of previous years, will probably be deemed satisfactory, nevertheless, considering the reduced rates of transportation which prevailed during the year, and the excessively low prices at which coal was sold during the latter part of the season, and also, the fact that, notwithstanding the great progress made, as we shall presently show, in the construction of our new railroads, we had in operation, during the year, only that portion lying between Wilkesbarre and White Haven, which, on account of the intermediate mountain to be overcome, must always remain the least profitable part of the whole line, and the six mile division between Penn Haven and the head of navigation too short to work to advantage by itself. But little, comparatively, could be expected from these disjointed sections, which we had to operate as best we could, with the Lehigh Valley Railroad intervening between them.

The gross profits and expenses for the two years 1865 and 1866, are exhibited in the following statement:

	1865.	1866.
Water and ground rents	$11,789 15	$7,759 76
Profits on town lots sold	.....	15,199 30
Profits on coal, incl. mine rents	584,748 33	237,685 76
Tolls on navigation, less collection exp.	612,803 21	548,303 76
Tolls and transportation on railroad, incl. car service	170,796 95	141,838 24
Profits from Delaware Canal	.....	80,027 00
Total gross receipts	$1,380,137 54	$1,030,814 45
Add balance from previous year	2,983,243 08	3,502,854 08
Total resources	$4,363,373 62	$4,533,668 53
Total disbursements	860,519 54	1,141,966 84
Balance to next year	$3,502,854 08	$3,391,701 69

The following shows the disbursements in greater detail:

	1865.	1866.
Cost of repairs and improvements of the navigation	$74,694 17	$83,102 90
Future renewal of pockets at Turnhole	30,940 77	.....
U. S. tax on surplus profits, 5 p.c. of previous year	48,219 79	25,980 90
U. S. tax on $1,803,000 scrip, converted into stock by decree of Supreme Court, March, 1864	.....	90,150 00
Dividend and tax, May	225,418 42	320,615 79
Dividend and tax, Nov.	268,634 21	322,631 58
State tax on capital	23,467 50	15,229 25
State tax on gross receipts	.....	7,367 17
Balance of interest account	189,144 68	276,889 25
Total disbursements	$860,519 54	$1,141,966 84

The negotiation with the Delaware Division Canal Company for a lease of their canal, as reported to the stockholders at their last annual meeting, was consummated by the execution, on the 20th of August last, of a contract, in writing, between the two companies, bearing that date, and embodying all the features approved at that meeting by the stockholders. As the season was already well advanced before all the details of this important agreement were finally settled, the Delaware Division Canal Company continued to manage the work until the end of the season, and accounted to this company for the net proceeds. The profits for the season, after charging a whole year's rent, amounted to the sum of $80,027 63, as already mentioned in connexion with the general profits for the year.
